PROCEEDINGS AND DEBATES OF THE *101st* CONGRESS, SECOND SESSION

## HOUSE OF REPRESENTATIVES—*Wednesday, May 16, 1990*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Give us, O God, the spiritual maturity to recognize our weaknesses, the honesty to see our own faults, and the integrity to admit that we are not always the people You would have us be. We realize that it is easier to see the sins of someone else and to miss the selfishness in our own hearts. May Your grace, O God, so enlighten our very souls that we may seek Your forgiveness and thus be renewed in mind and spirit. This is our earnest prayer. Amen.

### THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. SLAUGHTER of Virginia. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. SLAUGHTER of Virginia. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 267, nays 113, not voting 52, as follows:

[Roll No. 109]

□ 1022

Mr. BOSCO changed his vote from "nay" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

## PERSONAL EXPLANATION

Mr. GILMAN. Mr. Speaker, this morning I was unavoidably detained away from the Capitol while participating in a seminar in Arlie, VA. Unfortunately, I was not present to vote on rollcall No. 109, regarding the Speaker's approval of the Journal. Had I been present, I would have voted "yea."

## PERSONAL EXPLANATION

Mr. ACKERMAN. Mr. Speaker, it has come to my attention that I was recorded as not voting when, in fact, I was present and voting in the Chamber.

I was marked as "not voting" on the Speaker's approval of the Journal—presumably rollcall No. 109. I was present, I did insert my voting card, and I did vote "yea." My votes apparently were not recorded due to a malfunction of the voting system.

## PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentlewoman from Maryland [Mrs. MORELLA] please come forward and lead the House in the Pledge of Allegiance.

Mrs. MORELLA led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

## REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 2584

Mr. QUILLEN. Mr. Speaker, I ask unanimous consent to have my name removed as a cosponsor of the bill, H.R. 2584.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

## THE BUDGET SUMMIT

(Mrs. BOXER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BOXER. Mr. Speaker, the administration has called a budget summit due to a weakening economy which is leading to greater deficits. They say the assumptions used for unemployment, interest rates and inflation have changed for the worse, so rather than go back to submit a new budget President Bush has summoned the elders to a private summit.

But what about the American people? Do they not have a right to know what is going on in the economy? Our chairman of the Budget Committee, the gentleman from California [Mr. PANETTA] asked Richard Darman, OMB Director, to come before the Budget Committee and the American people to detail the changes in the economy that are leading to this private summit. Darman will only come to a private meeting which he will do this afternoon with the Budget Committee.

But why not a public meeting, I ask? Could it be that Mr. Darman is embarrassed about the illogical assumptions he put before the Congress just a few months ago, or could it be he does not want to talk about the savings and loan mess or the billions in interest on the national debt which buys nothing but a credit crunch?

Mr. Speaker, if we are in such bad straits I think Mr. Darman ought to come forward in public. The American people ought to hear, and let us get on with fixing the crisis.

## REPORT ON ANTI-DRUG-ABUSE EFFORTS IN EDUCATION

(Mr. LEWIS of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS of Florida. Mr. Speaker, last Wednesday the Secretary of Education reported to the Select Drug Committee about anti-drug-abuse efforts in our education system.

The report was good. A model drug prevention curriculum for grades K-12 is soon to be released and interagency coordination has increased.

However, I am here today to discuss another issue of importance.

Schools, colleges and universities that have not implemented drug prevention programs and policies by October 1 will lose all Federal funds.

I repeat, all Federal funds.

It is the kind of get-tough attitude we have needed for a long time, but we must do everything we can to get the word out to our schools to put these important programs in place so our children do not pay such an expensive price.

The Department of Education is getting the word out. I am telling all my schools. I urge you to do the same. Let our children know about the devastation of drugs before they use them.

## WHAT HAS CHANGED IN OUR ECONOMY?

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, a question for the Bush administration: What has changed? They say there is economic trouble ahead and we need a summit on the deficit, and when we have asked what trouble, what has changed, we are told by the administration, "Well, we'll tell you, but in secret, behind closed doors."

How about whispering this fiscal policy secret to the American people? We can handle it. What has changed? What is different?

Do Members know what I think? I think it is a softening economy and an exploding, expanding savings and loan scandal, and means potential, very troublesome expanding Federal deficits.

But why not share this with the American people? Adlai Stevenson said trust the American people, trust the American people with the facts, trust the American people to make the right decisions.

Share the secret with us, Mr. President, so we can make the right decisions about America's future.

## THE IMPORTANCE OF BIPARTISANSHIP TO ENACT COMPREHENSIVE CAMPAIGN FINANCE REFORM

(Mrs. MORELLA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MORELLA. Mr. Speaker, as Congress begins debating comprehensive campaign finance reform, I rise today to stress the importance of bipartisanship to achieve this significant goal.

To be successful, we must not act in the interest of our parties, but in the best interest of our country and our democratic process. Only then can we act decisively to enact the legislative changes needed to ensure greater public participation, to reduce the influence of special interests upon incumbents and challengers for office, and to increase the competitiveness of our elections. We need negotiations and actions, not partisan posturing to counteract the prevailing public belief that excessive campaign contributions may be corrupting our election and legislative process.

Criticism of our present system of congressional elections has been bipartisan. The public's eroding faith in Congress has been bipartisan. The solution to these problems should, therefore, also be bipartisan.

Mr. Speaker, let us now act with foresight, so that we can enact reforms in this Congress. I urge my colleagues to improve the confidence of the American people in this institution, and rekindle the spirit of comity which has carried us through this session, by engaging in serious bipartisan negotiations to construct comprehensive campaign finance reform legislation.

□ 1030

## WHAT ARE THE INTENTIONS OF THE ADMINISTRATION AT THE SUMMIT?

(Mr. TORRICELLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TORRICELLI. Mr. Speaker, the first summit has ended. Having reviewed the comments offered by members of the administration, nothing appears clearer to me now than before it began. This it would appear is a summit without substance.

What circumstances are there that have called the administration to bring together this extraordinary meeting? What is it that happened with our economy and our budget? Mostly, what ideas do they propose to bring forward?

Nothing is clearer now than it was before. Indeed Mr. Darman, the Director of the OMB, has refused to come to the Budget Committee before the American people and give any explanation about why the President's previous assumptions are wrong or what it is he intends to do.

Mr. Speaker, summits have their value but they are not an excuse to avoid accountability or to have failed to answer the American people about the state of our economy or our budget.

## LET US PASS AID FOR PANAMA-NICARAGUA TODAY

(Mr. BARTON of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARTON of Texas. Mr. Speaker, on December 20 American forces liberated Panama. Twenty-three Americans lost their lives making the supreme sacrifice for this effort.

On January 4 a congressional delegation headed by the majority leader of the House of Representatives went to Panama and promised quick aid.

On February 6 the President requested $500 million for Panama. On March 13 the President requested $300 million for Nicaragua. On March 27, H.R. 4404 was reported by the Committee on Appropriations. On April 3 H.R. 4404 passed the House.

On April 24, H.R. 4404 was reported by the Senate Appropriations Committee. On May 1, H.R. 4404 passed the Senate. On May 3, H.R. 4404 was sent to conference. The House adopted the Conte motion to instruct the conferees to agree to census, food stamps, and veterans' amendments and to insist against any non-dire-emergency items by a vote of 388 to 8.

On May 9 the conferees met. They adjourned subject to the call of the Chair. Mr. Speaker, the conferees are scheduled to meet this afternoon at 3 p.m. It is time to pass this aid for Panama-Nicaragua or stay here until we get it done.

## CRIME PAYS UNLESS WE PAY TO STOP IT

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANNUNZIO. Mr. Speaker, you have to spend money to make money. Nowhere is this truer than in the savings and loan crisis. The crooks who saddled us with this debt are getting away because the administration refuses to spend the money to catch them and recover the money.

The crooks who plundered the savings and loan industry are enjoying their gains and laughing at the taxpayers.

More than 21,000 criminal referrals involving financial institutions have been made, but the Justice Department is actively pursuing only about 6 percent of them. Nearly 20,000 crooks will apparently get to keep and enjoy their thefts. Yet the administration opposes appropriating $25 million of the $75 million authorized by the thrift bill to prosecute bank fraud and recover the stolen loot.

We are facing a possible bailout expense of $500 billion. How can the administration claim that the additional $25 million is not needed, when nearly 20,000 criminal referrals will not be investigated? The administration's enthusiasm for prosecuting these crooks lasted only as long as it was front-page news.

Let us appropriate the additional $25 million and go after the savings and loan crooks.

## BALANCED-BUDGET AMENDMENT SHOULD BE ON TABLE

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Mr. Speaker, the budget summit has begun because we have not been able to come to terms on our own about the deficit which is consuming us from within. The interest on our debt alone is almost beyond comprehension. The cash outlay for the interest in fiscal 1990 is $175 billion, but if you read the fine print and include all interest, including interest for off-budget obligations, the figure would be in excess of $240 billion or more than we shall pay for Social Security. Everything is supposed to be on the table.

Well, is it? Nobody wants to mention taxes; the President is waiting for suggestions from Congress, and the majority is gleefully waiting for the President to impale himself on the T word.

There is a crisis; and it is time we need to face up to it. We need to do one of two things: Either freeze all spending at last year's levels, or increase taxes—but couple this with a constitutional amendment to balance the budget or a line-item veto.

I favor and again am advocating a budget freeze—everyone easily could realize the fairness of this—everyone would tighten their belts together.

But if we cannot do this—we must pass an amendment to force the issue—Americans work until May 5 for tax freedom day. We cannot push this date into July while we increase spending for everybody's pet project. It is time to bite the budget bullet.

## THE SECRET IS OUT OF THE BAG—LAST YEAR'S DEFICIT OVER $200 BILLION

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, the big secret is out of the bag. Richard Darman said last year's deficit will be over $200 billion.

Now what a surprise. Even the bag ladies knew that in January.

Ladies and gentlemen, America is going bankrupt and it is not hard to figure out. We borrow $200 billion a year and then we take that borrowed money from the rich countries and give it away in the form of foreign aid to the so-called poor countries.

But that does not just take the cake: We then borrow hundreds of billions of dollars from the rich countries and then we take that borrowed money and then we defend those same rich countries that lend us the borrowed money in the first place.

Now figure it out: Americans are living on borrowed time. Maybe Mr. Darman's plan is to take the debts off budget.

Ladies and gentlemen, I say that America does not need a tax increase; America needs some common sense. The tragedy is we do not even spend this borrowed money to help the people in our own country who are now living on borrowed money.

## LET US NOT LEAVE HERE UNTIL WE PROVIDE THAT BRIDGE LOAN FOR NICARAGUA

(Mr. DOUGLAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOUGLAS. Mr. Speaker, I just came from a meeting 45 minutes ago with Secretary Eagleburger of the Department of State who read a letter from Mrs. Chamorro, the newly elected President of Nicaragua, in which she said her country is bankrupt, liter-

ally out of money, unable to bring in food, fertilizer for the farmers, seeds so they can grow their crops.

Now the Democratic side of the aisle fought Contra aid and said the real answer is free elections in Nicaragua. They got it.

Their President said there were free and fair elections there. Now they are going to starve the people of Nicaragua for voting wrong. That is an outrage.

The people of Nicaragua deserve to eat. The farmers deserve to grow their crops and we should have voted a month ago on that aid package and gotten it to the White House for signature.

The President wanted it by April 15. This is May 16. If we have any compassion for people, children, women who are at home trying to eat in a country that has been destroyed and looted by a Communist government, let us put it on the line, let us vote today and let us not leave here until we provide that bridge loan for Nicaragua.

□ 1040

## ABOLISH DRAFT REGISTRATION

(Mr. DEFAZIO asked and was given permission to address the House for 1 minute.)

Mr. DEFAZIO. Mr. Speaker, draft registration is a symbol that has outlived its usefulness. President Carter announced the resumption of a draft registration in response to the Soviet invasion of Afghanistan, and President Reagan supported it following the crackdown on Solidarity. The Soviets have left Afghanistan, and Solidarity now runs the Polish Government.

The Pentagon is furiously planning for reductions in force in a belated reaction to a changed world order. So why are we still paying $26.3 million a year to plan for a massive mobilization that will not happen? The fact is, draft registration has nothing to do with military readiness. If there were a true national emergency, draft registration would not put a single soldier on the front line 1 hour earlier.

Mr. Speaker, registration for the draft is a $26.3 million symbol that we do not need, we cannot afford. Let Members end the permanent authorization for registration for the draft, and reduce the real threat to America's security—the deficit.

## CONGRESS SHOULD BE EMBARRASSED

(Mr. GUNDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUNDERSON. Mr. Speaker, the Congress of the United States ought to be embarrassed. The Congress of the United States ought to be embarrassed. The people of Nicaragua vote for democracy and the Congress of the United States tries to kill it. The Congress of the United States ought to be embarrassed. The people of Nicaragua vote for democracy and the Congress tries to kill it.

Way back in March, the President asked for $300 million in emergency economic aid. Why? Because the Sandinistas looted government property before they left office. They granted huge pay raises to their Sandinista bureaucracy before they left office, and they passed lameduck laws aimed at preventing the new government from trimming the bloated bureaucracy. They put the country into bankruptcy. The democracy has asked for our help. The President has asked for help, and the Congress has not responded.

The Congress of the United States ought to be embarrassed. The people of Nicaragua voted for democracy and we are trying to kill it. The Congress ought to be embarrassed.

## THE DEFICIT IS WORST TAX OF ALL

(Mr. MOODY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOODY. Mr. Speaker, all this talk about who wants new taxes, Democrats or Republicans, misses the essential point. With the economy faltering and the administration's earlier rosy projections failing, either revenues rise or deficits rise. Take your choice. It is not what anyone, Republicans or Democrats, want to happen. It is what will happen.

So which is worse—a rise in deficit or a rise in taxes? Here, the key is to remember that the deficit is a tax by another name. It is a tax to the monetary system instead of through the fiscal system. Many experts believe that the deficit of the United States causes our interest rates to be about 2 percentage points higher than they would otherwise be. If a person has a $40,000 home mortgage, that is $800 per year tax on your family due to the deficit. If a person has a $10,000 car note, about a $200 tax is due to the deficit. But note, a deficit through the interest rate system is a tax without revenues. It does not help the Government get out of the deficit. So taxophobia is great for colorful political rhetoric like "Read my lips," but fails to reduce the deficit or cut the deficit, and continue to compound the worst tax of all—the deficit.

## AID TO NICARAGUA NOW

(Mrs. JOHNSON of Connecticut asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. JOHNSON of Connecticut. Mr. Speaker, why are we willing to humiliate our allies? Why are we willing to humiliate our friends? Why are we willing to hold the hopes of a war-weary people hostage to narrow partisan politics here in the House? Why are we willing to disgrace our President by not allowing him to fulfill a promise we have all said we stood behind, of a mere $300 million in bridge aid to Nicaragua, so a new democracy can turn the fortunes of that war-torn nation and can provide the peace and economic opportunity that we know those people so desperately want.

Why are we willing to disgrace our own leadership? After all, the gentleman from Missouri [Mr. GEPHARDT] and the gentleman from Georgia [Mr. GINGRICH] promised speedy action a couple of months ago when they were down there, face to face. Why do we humiliate our friends when we could break loose that aid tonight?

## MYSTERY SURROUNDS 1985 GANDER PLANE CRASH

(Mr. TALLON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TALLON. Mr. Speaker, I rise today with a sense of sadness and disbelief with yet another example of how our government agencies want to continue to hide the truth about the 1985 Gander plane crash which killed 248 of our elite soldiers of the 101st Airborne Division.

Last week, customs officials seized personal papers of Arif Durrani, a convicted arms dealer, who is in prison for his role in selling weapons to Iran.

In the search warrant, customs cited and then seized documents of concern to the press and investigative persons who have been working with me and who interviewed Durrani concerning his knowledge of the Gander crash.

Mr. Speaker, I cannot help but suspect that the Customs Service, the administration, as well as other government agencies are very anxious to find out what the press knows, what Durrani knows, and what I know about the mystery surrounding the Gander crash.

## TRANSPORTATION EMPLOYEE ALCOHOL AND DRUG TESTING ACT OF 1990

(Mr. COUGHLIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COUGHLIN. Mr. Speaker, I am delighted to be joined today by my colleague and friend, Mr. HUGHES, to introduce critically important legislation

requiring mandatory drug and alcohol testing of transportation professionals.

The Transportation Employee Alcohol and Drug Testing Act of 1990 will require testing for drug and alcohol use by the operators of aircraft, railroads, commercial motor vehicles, and mass transportation vehicles. It protects the rights of those tested by incorporating guidelines established by the Department of Health and Human Service [HHS] on laboratory accuracy, as well as protections for individual privacy.

In 1988, the Department of Transportation [DOT] issued rules—most of which became effective last December—to require drug testing of nearly 4 million transportation workers. While this is certainly a step in the right direction, our legislation will provide the DOT with the statutory authority necessary to prevent court challenges. It will also require the DOT to supplement their program with requirements for alcohol testing.

The evidence of drug and alcohol use in the transportation industry is overwhelming. In January 1987, a crash between a Conrail freight train and an Amtrak passenger train at Chase, MD resulted in 16 fatalities and 170 injuries.

The Conrail train's engineer and brakeman subsequently testified that they had been smoking marijuana in the cab prior to the fatal accident. Since this tragedy, there has been an average of one railroad accident every 10 days involving drugs or alcohol.

In March, a Southeast Pennsylvania Transportation Authority [SEPTA] train crashed killing three people and injuring 94. Transit authorities subsequently announced that one of the motormen on the subway train tested positive for cocaine use.

A Northwest Airlines crew was recently arrested for operating a jetliner with 91 passengers on board while under the influence of alcohol. All three pilots were found to have blood alcohol levels above Federal Aviation Administration [FAA] limits. Fortunately, the aircraft landed without incident.

In February, the National Transportation Safety Board [NTSB] announced the results of a 1 year study of fatal truck crashes in eight States. The NTSB found that 33 percent of the truck drivers who were killed in these crashes were drug or alcohol impaired.

These threats to public safety are why the Supreme Court has found testing programs to be within the limits of the Constitution—both Federal Railroad Administration post-accident testing of railway workers and U.S. Customs Service drug testing requirements for employees seeking promotions. Moreover, the court has let stand several appeals court rulings allowing random tests for those in safety-related positions.

The fact is that large numbers of transportation employees work in an environment with little, if any, direct supervision. A strong deterrent, such as the threat of being detected and sanctioned for drug and alcohol use is, therefore, a necessity.

We rely upon the vigilance of trained employees to remain alert to occurrences that might endanger our safety. Those who drink alcohol or use illegal drugs simply have no business holding a sensitive travel or public-safety job through which they assume responsibility for innocent lives.

Mr. Speaker, the presence of alcohol and illegal drug use in the transportation industry poses far too serious a threat to ignore. Drug and alcohol testing is the only method we have to reasonably ensure that transportation professionals will not use drugs or alcohol.

The fact is that random testing works. Since the Department of Defense instituted random testing, drug use has dropped from 27.6 percent in 1980 to 4.8 percent in 1988. The Coast Guard started random testing in 1983 and has seen a drop in drug use from 10.3 percent to 2.8 percent in 1988.

Further, the public supports testing. A recent Gallup Poll found that 80 percent of all Americans surveyed favored testing of those in public safety positions. Moreover, our bill will require rehabilitation programs that give employees the opportunity to come forward and get help before they are identified through testing as a drug or alcohol abuser.

While our legislation is substantially the same as S. 561, introduced by my colleagues, Senators HOLLINGS and DANFORTH, it goes beyond this Senate bill by including Urban Mass Transit systems. The Hollings/Danforth legislation has passed the Senate nine times since it was first introduced in 1987.

Mr. Speaker, the need for this legislation is obvious and the time for action is now. Enactment of this legislation will strengthen efforts already underway in the transportation industry. The potential for disaster created by those who abuse alcohol and illegal drugs while employed in safety sensitive transportation positions mandates that we do everything we can to eliminate the cause of the threat. I urge my colleagues to consider the importance of this issue and join us in this bipartisan effort.

## PRELIMINARY ACID RAIN STUDY COMPLETED

(Mr. APPLEGATE asked and was given permission to address the House for 1 minute.)

Mr. APPLEGATE. Mr. Speaker, the $600 million acid rain study is not officially out until September. But here are the preliminary results. This 10-year study, which was supported by the environmentalists in 1980, now opposes it, because it does not say what they wanted it to say. If Congress disregards this, then they are throwing $600 million of your good, hard-earned tax money down the tube. This cockamamy idea that the sky is falling is nothing but hogwash, and here is what it says right here, if Members take a look. "Worst fears on acid rain are unfounded." And the study finds no environmental crisis.

Yes, there is a problem, but not to the degree that it should cause taxpayers 750,000 jobs, which is what the Carnegie-Mellon University says. Consider your vote. We need a workable solution to this, but do not destroy an economy because of bad faith.

## THE ROLE OF CONSTITUENCY IN LOCAL POLITICS

(Mr. SHAW asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHAW. Mr. Speaker, what has traditionally made America unique and truly democratic is grassroots involvement in politics. It is local politics that creates an aware and informed citizenry. What we are witnessing now, however, is a crisis in local politics. Campaigns are relying less on volunteer organizations from their constituency, and more on national media consultants.

We must again localize congressional elections. We must again provide an elections process that truly represents the will of the people. We must serve and be beholden to our constituents, as the Founding Fathers intended. As a major step in this direction, we should require Members to raise at least a majority of their campaign funds from individuals in their home district.

Unless we encourage constituent participation in campaign finance, we are saying to the American people that special interest money from Washington, not local participation, counts most in elections for Congress.

Mr. Speaker, to preserve the great American tradition of local involvement in politics, we must increase the role of constitutents in campaign finance.

□ 1050

## THE HEALTH INSURANCE COUNSELING AND ASSISTANCE ACT

(Mr. PRICE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PRICE. Mr. Speaker, I am pleased to be introducing today, along

with my colleagues, JIM MOODY and MARILYN LLOYD, the Health Insurance Counseling and Assistance Act. I believe this bill will help senior citizens make the best and most cost-effective decisions about their health insurance needs.

The Health Insurance Counseling and Assistance Act will provide grants to the States for the establishment or improvement of programs providing one-on-one health insurance assistance and counseling to the elderly.

This bill is needed because there is currently widespread confusion about what exactly Medicare covers. For instance, a recent study by AARP discovered that more than one-third of older Americans believe that Medicare will cover long-term nursing home expenses. Counseling programs can correct such misconceptions by offering independent, objective information about the Medicare program and its benefits.

Misinformation about Medicare contributes to a second problem: duplicative purchasing. Many Medicare beneficiaries purchase policies that cover benefits already provided for by Medicare or purchase duplicative or unneeded policies to fill in the gap between Medicare coverage and their health needs. Unfortunately, we have all heard too many stories about high-pressure sales tactics causing Medicare recipients to purchase policies that they do not need.

Counseling has proven to be a cost-effective way to inform seniors and prevent multiple coverage under Medigap policies. For instance, in Maryland, as a result of counseling, a woman with duplicative coverage was advised to drop one policy, resulting in savings of $2,000. And in Idaho, counseling program volunteers referred a man with duplicative policies to the insurance commissioner's investigative office, whose efforts resulted in a refund of $11,000 to the man. Unfortunately, not all States have these programs in place.

I must note that we have a very effective program in North Carolina run by Insurance Commissioner Jim Long. The Seniors Health Insurance Information Program [SHIIP] trains volunteers to help senior citizens review policies and to answer their questions about their rights and the insurance agent's responsibilities in marketing health care policies.

I am enthused about this bill because it can help the North Carolina program expand its reach and help other States to join this effort. The bill includes specific language to encourage States with existing programs to offer more health insurance information services, experiment with new methods of outreach and expand programs to geographic areas currently underserved.

We all know that most people—particularly retirees—feel vulnerable because of the cost of health care and insurance in this country. While this legislation does not begin to address all these problems, it does take a solid step to ensure that consumers have adequate and accurate information when they make decisions about health care insurance policies. I hope my colleagues will join us in this effort.

## A PLEA FOR AID TO CENTRAL AMERICAN NATIONS

(Mr. KYL asked and was given permission to address the House for 1 minute, and revise and extend his remarks.)

Mr. KYL. Mr. Speaker, we are all heartened by the events in Eastern Europe where democracy has seemed to break out, and we want to assist those people to begin to develop their economies and further guarantee freedoms for their people. Then why are we turning our backs on the people in our own hemisphere, the people in Panama and in Nicaragua?

It was February 6 when the President sent to us his aid request for the people in Nicaragua and Panama. Our soldiers helped the Panamanians gain their freedom from the grip of the pressure that Manuel Noriega has held them in, and our country backed the process that led to democracy in Nicaragua. Why are we turning our backs on these people now?

Surely it is not because the Congress does not support democracy in this hemisphere. Surely it is not because the Congress wants to go back on the commitments we have made. Surely it is not because the Congress wants to embarrass President Bush. His policies in Panama and Nicaragua have been supported in the Congress. Surely it is not because we are too busy with other things. We could do this in just a matter of minutes. We could do it right now. As my colleague previously said, Congress ought to be embarrassed. America is embarrassed.

Mr. Speaker, let us get the President's request for aid acted on before we go home for the Memorial Day recess. Not to do so is to turn our backs on democracy in this hemisphere.

## A TRIBUTE TO MS. HATTIE FRANKLIN

(Mr. FLAKE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FLAKE. Mr. Speaker, today I would like to rise in recognition of Ms. Hattie Franklin. Ms. Franklin is a constituent in my district, as well as a close friend.

Ms. Franklin's dedication and spirit of volunteerism has reached and positively impacted thousands of upper elementary, middle, and high school students in my district. These students have had the opportunity to learn the curriculum of the We The People Bicentennial Program. These materials introduced the students to the Founders of our country, historical background of the Philadelphia Convention, and the issues and philosophies that shaped the writing of our Constitution. Students learn how our Government is organized and how it protects the rights and liberties of all citizens. Students learn of the responsibilities which accompany the rights of citizenship in a democracy. We cannot expect students to be appreciative of democracy unless they learn what democracy entails and of the price that our ancestors paid to obtain democracy. This lesson is especially important and relative to their lives as people throughout the world are struggling and dying for an opportunity too participate in a democracy.

Creative and pertinent lessons are imperative in peaking student's interests in learning and this program has been a success in this effort. The Sixth District of New York and I personally thank Ms. Franklin for her initiative to share herself with our children. Ms. Franklin is a true inspiration to our community.

## COMMEMORATING ASIAN-PACIFIC AMERICAN HERITAGE MONTH

(Mr. FALEOMAVAEGA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FALEOMAVAEGA. Mr. Speaker, I was privileged to have been able to attend a special ceremony this past Monday, May 7, 1990, at the White House where the President signed an official proclamation to proclaim this month as Asian-Pacific American Heritage Month, a special tribute to all Americans who are of Asian-Pacific heritage descent.

Mr. Speaker, I hope you will join hands in celebrating this historical event. As Asian-Pacific Americans, we have a key role to play in helping America maintain its world leadership into the Pacific century, otherwise known as the next American century.

The Federal Asian-Pacific American Council is an interagency group organized to provide a focus for Asian-Pacific American activities within the Federal Government. The Council, through its interagency membership, is responsible for spearheading training awareness of the impact of Asian and Pacific cultures, work ethics, and behavior as related to employment in the Federal work force.

Over the past 5 years, the ability of the Council to plan, coordinate, and implement successfully, ambitious activities—including the first 1986 national training conference and the 1987 and 1989 recognition luncheons for Asian-Pacific Americans holding senior military, public health, civil, and foreign service executive positions—is attributed to, first, the enthusiasm and dedication of Council members and, second, their overwhelming agency support. I can state with confidence that both are essential to the Council's continued success.

Asian-Pacific Americans bring to the national workplace a diversity of cultural perspectives and work ethics; however, they are often misinterpreted which results in barriers to communication, productivity, and advancement.

In an effort to overcome these barriers, I am proud to announce the Council's sponsorship of the third national Federal Asian-Pacific American heritage training conference. The conference will be held in Bethesda, MD, May 30 through June 1, 1990.

Mr. Speaker, I would call upon my esteemed colleagues to commend the Federal Asian-Pacific American Council for their past accomplishments, their efforts to enhance educational and employment opportunities for Asian-Pacific Americans, and to actively support their endeavors.

## EARNINGS TEST

(Mr. JAMES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JAMES. Mr. Speaker, I just returned from a rally that was held on the steps of the Capitol to raise awareness for a very large inequity that currently exists for retirees. I am speaking of the unfair and inequitable Social Security earnings test. Not only is this elderly tax discriminatory against our senior citizens, but also hurts America as well. By applying effective tax rates of over 50 percent on meager salaries earned by the working elderly, the Federal Government effectively holds many retirees in poverty. Just as badly, America loses valuable skills and extra tax revenue by forcing its most experienced workers into a life of inactivity.

The solution is to repeal the earnings test and allow retirees to work for an honest dollar. I want to urge all of you here who have not already cosponsored H.R. 2460 to do so now. The retirees in your district are waiting.

## HOPE LOOMS FOR DISABLED AMERICANS

(Mr. BENNETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BENNETT. Mr. Speaker, 26 years ago, Congress enacted the historic Civil Rights Act of 1964. This sweeping legislation bars discrimination on the basis of race, color, religion, sex, or national origin. Unfortunately, the largest minority group in America, people with disabilities, were excluded from the act.

Today, thanks to the leadership of STENY HOYER, GUS HAWKINS, JOHN DINGELL, JACK BROOKS, GLENN ANDERSON, our former colleague, Tony Coehlo, and others, we have the opportunity to extend the same basic civil rights that other members of our country enjoy, to our Nation's forgotten minority, the handicapped.

All too often in our society people who do not have a disability tend to ignore the needs of their disabled brethren. They look past them, or through them. They become irritated because the disabled cannot move as fast as they do. They grow impatient when asked to hold the door for an extra second or two.

Many people look at me, observe me walking with two canes, and attribute my gait, and my hesitancy, to old age. Sometimes I wish that were true and wish that the freedom and joy of running through a park, or playing touch football with children, was not taken from me in my youth. But, as fate would have it, that was not what was in store for my life. As a young man fighting in the Philippines during World War II, I contracted polio. Doctors at first said I may never walk again, but 2 years later, with the assistance of canes like these, I was able to walk, and with these canes I have walked every step of the past 42 years.

However, do not mistake my candor for bitterness—I have no bitterness. I have been blessed in many, many ways. I have a beautiful and loving wife. I have three beautiful children. I have been able to touch the lives of untold thousands of men and women and feel that in some small way I have made their life a better one.

And I am just one person with a disability. There are thousands of disabled Americans like myself who dedicate their lives to helping others. But what if we had not been given an opportunity because of our disability? What if roadblocks had been put up everywhere, what if we were denied access? Many of the 43 million Americans with disabilities face a lifetime of roadblocks, or hurdles they must overcome. For many disabled Americans the hurdles are too high to jump over, the doors are too narrow, or shut in their faces.

The Americans With Disabilities Act removes the hurdles and opens the door—the door to opportunity. Reflect, if you will, on the number of eminently qualified men and women who are disabled. Reflect on the vast contributions these men and women have had on our quality of life. With that type of reflection, I believe you would agree with me that we can ill-afford not to open our arms and embrace disabled Americans. We disabled can contribute. The Americans With Disabilities Act gives disabled Americans those same opportunities and privileges enjoyed by the rest of society. It does nothing more, and should not do anything less.

I urge you to support passage of this deserving legislation.

## AMERICANS WITH DISABILITIES ACT

(Mr. DUNCAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DUNCAN. Mr. Speaker, when we take up the Americans With Disabilities Act, we should help the disabled but not harm small business in the process. To encourage compliance with the requirements of the new law, a tax credit for small businesses must be provided.

A bipartisan bill to provide a tax credit to small businesses has been introduced and enjoys the support of 186 cosponsors. H.R. 3500, the Small Business Access Improvement Act of 1989, would provide a tax credit for some of the businesses that will be forced by the courts to spend money because of the ADA.

Mr. Speaker, this tax credit is not just a good idea, it is essential. The Rules Committee should allow for the full House to vote on the tax credit. If the rule on the ADA does not allow for a vote on a tax credit for small business, we should oppose the rule and encourage our colleagues to do likewise.

Times may be good for the big guys, Mr. Speaker, the New York Stock Exchange companies, but thousands, maybe even hundreds of thousands of small businesses are struggling. I hope we will not hurt them further by any bills or legislation we pass here in the Congress.

□ 1100

## IN SUPPORT OF AMERICANS WITH DISABILITIES ACT

(Mr. SCHEUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHEUER. Mr. Speaker, I would like to salute my colleague, the gentleman from Florida [Mr. BENNETT] for his moving and touching words about the potential for service of people with disabilities.

I, too, suffered from polio that I contracted in 1948 just after my military

service. Doctors told my wife at that time, we were on our honeymoon, that I would never sit up in a chair unless I was strapped up. I made a remarkable recovery, thanks to God, not due to any particular efforts or talents on my own, because the gentleman from Florida [Mr. BENNETT] will attest, I think, that all the people who were afflicted with polio at that time wanted to get better, wanted to have productive lives, wanted to express themselves, wanted to exercise their talents. Some of us were lucky and some of us were not.

But I think this bill is a hallmark piece of legislation that will encourage the integration of people with disabilities into the mainstream of American life.

I congratulate my colleague, the gentleman from Florida [Mr. BENNETT] for his remarks, and I hope it will have smooth sailing through the House.

## CONGRESS DENIES NEEDED HELP TO CENTRAL AMERICA

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, when Congress knowingly denies emerging democracies the help they need in order to just survive, Congress is being destructively irresponsible. That is precisely the situation with regard to Panama and Nicaragua. For weeks this Congress has ignored the pleas of President Bush and the pleas of the democratically elected Presidents of those two Central American countries for the help that they need in order to just survive.

We must act. Democracy could be lost because Congress is playing politics with the help that everyone can see is needed.

## DEMOCRATS WANT TO RAISE TAXES

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Mr. Speaker, Democrats want to raise America's taxes.

Let me repeat that again. Democrats want to raise America's taxes. Over the past 10 years on average, revenues to the Treasury have been increased $56 billion a year. That is $560 billion in new revenues over the past 10 years; but Democrats who control Congress have been spending more and more each year on pork barrel projects and new spending programs.

The President does not spend money, the taxpayers' dollars, Congress does. Congress has control of the purse, so do not try to hoodwink the American people.

Democrats do not want to cut spending. Democrats want to spend more and Democrats want to raise America's taxes.

Now, in 1982 we passed the Tax Reform Act, and the agreement was that for every $1 in new taxes they would cut spending by $3. They not only did not cut the spending, they spent the $1 in new taxes and that will happen again. We must not raise taxes. We must cut spending.

## AID FOR CENTRAL AMERICA—DRUG LORDS STILL SLAUGHTERING PEOPLE

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute.)

Mr. DORNAN of California. Mr. Speaker, I want to add my voice to the chorus of voices this morning asking the leadership on the other side of the aisle and the moderate wing of their party to get busy and send this money down to Central America. I do not know what the obsession is with Central America, and most of the Democrats in this House being driven by a small band of radical liberals, that no matter how history takes its course toward democracy in Central America, they want to sock it to Honduras, sock it to El Salvador, screw up Nicaragua yet, cut off Panama even in spite of the fact that almost 30 Americans gave their lives down there trying to win freedom.

Mr. Speaker, I came to the floor this morning for a different subject. Two nights ago I saw Chuck Norris film, "Delta Force 2," an excellent job of direction by his brother, Aaron, who is a combat veteran of Vietnam.

The one criticism I had of the film I have to eat today. I thought that the villain in their film, patterned after Pablo Escabar, of the drug leader, Lederer, was overdone; not when you read this morning's paper, 280 people killed in the last few months in Colombia, 10 car bombings, over 300 bombings in all and 28 people murdered just in the last 72 hours.

Mr. Speaker, the drug lords are still slaughtering people, trying to send a message to us that Americans are going to get drugs no matter what we do in this Congress.

## SUPPORT BILL TO REPEAL EARNINGS LIMIT ON SOCIAL SECURITY

(Mr. HANCOCK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HANCOCK. Mr. Speaker, it is time to repeal the limit on the amount our senior citizens can earn to supplement their Social Security. As of today, there are no more excuses.

A majority of House Members—220—have now cosponsored Congressman HASTERT's bill to repeal the earnings limit. It is wrong to hold up this bill when a majority of the Members support repeal of the earnings limit now.

The evidence from the economists is also now in. There is clearly no truth to the claim that repeal of the earnings limit will lose Government revenue. The facts clearly show, instead, that Government will receive a net increase in revenue from the economic activity spurred by repeal of the earnings limit.

Yes, there are no more excuses. The time to relieve our senior citizens and free them to earn a living without penalty is now. A majority of House Members supports it. Government revenues would be increased in the long run. And our senior citizens deserve to be treated fairly.

There is no reason why we should not repeal the earnings limit this year. It is the right thing to do.

## PROVIDING FOR CONSIDERATION OF H.R. 4151, HUMAN SERVICES REAUTHORIZATION ACT OF 1990

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 392 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 392

*Resolved*, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4151) to authorize appropriations for fiscal years 1991 through 1994 to carry out the Head Start Act, the Follow Through Act, the Community Services Block Grant Act, and the Low-Income Home Energy Assistance Act of 1981, and the Low-Income Home Energy Assistance Act of 1981, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and the amendment made in order by this resolution and which shall not exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Education and Labor printed in the bill as an original bill for the purpose of amendment under the five-minute rule, by title instead of by section and each title shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of clause 7 of rule XVI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may

demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore (Mr. DURBIN). The gentleman from Ohio [Mr. HALL] is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from California [Mr. PASHAYAN] for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 392 is an open rule providing for the consideration of H.R. 4151, the Human Services Reauthorization Act of 1990. The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor.

The rule also makes in order the Education and Labor Committee amendment in the nature of a substitute now printed in the bill as an original text for the purpose of amendment under the 5-minute rule, amendable by title instead of by section. Each title shall be considered as having been read.

The rule also waives all points of order against the substitute for failure to comply with the provisions of clause 7 of rule XVI. Mr. Speaker, this is a technical waiver of germaneness which is necessary to allow the Education and Labor Committee amendments to be added to the original bill as it was introduced.

Finally, the rule provides for one motion to recommit, with or without instructions.

Mr. Speaker, H.R. 4151 reauthorizes for several important educational and social programs. It is appropriate that we consider this measure today since we are celebrating the 25th anniversary of the Head Start Program this week. This is an excellent program which has helped 11 million poor children since its inception in 1965.

I, personally, have visited Head Start programs in my district of Dayton, OH, and am well aware of the excellent range of services. These children are getting comprehensive education, health, and social services which will make a difference in their lives. It is cost-effective in the long run for us to invest in our children when they are young.

This bill authorizes funds for several other worthwhile programs including Follow Through, State Dependent Care Development Grants, the Community Services Block Grant, and the Community Food and Nutrition Program. As chairman of the House Select Committee on Hunger, I am pleased to see Federal funds going for nutrition education and hunger prevention to complement the other needed poverty programs.

Mr. Speaker, H.R. 4151 is the result of the hearings and careful consultations. I am pleased that we have an open rule, and I urge my colleagues to adopt it.

□ 1110

Mr. PASHAYAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 392 makes in order for consideration H.R. 4151, Human Services Reauthorization Act of 1990, under an open rule, with 1 hour of general debate. The rule makes in order the Education and Labor Committee's amendment in the nature of a substitute now printed in the bill as original text to be considered by titles, each title considered as read. Mr. Speaker, this rule waives clause 7, rule XVI, which prohibits nongermane amendments, against the substitute only. And finally, Mr. Speaker, House Resolution 392 makes in order one motion to recommit with or without instructions.

The bill made in order by this rule reauthorizes funding for important human-service programs, such as Head Start, Follow Through, Community Service Block Grants, State Dependent Care Development Grants, the Community Food and Nutrition Program, the Child Care Development Associate Scholarship Assistance Program, and the Demonstration Partnership Agreements.

Mr. Speaker, I support this open rule and urge my colleagues to do the same, so that the House can proceed and debate the provisions of this important legislation.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HALL of Ohio. Mr. Speaker, I yield 8 minutes to the gentleman from New York [Mr. SCHEUER].

Mr. SCHEUER. Mr. Speaker, today is a day I have waited for for 25 years. When I first came to Congress in 1965, I was fortunate to be assigned to the Committee on Education and Labor and it was my pride and joy to work as my first major project in the Congress on the Elementary and Secondary Education Act of 1965, which included the Head Start Program, which has since become the jewel in the crown of the antipoverty program.

Mr. Speaker, it is an enriched Head Start Program that is the subject of the amendment sponsored by the Committee on Education and Labor under the leadership of the distinguished gentleman from Michigan [Mr. KILDEE] that I wish to address my remarks to.

I want to pay tribute to the gentleman from Michigan [Mr. KILDEE] for his superb leadership efforts and his unrelenting determination to see Head Start become a reality for every American child. That has really been the driving force in bringing this legislation to the floor today.

Mr. Speaker, not since the GI bill of rights has there been a Government program providing such a rich return. Of the $7 billion in the GI bill spent on college and graduate school, the ratio of benefits to costs per dollar was a minimum of 5 to 1 and a maximum of 12.5 to 1. This means that for every Government dollar spent, the Nation received from $5 to $12.50 in return benefits. And this figure does not include the tax dollars these soldiers-turned-students paid in taxes over their lives. The Head Start Program similarly has an enormous benefit-to-cost ratio.

Over 10 million preschool children have been given the Head Start experience in this country since the program's inception. Studies of the program have revealed remarkable results. Among Head Start graduates, there have been dramatic drops in the need for remedial training, in truancy, in teenage pregnancy, and teenage criminal activity. At the same time, significant gains have been documented in enrollment in Gifted and Talented Programs, scholastic achievement in general, and success in later life.

Head Start is a family program as well as an educational one. It stresses parental involvement, and provides a comprehensive range of services which address not only educational needs and growth, but also social, nutritional, and health needs as well. Head Start students have developed an amazing advantage over their non-Head Start counterparts. The chart that I have brought before you today illustrates the startling evidence that Head Start works. Head Start graduates have a 20 percent better chance of graduating from high school, and are twice as likely to go to college or get jobs than their non-Head Start counterparts. Conversely, Head Start students are much less likely to be arrested or go on welfare.

Mr. Speaker, we are the wealthiest Nation in the world. Yet, up until now, we have refused to make an adequate investment in our country's greatest asset: Our children. How can we be so contemptuous of our own futures? The financial impact of unprepared students entering the job market is staggering. Business coffers are being emptied into remedial training and education for people that were never taught skills as children.

Can we continue to condemn so many disadvantaged youth to futures without hope? The administration proposes a funding level that would provide Head Start to about 20 percent of the young people that need it. Are we to consign the other 80 percent

to failure? But it is not too late for them. My colleagues have a rare opportunity today. By voting for this measure, and fully funding Head Start, we will be investing not only in our children, but in our economy.

For every $1 we spend on Head Start, there is an average return of about $6 in generated revenue. Head Start is the ultimate "bang for the buck" educational program. But it goes further than that. We not only see an economic benefit, but we have a moral imperative to provide a quality education to our youth, and this includes Head Start.

Let us go to the children living on the edge of educational disaster, and fund all young people in need of Head Start training. Since its inception, 11 million children have successfully gone through the Head Start Program.

Mr. Speaker, millions of success stories don't lie. Full funding of Head Start is a necessity we can't afford to pass up. Otherwise, we will end up with a society divided into two structured groups—the haves and have-nots—with have-nots doomed to low or no education and doomed not to receive the benefits and increased productivity that quality education brings.

I do not think we want that kind of a society, Mr. Speaker, either in terms of failing to produce the work force for a productive economy, or moving rapidly toward a two-tiered society of haves and have-nots.

Opponents of this legislation miss the stark reality that we are systematically undereducating millions of young people, many of whom are minorities, and crippling their chances for success in school, at work, as parents and as citizens. Despite the 25-year success of the Head Start enriched preschool program, our society pays for such an indispensable aid to learning for only one out of six impoverished American children at severe educational risk.

This means our society denies more then 80 percent of kids 3, 4, and 5 years old from educationally deprived homes of the basic education skills, nurturing, nutrition and health care that are almost certainly indispensable preconditions to educational success in their elementary and secondary schools, without which these kids are almost doomed to educational failure.

It is a disgrace that so many children from low-income, educationally and culturally deprived families who most need an enriched preschool experience, a disproportionately large share of whom are black and Hispanic, are being denied access to Head Start, at untold cost to the health, vitality and competitiveness of our society.

H.R. 4151 will break this cycle of poverty and low education attainment by authorizing appropriations to allow all eligible 3- and 4-year-olds to participate in Head Start by 1994 along with the 30 percent of eligible 5-year-olds who are not in a public school program. It will also provide funds to improve the quality of Head Start Programs, to improve staff salaries, to upgrade facilities, and to hire additional staff.

As an original cosponsor of this bill, I am very pleased to see it come to the floor this morning.

Mr. President, an important part of the groundwork leading up to passage this morning of H.R. 4151 was laid during more than a dozen hearings on the economic value of education, and early childhood education in particular, conducted during the past few years by the Joint Economic Committee. Many of these hearings were held before the Committee's Subcommittee on Education and Health, which I chair.

During these hearings, an impressive series of corporate chief executive officers from the Fortune 500 group testified passionately about the consensus of business leadership in our country that improving the quality of education for all young people and especially provision of a Head Start experience for deprived minority youth is imperative for our society—a moral challenge to our commitment to education equality and a productive, healthy society.

Mr. Harold McGraw, chairman of McGraw-Hill, Inc., testified that one out of every five workers reads at no more than an eighth grade level, and one out of eight at the fourth grade level, while most of the jobs have considerably higher requirements than that. There are far too many dropouts, who are woefully unprepared to cope, and there are large numbers who finish high school with barely marginal literacy skills. In his testimony, Mr. McGraw said:

> We need to improve the teaching of basic skills in the schools and in particular to reach at an earlier age those children who are at risk for dropping out. And we need to bring parents and children together in literacy and Head Start programs, for most literacy problems have their roots in the home.

Mr. Richard Heckert, chairman of the board of E.I. du Pont de Nemours, Inc., testified that the declining quality of entry-level workers will impair Du Pont's competitiveness in years to come. He said:

> The place to begin improving future competitiveness is in the classroom at the earliest possible point in the education system, teaching clear, two-way communication in standard English and then going on to math and the other disciplines.

Mr. Owen Butler, former chairman of the board of Procter & Gamble Co., testified:

> I am thoroughly convinced that the place where we must change our approach in order to adequately educate those young people is to intervene in early childhood. Many of the high school dropouts, we are convinced, really dropped out in first grade. They cannot compete and nobody likes to do something at which he or she continually loses. The most profitable investment we can make to improve education for that group of children is to intervene early. The evidence, though small, is compelling that the taxpayers' money invested in that kind of early childhood intervention is returned to the taxpayer four times over, plus interest and inflation. There is no better investment in this country.

Other business leaders who testified on the need for early childhood education included Mr. Alan Campbell, vice chairman of the board for ARA Services, Inc.; Mr. Badi Foster, of the Aetna Life & Casualty Co.; Mr. William Wigginhorn, vice president of Motorola Inc.; Mr. James Dezell, of IBM Corp.; Mr. Edward Donley, chairman of the executive committee of Air Products & Chemicals; and Mr. Jack MacAllister, chairman and CEO of U.S. West.

On February 26, 1990, the Subcommittee on Education and Health of the Joint Economic Committee conducted a hearing on The Future of Head Start. The subcommittee heard from six outstanding witnesses, including two eloquent spokesmen for the Nation's business community and four experts on the Head Start Program. The witnesses included Mr. Frank Doyle, senior vice president, General Electric Co.; Mr. William Kolberg, president, National Alliance of Business; Dr. Lynn Kagan, assoc. director, Bush Center for Child Development and Social Policy, Yale University; Dr. David Weikart, president, High/Scope Educational Research Foundation, Ypsilanti, MI; Ms. Patrice Carter, attorney, Raleigh, NC, and a former Head Start participant; and Ms. Sandra Waddell, Head Start director, Beverly, MA.

The witnesses made a number of recommendations during the hearing, and I would like to discuss them briefly here.

Federal spending on Head Start should not be viewed as an expenditure, but as an investment that will have a significant payoff for the Nation in the years ahead.

On this issue, the witnesses testified that spending more for high-quality preschool education today will pay off may times for the Nation and the Nation's businesses in the future by increasing future output and by reducing the economic and social costs that result when large numbers of people cannot read or write or count or are unable to learn.

American businesses currently spend $30 to $40 billion each year on education and training for workers. This is projected to double during the next decade. Mr. Doyle and Mr. Kolberg testified that the positive effect which Head Start has on the effectiveness of

elementary and secondary education for disadvantaged children means that an expanded program would significantly reduce the amount of money businesses must spend on remedial education and thus allow businesses to better target their education and training efforts.

Disadvantaged children who have had a Head Start experience have much lower dropout rates than those who have not. The 700,000 dropouts from each high school class represent, according to Mr. Doyle, a $240 billion economic loss over the course of their lifetimes in the form of wages not earned and taxes not paid. The small investment it would require to fully fund Head Start would thus have a tremendous impact on the Nation's future economic growth simply by reducing the number of youths who drop out of school before earning their high school diploma.

In summary, as Mr. Doyle testified, "investment in education is government at its best and most needed. When it's done right, early investing in education is the best investment of all."

Increased funding for Head Start is an absolutely essential first step in making the United States competitive in world markets.

Major changes are occurring in the American economy that is making Head Start an increasingly important investment for the years ahead. Between now and the year 2000, almost all of the new jobs will require a high school education and most will require a college education. Prospective employees who arrive at the workplace unable to learn and unable to be trained will not find jobs. During the 1970's and 1980's public policy needed to focus on generating jobs for the growing number of people entering the labor force. But labor force growth will be much slower during the 1990's. Public policy must focus on equipping our workers for the millions of new jobs that will be created. As Mr. Doyle testified, our Nation is going to be faced with the tragic situation in coming decades of terrible labor shortages at the same time that may well have rising unemployment.

Unfortunately, we do not have the luxury of time to solve this problem. The globalization of markets and businesses means that employers will take the high-value-added work where there are trained workers; today that not only includes Western Europe and Japan, it also includes the newly industrializing countries of Southeast Asia and Eastern Europe. We are becoming increasingly uncompetitive in the world economy because our workers are not adequately educated.

As Mr. Kolberg testified:

> Head Start is a critical investment in our economic future as we enter a new era of global competition based on technical competence and work force quality. * * * [We must] improve the quality of American public education in order to enhance America's ability to remain competitive and productive in today's world markets.

The President's recommendation to provide $500 million more for Head Start is welcome, but it is only a first step.

According to the 1991 budget, the additional funding proposed for Head Start for fiscal year 1991 will expand the program only to cover 70 percent of eligible 4-year-olds. However, as the rest of this summary explains, much more is needed. To fully fund Head Start, so that it serves all eligible disadvantaged 3-, 4-, and 5-year-olds will require an annual investment of approximately $7 billion. To improve the quality of the program as well may bring the required annual investment up to $10 billion.

Head Start should be available to every eligible disadvantaged 3-, 4-, and 5-year-old.

The Administration's focus on funding Head Start primarily for 4-year-olds derives, according to Dr. Weikart, from a study of the Ypsilanti Perry Preschool project which found that a 2-year program for both 3- and 4-year-olds would be optimal but that if only a 1-year program were available it should be for 4-year-olds. The Perry preschool study thus focused primarily on the benefits of Head Start for 4-year-olds, but it also found substantial benefits for 3-year-olds. Dr. Kagan testified that for certain disadvantaged children, early intervention through a preschool program should begin even before age 3.

Many 5-year-old disadvantaged children would also benefit from continued enrollment in Head Start. Though most States provide kindergarten to 5-year-olds, these programs do not provide the social services and parental involvement that is central to Head Start. As Ms. Waddell testified, "I find that some children need the extra year in Head Start; the parents need the extra year or support in Head Start, and they need more than that 2½ hours in kindergarten." Dr. Kagan testitied, "It's not just children who make the transition from preschool into regular school. Parents do as well, and many parents feel abruptly and artificially cut off from the Head Start home and the Head Start community when the children move on to kindergarten." Head Start should be available to all eligible 3-, 4-, and 5-year-olds if we want to be sure these children are adequately prepared for entrance into the first grade.

Some additional funds should be provided for increasing salaries and benefits of teachers, improving training programs, upgrading facilities, and improving the quality of Head Start Programs.

The witnesses were virtually unanimous in testifying that additional funds should be made available not only to increase enrollments but also to improve the quality of Head Start Programs. Mr. Doyle testified:

> It is important that the additional funds are not solely earmarked to create additional half day program slots for 4-year-olds. Some of these new funds should be constructively spent on increasing salaries and benefits, improving staff training and upgrading facilities. It is imperative that as Head Start is reauthorized and additional money appropriated, that as much emphasis is paid to raising quality as to broadening access.

Dr. Kagan and Ms. Waddell urged that 20 to 30 percent of new funds be earmarked to improve quality. The first priority in their view is additional funds for staff salaries and staff training, to reduce the teacher turnover rate and assure the highest quality education for Head Start participants. Facilities are also becoming an important problem; many school systems and churches have begun reclaiming Head Start space for other educational and social programs. A third priority is additional social service support for parents, many of whom are alone, poorly educated, often homeless and addicted to drugs and alcohol. As Ms. Waddell testified.

> The key to quality is the ability to attract and maintain trained and experienced staff, provide on-going training to staff, establish staffing patterns to meet family needs, ensure transportation systems are updated on a regular basis, and to provide funding so facilities are well-maintained.

Head Start should be fully funded by fiscal year 1994.

The most serious constraint to an expansion of Head Start is the need to train new teachers and find new facilities. Nevertheless, the witnesses urged that Head Start be fully funded as quickly as possible. The fiscal 1991 budget for Head Start should thus include funds not only to expand the program today but also to remove the constraints to full funding by 1994.

Ms. Waddell's statement summarizes the need for full funding as soon as possible: "It is very difficult to have children on a waiting list, knowing they will never have a Head Start experience. Because we know that Head Start benefits children and families, and $1 spent now will save $7 in the future, I urge you to fully fund Head Start."

As Mr. Butler pointed out in his statement to the Subcommittee on Education and Health, investment in education pays a tremendous return to the Nation.

In his February 29, 1990, testimony before the Subcommittee on Education and Health of the Joint Economic Committee, David Weikart, president of the High/Scope Educational Research Foundation, presented detailed

data on the benefits and costs of early preschool programs, based on his 1984 study of the Ypsilanti Perry Preschool Program.

The Perry preschool project is a study begun in 1962, in which 123 black youths from low income families who were at risk of failing in school were divided into two groups at ages 3 to 4 years old—an experimental group which received a high-quality preschool program and a control group that received no program. Information was collected on these children annually from ages 3 to 11, and again at ages 14, 15, 19, and recently at 28.

The study found that, on the whole, early preschool education significantly alters the child's performance later in life. Results at age 19 comparing those who attended preschool and those who did not can be summarized as follows:

In education: Fewer were classified as mentally retarded, 15 percent versus 35 percent. More completed high school, 67 percent versus 49 percent. More attended college or job training programs, 39 percent versus 21 percent.

Concerning work experience: More hold jobs, 50 percent versus 32 percent. More support themselves, 45 percent versus 25 percent. More are satisfied with their jobs, 42 percent versus 26 percent.

In the community: Fewer were arrested for criminal acts, 31 percent versus 51 percent. Lower birthrate, 64 versus 117 per 100 women. Fewer on public assistance, 18 percent versus 32 percent.

The study's benefit/cost analysis of the program show that preschool education is a good investment for taxpayers.

The study found that the cost per participant per program year was about $5,000 in 1981 dollars, properly discounted. This includes costs often overlooked by benefit/cost studies, such as building depreciation, clothing, and volunteer time.

The benefits include a $5,000 savings in compensatory and special education programs per participant, $3,000 in the cost of crime, and $16,000 in welfare savings. In addition, the participants paid approximately $5,000 more in taxes than nonparticipants from their improved lifetime earnings—all figures are properly discounted—for a net benefit of $28,000 per participant.

The benefit/cost ratio was about 6 to 1; that is each $1 invested in preschool programs produced $6 in benefits to society. Since a $5,000 investment would generate $5,000 in additional taxes from participants' improved lifetime earnings, again properly discounted, the program would break even for the Government.

Other studies have also shown a very high return to investment in education. Following the end of World War II, the Federal Government provided $14 billion in education and job training benefits for 7.8 million veterans under the Servicemens' Readjustment Act or, as it was popularly known, the GI bill of rights.

Just over a year ago, the staff of the Joint Economic Committee prepared a benefit/cost analysis of the portion of that total—an estimated $7 billion—that was invested in the 2.2 million GI's who used the funds to attend college or graduate school.

Based on an estimate of the increase in the Nation's total output of goods and services produced by GI bill beneficiaries, this analysis found that the ratio of benefits to costs for the Government's investment in education under the GI bill was a minimum of 5 to 1 and as high as 12.5 to 1. That is, for every dollar the Government invested in education under the GI bill, the Nation received at least $5 in benefits and as much as $12.5 in benefits, properly discounted. These are extraordinarily high ratios of benefits to costs, far above the returns earned by most other forms of investment, either Government or private.

Furthermore, the additional taxes paid by the college-educated veterans during their working lives more than paid for the cost of the program.

Altogether, the extraordinarily high ratio of benefits to costs that this analysis found for the GI bill program suggests that postsecondary education has been, and probably remains, a highly productive form of Government investment for the Nation.

Mr. Speaker, H.R. 4151 is an example of Government investment at its best—investment in children who are in the more risk of education failure and who need the most help in achieving useful and productive lives. This bill will provide extraordinary returns to the American taxpayer and help keep America competitive and vital in the world economy.

Mr. Speaker, I urge my colleagues to observe this moral imperative and to pass this bill.

Mr. HALL of Ohio. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the eyes appeared to have it.

Mr. HALL of Ohio. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore (Mr. DURBIN). Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 408, nays 0, not voting 24, as follows:

□ 1144

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## REMOVAL OF NAME OF MEMBER OF COSPONSOR OF H.R. 3732

Mr. ANDREWS. Mr. Speaker, I ask unanimous consent that the name of the gentlewoman from Kansas [Mrs. MEYERS] be removed as a cosponsor of H.R. 3732.

The SPEAKER pro tempore (Mr. DURBIN). Is there objection to the request of the gentleman from Texas?

There was no objection.

## HUMAN SERVICES REAUTHORIZATION ACT OF 1990

The SPEAKER pro tempore. Pursuant to House Resolution 392 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 4151.

□ 1145

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4151) to authorize appropriations for fiscal years 1991 through 1994 to carry out the Head Start Act, the Follow Through Act, the Community Services Block Grant Act, and the Low-Income Home Energy Assistance Act of 1981, and for other purposes, with Mr. PRICE in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read the first time.

Under the rule the gentleman from Michigan [Mr. KILDEE] will be recognized for 30 minutes, and the gentleman from Pennsylvania [Mr. GOODLING] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Michigan [Mr. KILDEE].

Mr. KILDEE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, it is truly a pleasure to bring to the House floor a strong bipartisan bill to reauthorize several important education and social programs for 4 years.

The Subcommittee on Human Resources has a history of reporting bipartisan bills and H.R. 4151 is one of the most successful efforts.

Its provisions reflect the input of Members on both sides of the aisle.

Mr. TAUKE, Mr. GOODLING, Mr. HAWKINS, and all the Members of the subcommittee, Democrat and Republican, were extremely helpful in developing the bill before us today, and I thank them for the good will they brought to the process.

Mr. Speaker, I also would like to recognize the gentleman from New York, Mr. SCHEUER. He has been at the forefront in support of Head Start since coming to Congress 25 years ago. As a freshman in 1965, Congressman SCHEUER served on the Education and Labor Committee and helped draft the first Head Start bill. He has been a strong supporter of Head Start ever since.

My colleague and I have worked together long and hard to fully fund the Head Start Program. Not long ago, SCHEUER held 9 days of hearings on the education deficit. As Chair of the Joint Economic Committee's Subcommittee on the Health and Education, he documented the troubled times of the educational system, and provided a wealth of information on the economic benefits of an enriched, preschool experience.

He also brought in the CEO's of major Fortune 500 companies, who all testified on the enormous benefit of an early education. The report he created as a result of these hearings is a blueprint for a superior educational system in America.

For 25 years, Representative SCHEUER has been a powerful advocate for children at economic and educational risk. The work we have done together to provide full-funding for Head Start will go a long way toward breaking the cycle of poverty in this generation.

I wish to commend him again for his fine leadership and unremitting efforts on behalf of Head Start and of educational opportuntiy for all Americans.

The Joint Economic Committee's Subcommittee on Education and Health, which he chairs, held a hearing on Head Start earlier this year.

The testimony from that hearing further reinforced the need for many of the amendments included in H.R. 4151.

Before discussing the provisions of H.R. 4151, I would like to note for the record that Mr. TIM JOHNSON of South Dakota is a cosponsor of the bill. It was only by error that his name was omitted.

H.R. 4151 reauthorizes Head Start, the Follow Through Act, the State Dependent Care Development Grants Act, the community services block grant including the Community Food and Nutrition Program and Demonstration partnership agreements addressing the needs of the poor, and the Child Development Associate Scholarship Assistance Act of 1985.

In 1965, President Johnson created Head Start as a pilot program under the Economic Opportunity Act of 1964.

Since then it has provided more than 11 million preschool-aged children from low-income families with comprehensive services to address their educational, social, nutritional, health, and other needs to help them begin school on an equal basis with their more advantaged peers.

Head Start has an impressive record of achievement and a new set of challenges.

H.R. 4151 addresses these challenges by providing authorizations at levels which will enable the program to serve all eligible 3 and 4 year olds, and 30 percent of the 5 year olds.

It would also target a portion of Head Start funds for quality improvement activities including improvements in staff salaries.

□ 1150

Mr. Chairman, in addition to targeting funds for maintaining and improving program quality, H.R. 4151 requires that each grantee be evaluated at least once every 3 years.

To the maximum extent practicable, this monitoring is to be carried out by

Department of Health and Human Services [DHHS] employees who are knowledgeable about Head Start.

HHS personal are to supervise the evaluation at each site and the monitoring devices used to conduct the evaluations are to be as comprehensive as the program performance standards.

Routine and comprehensive evaluations are an important part of ensuring program quality. To maximize the impact of these evaluations, they are to be accompanied by proper technical assistance, training, and support to assist grantees in providing high quality services.

Mr. Chairman, it is very fitting that the Head Start reauthorization be considered this week as Friday, May 18, 1990, marks the 25 anniversary of the Head Start Program.

During all those 25 years, Mr. Chairman, I have served in a legislative body. I have had contact with people who have benefited by this Head Start Program, people who now are approaching 30 years of age and whose lives have literally been turned around and pointed in the right direction, people who are productive citizens, taxpaying citizens, because of Head Start. I met them legislatively as they appeared before our subcommittee hearings, and I have met them in my community and in communities in Iowa, Pennsylvania, California, and throughout his country. This has truly been a success story. It has been a success story that for 25 years has had support on both sides of the aisle.

Mr. Chairman, the Follow Through Program operates in kindergarten through the third grade and is specifically designed to consolidate and build upon the gains that low-income children have made in Head Start.

Both in purpose and in operation, it is unique among Federal education programs.

It is complete, full day educational program providing a wide range of services.

H.R. 4151 would substantially improve the Follow Through Act.

Title II contains amendments which emphasize the provision of direct services, improve the coordination of Follow Through with Head Start and several other education programs, and authorize new program improvement activities.

H.R. 4151 also extends the State Dependent Care Development Grants Act which has been extremely effective in assisting States to expand the availability of before and after school child care and resource and referral programs for families needing these services.

The Community Services Block Grant Program is the only Federal program specifically mandated to provide a range of services having a measurable and potentially major impact on the causes of poverty.

H.R. 4151 contains several amendments to strengthen CSBG and better enable community action agencies [CAAs], which administer the vast majority of its programs, to serve low-income families.

The Child Development Associate Scholarship Assistance Act distributes funds to States to provide scholarships to low-income individuals to cover credentialing costs of the Child Development Associate credential [CDA].

H.R. 4151 removes two barriers to obtaining the CDA credential.

First, it allows States to use up to 20 percent of its grant to assist DCA candidates pay for the training necessary to obtain the CDA credential.

Second, it raises the eligibility level to 125 percent of the lower living standard.

Mr. Chairman, each of the programs in H.R. 4151 enable important services to children and their families.

I urge my colleagues to join me in supporting the reauthorization of these critical programs.

Mr. GOODLING. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise to speak in support of H.R. 4151, the Human Resources Reauthorization Act of 1990. First, let me congratulate Mr. KILDEE, the subcommittee chair, and Mr. TAUKE, the ranking Republican member on the subcommittee, for their fine work in bringing this bill to the floor. Through much discussion and good faith bargaining, they have worked out their differences and arrived at a package that deserves bipartisan support. These two gentlemen have been doing yeomen's work of late with responsibility for this reauthorization and the child care bill as well.

Congratulations are also in order to the majority and minority staff who have worked very hard to improve these programs and smooth out the differences between the Members.

The centerpiece of H.R. 4151 is the Head Start Program. Head Start is the major Federal program designed to help us reach our national goal of preparing all children for school. The President has endorsed Head Start and asked for the single biggest increase, $500 million, in its history.

Mr. Chairman, I want to point out that I have been trying to say to our committee over and over again that we have to stop just saying that if we just had more money and if we served more people, somehow or other we would cure all the ills. This program needed to be improved. It needed to be improved dramatically. This committee, I believe is bringing forth legislation that will do that.

Several amendments to the Head Start Program before us deal strictly with quality and strictly with improvement, and that has to be our theme if we are going to turn things around. All new and current Head Start grantees will have to involve parents in the education program at the site and refer parents to other education activities in the community. In the past what we have done is to say that parents must participate. In many instances, what they needed most of all was an education. This bill is now strengthened to say, yes, they participate, but they participate by becoming better educated so that when these youngsters go home, they can be the reinforcement they will have to be in order to have these young people improve.

Another amendment will require all Head Start grantees to work with the schools that will receive Heat Start "graduates" so that these young children receive a smooth transition and the progress they have made is not lost. Again, unfortunately, we started out with sort of an adversarial relationship many, many years ago. This is working quite well now, and this reauthorization will say positively that they will work very closely together so there is a smooth transition, because we have discovered that unfortunately we have brought these youngsters along well enough in Head Start that by and large they do not qualify for chapter 1, so by the end of the third grade, after having thrown them in this big pool out there to swim or sink, a lot have sunk.

So this legislation will make sure that there is a good transition and that Follow Through will become part of the transition rather than some independent entity out there, because we must follow the youngsters through so that by the end of the third grade they have not lost all they have gained prior to coming into Head Start.

Let me just mention one thing also about the Community Block Grant Program. It reauthorizes the Community Services Block Grant Program. In my congressional district this is an important program. The Community Action Agency in York has done magnificant things to help the disadvantaged. They have just celebrated their 25th anniversary. They have given us 25 years of outstanding services. They have one program which provides day care to young mothers so they can continue their education and obtain the skills they need to be contributing members of society. They also use their services to send a former drug addict out into the schools to try to deal with the children so they can see firsthand someone who has made a mistake, someone who has changed his life, so they can relate to him, where you and I possibly could not do that.

Again, Mr. Chairman, I could not thank the gentleman from Iowa [Mr. TAUKE] and the gentleman from

Michigan [Mr. KILDEE] enough for their efforts to bring this bipartisan bill to us, a bill that deserves the support of all of us.

Mr. Chairman, I reserve the balance of my time.

Mr. KILDEE. Mr. Chairman, I want to thank the gentleman from Pennsylvania [Mr. GOODLING] for his tremendous support for this bill, especially for Head Start. There has been no greater supporter of Head Start in this House than the gentleman from Pennsylvania, and no one understands it better than he. I appreciate his constant support of this legislation.

Mr. Chairman, I yield 5 minutes to the gentleman from Florida [Mr. GIBBONS].

Mr. GIBBONS. Mr. Chairman, I want to thank the gentleman for yielding time to me.

Mr. Chairman, I want to say to the gentleman from Michigan [Mr. KILDEE] and the gentleman from Pennsylvania [Mr. GOODLING] also that I want to congratulate both of them for having brought this very worthwhile program forward in a constructive manner. If I have any criticism, it is a criticism of the Congress on the setting of our priorities. We should be doing much more in this area.

When we first put this program into operation about 25 years ago, we had high hopes that we could cover all the target group of people who were eligible, and we selected this rather small target group to work on because of the lack of resources at that time.

□ 1200

Unfortunately the Korean war came along, or the Vietnamese war came along, and we devoted too much of our resources unproductively to that war, and since that time the cold war has attracted our attention, and all of the resources that we should have been putting into this fine program have been siphoned away.

Mr. Chairman, this group of programs builds better individuals, it builds better families, it builds better communities and a better nation, and all of us know that we have got problems in this Nation, problems that need to be corrected.

We look too often to the quick fix, but we know from bitter experience that there is no quick fix, that we have got to do it the hard, constructive way, through better education, better family building, better community building, and the blocks that are in this program are what make for a better individual, a better community, and a better nation.

So, Mr. Chairman, in this debate today let us decide that this is going to be the last time we go ahead in this manner, that we go ahead much more vigorously in the future now that our priorities have had a chance to change.

I would call my colleagues' attention to the fact that so much more needs to be done in the area of medical care and to the legislation which the gentleman from California [Mr. STARK] has proposed that would begin Medicare-type coverage for individuals at the time of pregnancy and take those dependent people through to the time of life when they should be independent and are able to stand on their own feet. We need that along with this fine set of programs here.

So, Mr. Chairman, I congratulate the committee for its shepherding this program for a long period of time in a constructive manner, for the harmonious relationship that it has developed without partisanship and for the skill and the knowledge that has been built up in this program.

However, Mr. Chairman, I say to my colleagues, "We've had enough experience now. Let's move out in this area far more vigorously than we have in the past."

Mr. Chairman, that is going to require that we redirect our priorities, and we can redirect them. This is a strong economic system that we are working from, and we can collect the revenue that is needed for this kind of very needed program. This is the kind of war on drugs that will be successful. This is the kind of war on poverty that will be successful, and we will build a better nation by doing all of it.

So, on the 25th anniversary of Head Start and the probably less than 25 years on some of the other programs that are included in here, we are building on a good foundation, and let us move ahead.

Mr. Chairman, I am going to vote for this bill. I hope all other Members will vote for it.

Mr. GOODLING. Mr. Chairman, I yield such time as he may consume to the gentleman from Iowa [Mr. TAUKE], the ranking member on the subcommittee, who was very responsible, along with the gentleman from Michigan [Mr. KILDEE], for this legislation.

Mr. TAUKE. Mr. Chairman and members of the committee, the bill that is before us today, the Human Resources Authorization Act of 1990, is the result of months of bipartisan cooperation among the members of the Committee on Education and Labor, and I want to thank the gentleman from Michigan [Mr. KILDEE], the chairman of our subcommittee, for his tireless pursuit of a human resources package that we could all support and champion. And I want to commend his staff and the staff on the minority side of the aisle for their tremendous work in making this a good piece of legislation.

The bill, as my colleagues know, reauthorizes several programs including not just Head Start, but also Follow Through, the Community Services Block Grant [LIHEAP], the State Dependent Care Development Grants and the Child Development Associate Scholarship Assistance Program, and it makes some important policy changes in all those programs.

First, Mr. Chairman, let me take a few moments to address the Head Start Program. Head Start is a wonderful program. We all acknowledge that, and we all support its expansion.

However, Mr. Chairman, it is important at the same time that we acknowledge the wonderful achievements of the Head Start Program, that we recognize, too, that there have been some problems with the Head Start Program. This legislation attempts to address some of the concerns.

First, we have known that we wanted to expand the Head Start Program in order to cover more children. Everybody keeps talking about expanding it, but we also have recognized that, while expansion is necessary, we also had to address quality concerns.

The gentleman from Michigan [Mr. KILDEE] really championed the quality cause. He wanted to insure that we had better salaries for those who were in the Head Start Program, tried to insure that we had a better program, quality program, for those who are participating in Head Start, and, although we had a few rocky moments over the last few months in trying to work out a quality package, I think the bill that we have before us today does insure that we improve the quality of the program that is serving those students who are signed up for Head Start.

At the same time, however, we wanted to expand in order to reach that goal of giving every eligible child access to the Head Start Program. I will say to my colleagues that I am less than comfortable with the expansion of the authorization by over $6 billion. Given our current budget situation, and the deficit and so on, a $6 billion increase in the authorization in just this program was something that I swallow twice when I think about it.

However, Mr. Chairman, I did not oppose this amendment in the subcommittee because I do believe that it is important that we move in the direction of achieving the goal of serving everybody. Whether or not a $6 billion increase in the authorization does that, I plain do not know. I think we kind of pulled that figure out of the air. It is subject to a lot of debate, but, in any event, I believe it should be looked at as an effort on the part of our subcommittee and committee to say to the Members of the House, "We want to insure that we improve the quality of the program on the one

hand and expand it to serve all eligible individuals on the other."

There are a couple of amendments that were offered by the gentleman from Pennsylvania [Mr. GOODLING], my good friend and our ranking member of the full committee, that deserve attention. The first has to do with parental involvement in education.

Mr. Chairman, I applaud the gentleman from Pennsylvania [Mr. GOODLING] for his continued leadership in this area. This is one of his causes, and, due to his diligence, we have amendments to the human resources bill calling for the elevation of the parental role in children's education and the requirement that Head Start grantees assist parents in obtaining necessary education services so that they could help their children achieve full potential, and I think that is a giant step in the right direction.

The second change proposed by the gentleman from Pennsylvania [Mr. GOODLING] is in the area of transition to elementary schools. We will now require that Head Start grantees coordinate with the schools that will ultimately serve the children who are currently in a Head Start Program, and I think that it is very important that we have that kind of coordination and that we make special efforts to prepare the children and their families for the transition to elementary school.

The next area that should be mentioned, Mr. Chairman, is the Follow Through Program. Follow Through has been the subject of controversy for almost as long as I have been in the Congress. It is a program that has wonderful intentions. It has done some good things, but it has been a program that is in limbo. Essentially it was a demonstration grant program, and we have been demonstrating for almost a quarter of a century, and we have not, as a result of those demonstrations, ever moved to a program that served all of those who were in Head Start and followed through on them, if my colleagues will, to make certain that the benefits of Head Start carried over. What we find, as we looked at those who had gone through the Head Start Program, is they had great improvement in their skills, in their socialization, in health and nutrition, after they got out of the Head Start Program, but by the time they reached third or fourth grade, one could not tell the difference between those who had gone through Head Start and those who had not.

Mr. Chairman, clearly what we need is a strong Follow Through Program and one that ties in with the chapter one program, which is actually where the big bucks are in providing assistance to the those students in the early elementary grades who are educationally disadvantaged, and, by tying them together through Follow Through, as this bill will do when we finish with it today as a result of a compromise worked out between the majority and minority, I think we will have helped make the Follow Through Program a workable program, and we will have done a great deal to sustain the benefits of the Head Start Program.

Mr. Chairman, let me touch next on the community services block grant. That program has been subject to a lot of criticism in the recent years, and I noticed the administration in its sheet to us on this piece of legislation says that we should be cutting out the Community Services Block Grant Program. I think that would be very misguided policy. The Community Services Block Grant Program is the glue that holds together the community action agencies around the country, and I do not know what the community action agencies are like in my colleagues' areas, but I know what they do in the State of Iowa. They are the agencies that pull together an array of services for those families who need help. They can go to the local welfare or social service offices, if my colleagues will, and they can apply to one program, and they are run through all of those hoops to see if they qualify.

□ 1210

Then if you do, they say yes. If you do not, they say no; but they do not seem to ever get around to saying what kind of an array of services can we put together to actually help you through this trouble, and that is what the Community Action Agencies do. They only do it because they have the community service block grant funds. If we eliminate that, they are not going to be there to administer all the other programs that we want them to administer, like the low-income heating assistance program or the Head Start Program. So I think that it is important that we not only endorse the Community Services Block Grant Program, but take it out of limbo and increase the funding for it. That is what we are attempting to do here.

Well, there are lots of other wonderful things in this bill. Let me just say, however, that we have attempted with this measure to try to address the concerns that have been raised about the ways some of these programs are run in order to insure that they function properly. I am not saying this is the answer to all our prayers or that it is the greatest piece of legislation that ever hit the floor, but I am saying that it is a strong bipartisan effort to shape these programs in a way that can command consensus accord and try to build on something that is good and make it a little better.

Mr. KILDEE. Mr. Chairman, I want to thank the gentleman from Iowa [Mr. TAUKE], the ranking Republican member of the subcommittee. He has been extremely helpful in the years I have served with him. He is going to be leaving this House in one way or another seeking another office. He is a bona fide Republican. He is more conservative than I, but he has brought into the process a balance and a zeal that has been very, very helpful before.

I have said before that if we had more TOM TAUKES in the Congress, we could get a lot more done around here and do less growling and shouting at one another.

Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. PICKLE].

Mr. PICKLE. Mr. Chairman, I thank the gentleman for giving me this time.

I rise in support of this very important piece of legislation. I am confident that the Congress is going to give it one of the highest votes of approval of any piece of legislation we have this year.

I take this occasion, though, to depart a little bit from this debate to tell you that these programs are a product of a period of time in American history of which we can all be proud. A couple of weeks ago in Austin, TX, we had a ceremony in celebration of the 25th year anniversary of the inauguration of President Lyndon Johnson and Vice President Hubert Humphrey. It was a large crowd of people who gathered from all over America just to commemorate the fact that this was a period of time in our history when so many productive pieces of legislation passed. Head Start is one of them, and it was certainly the centerpiece of part of our discussion.

Two weeks ago on a Friday evening over 1,600 people gathered at the LBJ Library just to participate in the remembrances. We had so many people, the largest crowd that ever gathered for a ceremony in Austin at that library, that we had to put them in three or four different rooms throughout the building and hook them up by television so they could just see the program and enjoy it. There was more hugging and kissing and shaking of hands and slapping of backs and laughter and tears during that 2-day ceremony than any period I have experienced in my years as a legislator in this body.

We were proud of the programs we started. Think of them, not just Head Start, but the Civil Rights bill of 1964, the grandaddy of all civil rights programs; Medicare; Community Action; the Job Corps; voting rights; fair housing; elementary and secondary education; higher education; and a host of other programs that represent the most productive period in the history of this great Republic.

The people who came to Austin went back with pride. They were not disillu-

sioned by any of the personal negative comments that you see or read about these days. They were hugging each other because they were proud to have been a part of a period of time that did so much for the individual.

Now, the Head Start Program is one that Lady Bird Johnson inspired and put her emphasis behind. It was her program during the time she was our First Lady. We paid our respects to her on behalf of the President and Vice President Humphrey.

It is good then for us to come back and celebrate this kind of achievement and it is good at this particular time to say we have a program again that this committee has brought forth.

I commend the chairman for this piece of legislation and say to you that as long as we look after our young people, the preschool children, and we give them a little Head Start against the big challenges they have in life, then we are worthy of being proud of our own heritage and our democracy.

So this is a good program and I am proud to support it.

Mr. GOODLING. Mr. Chairman, I yield 2 minutes to the gentleman from Missouri [Mr. COLEMAN], a member of the subcommittee.

Mr. COLEMAN of Missouri. Mr. Chairman, I thank the gentleman from Pennsylvania [Mr. GOODLING] for yielding me this time.

Mr. Chairman, I would like to join in the commendation of the gentleman from Michigan [Mr. KILDEE] and the gentleman from Iowa [Mr. TAUKE] for working out a bill which I think all of us can agree to and support. It shows what putting aside differences in the spirit of compromise can accomplish in this House. I would like to see more of it and hope that we might be able to see more of it.

Mr. Chairman, the mission of Head Start is to prepare youngsters mentally, physically and emotionally, for schooling. Now it is more critical probably than the day that the gentleman from Texas said 25 years ago, because today many of our Nation's children are facing overwhelming odds in developing skills and knowledge necessary to succeed in the early most critical years of their education.

Head Start has indeed compiled an outstanding record of achievement for children who receive the full benefit of its services, but at current funding levels less than 20 percent of the eligible young children are really in the Head Start Program. That is why I am so happy that not only did the committee ask for and seize the initiative on this by increasing the authorization level, but also that the President, the White House and the Administration, has proposed a significant increase in Head Start in this budget of $500 million to expand and allow 180,000 youngsters to be put into the program.

I think the first priority must be to bring as many eligible children into the program as possible, but also the services and instructors training have to be upgraded and increased as well.

We have research that shows children enrolled in Head Start achieve substantial gains in learning skills and personal development and are significantly better prepared for the demands of elementary school. For many children, Head Start is the first link in a chain which must bear much weight and repeated testing during their education.

I am very happy to hear that we have an agreement on the Follow Through Program, because they say the efforts of Head Start kind of wear off after you get into the 8 or 9 years of age, unless there is more involvement and more effort. The Follow through Program ought to be able to take that up. I think with this we have been able to do that and make this a worthwhile program.

The one thing I want to conclude with is that I visited about eight Head Start centers in my district during this reauthorization process. I was struck with the commitment of the instructors and the people that were there and the learning atmosphere that I found.

One of the things I also found was concern about expansion of the funds which we know will be coming and how do we get those out to the people; especially in rural areas, we have found great concern expressed that they may have to compete for grants, even though they may have lower numbers of children, but they have a very high percentage of unmet need. At the same time, others might get in more urban areas direct grants given to grantees with high numbers of unserved children, and a waiting list as well.

I hope that the administration of this program will work out to show that the youngster in a small town and a small rural community has a need for these services as much as people in our urban areas as well.

Mr. KILDEE. Mr. Chairman, I thank the gentleman from Missouri [Mr. COLEMAN]. The gentleman preceded me in the Congress by a few months, but we have always considered ourselves classmates and have worked well together, and I appreciate his good work.

Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. HAWKINS], the chairman of the Committee on Education and Labor, one of my mentors. If I were to count my mentors critically and morally, I would put this gentleman in the top 1 percent.

□ 1220

Mr. HAWKINS. Mr. Chairman, I thank the gentleman from Michigan [Mr. KILDEE] for his generous remarks. I commend him and the gentleman from Iowa [Mr. TAUKE] for bringing this legislation to the floor.

I rise in strong support of the Human Resources Reauthorization Act of 1990 which strengthens many important programs designed to help low-income families and children. The reauthorization package includes Head Start, Follow Through, State Dependent Care Development Grants, Community Service Block Grants, and the Child Development Associate Scholarship Assistance programs.

The cornerstone of this bill is the expansion and improvement of the Head Start Act. When President Lyndon Johnson signed the Head Start Program into law on May 18, 1965, he proclaimed that the services provided to poor children would "make certain that poverty's children would not be forevermore poverty's captives." Over the years, Head Start Program has demonstrated its success in improving the lives of poor children and their families. Extensive research proves that children who have attended quality early childhood programs develop social and academic skills that result in increased school success.

As we mark the 25th anniversary of Head Start later this week, it is particularly fitting that Congress, in a bipartisan fashion, is authorizing full funding for the program by 1994.

In addition to expanding access to Head Start, we also address the need to ensure the program's quality. During reauthorization hearings, many witnesses, including business representatives, urged Congress to place as much emphasis on quality as on access. I am pleased that the committee's bill provides for a set-aside of funds to improve salaries, expand staff, improve training and pay for transportation, facilities, and other quality improvements.

Today, our country is faced with a growing number of dysfunctional families. There are increasing incidences of substance abuse, teenage pregnancies, school dropouts, gang violence, and homelessness. The future of this country—our children—comprise the poorest group in America. One out of every five American child lives in poverty. We need to provide early intervention for families and to provide more comprehensive services to children under the age of three. For these reasons, I have proposed an expansion of the Parent Child Centers under Head Start which strengthen the family unit by providing opportunities for increasing parents' skill and knowledge of their own children's development. The centers also provide early childhood intervention programs to enhance the development of these young children.

Before I conclude my remarks, I want to commend the distinguished chairman of the Subcommittee on Human Resources, Mr. KILDEE, for his fine leadership in fashioning this important reauthorization proposal. Many of these programs have been in existence since the days of the War on Poverty. These programs have a demonstrated record of cost-effectiveness and meet the most stringent tests. They have become a symbol of hope for millions of Americans and should be continued. I urge my colleagues to support the Human Services Reauthorization Act.

Mr. GOODLING. Mr. Chairman, I want to agree with the gentleman from Michigan [Mr. KILDEE] in what he had to say about our wonderful chairman, the gentleman from California [Mr. HAWKINS]. The gentleman is doing this country a great disservice by retiring, but I suppose Elsie figures he has given enough time to everybody else, and she would like to have a little more of his time. He has fought long and hard for equal opportunities for all children, and all Members are going to miss him.

Mr. Chairman, I yield 2½ minutes to the gentleman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. Mr. Chairman, I almost approached the gentleman from Pennsylvania [Mr. GOODLING] to rescind my request for time to speak on this subject, because I will be the only one apparently thus far at least who may drop a little cold water on the nice atmosphere that has been created by the proponents of the legislation.

I to am one of those in the Congress, and I do not think there is anyone who is not, who is totally in favor of the Head Start Program, its proven results, its coverage, its intentions, its overall comprehensive plan for making sure that our youngsters get that head start for which the title is so aptly put. But there is a dilemma, and that dilemma is one that faces us constantly on the floor of the House, and it is important that we articulate that dilemma.

This program is not only endorsed by Members of Congress, but the President of the United States in the State of the Union Message, in one of the few areas in which he proposed an increase in the budget, singled out Head Start for a one-half billion dollar increase in his own very draconian budget, one in which his Gramm-Rudman deadlines are met, but nevertheless allowed an increase in his planned Head Start budget by half a billion dollars.

But this bill that comes before us now, where all Members endorse Head Start, doubles the ante, increases that funding, and goes beyond what is expected by the administration for a program which it endorses.

Therein lies the dilemma. What do many of us want to do who support Head Start, but at the same time want to support the administration's yeoman efforts to bring this deficit under control?

What a dilemma. It appears to me that because I support generally the gentleman from Michigan [Mr. KILDEE] and the gentleman from Pennsylvania [Mr. GOODLING] in their efforts on these programs and others, that I must indicate my strong support again for Head Start, indicate my cooperative spirit with the gentlemen who brought this bill to the floor, and then register my reservations until such time as the spirit of bipartisanship which has brought us thus far will prevail in those summit meetings that are being held, or hopefully are going to be held, also on a bipartisan basis, which will keep in mind the strong input that the two gentlemen, along with their members and chairmen, have put into the program, so that it can survive.

Until that time, I have to maintain that balance and throw that little cold water by maintaining reservations about the ultimate support of the legislation which is now in front of us.

Mr. KILDEE. The gentleman from Pennsylvania [Mr. GEKAS] may wish to move that the gentleman from California [Mr. HAWKINS], and the gentleman from Iowa [Mr. TAUKE], and the gentleman from Pennsylvania [Mr. GOODLING], and myself be sent to that summit conference at the White House so we can maybe work that out also.

Mr. Chairman, I yield 3 minutes to the gentleman from Virginia [Mr. OLIN].

Mr. OLIN. Mr. Chairman, I would like to congratulate the gentleman from Michigan [Mr. KILDEE] and Members on both sides of the aisle that brought this bill together and have given Members the chance to make these improvements.

Mr. Chairman, I rise in support of the bill, H.R. 4151, and urge its passage. Although all the programs reauthorized in this bill are very fine programs that benefit society, I have a special interest in Head Start. One of the most exciting things about this bill is that it would authorize sufficient appropriations so that Head Start could reach all eligible children by fiscal year 1994. Right now, only about 20 percent of the eligible children are served by Head Start. Considering the advantages Head Start provides, enrolling all at-risk children in Head Start is one of the wisest things we can do in both human and economic terms.

H.R. 4151 provides for the expansion of Head Start to all eligible children while, at the same time, providing sufficient funds for a high-quality program. In recent years, budget restrictions and inflation have forced many Head Start centers to cut back on such critical elements as health, nutrition, parental involvement, and social services. This bill sets aside funds for quality improvements assuring that Head Start will remain the high-quality program that it was originally designed to be. Quality components of Head Start cost more, but they are well worth it. According to the Children's Defense Fund:

> Every $1 invested in high-quality preschool programs such as Head Start saves $6 in lowered costs for special education, grade retention, public assistance, and crime later on.

The CDF goes on to say.

> Children formerly enrolled in these programs are more likely than other poor children to be literate, employed, and enrolled in postsecondary education. They are less likely to be school dropouts, teen parents, dependent on welfare, or arrested for criminal or delinquent activity.

I know these statements are true. My wife spent 11 years as a psychologist in Head Start. This bill will make possible what she has been working for the last 20 years.

Another feature of H.R. 4151 that is crucial is the language that reinforces the right of local Head Start centers to serve children for more than 1 year if they believe it necessary. In many cases, it takes more than 1 year to overcome the disadvantages at-risk children come with. Local Head Start centers need the discretion to serve children for more than 1 year in order to overcome the problems many of these children have.

Finally, I would like to note that this bill calls for a higher appropriation for Head Start than we have had before. It is well worth the investment, and I will be working to make sure the revenue is available. Again, Mr. Chairman, I urge the passage of H.R. 4151.

□ 1230

Mr. KILDEE. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas [Mr. ORTIZ].

Mr. ORTIZ. Mr. Chairman, I do support this piece of legislation. It is good and I urge my colleagues to support it.

Mr. Chairman, I rise today to urge my strong support of H.R. 4151, the Human Services Reauthorization Act. I commend the outstanding leadership of my good friend, DALE KILDEE, Mr. GOODLING, and members of the committee, who have put a lot of time and work into this legislation.

This important piece of legislation includes the Head Start Program, which is vital to the education of our youngest people.

Since its inception in 1965, Head Start has emphasized strong parental involvement in learning, as well as a wide range of services to address the other needs of low-income preschool children.

Head Start was the first program to recognize the need for social, nutritional, and health needs for these children.

Since our educational system has recently been criticized for its shortcomings, it is imperative that we combat this lack of education in the early development years of our children.

Children who attend Head Start are more likely to excel in classes and are less likely to drop out of school.

Additionally, and most importantly, children in Head Start are less likely to experiment with drugs.

They are safer, smarter, and happier.

I urge the House to adopt H.R. 4151.

Mr. KILDEE. Mr. Chairman, I yield such time as he may consume to the gentleman from Indiana [Mr. McCLOSKEY].

Mr. McCLOSKEY. Mr. Chairman, I thank the gentleman from Michigan for yielding time to me, and I rise in strong support of H.R. 4151, the Human Services Reauthorization Act of 1990, a bill which enables Head Start to serve all eligible preschool children by 1994.

Mr. Chairman, I rise in support of H.R. 4151, the Human Services Authorization Act of 1990. This bill will enable Head Start to serve all eligible preschool children by 1994. I have witnessed firsthand the remarkable effect the Head Start Program has had in southwestern Indiana.

Since its establishment 25 years ago, Head Start has been one of the Federal Government's most effective programs. Low-income children are given the special attention they need to be prepared for kindergarten and elementary school. Head Start gives young children the self-confidence that is so essential at this critical stage of development.

Studies have shown that children enrolled in Head Start are more likely to succeed educationally and to stay in school. Head Start graduates also are less likely to require remedial courses.

H.R. 4151 also increases funds for the Follow Through Program, which allows kindergarten through third-grade students to continue the progress they made in Head Start. Head Start students should not be abandoned after they leave the program and advance to elementary school. Without the right encouragement, these children could lose all that they gained from Head Start.

Mr. Chairman, as it is often said, our children are our future. I urge my colleagues to support H.R. 4151 to protect our country's future.

Mr. KILDEE. Mr. Chairman, I yield 2 minutes to the gentleman from Colorado [Mr. SKAGGS].

Mr. SKAGGS. Mr. Chairman, I thank the distinguished gentleman for yielding time to me.

Mr. Chairman, I would like to express my strong support for H.R. 4151, the Human Services Reauthorization Act of 1990, and to urge my colleagues to support this bill.

Over a quarter century ago, the United States declared war against poverty. The force behind that declaration was the Economic Opportunity Act—education and training programs designed to open to everyone "the opportunity for education and training, the opportunity to work and the opportunity to live in dignity."

We have fought hard, but we have not won that war yet.

The average income for the poorest families has resumed a very troubling decline, and the number of children living in poverty has been growing at an alarming rate. For those children, the chances of breaking the cycle of poverty are getting slimmer. That's not what this country is supposed to be about. What do we do?

Without adequate health and nutrition care, children cannot grow and develop normally. Without a stable home environment, children are less likely to enter school prepared to learn. And without an education, they cannot develop the skills necessary to earn a living and rise above poverty.

We've got to break the old, disabling cycle and replace it with a new, enabling one. We have got to wake up to the fact that our children are our future. And it's up to us—all of us—to make sure they're prepared to meet the challenges of the future.

That's why this legislation is so important.

One of the programs reauthorized in this bill is Head Start, a program particularly successful in reaching children early on. It's not enough that we ask how Johnny was able to graduate from high school without learning to read. Chances are, Johnny was already way behind other kids before he even reached high school. We have to provide services today for 3-year old Johnny and 4-year old Johnny and help him before he falls behind—give him an environment that will teach him how to learn, an environment that will help him learn, and most important, an environment that will make him want to learn. Twenty-five years after its beginning, Head Start has a record of success in doing just that.

More than just an education program, Head Start is a comprehensive child development program that provides supporting services such as health care, dental care, and hot meals. The program continues to help kids from low-income families start school on an equal footing—before they fall behind.

The Human Services Reauthorization Act would expand funding for Head Start so that the program is available to all children who are eligible. Today, Head Start serves less than 20 percent of eligible 3 and 4 year olds. With this bill and with appropriations to fulfill its promise, we can hope to reach the other 80 percent by 1994.

I'm pleased that this bill also targets funds to improve the quality of Head Start programs. If Head Start is to continue its record of success, serving more children has to be combined with serving all children better.

This bill also reauthorizes Follow Through, an important program designed to build on the gains children make in Head Start. In my own district of Colorado, INREAL Follow Through is working with elementary schools to improve children's communications skills, problem solving skills, and language proficiency, and to increase children's motivation and thus their chances for success.

Head Start and Follow Through are just two of the seven programs reauthorized by this bill. They're all important.

Failure to invest today will result in much greater costs in the future—the costs of public assistance, the costs of crime, the costs of a poorly prepared work force. Conversely, the national gains from our investment today will be enormous. We'll all benefit.

Enacting this legislation perhaps represents one of the few times we demonstrate the good judgment to take preventive steps—acting on solid information and experience about how to keep the circumstances of our poor children from deteriorating further. In so doing, I wish we could say this shows Congress can on occasion act to avoid crises, rather than waiting for the crisis before we act. But no, that's too kind. Our kids are at the crisis point, and we'd better not pretend otherwise. At least this bill shows we can respond.

No, we haven't won the fight against poverty that we declared a quarter of a century ago. But neither have we lost it. The Human Services Reauthorization Act will give us some necessary resources to continue fighting poverty and its effects on children and families. Let's get on with it.

Mr. KILDEE. Mr. Chairman, I yield 2 minutes to the gentlewoman from Washington [Mrs. UNSOELD], a faithful and effective member of the subcommittee.

Mrs. UNSOELD. Mr. Chairman, I want to thank the chairman of my subcommittee, the gentleman from Michigan [Mr. KILDEE] and the ranking minority member, the gentleman from Iowa [Mr. TAUKE] for their leadership. I also want to thank the chairman of our full committee, the gentleman from California [Mr. HAWKINS]. I only regret that I delayed so long coming here that I have a very short time to make him my mentor.

Mr. Chairman, I join my colleagues today in enthusiastically endorsing the Human Services Reauthorization Act which extends some of our most successful education and social service programs, including Head Start, the Community Service Block Grant and the Community Food and Nutrition Program.

If I hadn't already been a supporter, I would have become so as I listened to

the personal testimony given at our hearings. These programs make a real difference in people's lives. The community action agency who lent a helping hand to the Iowa farmer and his family during tough times, the young man from Alabama who got a "Head Start" at the age of five and has gone on to finish college and work in the Peace Corps, and the CEO from Honeywell who became compelled by the inadequacy of his workforce to get involved in the Head Start Program.

Mr. Chairman, Head Start is receiving praise and accolades from almost everyone these days and deservedly so. It is everything that is right about making an early investment in our children's education. As Head Start enters its 25th year, we must not only celebrate its triumphs but extend its crucial successes to all eligible children. Right now, only 18 percent of those eligible are served. We must fully fund Head Start for 3, 4 and 5 year-olds. If we are to be successful in an increasingly competitive world, our children must first succeed in the classroom. We can pay now or pay later, but we will end up paying. Let us make the smart investment on the front end.

The Community Service Block Grant is another remarkable program that uniquely brings together a broad range of critical services to families during tough times. In my State of Washington, we face a timber shortage. Mills are closing, family breadwinners are losing their jobs, and communities are on the brink of collapse. We need CSBG. CSBG has helped 31 community action agencies in Washington provide vital food, housing, employment, health and day care services. The most important aspect of CSBG is that it helps families retain their dignity. It is not a hand-out, but a helping hand-up to self-sufficiency.

I strongly urge my colleagues to support this important package because it makes an investment in life.

Mr. KILDEE. Mr. Chairman, I deeply appreciate the kind, personal remarks of the gentlewoman from Washington.

Mr. Chairman, I yield 1 minute to the gentleman from Delaware [Mr. CARPER].

Mr. CARPER. Mr. Chairman, a friend of mine, who is a minister, said to me not long ago it does not really matter how high we jump up in church, what matters is what we do when our feet hit the ground.

Today as I listened to the bipartisan harmony on this particular issue, Head Start, I am reminded of what my minister friend likes to say. Today we are jumping up high in church, and what really matters is what we do when our feet hit the ground on this issue.

In a month or two from now we will have the opportunity to hit the ground. In a month or two from now we will have the opportunity to gather here once again to discuss not a level of authorization for Head Start, but a level of appropriation for Head Start, real money, not play money, not monopoly money, real money. My friends and colleagues, my hope is that those of us who marched to this well today trumpeting the glories and triumphs of Head Start will remember our words when our feet hit the ground, and when we debate and vote on that appropriation bill later this summer.

Mr. GOODLING. Mr. Chairman, I would like to say to the gentleman from Delaware that I have already had my feet on the ground before the Appropriations Committee, encouraging them to give us this additional amount.

Mr. Chairman, I yield 3 minutes to the gentleman from Kentucky [Mr. PERKINS].

Mr. PERKINS. Mr. Chairman, I thank the gentleman for yielding time to me.

Mr. Chairman, this is a wonderful program. I think everyone here realizes fully and exactly the tremendous effect that this is having on the American public. It is just doing wonderful things.

But let us trace a little bit about how this program has come into being and the numbers it has served over the years. When it first came into existence in 1965 it served well over 700,000 people. It went down over the years to finally serving just a little over 300,000 students somewhere around 1977, and it has increased over the years slowly until today it serves about 488,000 students. So we have seen, indeed, the program go from its high point in the Great Society years down to its nadir I guess in 1977, the first year of the Carter administration, and then it has come back somewhat.

But a disturbing thing from 1981 to 1989 was the fact that we see the expenditure per pupil has gone down by around 13 percent, and this is a quality problem. We are having over half of the teachers making less than $10,000 a year on this Head Start Program.

□ 1240

And this is something that is troublesome. I want to thank very much the gentleman from Michigan [Mr. KILDEE] and the gentleman from Pennsylvania [Mr. GOODLING] for all of the assistance they have given in the quality aspect of this bill, and also to the gentleman from Iowa, Mr. TAUKE, for their quality assistance on this program.

Trying to increase the quality of the program that is being presented is going to be extremely important to the success of this program.

There is something else I have got to talk about. In this bill we have some learning centers for those students from zero to age 2 that are going to be getting some full-time assistance which they would not be given otherwise.

We also have the Follow-Through Program which I have always viewed as an absolutely essential tool.

So in essence we are going to be going now for some very few students from birth to the third grade. It will be interesting to follow maybe in a longitudinal study as to what sort of effect these continuing programs have upon them as they go through their lives.

This is something that I think is very important. I think this is going to be extremely important as we look at the overall effect of this program in the long term.

But indeed we have, with the Head Start portion, a tremendous thing there. We are going to 100 percent for all 3-year-olds and 4-year-olds by the year 1994.

You know, we only serve a half million out of 2.5 million to 3 million kids with this program that are eligible and should be served. That is tragic in a country that has as many resources as we do.

We have got to invest in our future. We have got to invest in our children. And this bill makes a major stride towards insuring quality educational benefits for all children who need that sort of assistance in these crucial years.

Five years from now I hope we can expand the Follow-Through Program and see more of those learning centers. That would be my goal now.

But right now this is a major step that is going to make the future of America that much brighter for so many more deserving children in this country.

I again congratulate the sponsors on their fine work on this legislation.

Mr. KILDEE. Mr. Chairman, I yield 1 minute to the gentleman from Minnesota [Mr. PENNY], a strong supporter of the Head Start Program.

Mr. PENNY. Mr. Chairman, I first want to compliment the gentleman from Michigan [Mr. KILDEE] and other members of the Committee on Education and Labor for their splendid work on this legislation. I do want to express my strong support for the human services reauthorization bill, similar to legislation which I introduced a year ago.

H.R. 4151 authorizes funds sufficient to allow all eligible children to participate in the Head Start Program by fiscal year 1994. Head Start is obviously a popular program with strong support here in this Congress and on the part of the administration. It has proven its effectiveness over its 25-year history.

I have visited many Head Start sites in my district and can attest to the value of this program. However, the appropriation is the real challenge. Honest cuts have to be made in other areas of the budget so we can make good on our commitment to Head Start. Otherwise a "yes" vote on this bill today is nothing more than a feel-good vote.

I trust that the budget summit proceeds and that appropriation priorities are established and that room will be made in the budget to make the promise of full funding of Head Start a reality.

Mr. GOODLING. Mr. Chairman, I yield 3 minutes to the gentleman from Iowa [Mr. GRANDY], a distinguished member of the subcommittee.

Mr. GRANDY. Mr. Chairman, I am pleased to join this bipartisan group of members of the Committee on Education and Labor who, unfortunately, more and more are not agreeing on issues of this nature. We are deeply divided on other subjects.

I think it is important to point out how united we are on the substance and sum of this program. I am a member who supports Head Start full funding, because it is a program that works and it works because it is a hand up and not a handout.

We rely on self-sufficiency in this program. It is accomplished in two ways: By focusing on both the individual and local efforts. Head Start is mandated by law to involve parents in almost every facet of the program, including decisionmaking about the structure and operation of the program, decisionmaking about employment and volunteer opportunities as well as encouraging parents to serve on the local advisory committees.

As a sign of success, 36 percent of Head Start staff were or still are Head Start parents.

Now that is worth investing in. Secondly, it is worth investing in it because the delivery mechanism for Head Start is at a local level through Community Action agencies.

The CAA's in my district are doing a very effective job. I was pleased to have the chairman of our subcommittee, the gentleman from Michigan [Mr. KILDEE] come out to Sioux City, IA, and see how well the community cosponsorship of this program is working and how important it is to underwrite this concept.

Because the CAA is locally controlled, it is more efficient, bypassing the bureaucratic process to mobilize resources and more flexible in targeting solutions to unique local problems.

Now a word about funding, Mr. Chairman, because obviously this is a big-ticket item and we bring to the floor a bill that will probably over the next 5 years cost the taxpayers roughly $22 billion if you add up all the annual costs.

I support full funding. I attempted to offer to this committee a pay-as-you-go amendment, which was ruled nongermane, but I do want to emphasize to my colleagues that we should encourage only fiscally responsible methods for this funding.

Expanding social programs cannot come at the cost of increased debt. We need to be honest with the American people. Increased funding for Head Start has to be done on a pay-as-you-go basis, Mr. Chairman, whether amendments to that effect are ruled in order or not.

That means spending reductions, as the gentleman from Minnesota just specified in his remarks, or some kind of revenue enhancement, which is a 15-cent word for you-know-what.

Fiscal prudence applied, Head Start is an investment in the younger generation of today which will build a generation of tomorrow. I encourage all of our colleagues on both sides of the aisle to join together in giving strong support to H.R. 4151.

Mr. KILDEE. Mr. Chairman, how much time remains?

The CHAIRMAN. The gentleman from Michigan [Mr. KILDEE] has 1 minute remaining, and the gentleman from Pennsylvania [Mr. GOODLING] has 6 minutes remaining.

Mr. GOODLING. Mr. Chairman, I yield 2 additional minutes to the gentleman from Michigan [Mr. KILDEE].

I might say that an important appropriator is on his way, and I am stalling.

Mr. KILDEE. Mr. Chairman, that has been done before around here, and that is a very good procedure.

Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to join with the gentleman from Iowa [Mr. GRANDY] for his support of Head Start. Mr. GRANDY is a member of the subcommittee, he has been very regular in his attendance, regular in attendance at our hearings and has really helped us to reach the point that we are at today.

I enjoyed very much traveling out to his district, to Sioux City, IA, where we looked at some of the programs out there.

I will say in general I think I have been on both sides of Iowa, east to west, and the State there really knows how to make these programs work.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. KILDEE. I yield to the gentleman from Texas.

Mr. BARTLETT. I thank the gentleman for yielding.

Mr. Chairman, I would make inquiry of the gentleman as to the procedure as this bill moves to conference. I support the bill in its present form and the committee on which I serve has done an excellent job on it.

As the bill moves to conference, I would inquire of the gentleman as to whether the gentleman and the conferees intend to resist that whole body of extraneous amendments that the other body's conferees have begun to try to add to education bills in the last 2 years? Some of the amendments relate to specific special interest projects that are in a conferee's district. Other amendments relate to expanding education programs to other nations; in one case I recall it was Ireland and in another case it was Micronesia, separate and sovereign nations that should be a part of the foreign affairs process.

So I would inquire of the gentleman as to whether it is the gentleman's intention to resist the entreaties of the other body at the conference to add extraneous amendments to what is currently a clean bill?

Mr. KILDEE. I cannot think of any amendment—in general that has been my approach. We are generally guided by tighter rules of germaneness in this body and I would certainly try to uphold that as we enter the conference.

Mr. BARTLETT. I would just hope that the gentleman could, if in fact, those entreaties of special particular interest amendments are offered in the conference, I would hope that the gentleman would notify other Members of the House as to those facts prior to any agreement or any decision by the conferees and surely prior to consideration of the conference report.

□ 1250

Mr. KILDEE. I will do that before we return here in a formal matter to inform the gentleman of that. I pray that leads us not into temptation during that conference.

Mr. BARTLETT. I share the gentleman's prayers.

Mr. GOODLING. Mr. Chairman, I yield 4 minutes to a distinguished Member and a great Red Sox fan, the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Chairman, I rise in warm support of H.R. 4151, the Human Services Reauthorization Act of 1990.

My good friends, Mr. HAWKINS, Mr. GOODLING, Mr. KILDEE, Mr. TAUKE, and their staffs did an outstanding job in crafting this important piece of legislation and bringing it to the floor today.

This bill reauthorizes two important programs which are near and dear to my legislative agenda—Head Start and the Community Services Block Grant. Each program has contributed to the well-being of millions of families and children across America.

As a member of the House Appropriations Committee and the subcom-

mittee which is responsible for these programs, I have been impressed with the progress being made in helping the disadvantaged to acquire the skills to become self-sufficient.

I am especially happy to note the provisions in the bill which will continue to expand Head Start not only to serve more economically disadvantaged children, but to improve the quality and range of services as well. This bill also reauthorizes the Community Services Block Grant Program and makes several improvements to improve participation by nonprofit organizations.

These provisions will expand the range of community services in nutrition, health education, and many other important activities.

I would like to draw the House's attention to one special program funded by the community services block grants—the National Youth Sports Program. The NYSP through a unique partnership combining * * * Federal, State, local, and private resources. Each summer, NYSP brings more than 55,000 disadvantaged boys and girls, ages 10 to 16, onto college campuses. There they receive high quality instruction in competitive and lifetime sports, and a daily enrichment component—instruction in such areas as health and nutrition, educational and job opportunities, drug abuse prevention, AIDS, and teen pregnancy.

At the same time, NYSP allows the students to take advantage of free medical examinations and followup, and free daily USDA-approved meals.

The NYSP exposes disadvantaged youngsters to college environments to which few would otherwise have access. It also provides employment for many residents of poverty-stricken areas.

This serves NYSP's goal of motivating needy young people to better their opportunities for the future and pursue advanced education.

With this bill's reauthorization of community service block grants, the National Youth Sports Program will continue its mission in new and innovative ways. I am heartened by the enthusiastic participation of all those involved: young people, teachers, administrators, athletes, and counselors. This bill will allow their energy and dedication to sustain the program in the coming years, and I urge all my colleagues to support it.

Mr. KILDEE. Mr. Chairman, I take note that the gentleman from Massachusetts [Mr. CONTE] has been a strong supporter of the NYSP program and the increase in CSBG will enable that program to grow. When I was in Sioux City, IA, we heard testimony on that program.

I have said it before, but I want to say it again, the gentleman from California [Mr. HAWKINS] has been very important to me. I clearly am a better person because of GUS HAWKINS. He has been a very important part of my own personal formation, and I am very grateful to him for that.

Mr. WEISS. Mr. Chairman, hundreds of thousands of American children are born impoverished. The United States ranks first among industrialized nations in child poverty. Without help, these economically disadvantaged children face problems in school and often do not receive an adequate education. As uneducated adults, these individuals find it difficult to become self-sufficient. They get caught in the treacherous cycle of poverty.

The programs reauthorized in H.R. 4151, such as Head Start, Follow Through and the Community Services Block Grant Program, help many children break out of this cycle of poverty. Studies show that young children who receive regular health care, proper nutrition and the special attention they need will have better school attendance records, more energy and heightened attention in class, and improved performance throughout their school careers.

The Head Start Program comprehensively addresses the needs of children and families. It provides low-income families with a wide range of services to meet the educational, social, nutritional, health, and other needs of pre-school low-income children and families. Studies show that Head Start students, as compared to other students, are less likely to be held back a grade, to be assigned to remedial or special education classes, and more likely to be enrolled in gifted and talented programs. They are also less likely to drop out of school or become involved in crime or receive welfare. H.R. 4151 authorizations for Head Start are sufficient to allow all eligible preschool children to participate in the program by fiscal year 1994.

To build on the gains these low-income children made in Head Start, the Follow Through Program provides children in kindergarten through third grade with a full-day educational program including classroom instruction in basic academic areas, access to health, social, nutritional, psychological services, and strong parental involvement.

The Community Service Block Grant Program provides funds to local community action agencies for activities to promote economic self-sufficiency, such as job training and placement, child care, emergency food shelter and drug prevention education.

I urge my colleagues to support H.R. 4151, the Human Services Reauthorization Act, and help break the cycle of poverty. With the passage of H.R. 4151, the recommendations of a broad range of policymakers, child development experts, business leaders, and children's advocates can be translated into new opportunities for millions of low-income children.

Mr. WOLPE. Mr. Chairman, I rise in support of H.R. 4151, legislation that would reauthorize the vital Head Start Program and, for the first time, provide insufficient budet authority to enable Head Start to serve all eligible preschool children by fiscal year 1994.

This week we celebrate the 25th anniversary of Head Start. This important program has served over 11 million children from low-income families, allowing them to begin school on an equal footing with children from more advantaged homes. As we reflect on the last 25 years of Head Start, the merits of this overwhelmingly successful program are clear.

Head Start children are more likely to meet the basic requirements for elementary school, showing significant improvement in school readiness and achievement on standardized tests.

Head Start provides quality health service to poor children, with over 90 percent of all Head Start children receiving medical and dental screening and treatment. In 1986, 98 percent of Head Start children were up to date on their immunizations.

Head Start provides jobs for Head Start parents and community residents. In 1988, 78,000 people were employed in Head Start programs.

An important study undertaken in Ypsilanti, MI, recently reported these dramatic findings. The Ypsilanti study found that students participating in high quality early intervention programs like Head Start made substantial gains in many areas of development: Those students who participated in early intervention programs were almost 50 percent less likely to be arrested as a young adult and were 20 percent more likely to graduate from high school. At age 19, over 45 percent of students who participated in an early development program were fully employed and self-sufficient, whereas only 25 percent of students who did not participate in such a program were self-sufficient.

Despite the overwhelming successes of Head Start, funding for this program has been shamefully inadequate. Less than 20 percent of eligible children currently can participate—a small proportion of participating children than a decade ago. The increase proposed by President Bush for Head Start funding leaves the program with fewer inflation adjusted dollars per child than it received from the 1978 appropriations.

We have taken important steps to improve and expand the Head Start Program—and the lives of our children—by passing comprehensive child care legislation. We cannot, however, stop now. Inadequately funding the Head Start Program only means that our children will suffer and that our Nation will be denied the possibility of having a quality and productive work force in the 21st century. I strongly urge support of this critical legislation.

Mr. MILLER of California. Mr. Chairman, I rise in support of H.R. 4151, The Human Services Reauthorization Act of 1990.

The children of America and their families who will be given an opportunity to participate in Head Start as a result of this legislation join with me in thanking my colleagues on the Education and Labor Committee, and especially Mr. KILDEE, for working so hard to bring this measure before us for consideration today.

This week, as we celebrate Head Start's 25th anniversary, I am particularly pleased that this historic legislation builds on the Child Investment and Security Act, which I introduced last year, and provides a multiyear funding strategy for Head Start so that by 1994 all eligible, low-income preschool children can participate.

For the past 25 years, Head Start has been providing an invaluable service to millions of low-income children and their families. Today, 450,000 low-income children are served by more than 1,285 grantees.

Head Start is not just a preschool program. In addition to providing the educational experiences that prepare the most vulnerable children for kindergarten, Head Start provides a wide range of social, nutritional, medical, and dental services. Head Start parents are also engaged in a unique way—through the establishment of parent advisory councils and employment training and job opportunities.

The benefits of Head Start are well documented. Studies are virtually unanimous that children show significant immediate gains in cognitive ability, self-esteem, achievement motivation, and social behavior as a result of Head Start participation. According to the administration's own study, Head Start also affects the long-term success of its enrollees. Children who attended Head Start are less likely to fail a grade in school or to be assigned to special education than children never enrolled in Head Start.

Given that only the most severely disadvantaged children currently can be served by the program—in 1988, 75 percent of all Head Start families had incomes below $9,000—the gains Head Start children receive are even more impressive.

Despite the increase Congress afforded Head Start last year, 80 percent of eligible, low-income children ages 3 to 5 are still excluded from the program.

Last September, the President convened an education summit for the Nation's Governors. The No. 1 educational priority identified by that group was to improve "the readiness of children to start school." The national education goals approved at that historic meeting stated explicitly that "all eligible children should have access to Head Start * * * or some other successful preschool program with strong parental involvement."

Increasingly, States are beginning to implement high, quality preschool programs for disadvantaged children. But according to the National Association of State Boards of Education Task Force on Early Childhood Education, "the combination of State, Federal, and local programs falls far short of meeting the needs of at-risk children for preschool. * * *."

The Federal Government has to rise to the challenge and meet its part of the bargain.

Head Start gives us that opportunity. And it is a sound investment. Report after report from government, universities, medical schools, business groups, and think tanks demonstrate that investments in prevention for our youngest, most vulnerable children can save their lives—and save billions of dollars, too.

The Select Committee on Children, Youth, and Families documented in its report, "Opportunities for Success: Cost-Effective Programs for Children, Update 1988," every dollar invested in high quality preschool programs saves at least $6 in reduced special education, welfare assistance, and crime. Head Start is part of the Federal Government's blue-chip portfolio.

Mr. Chairman, as important as ensuring that all eligible children have access to Head Start, is meeting our obligation to Head Start's legacy of comprehensive, high quality early intervention. But with dwindling resources over the last quarter century, Head Start has had to struggle to maintain the high standards that have become its hallmark.

This week, the Silver Ribbon Panel on Head Start, a panel of distinguished advisers that met to develop recommendations for the future of Head Start will release a critical and timely report. As it first recommendation, the Silver Ribbon Panel calls for investments in the quality of Head Start by increasing staff compensation, training, family support and developmentally appropriate practices.

There is now a chorus of experts calling for significant improvements in training and enhanced salaries for early childhood professionals. The Head Start Silver Ribbon Panel is joined by other notable researchers and clinicians, including those who compiled the National Child Care Staffing Study, and members of the National Academy of Sciences Child Care Panel and the National Center for Clinical Infant Programs, who have documented that education and ongoing training of child care teachers, regardless of their experience, are the key to the quality of services children receive, and that wages are the most important predictor of quality.

The Panel also recommends increased funding so that all eligible children who need Head Start can participate and local programs can provide services that meet the needs of today's families. The Panel further underscores the need for leadership to build a more coordinated and effective system of services for children and families through collaboration and research.

Mr. Chairman, this legislation addresses all of the recommendations of the Silver Ribbon Panel, and I am especially pleased that the bill allows funds—when appropriations are sufficient—to be set aside to improve teacher salaries and benefits, and hire and train staff.

In addition, the Child Development Associate Scholarship Assistance Program for low-income child care providers seeking the CDA credential, the only nationally recognized child care "seal of approval," has been expanded to underwrite the critical training necessary to attain the credential.

The remaining provisions of this legislation provide funding for other extremely important programs targeted to low-income families: Follow Through, which provides Head Start type services to children once they enter school; the community services block grant, which funds community agencies providing a wide range of services in low-income neighborhoods and the Community Food and Nutrition Program, which helps meet the nutritional needs of low-income families. All of these programs have a long track record of providing low-cost services to meet a wide range of needs in low-income communities. They deserve our support and admiration—for accomplishing so much with a minimal amount of funding.

When it comes to cost-effective programs, we know Head Start and these other programs work. We know they are successful. Let's do what we know is right. Vote with me to support the increased funding levels and quality improvements for Head Start contained in H.R. 4151. The future of Head Start, and of our children, depend on your support.

Mr. PENNY. Mr. Chairman, I would like to express my support for the human services reauthorization bill which authorizes appropriations for Head Start.

Similar to legislation I introduced a year ago (H.R. 2373), H.R. 4151 authorizes funds sufficient to allow all eligible children to participate in the Head Start Program by fiscal year 1994. In addition, the bill sets aside 10 percent of the appropriated funds to ensure for program quality such as improving teachers' salaries, transportation, and facilities.

Head Start is a popular program with strong support in Congress and the administration. However, appropriations is the real challenge.

Honest cuts have to be made in other areas of the budget so that we can make good on our commitment to Head Start. Otherwise, a yes vote on this bill is nothing more than a feel-good vote.

For starters, I suggest that we eliminate the Follow Through Program. Over 20 years ago, Follow Through began as a demonstration program for former Head Start children but has never gone away. It only serves a small number of students in 68 districts of the country. The authorization level for fiscal year 1991 under this bill is $20 million—and the number increases to $50 million by fiscal year 1994—if the fiscal year 1991 level were translated into Head Start dollars, then an additional 7,000 children could be served by Head Start.

This Follow Through Program has outlived its purpose. By the end of the current grant period the program will have had 24 years to test and disseminate its models on compensatory education. The remaining task is for school districts to adopt the various models. The chapter 1 basic grants program is a logical source of support for these models, particularly with its emphasis on program improvement.

President Bush has recommended that Follow Through be allowed to expire. Given the challenge we face in actually obtaining the funds to successfully expand Head Start and other programs with severe needs, we should vote to strike Follow Through from this reauthorization.

Eliminate Follow Through. This demonstration program has outlived its purpose. It is amazing that what began as a demonstration program has been on the books for 24 years. We now have chapter 1 and chapter 2 and Even Start. We no longer need Follow Through.

Let's transfer the savings into Head Start. When you get down to the bottom line, dollars for the continuation of Follow Through are dollars subtracted from other needy programs—like Head Start.

The administration opposes Follow Through. Education Secretary Cavazos has indicated that programs such as chapters 1 and 2 and Head Start can fulfill the same purpose. The President's budget eliminated Follow Through funding.

Mr. FRENZEL. Mr. Chairman, I want to thank my colleagues on the Education and Labor Committee who worked diligently on this important bill.

H.R. 4151 reauthorizes appropriations for a number of programs designed to assist the poor or otherwise disadvantaged. Among these are Head Start, the Community Services Block Grant and Follow Through. All the programs I am familiar with here are based on noble motivation, and some are even carried out well.

I realize that this bill does not violate the Budget Act because sufficient funds are assumed in the already irrelevant House budget resolution. H.R. 4151 merely sets authorization levels which are subject to appropriations. Moreover, the House budget resolution assumes sufficient money to fund the expansion in Head Start.

Nevertheless, I am bothered by the budgetary implications of this bill. If Congress appropriate the full amount for Head Start, this one provision would cost $1 billion in fiscal year 1991. But this is only the beginning: the costs snowball to over $6 billion by fiscal year 1994! And don't forget that we already authorized another $3.3 billion for Head Start in the child care bill.

Of course when we view this bill in a vacuum these authorization levels may not appear excessive. Personally, I would give these programs, or at least the ones that prove by test to be effective, the very highest spending priority. Unfortunately, we must balance the funding requirements of Head Start with that of a multitude of other worthy programs. Early this year the House passed a child care bill which would cost around $27 billion over 5 years. I understand the Banking, Finance, and Urban Affairs Committee plans to report out a subsidized housing bill which would annually raise authorization levels by three $3 billion beginning in fiscal year 1991. Ways and Means has moved forward with a number of expensive initiatives including liberalization of the Social Security earnings test. I won't even mention such really big ticket items as long-term health care.

The net of all these congressional letters to Santa Claus is that we have made promises, and raised aspirations, well beyond our ability, or the people's willingness, to deliver.

It is time to get serious. Our leadership has just entered into discussions with the administration over the budget. How can we ask all of our constituents to make sacrifices to reduce the deficit at the same time we are promising a few of our constituents programs which will increase the deficit by over a billion in the same year?

These authorization levels are outrageous, and they are terribly dangerous. Authorizations imply a promise or willingness to actually spend the sums as indicated. But we all know that our ability to carry out the promises in this bill are limited by our unwillingness either to cut other programs or to come up with new revenue.

In conclusion, I reject the argument that we should not be too concerned with these authorization levels because the appropriators will save us by less than full funding. In fact, authorization bills measure our ability to meet both domestic and fiscal needs. The authorization levels in this bill simply prove again that we are not up to the task.

It is, regrettably, again my futile duty to be the onion in the petunia patch. There will be precious few votes against this bill, but one of them will be mine.

Mr. RAHALL. Mr. Chairman, I rise in strong support of H.R. 4151, a bill reauthorizing such human services programs as Head Start, the Community Services Block Grant Program, Follow Through, and for other purposes.

We are all intensely aware of the highly successful outcomes of children who, over the past 25 years, have benefited by being able to participate in Head Start. This program serves not only low-income children by providing educational, social and health services, it also serves their parents. The parental involvement practiced, indeed required, by the Head Start Program I am convinced is the secret of its success. I wish we could successfully impose that degree of parental involvement elsewhere in education. If we did, I am confident we would see a vast change for the better in our public school system throughout the Nation.

Mr. Chairman I was deeply pleased to have been able to join with our chairman, Mr. HAWKINS, in expanding and improving the Parent Child Center Program under Head Start. This little known program which serves children from birth to 3 years of age, has been funded since 1967 out of the Secretary's discretionary fund. There are only 37 such PCC's in the Nation. I am proud to say that we have two of them in West Virginia, and I was able to visit them recently to see first hand how these parents and children thrive because of the program's focus on parenting skills and early childhood development for these children from birth to the age of 3 years.

The Hawkins-Rahall amendment adopted in committee expands the current funding of $15 million for parent child centers to $30 million in the coming fiscal year, rising incrementally to $33.7 million in fiscal year 1994.

Mr. Chairman, I am also pleased that we are focusing more of our attention on the outstanding work that has been done over the past 25 years by community action agencies for the families and individuals in their communities living at and below poverty, and that this bill calls the attention of the Members of this body to the need to increase funding for the Community Services Block Grant Program. No where is there more need for community action agencies and the wide array of personal services they provide to the poor than in West Virginia. Community action in West Virginia means food on the table, shelter, home repairs, and weatherization services for better home heating during bitterly cold winters. It often means that the first person a family sees after a devastating home fire, or a flood that wipes out their homes, is a representative from the local community action agency that serves them.

Community action agencies are also, the extent possible, involved in serving the homeless, and in fighting against substance abuse in the communities they serve.

H.R. 4151 calls for full funding of the Head Start Program by fiscal year 1994. I deeply and sincerely hope that this goal is realized, and that the administration continues its strong support for increased funding each year until we are serving all eligible children who need, want, and can benefit from Head Start services.

The bill also addresses the need and calls for added spending for the salaries of those devoted teachers and teacher aides that make Head Start work wherever it exists. I know that the women and men who serve Head Start Programs in West Virginia are dedicated to what they do, and to the children they care for each and every day. We are lucky to have people at the helm of Head Start in our State who have been with the program from its very inception 25 years ago. One of them I will single out for special mention, Mary Jane Bevins who works out of the Southwestern Community Action Council in Huntington, WV, has been with the program for 25 years, and is a nationally recognized expert on parent child centers who serve children from birth to the age of 3. I know she will be, as will those directors of the other 35 PCC's across the country, extremely pleased to note the expansion of the Parent Child Center Program in the coming years, as well as the upgrading of Head Start teachers and teacher aide salaries.

Mr. Chairman, this is an important and urgently needed measure, and I commend my chairman, Mr. HAWKINS, and the subcommittee chairman Mr. KILDEE, for their hard work and perseverance in bringing this bill to the floor today, and I urge my colleagues to support it.

Ms. LONG. Mr. Chairman, I rise today to express my strong support for the Head Start Program and for H.R. 4151, the Human Services Reauthorization Act. This bill will provide for the expansion of Head Start, as well as for the continuation of other programs crucial to the well-being of underprivileged children and their families.

I am a cosponsor of H.R. 4151 and I support its goals. I believe that early childhood education is crucial for ensuring the success of children later in life. Such a start is especially important for those children who need extra attention and care in order to reach their full potential. Head Start provides a strong beginning for children who truly need it.

Unfortunately, Head Start has not received enough Federal funding in the past. The bill being considered today would remedy this problem. This legislation would dramatically increase funding for Head Start, raising the funding level for the program to $4.3 billion in 1992. This amount represents an increase of $2.4 billion over the amount suggested for 1991 by President Bush.

As many of you know, only 25 percent of the children eligible for Head Start have ever been served by the program during its 25 years of existence. Under this bill, funding would be increased over the next few years to allow all eligible 3- and 4-year-olds, as well as 30 percent of eligible 5-year-olds, to be enrolled in Head Start Programs by 1994.

I believe that every child deserves the foundation that a good early childhood education can provide. Children who have been given the opportunity to benefit from the Head Start Program have gone on to success in the higher grades and have shown greater confidence in their own abilities. I believe that all eligible children should be given that opportunity. I urge my colleagues to support H.R.

4151 and provide each and every child with the educational opportunities they deserve.

Mrs. ROUKEMA. Mr. Chairman, we are today considering reauthorization of several very important social service programs that have had a great positive impact on many people in many regions of the Nation. Perhaps the most important of these programs in its scope and effect on the future of its beneficiaries is Head Start.

Head Start has been the focus of much attention over the past couple of years due to the Bush administration's pledge to work for a "kinder and gentler" America and last year's request for an additional $250 million for the program. More attention will be focused on Head Start in the coming months and years as the President, the Governors, and Congress begin to implement strategies for achieving the education goals recently set forth by the National Governor's Association. To achieve 90 percent high school graduation rates—one of the Governor's association education goals—will necessitate increased efforts in early childhood education and intervention through programs like Head Start.

In addition, democratic studies showing a steady increase in the proportion of mothers of young children entering the work force, and an increase in the number of young children in single-parent households, point to a need to expand comprehensive early childhood development programs. These facts, along with criticisms of the educational achievement of American students, have elicited a search for ways to improve educational programs, particularly prekindergarten programs that offer a comprehensive approach to improving the prospects for the children enrolled. By comprehensive I mean programs that address a broad range of problems including health care, drug abuse prevention and education, and nutrition to name a few.

There is no doubt that Head Start has been successful in offering comprehensive services to the educationally and economically disadvantaged over the years since its humble beginnings in 1964. One of the best features of Head Start has been its emphasis on parental involvement which has proven to be beneficial for both the enrolled child and the parent. Many Head Start parents, because of their involvement in the program, become Head Start volunteers. Because of this positive experience, many then go on to pursue an education in early childhood development, often becoming paid Head Start staff. As a testament to its impact, Head Start Programs will employ nearly 25,000 parents of current or former Head Start children in 1990.

Given the success of Head Start, it is no surprise that State and Federal legislators, State governments, child development specialists, and business leaders alike are unanimous in their support for increased funding for Head Start. I, too, believe that more needs to be done to expand Head Start to serve more eligible children. The President made a substantial step last year by proposing a $250 million increase and delivered on the promise of continued support for Head Start by recommending a $500 million increase for fiscal year 1991.

I must express concern, however, with the funding authorization levels in this bill. The committee approved a $1 billion increase for fiscal year 1991. This represents a 72-percent increase over last year's post-sequester funding level. Is this a realistic authorized funding level increase in light of the Gramm-Rudman budget deficit target? I think not. Is it a responsible funding increase recommendation in light of our fiscal limitations? I think not. Furthermore, these unrealistic funding levels increase to over $7 billion by 1994.

The unfortunate consequence of such an unrealistic funding level recommendation is to place Head Start funding level decisions solely within the province of the Appropriations Committee. Everyone would like to be generous with Head Start and other successful programs, but I would rather see a serious request that will get the attention of the members of the Appropriations Committee.

There is a further, more important, consequence to unrealistic funding levels. Should Head Start receive a substantial increase, program expansion may move too quickly, without focusing on the aspects of the program that make it successful. If Head Start were to expand too quickly, it is possible that the quality of services to the children could suffer. Since there is a current shortage of early childhood development professionals, it would be impossible to expand Head Start quickly and also maintain beneficial child/staff ratios. While I do not know the optimal funding increase that would allow expansion of services in an orderly manner without hurting the quality of the program, I feel confident that a 72-percent increase is not the optimal level.

Aside from the authorization levels, I am pleased to support this reauthorization bill. I am particularly pleased that parent education and referral services have been accepted by the majority along with a one-time national assessment of Head Start and a longitudinal study. While all agree that Head Start is a good program, we lack statistical analysis of this. Moreover, we do not have any reliable comprehensive study on the long-term effectiveness of different Head Start approaches. I thank the ranking minority member, Mr. GOODLING, for his work in these areas and the majority for accepting these important changes.

In summary, Mr. Chairman, I want to lend my support to this legislation while noting my disagreement with the funding authorization levels that have been adopted. Head Start is deserving of congressional support and a responsible level of increased funding.

Mr. OWENS of Utah. Mr. Chairman, I rise in support of expansion of one of our most effective Federal programs. Twenty-five years ago, President Lyndon B. Johnson launched the national Head Start Program as part of this country's war on poverty. This year as we celebrate its silver anniversary, we can proudly say that the Head Start Program has achieved distinction of the highest merit. We acknowledge this program as one of our best success stories, and yet, we are serving less than 20 percent of all eligible candidates. Utah has a relatively small population, but there are nearly 5,000 eligible students who are not getting the opportunity for advancement that they deserve.

Since 1965, Head Start has provided educational, social, medical, dental, nutritional, and mental health services to more than 11 million children and their families across the Nation. Since 1965, this program has served more than 450,970 children each year. In Salt Lake County this year, 888 children are being assisted by the Head Start Program.

I would like to share with you one of Salt Lake County's Head Start success stories. Marie Augustine was a high school dropout with three daughters when her husband left her. Her family, and others' families in similar circumstances, were dependent on welfare until Marie and others helped organize the area's first Head Start Program. With local, State, and Federal assistance due in large part to Marie's perseverance, the program became a success. Marie became executive director of the program, and in 1985, she became director of the Salt Lake Area Community Action Agency Head Start Program, the second largest program in the Western States region.

Today I wish to commend Congressman KILDEE and especially Marie Augustine and all those involved in Salt Lake County who have made this program so successful that it is now almost unanimously and bipartisanly endorsed.

Mr. OWENS of New York. Mr. Chairman, I am pleased and proud to rise in support of H.R. 4151, the Human Services Reauthorization Act of 1990. While all of the programs reauthorized by this legislation are of immense importance to the people of the 12th Congressional District, including the Community Services Block Grant, Child Development Associate Scholarships, and Community Food and Nutrition Programs, I want, in particular, to highlight the breakthrough improvements H.R. 4151 makes in two programs that are vital to the education of disadvantaged children in this country: Head Start and Follow Through.

The bold, progressive vision of this legislation makes me optimistic about the future. With this initiative, there are faint signs that a perestroika U.S.A. may at last be emerging, that the tide is indeed turning, that we are reaching an end to the policies of neglect that have starved the minds, bodies, and spirits of millions of poor children in this country during the last decade.

Poverty is not an act of God; it is an act of state. The Government of the United States has the power and the resources to wipe out poverty. It has always had them. But it has not used them because a big lie has always blocked the way.

During the 1950's and 1960's we confronted and defeated the first big lie—the lie that there was no poverty in America. We won that battle only to find that the path was not—and still is not—clear. Effective action to eradicate poverty and end the misery that depletes America has since that time been obstructed by two more big lies—the lie that nothing works and the lie that we cannot afford to act.

Head Start has met and bested the big lie that nothing works. Stacks upon stacks of evaluation studies have documented its shining success in changing the lives of disadvantaged young people. Children who have participated in Head Start perform better in school; they are less likely to be placed in special education or held back a grade; they are more likely to complete high school and

pursue college or other postsecondary education; and they are less likely to be arrested for delinquent or criminal behavior, become teen parents, or be dependent on welfare. On average each dollar invested in Head Start yields a total return of $6 in additional tax receipts generated by better and greater employment and earnings and in savings in public assistance and costs associated with criminal activity and special education. Head Start works.

This reauthorization shoves aside the second big lie that we cannot afford to act against poverty. Sufficient funding is authorized by H.R. 4151 to provide Head Start services to every eligible 3- and 4-year-old and 30 percent of eligible 5-year-olds by fiscal year 1994. This legislation affirms that we can afford to act. We can do what is right for the poor children of America.

From the first day I joined the House in 1983, the conventional wisdom, uttered over and over and again and again, has been that the U.S. Government cannot afford to adequately fund programs for people in general—and poor people in particular—because of the monumental size of the budget deficit. But when we really want to find the money for something, we do; exceptions to the conventional wisdom have often been made. There have been few major natural disasters over the last decade that the Congress and President have not responded to with generosity, compassion, and great speed. Budget deficit or not, we find the money to help when people are victimized by droughts, floods, and hurricanes.

But there are other disasters ripping through America today and none is more pernicious than poverty. H.R. 4151 recognizes that we can and must find the money to help the youngest and most vulnerable victims of this awful man-made disaster. Warping and abbreviating lives in neighborhoods across America, the destructive force of poverty is just a terrible as that of any tornado or earthquake you will ever see. And with this legislation the Congress can begin to respond to the plight of poor children in America with just a portion of the compassion and generosity with which we reflexively shower Americans who are victims of natural disasters.

Authorizing full funding for Head Start is a momentous step in and of itself, but H.R. 4151 goes beyond that to also assure that Head Start services will continue to be of the highest quality. It does this by targeting a share of the program's annual appropriations for activities necessary to maintain and improve the quality of local Head Start Programs. This provision has been made necessary by the administration's cynical and politically expedient efforts to squeeze program costs, shortchanging training and staff salaries, in order to drive up the number of children enrolled in Head Start. This short-sighted cost-cutting has caused serious problems for Head Start Programs in New York, making it impossible for them to provide the kind of salaries they need to attract and retain quality personnel. Countless able and committed Head Start teachers and aides have had to leave the program in recent years to take jobs in the public schools or other child development programs because they could not afford to live on the meager salaries offered by Head Start. H.R. 4151 responds to this growing crisis by setting aside 10 percent of Head Start's appropriations in fiscal year 1991 and 25 percent in subsequent years for salary increases and other quality improvement activities. These funds would be allocated among the States according to the existing formula. During the first 2 years these funds would be distributed among grantees in each State based on the relative number of children they serve; in later years, the amount each grantee receives would be negotiated as part of the regular process for determining grantee funding levels, although every grantee must receive some share of the funds. These funds would be in addition to the cost-of-living increases the Department is already required to provide to grantees.

Grantees must use at least half of the quality improvement funds they receive to increase staff salaries. The remaining funds could be used for hiring additional staff, transportation, insurance, modest facility improvements, and other uses which would be determined by the Secretary.

FOLLOW THROUGH

The only serious criticism or complaint that has been registered against Head Start in recent years has been that its effects on children do not last long enough. What we have seen in some studies is that the great intellectual and social gains some children make as a result of their participation in Head Start can be lost within a few years unless they receive appropriate followup services in elementary and secondary school. Missing the point entirely, some neanderthals on the far right have tried to use these studies to argue against funding Head Start at all. H.R. 4151 offers a more thoughtful and appropriate response to this problem by reauthorizing and revitalizing the Follow Through Program.

Follow Through was originally created during the Johnson administration to literally follow through and build upon the developmental gains children made in Head Start. It was envisioned as a direct service program for elementary school children that would be comparable to Head Start in its size and in the extent of services offered to children and their parents. Unfortunately, however, the program has never attained the funding it has needed to fullfill this kind of role and in recent years has been struggling for survival against constant assaults by the Reagan and Bush administrations.

Even under these very difficult circumstances, Follow Through has still managed to be remarkably effective. The Follow Through Program sponsored by the Bank Street College of Education at PS 243 in the Bedford-Stuyvesant neighborhood of my congressional district, for example, has made an important difference in the lives of the children and families it serves. Approximately 450 low-income youngsters enrolled in kindergarten through third grade are served at PS 243; about 80 percent of them previously participated in Head Start, Project Giant Step, or other comparable preschool programs. Follow Through has enabled these children to maintain and strengthen the gains they made in preschool and has helped PS 243 to become a successful school in an extraordinarily difficult environment. More than 70 percent of its students continue to achieve at or above grade level on city-wide tests at the second grade.

Through a rich curriculum, Follow Through students at PS 243 are encouraged to use language, writing, drawing, and other forms of representations to communicate their understanding to each other and to the adults who work with them. Recognizing the importance of experience to the healthy development of children, the curriculum attempts to provide firsthand experiences that allow children to expand their understanding of the world. Follow Through students, for example, have been active participants in anthropological digs at the nearby Weeksville Houses, one of the oldest free African-American communities in the United States. Artifacts collected by the children have become part of a minimuseum which is maintained at the school.

Follow Through has also dramatically strengthened the involvement of parents and other family members in the education of the school's students. On a recent night, more than 270 fathers and father surrogates came out with their children to participate in "Fathers' Night" at the school. "Grandparents' Day" brings out hundreds of grandparents to the school every year to visit with their grandchildren and participate in other events.

Follow Through and other staff have also made many efforts to address the serious, unmet health and social services needs of many of the school's students. The effects of the "crack" epidemic on this neighborhood have been devastating. Many children live in formal, as well as informal foster care situations because their parents have died or are unable to care for them. Some teachers try to address the unique needs of these and other students by making home visits accompanied by the Follow Through neighborhood worker; other teachers show their special concern for these children and families in other ways. The program sponsor and the principal of PS 243 have also been active in trying to locate alternative sources of funding for the special health and social services the children need but do not now receive. Many of these services had been provided through the original Follow Through Program, but are now no longer encouraged by the Department of Education because of the program's very limited funding in recent years.

H.R. 4151 recognizes the unrealized potential of the Follow Through Program and seeks to restore its originally envisioned role as an important partner with Head Start in the education of low-income children. Sufficient funding is authorized to dramatically expand the program to provide services in many more schools and to permit existing programs to provide the more enriched and comprehensive services that they have been unable to offer in recent years. The legislation also encourages the provision of services at more than one school site and during the summer months to meet the educational needs of children when they are not in school.

This is an important, ground-breaking initiative and I salute the chairman of the subcommittee, Mr. KILDEE, for his leadership in making it happen. I urge my colleagues to support H.R. 4151 without amendment.

Mr. MATSUI. Mr. Chairman, this year as we celebrate the 25th anniversary of Head Start we have the opportunity to reaffirm our commitment to this important program and to the low-income youth who benefit from the services provided by Head Start.

Since its creation, Head Start has reached more than 11 million children through the educational, health, nutritional, and social services the program provides. Sadly, this figure is only a small portion of the children who are eligible and would benefit from these services.

Before us today is a bill that gives us the opportunity to improve on this figure. H.R. 4151 would reauthorize and expand the Head Start Program so that by 1994, all eligible children will be able to participate in Head Start and receive the services so critical to their development.

The Head Start Program has a proven track record in getting low-income children off to a solid educational start. It has been shown through many studies that children who have participated in Head Start are more likely to succeed educationally than are their peers who do not have this advantage. It is time to act on this commitment to early childhood education and pass H.R. 4151.

The future of the United States is dependent upon the success of programs such as Head Start. If the children of today are to be adequately prepared to become the work force of the future, Congress must reaffirm its commitment to Head Start and the other social services programs included in H.R. 4151. These programs all serve a tremendous need throughout the country, in the form of community-based child care resource and referral programs under the State Dependent Care Development Grants Act and nutritional services and drug prevention and education services provided by the Community Services Block Grant.

Taken together, programs like these—Head Start, the Follow Through Program, the Community Services Block Grant, the State Dependent Care Development Grants Act, and the Community Food and Nutrition Program—make a tremendous contribution to the well-being and social and economic development of the Nation's low-income children, and to the economic well-being of the country.

Now is the time for Congress to act on its commitment to children and families across the country and pass this important human resources reauthorization legislation.

Mr. BRENNAN. Mr. Chairman, I support H.R. 4151, the 1990 Human Services Reauthorization Act. This is one of the more critical bills for low-income families, children, and individuals throughout the Nation. This is a bill which can help people themselves. It can move people off public assistance and into independent living situations.

The largest portion of this bill is for Head Start. Mr. Chairman, I have spoken on this floor previously about the positive effect Head Start has on at-risk youth. Only about 1,600 kids in my home State of Maine receive Head Start services. But these kids have that educational, social, and nutritional edge to carry with them as they meet new challenges. In addition to the quality improvements, I urge my colleagues to support expansion of Head Start so that by 1994 all eligible families and children will have access to these proven effective, life-long services.

Another highlight in this bill is the Community Services Block Grant Program. Maine has been a consistent beneficiary of this program. Corporations in my home State use these funds to leverage outside resources to build jobs and opportunities for low-income and disadvantaged individuals. These funds provide employment, self-employment, and job training, for AFDC recipients and people with disabilities.

I believe the greatest human service the Federal Government can offer our people is a job. The greatest human service department we can offer is a family whenever possible. I urge support of H.R. 4151 as a positive step toward ensuring educational and economic opportunities exist for individuals and families throughout the United States.

Mr. CRAIG. Mr. Chairman, today we will consider the Human Services Reauthorization Act of 1990. This reauthorization covers a number of important programs, including Head Start. While I am a strong supporter of the Head Start Program, I have a number of concerns regarding technical problems with the bill, as well as the increases in spending on a number of the programs that this bill authorizes.

I am not here to dispute the importance of the Head Start Program, or the other worthy programs this bill reauthorizes. But we must balance the needs of Federal programs within the limits of the Federal budget. We are already seeing Congress head down the road to overspending—the kind of overspending, Mr. Speaker, that leads to sequestration. H.R. 4151 reauthorizes the Head Start Program at $2.4 billion in fiscal year 1991—above the targets this House set in the 1991 budget resolution.

Congress can work toward achieving our Nation's goals in education without contributing to our spiraling budget deficit. The President's budget request for Head Start was the largest single funding increase in the history of the program—$500 million or 36 percent, providing access for 180,000 new children. This expansion was a fiscally responsible move toward our goal to provide a Head Start experience to every eligible child.

Mr. RANGEL. Mr. Chairman, I am pleased to support passage of H.R. 4151, the Human Services Reauthorization Act of 1990. In particular, I want to comment on the provisions of the bill which reauthorize the Head Start Program through 1994. This year Head Start is celebrating its 25th year of success. For fiscal year 1991, $2,386,000,000 is provided and in fiscal year 1992 the figure is $4,273,000,000. The purpose of the Head Start Program is to improve the delivery of comprehensive health, educational, nutritional, social, and other services to economically disadvantaged children and their families.

The Head Start Program has laid the foundation for a successful life by many minority and disadvantaged children. There is a need, however, to expand the program, because despite its successful track record, Head Start has never served more than a quarter of eligible children.

H.R. 4151 provides for the authorization of appropriations sufficient to enable all eligible 3- and 4-year-olds and 30 percent of 5-year-olds to participate in the Head Start Program by 1994. Head Start funding would also be used to increase the abysmally low salaries paid to Head Start teachers, improve facilities, and pay transportation expenses of children.

H.R. 4151 also reauthorizes through fiscal year 1994 the Parent-Child Centers within the Head Start Program. For fiscal year 1991, $30 million would be authorized and for fiscal year 1992 the figure would be $31,200,000. The purpose of the Parent-Child Center is to provide early childhood intervention programs to enhance the development of children from birth to age 3. Many Head Start teachers found that children ages 3 to 5 who were enrolled in their programs were suffering from nutrition, health, and developmental deficits. Earlier intervention with younger children should help prevent these situations from occurring. I urge my colleagues to support passage of H.R. 4151.

As chairman of the Select Committee on Narcotics, I strongly support the expansion of early intervention and prevention programs like Head Start and the Parent-Child Centers. We are spending billions of dollars on drug interdiction, law enforcement, prisons, jails, and treatment to address the symptoms and consequences of the drug problem. These are necessary components of a strategy to fight drugs. We must however, also recognize and begin to address the underlying social and economic conditions that often make disadvantaged communities and individuals especially vulnerable to drug abuse and drug crime. These root causes include lack of educational opportunities, lack of access to health care, homelessness, joblessness, poverty—in short the lack of hope for a better future that leads to drugs and crime.

The preschool education and enrichment opportunities for poor and minority children that Head Start offers are the types of long-term antidotes to the rising problem of drugs and crime that we need to be supporting. Head Start has been one of the most successful crime and drug prevention programs of the last 25 years. The Committee for Economic Development [CED], a prestigious organization of over 200 business executives and educators, has called for full funding of Head Start, citing the need for an educated and qualified work force for our Nation to compete in global markets. In a 1985 report, the CED concluded that every dollar spent on prevention and early intervention through preschool for at-risk children can save $4.75 down the road in the costs of remedial education, welfare, and crime.

We will never win the drug war just by building more prisons, buying more planes, boats, radar, and sophisticated technology to interdict drugs or increasing the number of law enforcement officers on the streets. If we are serious about defeating drugs, we need to increase our investments in people to ensure opportunities for all our citizens to participate productively in society. Head Start exemplifies this type of investment. I urge all Members to support this important legislation.

Mr. DUNCAN. Mr. Chairman, I strongly support the Head Start Program. I think it is one of the finest programs the Federal Govern-

ment has. I want to do all we can for poor and disadvantaged children.

Yet, we harm all children if we destroy this Nation by adding on debts that are impossible to handle. Our national debt is presently $3.12 trillion. We cannot afford to keep adding billions and billions more to this staggering total.

That is why I cannot support an increase of over 300 percent during the next 2 years for the Head Start Program.

No matter how good a program is, with our current financial condition, this Nation simply cannot afford to double and even triple certain Federal departments or agencies.

This bill will increase Head Start funding from $1.4 billion in fiscal 1990 to $4.3 billion in fiscal 1992.

The President recommended a $500 million increase for Head Start for this fiscal year. This would be a 36 percent increase from $1.4 billion to $1.9 billion. I would have been pleased to have supported this recommendation even though this is far more than we can give to most programs.

The President's proposal would have provided for an expansion of 180,000 new eligible children and would have been more fiscally responsible.

To more than triple the Head Start Program over the next 2 years, funds will have to be taken from many other good, worthwhile projects.

I simply cannot support this huge an increase for any program when our country is so deeply in debt.

As we so often do here in the Congress, we are spending money we do not have.

Mr. GOODLING. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore (Mr. FLAKE). Pursuant to the rule, the bill is considered under the 5-minute rule by titles, and each title shall be considered as having been read.

The Clerk will designate section 1.

Mr. KILDEE. Mr Chairman, I ask unanimous consent that the committee amendment in the nature of a substate be printed in the RECORD and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The text of the committee amendment in the nature of a substitute is as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

*SECTION 1. SHORT TITLE.*

*This Act may be cited as the "Human Services Reauthorization Act of 1990".*

*TITLE I—AMENDMENTS TO THE HEAD START ACT*

*SEC. 101. AUTHORIZATION OF APPROPRIATIONS.*

*Section 639 of the Head Start Act (42 U.S.C. 9834) is amended—*

*(1) by striking "$1,198,000,000" and all that follows through "1989, and", and*

*(2) by inserting after "1990" the following: ", $2,386,000,000 for fiscal year 1991, $4,273,000,000 for fiscal year 1992, $5,924,000,000 for fiscal year 1993, and $7,660,000,000 for fiscal year 1994".*

*SEC. 102. RESERVATION OF FUNDS.*

*(a) RESERVATION OF FUNDS.—Section 640(a) of the Head Start Act (42 U.S.C. 9835(a)) is amended—*

*(1) in paragraph (1) by striking "and (3)" and inserting "through (5)",*

*(2) in paragraph (2)—*

*(A) in subparagraph (A)—*

*(i) by inserting "for each fiscal year" after "available", and*

*(ii) by striking "no less" and all that follows through "1985", and inserting "not less than the amount that was obligated for use by Indian and migrant Head Start programs for fiscal year 1990",*

*(B) in subparagraph (C) by striking "1982" and inserting "1990",*

*(C) by striking the penultimate sentence, and*

*(D) in the last sentence by inserting "or paragraph (3)" after "this paragraph",*

*(3) in paragraph (3) by striking "87 percent of the",*

*(4) by redesignating paragraphs (3) and (4) as paragraphs (5) and (6), respectively, and*

*(5) by inserting after paragraph (2) the following:*

*"(3)(A) For any fiscal year for which the amount appropriated under section 639(a) exceeds the adjusted appropriation, the Secretary shall reserve the quality improvement funds for such fiscal year, for one or more of the following quality improvement activities:*

*"(i)(I) Not less than one-half of the amount reserved under this subparagraph, to improve the compensation (including benefits) of staff of Head Start agencies and thereby enhance recruitment and retention of such staff. The expenditure of funds under this clause shall be subject to section 653.*

*"(II) If a Head Start agency certifies to the Secretary for such fiscal year that part of the funds set aside under subclause (I) to improve wages cannot be expended by such agency to improve wages because of the operation of section 653, the such agency may expend such part for any of the uses specified in the subparagraph (other than wages).*

*"(ii) To pay transportation costs incurred by Head Start agencies to enable eligible children to participate in a Head Start program.*

*"(iii) To employ additional Head Start staff, including staff necessary to reduce the child-staff ratio and staff necessary to coordinate a Head Start program with other services available to children participating in such program and to their families.*

*"(iv) To pay costs incurred by Head Start agencies to purchase insurance (other than employee benefits) and thereby maintain or expand Head Start services.*

*"(v) To make nonstructural and minor structural changes, and to acquire and install equipment, for the purpose of improving facilities necessary to expand the availability, or enhance the quality, of Head Start programs.*

*"(vi) Additional uses related to quality, as determined by the Secretary.*

*"(B)(i) Funds reserved under subparagraph (A) for a fiscal year shall be allotted by the Secretary among the States in the same proportion as the Secretary allots funds among the States under paragraph (5) for such fiscal year.*

*"(ii) To be expended for the activities specified in subparagraph (A) in the first fiscal and second fiscal years for which funds are required by such subparagraph to be reserved, the Secretary shall make a grant to each Head Start agency that receives a grant from funds allotted under paragraph (5) for such fiscal year, in the amount that bears the same ratio to the amount allotted under clause (i) for such fiscal year for the State in which such agency is located as the number of children participating in the Head Start program of such agency in such fiscal year bears to the number of children participating in all Head Start programs in such State in such fiscal year.*

*"(iii) To be expended for the activities specified in subparagraph (A) in each subsequent fiscal year for which funds are required by such subparagraph to be reserved, the Secretary shall make a grant to each Head Start agency that receives a grant from funds allotted under paragraph (5) for such fiscal year, in such amount as the Secretary considers to be appropriate. The aggregate amount of grants made under this clause to Head Start agencies in a State for a fiscal year may not exceed the amount allotted under clause (i) for such State for such fiscal year.*

*"(iv) If a Head Start agency certifies for such fiscal year to the Secretary that it does not need any funds under subparagraph (A), or does not need part of such funds it would otherwise receive under clause (ii) or (iii), then unneeded funds shall be used by the Secretary to make grants under this subparagraph without regard to such agency.*

*"(v) Funds received under this subparagraph shall be used to supplement, not to supplant, funds received under paragraphs (2), (4), and (5).*

*"(4)(A) The Secretary shall reserve $30,000,000 for fiscal year 1991, $31,200,000 for fiscal year 1992, $32,448,000 for fiscal year 1993, and $33,745,920 for fiscal year 1994 to make grants to Head Start agencies to carry out early childhood intervention programs, to be known as 'Parent-Child Centers', within Head Start programs.*

*"(B)(i) Such programs shall be designed—*

*"(I) to enhance the development of children who are less than 3 years of age; and*

*"(II) to strengthen the family unit by providing opportunities for increasing the child development skills and knowledge of their parents.*

*"(ii) Such programs shall provide comprehensive services (such as social, health, and educational services) to low-income families with children who are less than 3 years of age. Notwithstanding section 645(c), such programs may provide such services to any eligible family during any period of time and may be center-based, home-based, or a combination of both.*

*"(C) Funds reserved under subparagraph (A) for a fiscal year shall be allotted as follows:*

*"(i) 87 percent of such funds shall be allotted among the States in the same proportion as funds are allotted among the States under paragraph (5).*

*"(ii) 13 percent of such funds shall be used to—*

*"(I) increase the allotments made under clause (i) so that the allotment made under clause (i) for each State is not less than the amount expended in fiscal year 1990 by Head Start agencies in such State to carry out early childhood intervention programs of the kind described in subparagraph (B); and*

*"(II) to make payments for programs and services specified in paragraph (2)(A) and to make payments to entities specified in paragraph (2)(B) to carry out such programs.*

*"(D) The Secretary may not make a grant under this paragraph to a Head Start agency for a fiscal year unless such agency*

certifies that carrying out the early childhood intervention program for which such grant is requested will not reduce services provided by such agency to children who participate in its other programs under this subchapter.

"(E) For purposes of this paragraph, the term 'low-income family' means a family that satisfies the eligibility requirements applicable under section 645(a).".

(b) DEFINITION.—Section 637 of the Head Start Act (42 U.S.C. 9832) is amended—

(1) by redesignating paragraphs (1) through (3) as paragraphs (2) through (4),

(2) by inserting before paragraph (2), as so redesignated, the following:

"(1) The term 'adjusted appropriation' means—

"(A) with respect to the first fiscal year for which funds are required by section 640(a)(3)(A) to be reserved, 110 of the amount appropriated under section 639 for the preceding fiscal year, adjusted to reflect the percentage change in the Consumer Price Index For All Urban Consumers (issued by the Bureau of Labor Statistics) occurring in the 1-year period ending immediately before the fiscal year with respect to which a determination is made under section 640(a)(3)(A); and

"(B) with respect to the each subsequent fiscal year for which funds are required by section 640(a)(3)(A) to be reserved, the amount appropriated under section 639 for the preceding fiscal year adjusted to reflect the precentage change in the Consumer Price Index For All Urban Consumers (issued by the Bureau of Labor Statistics) occurring in the 1-year period ending immediately before the fiscal year with respect to which a determination is made under section 640(a)(3)(A).", and

(3) by adding at the end the following:

"(6) The term 'quality improvement funds' means—

"(A) with respect to the first fiscal year for which funds are required by section 640(a)(3)(A) to be reserved, 10 percent of the amount appropriated under section 639 for such fiscal year; and

"(B) with respect to the each subsequent fiscal year for which funds are required by section 640(a)(3)(A) to be reserved, 25 percent of the portion of the amount appropriated under section 639 for such fiscal year that eceeds the adjusted appropriation for such fiscal year.".

SEC. 103. REQUIREMENTS APPLICABLE TO THE SECRETARY.

(a) REPORT ON STATUS OF CHILDREN.—Section 640(d) of the Head Start Act (42 U.S.C. 9835(d)) is amended—

(1) in the last sentence—

(A) by inserting "submit a comprehensive" after "shall",

(B) by striking "handicapped children" and inserting "children (including handicapped children)", and

(C) by striking ", their handicapping conditions,", and

(2) by adding at the end the following:

"Such report shall include—

"(1) a statement for the then most recently concluded fiscal year specifying—

"(A) the amount of funds received by Head Start agencies designated under section 641 to provide Head Start services in a period before such fiscal year; and

"(B) the amount of funds received by Head Start agencies newly designated under section 641 to provide such services in such fiscal year;

"(2) a description of the distribution of Head Start services relative to the distribution of children who are eligible to participate in Head Start programs;

"(3) a statement identifying how funds expended under section 640(a)(2), and grants made under section 640(a)(3), were distributed and used as national, regional, and local levels;

"(4) a statement specifying the amount of funds provided by the State, and by local sources, to carry out Head Start programs;

"(5) cost per child and how such cost varies by region;

"(6) employment status of parents;

"(7) teacher salaries and educational level;

"(8) number of recipients of benefits under title IV of the Social Security Act participating in Head Start programs;

"(9) the source of non-Federal funds used in such programs; and

"(10) the use and source of funds to extend Head Start services to operate full-day and year round.

Promptly after submitting such report to the Congress, the Secretary shall publish in the Federal Register a notice indicating that such report is available to the public and specifying how such report may be obtained.".

(b) GUIDELINES.—Section 640 of the Head Start Act (42 U.S.C. 9835) is amended by adding at the end the following:

"(f) The Secretary shall develop guidelines that define criteria to enable Head Start agencies to modify or implement their service delivery models.".

SEC. 104. COMPREHENSIVE HEAD START REPORT.

The Head Start Act (42 U.S.C. 9801 et seq.) is amended by inserting after section 640 the following:

"COMPREHENSIVE REPORT

"SEC. 640A. (a) The Secretary shall submit to the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate—

"(1) not later than July 1, 1993, an interim comprehensive report; and

"(2) not later than January 1, 1994, a final comprehensive report;

in accordance with this section.

"(b) The reports required by subsection (a) shall contain—

"(1) the information contained in the documents entitled 'Program Information Report' and 'Head Start Cost Analyses System' (or any document similar to either), prepared with respect to Head Start programs;

"(2) a description of the effect of the 1990 Decennial Census on the allotment of funds under this subchapter;

"(3) a description of the extent to which Head Start programs and local elementary schools coordinate their respective activities with each other and cooperate in providing activities;

"(4) a description of the extent to which social services in the communities are used by children who participate in Head Start programs and by their families;

"(5) separate descriptions of how this subchapter is administered by the headquarters of the Department of Health and Human Services and by its regional offices, including an analysis of the negotiations that occur between such regional offices and applicants for grants under this subchapter;

"(6) a description of the condition of facilities used by Head Start programs;

"(7) the results of recent studies evaluating the effectiveness of Head Start programs in meeting their goals;

"(8) a description of the impact of expending funds under paragraph (3) on staff qualifications, staff wages, and staff turnover of Head Start agencies; and

"(9) the matters specified in paragraphs (1) through (4) of section 640(d).

"(c) The Secretary shall meet periodically with the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate to inform the committees of the progress made in preparing the reports required by subsection (a).".

SEC. 105. DESIGNATION OF HEAD START AGENCIES.

Section 641(d) of the Head Start Act (42 U.S.C. 9836(d)) is amended by adding at the end the following: "In selecting from among qualified applicants for designation as a Head Start agency and subject to the preceding sentence, the Secretary shall consider the effectiveness of each such applicant to provide Head Start services, based on—

"(1) any past performance of such applicant in providing services comparable to Head Start services, including how effectively such applicant provided such comparable services;

"(2) the plan of such applicant to provide comprehensive health, nutritional, educational, social, and other services needed to aid participating children in attaining their full potential;

"(3) the plan of such applicant to coordinate the Head Start program it proposes to carry out, with other preschool programs and with the educational programs such children will enter at the age of compulsory school attendance;

"(4) the plan of such applicant to involve parents of children who will participate in the proposed Head Start program in appropriate educational services (in accordance with the performance standards in effect under section 651(b) or through referral of such parents to educational services available in the community) in order to aid their children to attain their full potential;

"(5) the ability of such applicant to carry out the plans described in paragraphs (2), (3), and (4); and

"(6) other factors related to the requirements of this subchapter.".

SEC. 106. POWERS AND FUNCTIONS OF HEAD START AGENCIES.

Section 642 of the Head Start Act (42 U.S.C. 9837) is amended—

(1) in subsection (b) by striking "and (4)" and inserting the following: "(4) involve parents of children participating in its Head Start program in appropriate educational services (in accordance with the performance standards in effect upon section 651(b) or through referral of such parents to educational services available in the community) in order to aid their children to attain their full potential; and (5)", and

(2) in subsection (c)—

(A) by inserting ", and schools that will subsequently serve," after "serving", and

(B) by striking "agency to carry out the provisions of this subsection" and inserting "program, to carry out this subchapter".

SEC. 107. ADMINISTRATIVE COSTS.

The first sentence of section 644(b) of the Head Start Act (42 U.S.C. 9839(b)) is amended by inserting "the required" after "including".

SEC. 108. NEUTRALITY.

Section 644 of the Head Start Act (42 U.S.C. 9839) is amended by adding at the end the following:

"(e) Funds appropriated to carry out this subchapter shall not be used to assist, promote, or deter union organizing.".

SEC. 109. PARTICIPATION IN HEAD START PROGRAMS.

The last sentence of section 645(a)(2) of the Head Start Act (42 U.S.C. 9840(a)(2)) is amended by striking "1990" and inserting "1994".

SEC. 110. NOTICE AND HEARING.

Section 646 of the Head Start Act (42 U.S.C. 9841) is amended—

(1) by inserting "(a)" after "SEC. 646.",

(2) in paragraph (3) by inserting "or reduced" after "terminated", and

(3) by adding at the end the following:

"(b) The Secretary may not prescribe any procedure that would modify the operation of section 1303.21 or 1303.33, or any of subdivisions (a) through (f) of section 1303.35, of part 1303 of chapter XIII of the Code of Federal Regulations as in effect on April 1, 1990.".

SEC. 111. ROUTINE EVALUATIONS.

Section 651 of the Head Start Act (42 U.S.C. 9846) is amended—

(1) by redesignating subsections (c) through (f) as subsections (d) through (g), respectively, and

(2) by inserting after subsection (b) the following:

"(c)(1) Subject to paragraph (3) and in addition to evaluations carried out under subsection (a), the Secretary shall carry out in each fiscal year a comprehensive evaluation of not less than one-third of the Head Start programs for which funds are received under this subchapter in such fiscal year.

"(2) In carrying out an evaluation under paragraph (1) of each Head Start program, the Secretary shall—

"(A) to the maximum extent practicable, carry out such evaluation by using employees of the Department of Health and Human Services who are knowledgeable about Head Start programs;

"(B) ensure that an employee of the Department of Health and Human Services who is knowledgeable about Head Start programs supervises such evaluation at the site of such program; and

"(C) measure the compliance of such program with the performances standards in effect under subsection (b).

"(3) Each Head Start program shall be evaluated under paragraph (1) not less frequently than once in each 3-year period.".

SEC. 112. LONGITUDINAL STUDY OF HEAD START PARTICIPANTS.

"(a) STUDY REQUIRED.—The Head Start Act (42 U.S.C. 9801 et seq.) is amended by inserting after section 651 the following:

"LONGITUDINAL STUDY OF HEAD START PARTICIPANTS

"SEC. 651A. (a) The Secretary shall conduct, through contracts with qualified persons, a longitudinal study of the effects that the participation in Head Start programs has on the development of children and their families.

"(b) In carrying out the study required by subsection (a), the Secretary shall establish an advisory panel to provide advice and guidance to the Secretary and to the persons who carry out such study, regarding the design and execution of such study. Such panel shall be composed of—

"(1) individuals who have—

"(A) expertise in the current operation of Head Start programs;

"(B) professional background in child development and related fields,

"(C) experience in the evaluation of Head Start programs and comparable programs; and

"(2) individuals who have expertise in designing and executing large-scale longitudinal studies.

"(c) Each study required by subsection (a) shall be carried out during a period of not less than 20 years, shall be based on a sample representing the national population and various subpopulations, and shall include information on—

"(1) the characteristics of the Head Start program included in such study;

"(2) the children participating in such programs and their families;

"(3) the effects of each Head Start program included in such study on the children participating in such program and on their families, including—

"(A) the effects of receiving Head Start services during more than one year;

"(B) the effects of such program on the parent-child relationship;

"(C) the long-term and short-term effects of such program on the health of such children and their families; and

"(D) changes that occur in the community in which such program operates, caused by the effects described in subparagraphs (A), (B), and (C);

"(4) the school grades, grade retention, motivation, special education placement, secondary school graduation, delinquency, college attendance, welfare participation and employment of such children; and

"(5) variables that sustain gains as such children move through the primary grades.

"(d) To the maximum extent feasible, the study required by subsection (a) shall provide for comparisons with appropriate control groups composed of individuals who do not participate in Head Start programs.

"(e) While each study required by subsection (a) is being carried out, the Secretary shall submit to the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate—

"(1) periodic reports on the progress of such study; and

"(2) for the Head Start programs included in such study, the information specified in subsection (c).".

(b) AUTHORIZATION OF APPROPRIATIONS.—Section 639 of the Head Start Act (42 U.S.C. 9834) is amended—

(1) by inserting "(a)" after "SEC. 639.",

(2) by inserting "(other than section 651A)" after "subchapter", and

(3) by adding at the end the following:

"(b) There are authorized to be appropriated such sums as may be necessary to carry out section 651A for fiscal years 1991 through 2011.".

SEC. 113. POVERTY LINE.

(a) ISSUANCE OF POVERTY LINE.—Subsection (a) of section 652 of the Head Start Act (42 U.S.C. 9847(a)) is amended to read as follows:

"(a) The Secretary shall issue annually (or at any shorter interval the Secretary considers to be feasible and desirable) a poverty line which, except as provided in section 645, shall be used as a criterion of eligibility for participation in Head Start programs.".

(b) DEFINITION.—Section 637 of the Head Start Act (42 U.S.C. 9832), as amended by section 102(b), is amended by adding at the end the following:

"(5) The term 'poverty line' means—

"(A) the official poverty line (as defined by the Office of Management and Budget) adjusted to reflect the percentage change in the Consumer Price Index For All Urban Consumers, issued by the Bureau of Labor Statistics, occurring in the 1-year period or other interval immediately preceding the date such adjustment is made; or

"(B) the poverty line (including any revision thereof) applicable to this subchapter for fiscal year 1990, adjusted to reflect the percentage change in the Consumer Price Index For All Urban Consumers, issued by the Bureau of Labor Statistics, occurring in the period beginning October 1, 1989, and ending immediately before the date such adjustment is made;

whichever is greater.".

(c) TECHNICAL AMENDMENTS.—Section 652 of the Head Start Act (42 U.S.C. 9847) is amended—

(1) by striking subsection (b), and

(2) in subsection (c) by striking "(c) Revisions required by subsection (a) shall be made and issued" and inserting "(b) The poverty line shall be determined by the Secretary".

SEC. 114. AUTHORITY OF SECRETARY.

Section 645(c) of the Head Start Act (42 U.S.C. 9840(c)) is amended by adding at the end the following: "The Secretary may not issue or enforce any rule (as defined in section 551(4) of title 5 of the United States Code) or guideline that forbids any Head Start agency to carry out a Head Start program in accordance with the authority described in the preceding sentence.".

SEC. 115. DETERMINATION REQUIRED.

Not later than 3 years after the date of the enactment of this Act, the Secretary of Health and Human Services shall—

(1) determine—

(A) whether Head Start services are provided effectively nationwide in family day care settings, and

(B) how such services should be designed to be provided in such settings to ensure their high quality and comprehensiveness, and

(2) publish in the Federal Register the determination made under paragraph (1) and a summary of the facts relied upon by the Secretary to reach such determination.

SEC. 116. TECHNICAL AMENDMENTS.

Section 643 of the Head Start Act (42 U.S.C. 9838) is amended—

(1) by striking "Governor" the first place it appears and inserting "chief executive officer", and

(2) by striking "Governor" the second and third places it appears and inserting "such officer".

## TITLE II—AMENDMENTS TO THE FOLLOW THROUGH ACT

SEC. 201. TECHNICAL AMENDMENTS.

Subchapter C of Chapter 8 of Subtitle A of title VI of the Omnibus Budget Reconciliation Act of 1981 (42 U.S.C. 9801–9861) is amended—

(1) by inserting after section 661 the following: "PART I—DIRECT SERVICES", and

(2) in section 668 by striking "this subchapter" each place it appears and inserting "part I".

SEC. 202. FINANCIAL ASSISTANCE FOR FOLLOW THROUGH PROGRAMS.

(a) PROVISION OF ASSISTANCE.—Section 662 of the Follow Through Act (42 U.S.C. 9861) is amended—

(1) in the first sentence of subsection (a) by inserting "quality pre-school" after "similar",

(2) in subsection (c)—

(A) in the first sentence by striking "this section shall provide such" and inserting "this part shall use model Follow Through approaches for which financial assistance is provided under section 664A and shall provide", and

(B) by striking "project" and inserting "program", and

(3) by adding at the end the following:

"(d) The Secretary may not refuse to provide financial assistance under subsection (a) to an applicant solely because such applicant proposes to carry out a Follow Through program during a period in which school is not in regular session, at more than one site, or both.

"(e)(1) In making grants under subsection (a), the Secretary shall provide sufficient funds to enable programs to meet the requirements of subsection (c).

"(2) If the aggregate amount appropriated for a fiscal year to carry out this subchapter exceeds $15,000,000, the amount of each such grant shall be not less than $200,000.".

(b) TECHNICAL AMENDMENT.—Section 662(c) of the Follow Through Act (42 U.S.C. 9861(c)) is amended by striking "projects" and inserting "programs".

SEC. 203. APPLICATIONS AND FUNDING.

The Follow Through Act (42 U.S.C. 9801-9861) is amended by striking section 663 and inserting the following:

"CONSIDERATION OF APPLICATIONS

"SEC. 663. (a) IN GENERAL.-A grant under this part may be made only to an applicant that submits an application to the Secretary containing such information as may be required by the Secretary by rule.

"(b) CONTENTS OF APPLICATION.—Each application shall—

"(1) provide that the program for which assistance is requested will be administered by or under the supervision of the applicant;

"(2) provide for the proper and efficient administration of such program;

"(3) provide for regular evaluation of such program;

"(4) provide that regular reports on such program shall be sent to the Secretary;

"(5) estimate the number of children who are eligible for Follow Through services in the geographical area served by such program and the approximate number to be served by such program;

"(6) describe which model Follow Through approach the applicant intends to use, and the manner in which the applicant will implement such approach;

"(7) provide evidence that the applicant has made a formal arrangement to receive technical assistance and training relative to such approach from an appropriate agency, institution, or organization that receives funds under section 664A;

"(8) provide an assurance that the instructional program, including textbooks and other materials provided by the applicant, is appropriate to the ages and developmental needs of the children to be served by such program and to the model Follow Through approach selected;

"(9) provide for direct participation of parents, as provided in section 662(c), and include a certification that such application has been approved by a committee (established in accordance with rules issued by the Secretary) that represents parents of children who participate, and parents of children who are likely to participate, in such program;

"(10) describe how the applicant proposes to coordinate services under this part with services under chapter 1 of title I of the Elementary and Secondary Education Act of 1965, the Bilingual Education Act, and the Education of the Handicapped Act;

"(11) provide evidence that the applicant has formally arranged with local Head Start programs and other preschool programs for such cooperation and activities as will ensure an effective transition of eligible children entering the Follow Through program carried out by such applicant; and

"(12) describe the expected or, if possible, actual impact of such program on the applicant's regular school program.".

SEC. 204. PROGRAM IMPROVEMENT.

(a) RESEARCH, EVALUATION, AND RELATED MATTERS.—The Follow Through Act (42 U.S.C. 9801-9861) is amended by striking section 664 and inserting the following:

"PART II—PROGRAM IMPROVEMENT

"RESEARCH

"SEC. 664. (a) The Secretary may provide financial assistance, through grants and contracts, to public and private nonprofit agencies, institutions, and organizations to conduct research—

"(1) to improve Follow Through approaches; and

"(2) to meet the special needs of children who are eligible to participate in Follow Through programs.

"(b) In providing assistance under this subsection (a), the Secretary shall give priority to applicants that have experience in developing, administering, or evaluating Follow Through programs or model Follow Through approaches.

"TECHNICAL ASSISTANCE AND TRAINING

"SEC. 664A. The Secretary shall make grants to public and private nonprofit agencies, institutions, and organizations—

"(1) to provide technical assistance to assist in the development, implementation, and expanded use of model Follow Through approaches; and

"(2) to provide training in conjunction with the operation of Follow Through programs or other programs that adopt such approaches.

"RESOURCE AND EXPANSION

"SEC. 664B. The Secretary may make grants to entities which operate, or previously operated, Follow Through programs that the Secretary had found to be effective—

"(1) to act as Follow Through resources to develop and provide information on the operation of their respective programs;

"(2) to promote the adoption of similar programs by local educational agencies; and

"(3) to assist agencies, institutions, and organizations that receive funds under section 664A, in providing technical assistance and training.

"NATIONAL CLEARINGHOUSE

"SEC. 664C. (a) If the amount appropriated to carry out this subchapter exceeds $19,000,000, then the Secretary shall make a grant to an organization that represents entities referred to in sections 662, 664A, and 664B to establish a national clearinghouse on Follow Through programs (hereinafter in this section referred to as the clearinghouse), which shall provide information, without charge or at such reasonable cost as the Secretary may determine, to the public concerning—

"(1) programs that receive financial assistance under section 662;

"(2) model Follow Through approaches;

"(3) the kinds of technical assistance and training available under section 664A;

"(4) the procedure to obtain technical assistance and training available under section 664A; and

"(5) Follow Through research and evaluations.

"(b) The Secretary shall make available to the clearinghouse all research and evaluations that relate to Follow Through programs and for which the Secretary provides, or has ever provided, funds.

"(c)(1) The Secretary shall promote the awareness and use of model Follow Through approaches by—

"(A) informing recipients of grants and contracts under section 1562 of the Elementary and Secondary Education Act of 1965 of the types of information received by the clearinghouse; and

"(B) making all information received by the clearinghouse available without charge to such recipients.

"(2) From the funds appropriated for each fiscal year to carry out this part, the Secretary shall expend—

"(A) not less than $100,000 to pay the costs incurred by such recipients to disseminate information relating to such approaches; and

"(B) not less than $300,000 to carry out this section.".

(b) CONFORMING AMENDMENT.—The Follow Through Act (42 U.S.C. 9801-9861) is amended by striking section 667.

SEC. 205. RESEARCH AND EVALUATION CONTRACTS.

Section 665 of the Follow Through Act (42 U.S.C. 9864) is amended—

(1) in the heading of such section by striking ", DEMONSTRATION, AND PILOT PROJECT" and inserting "AND EVALUATION", and

(2) in subsection (a)(1) by striking ", demonstration, or pilot project" and inserting "or evaluation".

SEC. 206. EVALUATION.

Section 666(a) of the Follow Through Act (42 U.S.C. 9865(a)) is amended by striking the last sentence.

SEC. 207. GENERAL AND ADMINISTRATIVE PROVISIONS.

(a) AUTHORIZATION OF APPROPRIATIONS.—The Follow Through Act (42 U.S.C. 9801-9861) is amended by inserting after section 666 the following:

"PART III—GENERAL AND ADMINISTRATIVE PROVISIONS

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 667. (a) There are authorized to be appropriated to carry out this subchapter $8,436,000 for fiscal year 1990, $20,000,000 for fiscal year 1991, $30,000,000 for fiscal year 1992, $40,000,000 for fiscal year 1993, and $50,000,000 for fiscal year 1994.

"(b) Of the amount appropriated for each fiscal year to carry out this subchapter—

"(1) 70 percent shall be available to carry out part I; and

"(2) 30 percent shall be available to carry out part II.

"(c)(1) Financial assistance provided under part I for a Follow Through program shall not exceed 80 percent of the approved costs of the program assisted, except that the Secretary may approve assistance in excess of such percentage if the Secretary determines, in accordance with rules establising objective criteria, that such action is required to carry out such part.

"(2) Non-Federal contributions may be in cash or in kind, fairly evaluated, including plant, equipment, and services.

"(3) The Secretary may not require non-Federal contributions in excess of 20 percent of the approved costs of the Follow Through program assisted.

"(d) An application for assistance under this subchapter may not be approved unless the Secretary is satisfied that the services to be provided under this chapter by such applicant will be in addition to, and not in substitution for, services previously provided without Federal assistance. The requirement imposed by the preceding sentence shall be subject to such rules as the Secretary may issue.".

(b) CONFORMING AMENDMENT.—Section 670 of the Follow Through Act (42 U.S.C. 9861 note) is repealed.

SEC. 208. PARTICIPATION IN OTHER EDUCATIONAL ACTIVITIES.

The Follow Through Act (42 U.S.C. 9801-9861) is amended by inserting after section 669 the following:

"PARTICIPATION IN OTHER EDUCATIONAL ACTIVITIES

"SEC. 669A. The Secretary shall facilitate the participation of entities that receive funds under sections 664A and 664B in training and technical assistance activities carried out under other Federal programs that provide assistance to children in elementary schools.".

SEC. 209. TECHNICAL AMENDMENT.

Section 668(a) of the Follow Through Act (42 U.S.C. 9867(a)) is amended by inserting "programs and" before "projects".

TITLE III—AMENDMENTS TO THE STATE DEPENDENT CARE DEVELOPMENT GRANTS ACT

SEC. 301. AMENDMENTS TO THE STATE DEPENDENT CARE DEVELOPMENT GRANTS ACT.

Section 670A of the State Dependent Care Development Grants Act (42 U.S.C. 9871) is amended—

(1) by striking "is authorized" and inserting "are authorized",

(2) by striking "1987, 1988, 1989, and", and

(3) by inserting after "1990" the following: "and 1991, and such sums as may be necessary for fiscal years 1992, 1993, and 1994".

SEC. 302. WAIVER OF EXISTING PERCENTAGE SET-ASIDE OF ALLOTMENTS.

(a) AUTHORITY TO GRANT WAIVER.—Section 670D(c) of the State Dependent Care Development Grants Act (42 U.S.C. 9874(c)) is amended—

(1) by redesignating paragraphs (1) and (2) as subparagraphs (A) and (B), respectively,

(2) by striking "Of" and inserting "(1) Except as provided in paragraph (2), of", and

(3) by adding at the end the following:

"(2) For any fiscal year the Secretary may waive the percentage requirements specified in paragraph (1) on the request of a State if such State demonstrates to the satisfaction of the Secretary—

"(A) that the amount of funds available as a result of one of such percentage requirements is not needed in such fiscal year for the activities for which such amount is so made available; and

"(B) the adequacy of the alternative percentages, relative to need, the State specifies the State will apply with respect to all of the activities referred to in paragraph (1) if such waiver is granted.".

(b) SITES OF SCHOOL-AGE CHILD CARE SERVICES.—Section 670D(b)(1) of the State Dependent Care Development Grants Act (42 U.S.C. 9874(b)(1)) is amended by striking "in public" and all that follows through "communities".

SEC. 303. TECHNICAL AMENDMENTS.

(a) USE OF ALLOTMENTS.—Section 670D of the State Dependent Care Development Grants Act (42 U.S.C. 9874) is amended—

(1) in the first sentence of subsection (a)(1) by striking "for fiscal year 1985 and fiscal year 1986",

(2) in the first sentence of subsection (b)(1) by striking "for fiscal year 1985 and fiscal year 1986",

(3) in subsection (b)(2)—

(A) in subparagraph (D)—

(i) by inserting "school-age children," after "diverse", and

(ii) by inserting a comma after "children" the last place it appears, and

(B) in subparagraph (F)—

(i) by striking "Governor" and inserting "chief executive officer of the State", and

(ii) by striking "the provisions of",

(4) in subsection (d)(1) by striking "subsection (a)" and inserting "subsections (a) and (b)",

(5) in subsection (f) by striking ", which prior to the date of enactment of this subchapter, are provided" and inserting "which are provided before the date of the enactment of this subchapter,", and

(6) in subsection (g) by striking "operating activities to be carried out" and inserting "carrying out activities".

(b) APPLICATION AND DESCRIPTION OF ACTIVITIES.—The last sentence of section 670E(c) of the State Dependent Care Development Grants Act (42 U.S.C. 9875(c)) is amended by striking "until September 30, 1987,".

(c) DEFINITIONS.—Section 670G of the State Dependent Care Development Grants Act (42 U.S.C. 9877), is amended—

(1) in paragraph (2)(C) by striking "a person" and inserting "an individual",

(2) in paragraph (7) by inserting "in" after "State" the first place it appears, and

(3) in paragraph (10) by striking "Trust Territory of the Pacific Islands," and inserting "Federated States of Micronesia, the Republic of the Marshall Islands, Palau,".

TITLE IV—AMENDMENTS TO THE COMMUNITY SERVICES BLOCK GRANT ACT

SEC. 401. AUTHORIZATION OF APPROPRIATIONS.

(a) GENERAL AUTHORIZATION OF APPROPRIATIONS.—Section 672(b) of the Community Services Block Grant Act (42 U.S.C. 9901(b)) is amended—

(1) by striking "is authorized" and all that follows through "1989, and", and inserting "are authorized to be appropriated",

(2) by inserting after "1990," the following: "$451,500,000 for fiscal year 1991, $460,000,000 for fiscal year 1992, $480,000,000 for fiscal year 1993, and $500,000,000 for fiscal year 1994", and

(3) by inserting "(other than section 681A)" after "subtitle".

(b) AUTHORIZATION OF APPROPRIATIONS FOR COMMUNITY FOOD AND NUTRITION PROGRAMS.—Section 681A(c) of the Community Services Block Grant Act (42 U.S.C. 9910a(c)) is amended—

(1) by striking "each of the fiscal years 1987, 1988, 1989, and" and inserting "fiscal year", and

(2) by inserting after "1990" the following: ", $10,000,000 for fiscal year 1991, $15,000,000 for fiscal year 1992, $18,000,000 for fiscal year 1993, and $20,000,000 for fiscal year 1994".

SEC. 402. ELIGIBLE ENTITIES.

(a) DEFINITION.—The second sentence of section 673(1) of the Community Services Block Grant Act (42 U.S.C. 9902(1)) is amended—

(1) by inserting "and" before "any grantee", and

(2) by striking ", and any organization" and all that follows through "1984".

(b) METHOD OF DESIGNATION.—The third sentence of section 673(1) of the Community Services Block Grant Act (42 U.S.C. 9902(1)) is amended—

(1) by striking "In" and inserting "If",

(2) by striking "not presently" and inserting "is not, or ceases to be,",

(3) by striking "Governor" and inserting "chief executive officer",

(4) in subparagraph (C) by inserting after "new area." the following: "In making a designation under this subparagraph, such chief executive officer shall give priority to such organization.", and

(5) by striking "The Governor's" and inserting "Such officer's".

SEC. 403. STATE ALLOCATIONS.

Section 674(a) of the Community Services Block Grant Act (42 U.S.C. 9903(a)) is amended—

(1) by redesignating paragraph (2) as paragraph (3), and

(2) by inserting after paragraph (1) the following:

"(2)(A) Subject to subparagraph (B), if the amount appropriated under section 672 for each fiscal year which remains after—

"(i) the Secretary makes the apportionment required in subsection (b)(1); and

"(ii) the Secretary determines the amount necessary for the purposes of section 681(c); exceeds $345,000,000, the Secretary shall allot to each State not less than one-half of 1 percent.

"(B) Subparagraph (A) shall not apply with respect to a fiscal year if the amount allotted under paragraphs (1) to any State—

"(i) is less than the amount allotted under such paragraph to such State for fiscal year 1990; or

"(ii) exceeds 140 percent of the amount allotted under such paragraph to such State for the fiscal year preceding the fiscal year for which a determination is made under this paragraph.".

SEC. 404. DISCRETIONARY AUTHORITY OF SECRETARY.

(a) PLANNING AND DEVELOPMENT OF RURAL RENTAL HOUSING.—Section 681(a)(2)(D) of the Community Services Block Grant Act (42 U.S.C. 9910(a)(2)(D)) is amended by striking "rural housing and community facilities development" and inserting "the planning and development of rural housing (including rental housing for low-income individuals) and community facilities".

(b) ACTIVITIES FOR LOW-INCOME YOUTH.—Section 681 of the Community Services Block Grant Act (42 U.S.C. 9910) is amended—

(1) is subsection (a)(2)(F) by striking "recreational activities" and inserting "instructional activities described in subsection (b)",

(2) by redesignating subsections (b) and (c) as subsections (c) and (d), respectively, and

(3) by inserting after subsection (a) the following:

"(b) Any instructional activity carried out under subsection (a)(2)(F) shall be carried out on the campus of an institution of higher education (as defined in section 1201(a) of the Higher Education Act of 1965) and shall include—

"(1) access to the facilities and resources of such institution;

"(2) an initial medical examination and follow-up referral or treatment, without charge, for youth during their participation in such activity;

"(3) at least one nutritious meal daily, without charge, for participating youth during each day of participation;

"(4)(A) high quality instruction in a variety of sports, provided by coaches and teachers from institutions of higher education and from secondary schools (as defined in section 1471(21) of the Elementary and Secondary Education Act of 1965); or

"(B) another high quality recreational activity; and

"(5) enrichment instruction and information on matters relating to the well-being of

youth, such as educational opportunities and study practices, the prevention of drug and alcohol abuse, health and nutrition, career opportunities, and job opportunities.".

SEC. 405. COMMUNITY FOOD AND NUTRITION.

Section 681A of the Community Services Block Grant Act (42 U.S.C. 9910a) is amended—

(1) by striking subsection (b),

(2) by redesignating subsection (c) as subsection (d); and

(3) by inserting after subsection (a) the following:

"(b)(1) Of the amount appropriated for a fiscal year to carry out this section, the Secretary shall allot funds for grants under subsection (a) as follows:

"(A) From 60 percent of such amount (but not to exceed $6,000,000), the Secretary shall allot for grants to eligible agencies for statewide programs in each State the amount that bears the same ratio to 60 percent of the amount appropriated for such fiscal year as the low-income and unemployed populations of such State bear to the low-income and unemployed populations of all the States.

"(B) From 40 percent of such amount (but not to exceed $4,000,000), the Secretary shall allot for grants on a competitive basis to eligible agencies for local and statewide programs.

"(2) Of the amount appropriated for a fiscal year to carry out this section that remains after making the allotments required by paragraph (1), the Secretary shall allot funds for grants under subsections (a) and (c) as follows:

"(A) From 50 percent of such remaining amount, the Secretary shall allot funds for the purpose and in the manner specified in paragraph (1)(A).

"(B) From 50 percent of such remaining amount, the Secretary shall allot funds for the purpose and in the manner specified in paragraph (1)(B), and for the purposes specified in subsection (c).

"(3) The Secretary may not make a grant to an eligible agency with funds allocated under paragraphs (1)(A) or (2)(A) unless such agency demonstrates to the Secretary that the statewide program such agency proposes to carry out with such grant consists of activities that—

"(A) represent a comprehensive and coordinated effort to alleviate hunger throughout the State involved; and

"(B) will be carried out throughout such State.

"(4) Except as provided in subsection (c), from funds allotted under paragraphs (1)(B) and (2)(B) in any fiscal year, the Secretary may not make grants under subsection (a) to an eligible agency in an aggregate amount exceeding $50,000.

"(c) From funds allotted under subsection (b)(2)(B) for a fiscal year, the Secretary shall make—

"(1) one or more grants, in an aggregate amount of not less than $50,000 and not more than $250,000, to public and private nonprofit agencies to provide, to entities that provide nutrition-related services to low-income individuals, training and technical assistance that focus on nutrition needs that are common to several regions of the United States or that require a national strategy; and

"(2) one or more grants, in an aggregate amount of not less than $100,000 and not more than $500,000, to public and private nonprofit agencies to carry out research and demonstration projects designed to develop knowledge, or demonstrate new approaches, that are relevant to alleviating hunger and malnutrition in the United States. Such grants shall be made to applicants based on—

"(A) the extent to which the proposed projects will effectively alleviate hunger nationwide; and

"(B) the ability of the applicants to carry out their respective proposed projects.".

SEC. 406. ANNUAL REPORT.

(a) REPORT REQUIRED.—The Community Services Block Grant Act (42 U.S.C. 9901-9912) is amended by striking section 682 and inserting the following:

"ANNUAL REPORT

"SEC. 682. (a)(1) For each fiscal year beginning after September 30, 1991, the Secretary shall, by contract with an entity that is knowledgeable about programs and projects assisted under this subtitle, prepare a report containing the following information:

"(A) The identity of each eligible entity, agency, organization, and person that receives, directly or indirectly, funds to carry out this subtitle in such fiscal year.

"(B) With respect to each particular purpose or activity referred to in section 675(c)(1)—

"(i) the aggregate amount of such funds expended in such fiscal year to achieve such purpose or carry out such activity; and

"(ii) the number of individuals who directly benefited from the amount so expended.

"(2) For any fiscal year beginning after September 30, 1991, the Secretary may, by contract, include in such report any additional information the Secretary considers to be appropriate to carry out this subtitle, except that the Secretary may not require a State to provide such additional information until the expiration of the 1-year period beginning on the date the Secretary notifies such State that such additional information will be required to be provided by such State.

"(3) The Secretary may not carry out this subsection by entering into a contract with any State, eligible entity, agency, organization, or person that receives, directly or indirectly, funds to carry out this subtitle.

"(b) Not later than 60 days after the end of the fiscal year for which a report is required by subsection (a) to be prepared, the Secretary shall transmit to the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate—

"(1) such report in the form in which it was received by the Secretary; and

"(2) any comments the Secretary may have with respect to such report.

"(c) Of the funds made available under section 681(d), not more than $250,000 shall be available to carry out this section.".

"(b) CONFORMING AMENDMENT.—Section 681(d) of the Community Services Block Grant Act (42 U.S.C. 9910), as so redesignated by section 404(b)(2), is amended by inserting ", section 682," after "this section".

SEC. 407. TECHNICAL AMENDMENT.

Section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2)) is amended by striking "for all Urban" and inserting "For All Urban".

## TITLE V—AMENDMENTS TO THE CHILD DEVELOPMENT ASSOCIATE SCHOLARSHIP ASSISTANCE ACT OF 1985

SEC. 501. ADEQUACY OF SCHOLARSHIPS.

(a) TRAINING ASSISTANCE.—Section 603(b)(1)(C) of the Child Development Associate Scholarship Assistance Act of 1985 (42 U.S.C. 10902(b)(1)(C)) is amended by inserting "(including, at the option of the State, any training necessary for credentialing)" after "credentialing".

(b) LIMITATION.—Section 603(b) of the Child Development Associate Scholarship Assistance Act of 1985 (42 U.S.C. 10902(b)) is amended—

(1) in paragraph (1)(C) by striking "and" at the end,

(2) by redesignating paragraph (2) as paragraph (3), and

(3) by inserting after paragraph (1) the following:

"(2) not more than 20 percent of the funds received under this title by a State may be used to provide scholarship assistance under paragraph (1) to cover the cost of training described in paragraph (1)(C); and".

SEC. 502. DEFINITIONS.

Section 604 of the Child Development Associate Scholarship Assistance Act of 1985 (42 U.S.C. 10903) is amended—

(1) is paragraph (1) by striking "poverty line, as defined in section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2))" and inserting "125 percent of the lower living standard income level",

(2) by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively, and

(3) by inserting after paragraph (1) the following:

"(2) the term 'lower living standard income level' means that income level (adjusted for regional, metropolitan, urban, and rural differences and family size) determined annually by the Secretary of Labor and based on the most recent lower living family budget issued by the Secretary of Labor;".

SEC. 503. AUTHORIZATION OF APPROPRIATIONS.

Section 606 of the Child Development Associate Scholarship Assistance Act of 1985 (42 U.S.C. 10904) is amended—

(1) by striking "is authorized" and inserting "are authorized",

(2) by striking "each of the fiscal years 1987, 1988, and 1989, and" and inserting "fiscal year", and

(3) by inserting after "1990" the following: ", $3,000,000 for fiscal year 1991, and such sums as may be necessary for fiscal years 1992, 1993, and 1994".

## TITLE VI—AMENDMENTS RELATING TO DEMONSTRATION PARTNERSHIP AGREEMENTS ADDRESSING THE NEEDS OF THE POOR

SEC. 601. AUTHORIZATION OF APPROPRIATIONS.

Section 408(g) of the Human Services Reauthorization Act of 1986 (42 U.S.C. 9910b(g)) is amended—

(1) by striking "$5,000,000" and all that follows through "1989, and",

(2) by inserting after "1990," the following: "$10,000,000 for fiscal year 1991, and such sums as may be necessary for fiscal years 1992, 1993, and 1994".

## TITLE VII—EFFECTIVE DATES

SEC. 701. EFFECTIVE DATES.

(a) GENERAL EFFECTIVE DATE.—Except as provided in subsection (b), this Act and the amendments made by this Act shall take effect on October 1, 1990.

(b) SPECIAL EFFECTIVE DATES.—(1) The amendments made by sections 101, 207(a), 301, 401, 503, and 601 shall take effect on the date of the enactment of this Act.

(2) The amendment made by section 207(b) shall take effect immediately before October 1, 1990.

*(3) Section 646(b) of the Head Start Act, as added by section 110, shall take effect on April 1, 1990.*

AMENDMENTS OFFERED BY MR. KILDEE

Mr. KILDEE. Mr. Chairman, I offer amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN pro tempore. The Clerk will report the amendments.

The Clerk read as follows:

Page 19, line 12, strike "9801 et seq." and insert "9831-9852".

Page 25, strike lines 4 through 6 and insert the following:

The Follow Through Act (42 U.S.C. 9861-9877) is amended—

Page 26, line 16, strike "9801-9861" and insert "9861-9877".

Page 29, line 3, strike "9801-9861" and insert "9861-9877".

Page 32, line 7, strike "9801-9861" and insert "9861-9877".

Page 32, line 22, strike "9801-9861'" and insert "9861-9877".

Page 34, line 14, strike "9801-9861" and insert "9861-9877".

Mr. KILDEE (during the reading). Mr. Chairman, I ask unanimous consent that the amendments offered en bloc be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. KILDEE. Mr. Chairman, these amendments are purely technical. They simply correct several section references. The minority has seen the amendments, and I know of no objection to their adoption.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Michigan [Mr. KILDEE].

The amendments were agreed to.

AMENDMENT OFFERED BY MR. TAUKE

Mr. TAUKE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TAUKE:

Page 25, after line 12, insert the following:

(a) PRIORITY.—Section 662(a) of the Follow Through Act (42 U.S.C. 9861(a)) is amended by adding at the end the following: "For the purpose of making grants under this section, the Secretary shall give priority to any local educational agency that requests the grant for purposes of carrying out a Follow Through program in a school that—

"(1) is designated as a schoolwide project under section 1015(a) of the Elementary and Secondary Education Act of 1965; and

"(2) has a high concentration of children described in the first sentence of this subsection.".

Page 25, line 13, strike "(a)" and insert "(b)".

Page 26, line 11, strike the closing quotes and the second period.

Page 26, after line 11, insert the following:

"(f) Notwithstanding subsection (c), any local educational agency that receives a grant under subsection (a) for purposes of carrying out a Follow Through program in an elementary school that—

"(A) receives funds under part A of chapter 1 of title I of the Elementary and Secondary Education Act of 1965; and

"(B) is designated as a schoolwide project under section 1015(a) of such Act;

may use such grant to serve all children attending such school in kindergarten through grade 3.

Page 26, line 12, strike "(b)" and insert "(c)".

Page 28, line 20, strike "and".

Page 28, strike line 23 and insert the following:

school program; and

Page 28, after line 23, insert the following:

"(13) contain—

"(A) a certification that the applicant submitted such application to the State educational agency (as defined in section 1471(23) of the Elementary and Secondary Education Act of 1965) for a reasonable period for comment before submitting such application to the Secretary; and

"(B) any comments received from such agency during such period;

if such application is for a grant under sectoin 662.".

Page 29, line 7, strile "(a)".

Page 29, line 11, strike "and" at the end.

Page 29, after line 11, insert the following:

"(2) to develop model follow through through approaches; and

Page 29, line 12 strike "(2)" and insert "(3)".

Page 29, strike lines 14 through 17.

Page 30, after line 3, insert the following:

"(b) Technical assistance with respect to a particular model Follow Through approach may not be provided under subsection (a)(1) in more than 5 fiscal years to a particular recipient of financial assistance under section 662(a).

Page 30, line 18, strike "exceeds $19,000,000" and insert "is not less than $3,000,000".

Page 32, strike lines 18 and 19, and insert the following:

Section 666(a) of the Following Through Act (42 U.S.C. 9865(a)) is amended—

(1) by striking the last sentence and inserting "Such continuing evaluation shall measure the impact of such programs on participating parents and on entire schools and school districts in which such programs are carried out.",

(2) by inserting "(1)" after "(a)", and

(3) by adding at the end the following:

"(2) The evaluation required by paragraph (1) shall include evaluations of local educational agencies that receive Follow Through grants for use in a school that is designated as a schoolwide project under section 1015(a) of the Elementary and Secondary Education Act of 1965. Such evaluation shall compare children who only receive services under a grant under chapter 1 of title I of the Elementary and Secondary Education Act of 1965 with children who receive services under such a grant and under a Follow Through grant for the purpose of determining whether the comprehensive services provided to the latter children through the model Follow Through approach had a positive effect on their educational progress and overall developmental progress. To the extent practicable, such comparison shall be made on the basis of results of evaluations conducted under such chapter and evaluations conducted under this subsection, and shall take into account the amount of funds provided to the project.".

Page 33, line 5, strike "$84,436,000" and insert "$10,000,000".

Page 33, line 15 strike "Financial" and insert "Except as provided in paragraph (4), financial".

Page 34, after line 3, insert the following:

"(4) Financial assistance provided under part I for a Follow Through program carried out in an elementary school that—

"(A) receives funds under part A of chapter 1 of title I of the Elementary and Secondary Education Act of 1965; and

"(B) is designated as a schoolwide project under section 1015(a) of such Act;

may be expended to pay 100 percent of the approved costs of the program assisted.

Page 34, line 21, insert the following before the first period:

, including programs and activities carried out under chapter 1 of title I of the Elementary and Secondary Education Act of 1965.

Mr. TAUKE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. TAUKE. Mr. Chairman, this amendment reflects the agreements that have been struck between the majority and the minority on the follow through program. It is an attempt to build on the efforts of Congressman KILDEE to strengthen the Follow Through Program. This amendment has strong bipartisan support on the committee and it is enthusiastically supported by the National Follow Through Association.

Follow Through was a program established almost simultaneously with Head Start in order to follow up on Head Start graduates as the entered elementary school.

Follow Through, because of departmental regulations, became more of a demonstration project for effective educational strategies and has never fulfilled its initial purpose. Its current funding level is approx. $7.6 million.

Now 20 years later, our biggest and most steadfast education program for disadvantaged elementary school students is not Follow Through, it is chapter 1 funded at over $5 billion.

Even with chapter 1's presence felt in so many schools across the Nation, we still have a problem with follow up on Head Start Kids and other children from compensatory preschool programs.

This is partly because Head Start has done a good job for these children and in many cases the children do not have the educational deficiencies required to participate in chapter 1.

However, it is clear that these children need additional services because studies show that while it is clear that Head Start graduates achieve immediate gains in IQ tests and school per-

formance, the progress gained in Head Start is lost only after a few years. Focusing on this fact does not mean we lessen our support for Head Start it means that we take a hard look at what is needed to ensure that student progress is maintained.

Chapter 1, if expanded, could have something to offer these children. We should not attempt to expand a $7 million program to the size and scope of Head Start and Chapter 1 when we would do better to develop ways to coordinate these two very large programs. The theory behind my amendment is that in years to come chapter 1 should provide a continuum of services to Head Start children but this will take time. What my amendment propose to do is to allow the Follow Through Program, which has been built on the strengths of Head Start to serve as a bridge between Head Start and chapter 1 as we more toward our goal.

The Tauke amendment requires the Secretary of Education to give priority to grants going to school-wide project schools that have a high concentration of Head Start or other preschool children. A chapter 1 school is designated a school-wide proejct if it has a population of 75 percent or more in poverty. School-wide projects receive chapter 1 funds in a block grant form. They can serve all children in the school, not only those determined to be educationally disadvantaged, and they can use the funds for virtually any purpose, so long as they can demonstrate that they have improved the overall education program in the school.

The amendment targets these schools because they will be able to serve Head Start children and other chapter 1 eligible students together, using an innovative Follow Through approach.

However, in making this priority we must make clear that it is not our intent to direct the Secretary to make Follow Through grants only to schoolwide projects and it is our hope that the Secretary will give equitable consideration to school districts in both rural and urban areas.

Chapter 1 has enormous flexibility in how it structures a school-wide project. My amendment removes certain eligibility restrictions in Follow Through so that Follow Through will be able to serve all children K-3 in a school. While Follow Through funds must be used to implement a model education approach for children in grades K-3, there are no remaining restrictions in Follow Through that would prohibit chapter 1 school-wide funds from being combined with Follow Through funds to apply the same educational approach to a wider population in the school and this is our hope and our reason for targeting schoolwide projects.

This approach will allow us to look at the ability and the efficacy of chapter 1 to serve a broader population with more comprehensive services like that of Follow Through and Head Start.

The amendment allows for the development of new Follow Through approaches. We have models that are effective but that have been in existence for 20 years. It's important to open up the field for innovative thinkers.

The amendment would limit the amount of time a school could receive technical assistance to 5 years. If a school cannot implement an educational model in 5 years, it's probably time to try a new approach or new school.

The amendment raises the funding trigger for a National Clearinghouse on Follow Through from $19 million to $30 million. There are many who would like to see this program dissolve. We are at the early stages to this effort and a clearinghouse for such a small and somewhat shaky program is not appropriate at this time.

A cornerstone of the amendment is a strong evaluation component which will attempt to assess the impact of additional comprehensive services found in Follow Through on chapter 1 students who might normally only receive educational assistance. The evaluation would consider the extent to which these additional services have a demonstrable impact on the educational progress of these children. The evaluation will also measure the impact of the Follow Through program on parents and school districts in which the program is found.

The amendment would raise the first year authorization level from $8.436 million to $10 million. This sends a message to the Appopriations Committee that this proposal deserves their serious consideration and support as it does yours.

I urge my colleagues to vote yes on this amendment.

□ 1300

Mr. KILDEE. Mr. Chairman, I rise in support of the Tauke amendment.

Mr. Chairman, the Tauke amendment provides that a school district which operates a school-wide chapter 1 program and has a high concentration of former Head Start children will be given priority in its application for a Follow Through grant.

This is an excellent addition to the bill, and I want to express my appreciation to the gentleman from Iowa [Mr. TAUKE] for his hard work on this amendment. The gentleman from Iowa [Mr. TAUKE], the gentleman from Pennsylvania [Mr. GOODLING], myself, and our respective staffs really worked hard and, I think, created a good amendment here. I think we also created some good will so we can look at things in the future in the fashion that we have looked at them here.

While preserving the programmatic integrity of a local Follow Through Program, this promotes a more coordinated use of Follow Through in chapter 1 schoolwide project funds. The amendment does not require school districts to use their chapter 1 funds to support the Follow Through Program. It is logical, however, to assume that based upon the needs of their students, some districts may choose to do so.

In agreeing to this amendment, it is my understanding that the Department of Education is to administer this new requirement as a simple application priority and not as a directive to fund only applications for school-wide projects.

Mr. Chairman, I again thank the gentleman from Iowa [Mr. TAUKE] for his contribution in offering this amendment, and I urge its adoption.

The CHAIRMAN pro tempore (Mr. FLAKE). The question is on the amendment offered by the gentleman from Iowa [Mr. TAUKE].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. TAUKE

Mr. TAUKE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TAUKE: Page 39, strike lines 10 through 15, and insert the following:

(a) DEFINITION.—The second sentence of section 673(1) of the Community Services Block Grant Act (42 U.S.C. 9902(1)) is amended by inserting before the period at the end the following: "(or if such organization declines to serve as an eligible entity, any community action agency that operates in the geographic area under the jurisdiction of such organization shall be an eligible entity)".

Page 41, after line 4, insert the following (and make such technical changes as may be necessary):

SEC. 404. APPLICATIONS AND REQUIREMENTS.

Section 675(c) of the Community Services Block Grant Act (42 U.S.C. 9904(c)) is amended—

(1) in paragraph (10) by striking "and" at the end,

(2) in paragraph (11) by striking the period at the end and inserting a semicolon, and

(3) by inserting after paragraph (11) the following:

"(12) in the case of a State which applied for and received a waiver from the Secretary under Public Law 98-139, provide assurances that any community action agency that received funding in the previous fiscal year under this Act, from an organization to which such State made a grant under this subtitle in fiscal year 1984, will not have its present or future funding substantially reduced unless—

"(A) after notice, and the opportunity for hearing on the record, such organization determines; and

"(B) after notice, and the opportunity for hearing on the record, such State determines;

that cause existed for such reduction subject to the procedures and review by the Secretary as provided in section 676A; and

"(13) in the case of a State which applied for and received a waiver from the Secretary under Public Law 98-139, provide assurances that funds will not be provided under this subtitle by such State to an organization to which such State made a grant under this subtitle in fiscal year 1984 unless such organization allows, before expending such funds, low-income individuals to comment on the uses for which such organization proposes to expend such funds.".

SEC. 405. PROCEDURES FOR REVIEW OF TERMINATION OF FUNDING.

Section 676A the Community Services Block Grant Act (42 U.S.C. 9906) is amended—

(1) in the heading by inserting "OR SUBSTANTIAL REDUCTION" after "TERMINATION",

(2) in subsection (a) by inserting ", or the assurances contained in section 675(c)(12) and substantially reduces the funding of a community action agency," after "organization" the first place it appears, and

(3) by inserting ", or any substantial reduction of funding to a community action agency protected by a State's assurances under section 675(c)(12)" before the period at the end.

Mr. TAUKE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. TAUKE. Mr. Chairman, one provision of H.R. 4151 eliminates the waiver language in current law which affects the CSBG Program in Colorado, Utah, and Wyoming. Although the situation in Colorado, Utah and Wyoming in 1984 justified granting them a waiver, it was never our intention to directly or indirectly have them replace existing community action agencies. Community action agencies have always been the intended recipients of CSBG funds.

Our goal in eliminating the waiver was to restore some stability to the existing private community action agencies. I will agree this may not have been the best solution to the problem and am, therefore, offering an amendment to restore the waiver and make several perfecting changes in the existing law.

The first part of the amendment will provide private community action agencies with the right to appeal to the county, the State, and ultimately HHS if their basic CSBG block grant funds are substantially reduced. It is difficult for community action agencies to provide consistent, effective services to the low-income community if they are uncertain from year to year as to the amount of CSBG fund they will receive. This amendment at least provides them the opportunity to appeal a substantial cut in funding if they believe their performance has not warranted such a reduction in funds.

The second part of my amendment permits those counties which receive funds in the waiver States to request that the State directly fund an eligible community action agency rather than have the funds first passthrough the county—as is currently the case. This language allows the counties in the waiver States to continue to make decisions about the use of CSBG funds—including decisions about whether or not they wish to continue administering the funds.

The final part of my amendment requires eligible entities in waiver States to involve low-income people in deciding how to best use CSBG funds to serve the needs of the low-income community. Currently, in the remaining 47 States members of the low-income community sit on a tripartite board and help decide what services are most needed by low-income individuals. This would allow similar participation by the low-income community in the waiver States. People who live in a community can often point out needs which would otherwise never have been considered. I believe this amendment will assist in assuring CSBG funds are used in the most effective manner.

Mr. Chairman, this amendment attempts to address the concerns of Representatives from the waiver States. I, of course, am quite willing to address any additional concerns in this regard during the House/Senate conference on H.R. 4151.

I believe this is a good faith effort to compromise on this issue and I urge my colleagues to adopt this amendment.

Mr. THOMAS of Wyoming. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I want to express my thanks to the chairman of the subcommittee and the gentleman from Iowa [Mr. TAUKE] for taking our unique interests into account.

This waiver does apply to low-density States such as Wyoming, and the legislation fits our needs much more with this amendment than it does without the waiver. So we appreciate very much the consideration that has been given to us here. It gives us the opportunity to touch the low-income people throughout our State even though the organization specifically represents only about 25 percent of Wyoming.

So we agree with the perfecting amendment the gentleman from Iowa [Mr. TAUKE] has offered here, and I certainly urge support of the amendment.

Mr. TAUKE. Mr. Chairman, will the gentleman yield?

Mr. THOMAS of Wyoming. I yield to the gentleman from Iowa.

Mr. TAUKE. Mr. Chairman, I wish to commend the gentleman from Wyoming [Mr. THOMAS] for his untiring efforts to make sure this issue is properly addressed. I hope now that we have reached an accord that will resolve the concerns of all the interested parties.

Mr. THOMAS of Wyoming. Mr. Chairman I thank the gentleman from Iowa, and I appreciate very much his efforts.

□ 1310

Mr. KILDEE. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, as the gentleman from Iowa [Mr. TAUKE] mentioned, there is no question about the efforts of the gentleman from Wyoming [Mr. THOMAS] which were untiring; he prevailed, the gentleman from Iowa [Mr. TAUKE] actually crafted the language, and I support the language. I think it is a good addition to the bill.

Mr. Chairman, I urge the adoption of this amendment.

Mr. CAMPBELL of Colorado. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Iowa [Mr. TAUKE].

Mr. Chairman, I rise today in support of Mr. TAUKE's amendment that addresses the way the community services block grant is administered. Colorado, along with Utah and Wyoming, have been operating their CSBG programs under a waiver provision that allows the grant money to be distributed through local county departments rather than a community action agency. Somehow, during the reauthorization process of this act, the waiver was dropped and it is extremely critical to restore it, which is one of the goals Mr. TAUKE's amendment accomplishes.

It is critical for Colorado to maintain this waiver, because it is my understanding that without it, only 20 percent of Colorado would be eligible to receive CSBG funding. That would be a devastating blow to many of the rural communities in my district that depend on these funds to promote economic self-sufficiency through such programs as job training and placement, child care, emergency services, drug prevention programs, and weatherization services.

I urge my colleagues to support this amendment.

The CHAIRMAN pro tempore (Mr. FLAKE). The question is on the amendment offered by the gentleman from Iowa [Mr. TAUKE].

The amendment was agreed to.

The CHAIRMAN pro tempore. Are there other amendments to the bill? If not, the question is on the committee amendment, in the nature of a substitute, as amended.

The committee amendment, in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN pro tempore. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the SPEAKER pro tempore (Mr. JACOBS) having assumed the chair, Mr. FLAKE, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4151) to authorize appropriations for fiscal years 1991 through 1994 to carry out the Head Start Act, the Follow Through Act, the Community Services Block Grant Act, and the Low-Income Home Energy Assistance Act of 1981, and for other purposes, pursuant to House Resolution 392, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The CHAIRMAN pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. KILDEE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 404, nays 14, not voting 14, as follows:

[Roll No. 111]

□ 1332

Mr. SAWYER changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

The title of the bill was amended so as to read: "A bill to authorize appropriations for fiscal years 1991 through 1994 to carry out the Head Start Act, the Follow Through Act, and the Community Services Block Grant Act; and for other purposes.".

A motion to reconsider was laid on the table.

## AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 4151, HUMAN SERVICES REAUTHORIZATION ACT OF 1990

Mr. KILDEE. Mr. Speaker, I ask unanimous consent that in the engrossment of the bill, H.R. 4151, the Clerk be authorized to correct section numbers. punctuation, and cross-references, and to make such other conforming changes as may be necessary to reflect the actions of the House in amending and adopting the bill, H.R. 4151.

The SPEAKER pro tempore (Mr. NAGLE). Is there objection to the request of the gentleman from Michigan?

There was no objection.

## GENERAL LEAVE

Mr. KILDEE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and include therein extraneous material, on H.R. 4151, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

## PERSONAL EXPLANATION

Mr. NELSON of Florida. Mr. Speaker, had I been present, I would have voted "aye" on rollcalls 109, 110, and 111.

## PERSONAL EXPLANATION

Mr. CLEMENT. Mr. Speaker, I was unable to be present for rollcalls 110 and 111. If I had been present, I would have voted "yea" on rollcall 110 and "yea" on rollcall 111.

## PERSONAL EXPLANATION

Mr. McEWEN. Mr. Speaker, recently it has come to my attention that I was recorded as having voted in the negative on rollcall 111, for H.R. 4151, the "Human Services Reauthorization Act of 1990." As a constant supporter of the programs encompassed in this legislation, and of the stability that they bring to lower income families in our Nation, this was neither my intent nor my desire, and I wish for the permanent record to reflect my position on this matter.

## PERSONAL EXPLANATION

Mr. OBERSTAR. Mr. Speaker, yesterday when the House of Representatives passed House Resolution 381, relating to human rights abuses by Cuba, rollcall No. 108, my vote was not recorded.

I was involved with the activities of the President's Commission on Aviation Security and Terrorism to which the Speaker appointed me, and was unable to attend that vote.

Had I been present, I would have voted "aye."

## PERSONAL EXPLANATION

Mr. WEISS. Mr. Speaker, yesterday I was unavoidably detained and missed the vote on House Resolution 381, human rights abuses in Cuba, rollcall vote No. 108. If I had been present yesterday, I would have voted in favor of the resolution.

## IN SUPPORT OF THE AID PACKAGE FOR PANAMA, EL SALVADOR, AND NICARAGUA

(Mr. DONALD E. "BUZ" LUKENS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks and to include extraneous material.)

Mr. DONALD E. "BUZ" LUKENS. Mr. Speaker, Congress ought to be ashamed. The United States is embarrassed. We have a moral commitment to Panama, to the people of Panama, the people of El Salvador, and the people of Nicaragua in Central America. They are our neighbors. For years we have talked about the good neighbor policy.

When the time comes to produce the minimum amount of dollars for people who really fought for freedom, Congress is not there. We really ought to accede to the President's request and pass the emergency package of aid for Central America as soon as possible for four reasons:

First, they have solved the military problem basically themselves in Panama with the help of American boys.

Second, economically they are in dire need of jump start money—not a lot. But it would pay off the United States, because in the 1980's when we had a positive balance of trade, Central America and Latin America accounted for 40 percent of that. As soon as they are back on their feet where they can choose to buy what they want, America is helped. This is a place where our pelple can benefit, and if for no other reason than that, aside from the moral reasons, the economic reason, and the political reason, certainly the purpose of helping ourselves, our own farmers and our own producers, is sufficient.

Mr. Speaker, we ought to pass that aid package now for Latin America and Central America, particularly Panama, El Salvador, and Nicaragua.

Following is a list of reasons we should consider while studying the need for immediate action on the administration's aid package for Central America.

### URGENCY OF AID PACKAGE FOR NICARAGUA

### ECONOMIC CRISIS

Without an immediate infusion of aid, farmers will not be able to buy the agricultural inputs—seeds, fertilizers, machinery, parts—necessary for a successful spring planting.

This would deal a severe blow to the Chamorro government's recovery program, which is based heavily on sharply increased agricultural production.

A slow start on economic recovery provides a golden opportunity for Sandinista efforts to undermine the new government.

The Sandinistas launched their obstructionist program well before the inauguration—looting government property, granting pay raises to state employees despite a bankrupt treasury, and passing lame-duck laws aimed at preventing the new government from trimming the bloated bureaucracy.

Those efforts are continuing: The Sandinistas have called widespread strikes among state workers to prevent Chamorro from revamping the civil service.

In view of this Sandinista obstructionism, we must move even more quickly to help Chamorro meet the expectations raised by her victory.

Rapid delivery is the key to the effectiveness of our assistance.

### CONTRA DEMOBILIZATION

According to the OAS, current food stocks in the security zones will last about 2 to 3 more weeks.

Food must be ordered 2 to 4 weeks in advance—cash up front.

Therefore, money is needed immediately to prevent a gap in food supplies.

If resistance members must forage for food, they could turn into bands of hungry marauders outside the security zones, risking contact with the Sandinista Army.

This could mean the unraveling of the demobilization process, a serious blow to what we have been working for under the bipartisan accord.

National reconciliation—a centerpiece of the Chamorro government's program and another key element of our own bipartisan accord—would be the likely casualty of a derailed demobilization process.

### EL SALVADOR NEGOTIATIONS AND ASSISTANCE

Both the government and the military want upcoming talks to succeed. We believe these talks are the best chance for achieving real peace since the conflict began.

As we here in Washington discuss military assistance for El Salvafor and how this may best achieve peace, I am concerned that the FMLN is playing a double game. They are talking peace while waging war and targeting the military and their families in order to provoke them into human rights abuses.

The guerrillas claim to be serious about these talks and have even pledged publicly to stop destroying the country's economic infrastructure and killing civilians, but are continuing to bomb, burn, and assassinate.

In March, the young, civilian son-in-law of the head of the Air Force was assassinated.

On April 3, the day before the U.N. Secretary-General announced the talks, an FMLN car bomb killed 6 policemen and 1 civilian and wounded over 40 policemen and civilians.

On May 1-2, the FMLN staged a series of military attacks across the country which left dozens dead and wounded, including civilians, and destroyed key facilities of the economic infrastructure.

These actions violate commitments by the FMLN to the Central American presidents and to the United Nations to cease attacks which affect the civilian population, and do not further the prospects for peaceful resolution of the conflict.

At the same time, the FMLN is playing to a Washington audience.

The most recent example of playing to the Washington audience came on May 9 when a senior guerrilla leader offered that the FMLN would cease receiving military aid from outside El Salvador if the United States terminated military aid to the Salvadoran Government.

This is an effort to negotiate with the United States directly, instead of seriously engaging the government. In addition, the proposal is fundamentally inequitable because our assistance is easily verifiable while FMLN resupply is clandestine.

### PANAMA TALKING POINTS

The United States has a moral and political obligation to help make Panama whole again, otherwise the 23 valiant young Americans who died there and the Panamanians who also gave their lives will have died in vain.

The need for assistance is not fictional; it is increasingly urgent.

The economic situation now is grave.

Unemployment, now at about 25 percent, is a real economic and political problem. In 1987, it was only 12 percent.

Panama's real GDP is down by over 27.5 percent since 1987.

Real and private investment has dropped to less than half its 1987 level.

Panama is 540 million USD in arrears with international financial institutions.

Given a one-time cash infusion to provide an economic "jump-start," Panama can use

its economic and financial infrastructure to recover quickly.

Without such a "jump-start" we run the risk that Panama will simply sink into an economic morass from which it will take many years to recover. That type of situation may eventually require a much larger U.S. contribution.

Panama's efforts to establish a truly professional civilian police agency to replace Noriega's corrupt and discredited defense forces also are placed increasingly at risk by the delays in our supplemental.

## INTRODUCTION OF THE AMERICAN JOBS STABILITY ACT

(Mr. HILER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HILER. Mr. Speaker, I introduce today the American Jobs Stability Act to help guard against plant relocations undertaken because of the Federal tax code.

As my colleagues know, under the possessions tax credit, or section 936 of the Internal Revenue Code, domestic companies can eliminate any Federal taxes owed on income generated by operations located in certain U.S. possessions, including Puerto Rico.

Creating a special category for business income earned in a U.S. possession was first codified in the Revenue Act of 1921. Since then, Congress reviewed the possessions credit in 1976, revised it in the Tax Equity and Fiscal Responsibility Act of 1982, and revised it again in the Tax Reform Act of 1986. In each of those instances, Congress decided that the credit served important roles in improving the quality of life for residents of possessions and in creating economic growth for them. These are individual goals.

However, the credit has been used in a way that Congress did not intend. Some companies are closing down plants and terminating jobs, and relocating them in U.S. possessions simply to take advantage of the favorable tax treatment.

Mr. Speaker, as I noted, two goals of the credit are to create new jobs and economic growth in U.S. possessions. But when jobs are created in one place only because they were cut in another, there is no net gain in employment, and the goal of creating new jobs is not met. If a plant is closed in one place and moved to another, economic activity has shifted, not grown, and our second goal is lost as well.

With this in mind, my bill simply denies the credit to companies that move their business operations to a possession if the relocation significantly and adversely affects the economy and employment of the area from which they moved: in other words if the operations are relocated or dramatically altered simply to take advantages of the credit. In short, the bill would extend to the possessions tax credit a similar prohibition against relocations that Congress has applied to other Federal programs, like Urban Development Action Grants.

Mr. Speaker, let me note in closing that Federal policies that award substantial competitive advantages to one group at the expense of another serve workers and our economy poorly and should be eliminated. This is especially true when people's livelihoods are threatened. By adopting this bill, Congress can close a loophole that has allowed companies to wander much too far from the intentions of section 936, and can help ensure that the credit is used to create true economic growth and new employment opportunities. I encourage my colleagues to support this measure.

The text of the bill follows:

H.R. 4831

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "American Jobs Stability Act of 1990".

SEC. 2. CONGRESSIONAL FINDINGS.

The Congress finds that the use of the possessions tax credit to assist the transfer of business operations from the United States to a possession (whether by direct relocation or by expansion) does not create new jobs and true economic growth, is contrary to the intent of the Congress in establishing the credit, and is harmful to workers in the United States when existing jobs are lost.

SEC. 3. DENIAL OF POSSESSIONS TAX CREDIT FOR CERTAIN RELOCATED BUSINESS OPERATIONS.

(a) IN GENERAL.—Subsection (a) of section 936 of the Internal Revenue Code of 1986 (relating to Puerto Rico and possession tax credit) is amended by adding at the end the following new paragraph:

"(4) DENIAL OF CREDIT FOR CERTAIN RELOCATED BUSINESS OPERATIONS.—

"(A) IN GENERAL.—For purposes of paragraphs (1) and (2), any income attributable to a disqualified relocated business operation shall be treated as income from sources within the United States.

"(B) DISQUALIFIED RELOCATED BUSINESS OPERATION.—For purposes of this paragraph—

"(i) IN GENERAL.—The term 'disqualified relocated business operation' means any business operation which is relocated (whether directly or by expansion) from the United States after the date of the enactment of the American Jobs Stability Act of 1990.

"(ii) BUSINESS OPERATION.—The term 'business operation' means any operation of a trade or business. The term includes any industrial or commercial plant, equipment, facility, position, employment opportunity, production capacity, or product line.

"(C) EXCEPTION.—Subparagraph (A) shall not apply to any taxable year for which the taxpayer establishes to the satisfaction of the Secretary that the relocation of the business operation—

"(i) did not, during such taxable year, significantly and adversely affect the level of employment, or the economic base, of the area from which the operation was relocated, and

"(ii) is not likely to have such effect during any subsequent taxable year."

"(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after December 31, 1989.

## A TRIBUTE TO BILL PHILLIPS

The SPEAKER pro tempore (Mr. PICKETT). Under a previous order of the House, the gentleman from Michigan [Mr. FORD] is recognized for 5 minutes.

Mr. FORD of Michigan, Mr. Speaker, Members who have been active in the Democratic Study Group and worked with or knew Bill Phillips were saddened by his unexpected death a few weeks ago. On March 29, family, friends, and colleagues met and exchanged remembrances of this former staffer who was so dedicated and highly respected.

Through Bill's tireless work, the DSG became the influential and indispensible organization we have all come to rely on today. Bill also served with distinction and honor in key staff positions on several House committees, and then went into the private sector where he continued working for the public good.

Because I am among those who worked with and admired Bill so much, I want to share with my colleagues what I think is an especially poignant tribute paid to Bill at that March 29 gathering. The eulogy to Bill from his friend and former associate, Jerry Zeifman, follows:

EULOGY FOR WILLIAM G. PHILLIPS

I am Jerry Zeifman. During the past few years Bill Phillips became both my closest friend, and my closest professional colleague. Our friendship and professional association, which began thirty years ago, were among the most gratifying of my life. For the rest of my own days I shall be forever grateful for having known and worked with Bill.

When I first came to Washington in the spring of 1961 to serve on the staff of the House Judiciary Committee, Bill Phillips had already been here for a number of years, and was then serving as the first Staff Director of the Democratic Study Group. I cannot remember the first time I met Bill—any more than I can remember the first time I had coffee in the Longworth cafeteria, had lunch at the Democratic Club, or walked through the rotunda of the Capitol. For me Bill has always been a major part of the landscape of Capitol Hill.

Before I came to Washington I had never heard of Bill Phillips or the Democratic Study Group. I was young, ignorant of legislative politics, and awe-struck to find myself here. I soon learned at least two of the lessons that Bill had learned much sooner than I: First, that everyone on Capitol Hill gets into their pants one leg at a time; and second, that what separates the men from the boys is that the boys all want to "be somebody," whereas the men want to "do something." In those years the founders of the Democratic Study Group were obviously among the men—and walking among the tallest of them in both a physical and moral sense was their very humane Staff Director, Bill Phillips.

The accomplishments of the Democratic Study Group during the sixties have had an indelible impact on all of our lives. It was the Democratic Study Group that paved the way for the enactment of the major civil rights laws and great social programs of our

century. Those of us who were here at the time still recall, with great pride, the stunning success of the 89th Congress whose achievements now stand as a monument to those good men and women who, with Bill, were among the early pioneers of the Democratic Study Group.

Let me just name a few of those wonderful human beings of whose contributions I have some personal knowledge, including such former Congressmen as Frank Thompson, Jim O'Hara, Lee Metcalf, George Rhodes (for whom Bill had previously served as an Administrative Assistant) Gene McCarthy, Dick Bolling and Charlie Vanik—as well as such extraordinarily gifted and dedicated staff members as Gene Krizek, John Morgan, Katie Miller-Johnson, Terry Corum, Bill Dietz, Fred Marshall, and Dick Warden.

Since John Morgan, who worked much more closely with Bill in those years than I, has already shared his memories with us today, I would like to talk about Bill as I came to know him in more recent years.

One morning five years ago, while walking toward the Rayburn Building, Bill and I met on Fourth Street and learned to our delight that each of us was looking for a person with whom we could share an office. Out of that meeting grew the opportunity for me to enjoy an association and friendship with Bill on a new and closer level.

I soon came to perceive Bill as the kindest man and the greatest gentleman I have known. Bill's demeanor often reminded me of a definition of the word "gentleman" that I first heard during World War II from a Navy Captain of the "old school"—who defined a "gentleman" as a "man who never unintentionally offended anyone." In that sense Bill himself was also very much of the "old school"—and truly believed that kindness, courtesy, and generosity of spirit are the hallmarks of virtue, and not the signs of weakness.

I also came to know Bill as a man of great, quiet strength and intense passions. He was passionately committed to his family, his friends, his country, his political party, and yes, the political institution that he loved and had served wholeheartedly, the United States House of Representatives.

I also knew Bill Phillips as a man who was devoid of avarice—who refused to subordinate his talents and his passions to the pursuit of wealth. Even after he left his position as Staff Director of the Committee on House Administration and entered the so-called "private sector", he remained truly a "public servant." As a lobbyist he put his clients' interests before his own and advocated only those causes in which he believed—the causes of education, health, safety, the environment, and of working men and women.

Finally, there was one cause in particular that Bill championed zealously and doggedly—and for which he never received any financial compensation. That cause was the National Council for Industrial Defense—of which he was a founder and served pro bono as president. The National Council was born in our office in 1986 out of Bill's irrevocable commitment to the cause of those Americans who contribute to the strength of our industrial base. Since then the National Council has consumed much of our time and energies. However, if we apply Mark Twain's definition of work as "whatever you are doing when you would rather be doing something else," the National Council has involved very little "work." It has been with relish and considerable delight that Bill has been intensively lobbying for our cause on Capitol Hill and has been the major force in investigating the unlawful procurements of foreign-made products which provided the basis for our pending law suit against the Department of Defense.

On January 12th the day before his untimely death, it was with exuberance that Bill reported our progress at a meeting of the National Council's Board of Directors. The next morning he appeared in our office and with similar exuberance reported to me he had won at poker the night before. A few minutes later, seated at his desk with his typewriter turned on and a lit cigar in the ash tray by his side, Bill died suddenly and quietly.

For Bill's family—his wife Maggie, her mother and her sons, and for his wonderful daughters Susan and Patricia—and for his friends of which I am proud to be but one of very many—the loss of Bill grieves us beyond words and beyond consoldation. Yet we can all take pride and still take joy from having known Bill. I suspect that in the future we may also enjoy a special benefit and blessing from having known Bill. If heaven in any way resembles the Congress of the United States—May God forbid—each of us may need at least one good lobbyist to help us gain access. In my view, the one lobbyist who has amassed the greatest measure of good will among the angels is Bill Phillips.

## NATIONAL GUARD AND RESERVES IN A CHANGING WORLD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. MONTGOMERY] is recognized for 5 minutes.

Mr. MONTGOMERY. Mr. Speaker, I want to continue to share with my colleagues a series of articles which appeared in the Roll Call newspaper in the April 30, 1990 edition in a special policy brief, titled "National Guard and Reserves In a Changing World." This brief was developed to describe the roles and missions of the Reserve components and to educate the readers. I wrote the lead article in hopes of generating interest by the readers to learn more about the Guard and Reserve. I commend by colleagues to read these articles to gain a better appreciation of the Guard and Reserve. Today I'm sharing another in the series of articles that appeared in that April 30 Roll Call edition.

### ARMY, NAVY, AIR FORCE—ALWAYS READY, WILLING, AND ABLE

Component chiefs are the senior officers responsible for the administration, training, and logistics for their respective components.

Here, Roll Call offers seven views from component chiefs on how things stand. The first item, by Lt. Gen. John Conaway, introduces these updates on the Guard and Reserves:

*Lt. Gen. John Conaway, National Guard Bureau:*

In 1989 it was commonplace to find Guardmembers training throughout the nation and the world, in virtually every theater of US military operations.

Roughly 40,000 Army and Air Guardmembers trained last year in 58 countries throughout Europe, Asia, the Caribbean, and Central and South America.

Last July, America was held in suspense as a United Airlines DC-10 made its fiery crash landing in an open cornfield in Sioux City, Iowa. Within minutes, Iowa Air National Guardmembers from the 185th Tactical Fighter Group were on the scene with fire and rescue teams, medical personnel, and volunteers.

On the West Coast, northern California witnessed the most powerful and destructive earthquake to hit the region in close to a century. Within the first hour of the quake, every unit in the California National Guard was alerted for possible activation.

Working through the night, Guardmembers from the Sacramento and San Francisco Bay areas assisted in relief efforts, providing vital services and resources not available to civilian agencies.

And one year ago this month, an oil spill the magnitude and size of which was never before seen in the US, crippled Prince William Sound, Alaska. The Alaska National Guard, in cooperation with the US Coast Guard and elements of the Active Army and Air Force, assisted in the massive clean-up efforts.

The threat to our environment is another emerging public policy issue that will dominate the American agenda in the next century. We in the Guard recognize the importance of protecting our environment and are committed to directing dedicated resources to identify and correct potential hazards to the environment.

We are confident that with the resources to back us, the '90s can be an era when civilian, military, and business communities pull together to institute proactive change in order to protect this most precious resource.

*Rear Admiral John Faigle, Office of Readiness & Reserve, Coast Guard:*

The Coast Guard has operated as a "Total Force" since long before the term came into vogue. While our primary mission is to maintain a high state of readiness in the event of mobilization for national security, it is the by-product of this mobilization for which our reservists are best known to the public.

Coast Guard reservists receive excellent training in operational skills necessary for mobilization, and the Coast Guard simultaneously receives additional support in carrying out assigned missions.

With augmentation training, the Coast Guard Reserve does not reduce its readiness to respond to national security threats. In fact, augmentation training has proven to be the most effective means of providing Reservists with those skills required for mobilization.

In 1984, the secretaries of the Navy and Transportation entered into a memorandum of agreement which established the framework for the orderly control and security of this nation's critical ports and waterways, which tie our country economically to the rest of the world.

This important organizational command structure—with two Maritime Defense Zones (MDZ), one for the Atlantic and Gulf Coasts, and the other for the Pacific Coast, Alaska, and Hawaii—is just as inextricable to this nation's future national maritime strategy is it was upon its inception.

The Coast Guard Reserve's role in MDZ is a major one. Reservists provide almost 85 percent of the Coast Guard's MDZ-related personnel requirements. As a result, approximately 90 percent of the Coast Guard's Selected Reserve is organized and trained to provide an almost tenfold in-

crease in ports security forces under the MDZ.

By providing 2.6 million man-hours annually to support the Active Duty in accomplishing its missions, Reservists have long been a vital part of the Coast Guard, in peace and during times of national security operations and natural disasters.

*Maj. Gen. Edmund Looney, Manpower & Reserve Affairs:*

The Marine Corps Reserve role is to:

augment selectively the Active Force in order to field three Marine Expeditionary Forces (MEFs) at full wartime structure;

to reinforce selectively the Active MEFs with Selected Marine Corps Reserve (SMCR) units;

provide the capability to field a Marine Expeditionary Brigade (MEB) to reinforce an Active MEF;

be prepared to field a Division, Wing and Force Service Support Group (FSSG) with reduced capability if augmentation/reinforcement is not ordered;

provide a nucleus to reconstitute a Division, Wing and FSSG if augmentation/reinforcement is ordered.

The organization of the Selected Marine Corps Reserve (SMCR) as the Fourth Division, Wind and FSSG capable of providing trained units to the Active Force provides unparalleled flexibility in employing Reserve assets.

The fiscal year 1990 SMCR manpower plan calls for an end strength goal of 44,000, a growth of 400 over fiscal year 1989.

When possible, the Marine Corps follows a horizontal fielding plan for weapons systems and other equipment. Distribution of equipment to the Reserves generally follows mobilization priorities based upon the three most demanding planning scenarios, i.e., the "First to Flight" Active or Reserve will be the "First to be Equipped."

Programs aimed at professional development and assignment of military occupational specialties are also an integral part of the equation.

In keeping with the Total Force Policy, the Marine Corps Reserve complements the Active Force as a fully integrated partner.

We believe we are on track with an affordable and executable program that maximizes the Reserve contribution to the nation's defense. Congressional support in the past has reaped dividends that will continue to appreciate in value. In the future, continued support will be required. In the final analysis, the value of the Marine Corps Reserve lies in its preparedness.

*Maj. Gen. Donald Burdick, Army National Guard:*

For the past 353 years this country has relied on the Army National Guard to provide an "Army on Call" made up of citizen-soldiers. The Guard, in fact, is a direct descendant of the mid-17th century colonial militia.

Of the 28 Divisions in the Total Force, ten are in the Army National Guard and of the remaining 18, Army Guard units round out an additional eight Active Army Divisions.

Our citizen-soldier "Army on Call" provides 44 percent of the combat units, 31 percent of the combat support, and 25 percent of the combat service support units of the Total Army.

In addition 20 percent of the Air Defense Batteries, 50 percent of the Field Artillery Battalions, 33 percent of the Aviation units, 41 percent of the Engineer Battalions, and 25 percent of the Special Force Groups are also assigned to the Army National Guard. These units are located in over 3,000 facilities in towns and cities nationwide.

New and modernized equipment provided to Army Guard untis incldues M-1 tanks, Apache Helicopters, Multiple Rocket Launch Systems, new radios, computer systems, and a multitude of other state-of-the-art equipment items.

The Army National Guard also plays an acitve role in support of federal and state authorities in counter-narcotics efforts. Initial efforts to support the counter-narcotics efforts began with four states in 1983 and has grown to a current level where 53 states and territories are involved in drug suppression operations.

The Army National Guard is also cost effective. This citizen-soldier force is manned and trained at approximately 25 percent of the cost of an Active Army Unit of the same type and size. Dollar for dollar the Army Guard is a bargain when you consider that it provides the property mix of forces with the Active Army and Army Reserve to meet the strategic goals of this nation.

*Maj. Gen. Philip Killey, Air National Guard:*

Shortly after the Wright Brothers' first flight, Guardsmen were spurred to investigate ballooning and to train in borrowed biplanes. Those early pioneers built the foundation for today's modern Air National Guard.

The Total Force Policy works well in the Air Force, as the recently completed Operation Just Cause vividly demonstrates.

Ohio Guard A-7 tactical fighters were on duty providing air support in defense of the Panama Canal as our A-7 units had been since 1978.

Three days after the operation began, the A-7s and their people were replaced by my old home unit from South Dakota as part of the normal rotation schedule. The tempo of close-air-support sorties for the soldiers on the ground was maintained at the same high level even with the change of unit.

Similarly, the Guard C-130s were also scheduled to end their rotation at that time and return to California, Delaware, Missouri, and Texas. This transfer to an Air Reserve unit was accomplished smoothly and professionally. No sorties were lost; all assigned missions were flown, all responsibilities met.

Stateside, the New York Guard C-5 unit and the Mississippi Guard C-141 unit were flying missions in support of Just Cause from the beginning of the operation. We even "loaned" a C-5 to the Military Airlift Command so they could meet an operational commitment.

ANG contributions to today's Total Air Force are significant: 116,000 members, 92 percent of continental air defense forces, 70 percent of reconnaissance forces, 38 percent of tactical airlift, one-third of the air rescue capacity, 24 percent of the tactical fighter force.

Air Guard flying units have a commitment right now to mobilize and deploy their people and aircraft anywhere in the world within 72 hours in support of the Active component.

Just as the Air Force relies heavily on the ANG to perform key wartime tasks, we rely even more heavily on them to provide us with equipment, training, and management support to perform our missions. F-15s, F-16s, C-130H-models, communications and radar equipment modifications and modernization do not just happen. They come from decade-long USAF commitment to making the Guard and Reserve full partners in the Total Force.

*Maj. Gen. Roger Scheer, Air Force Reserve:*

By the time Americans were rising on Dec. 20, 1989, Air Force Reservists already had flown and supported numerous missions in support of Operation Just Cause, the U.S. intervention in Panama.

This final U.S. military combat operation of the '80s and first of the '90s underscored the message the Air Force has been transmitting for years: "When we're needed, we'll be there."

Air Force Reservists volunteered for and served proudly in every major U.S. military action in the 1980s: the liberation of Grenada in 1983, the 1986 retaliatory strike on Libya, the evacuation of wounded Marines from Lebanon in 1983, and the 1988 dispatch of American troops to Honduras.

A former Congressional staffer, Maj. Tom Carter, a pilot with our C-141 airlift unit at Andrews Air Force Base in Maryland, flew the first plane into Honduras on that operation.

Our airlifters, flying and supporting C-5s, C-130s, and C-141s, fly missions all over the world, on every continent. Our airlifters perform missions ranging from bringing supplies to Antarctica to ferrying American verification teams to the Soviet Union in support of On Site Inspection Agency requirements.

The success of the Air Force Reserve is a tribute not only to America's Total Force Policy, but also to what can be termed the "Total Reserve Force."

That's the unique mixture of a Reservist's military skill blended with the three-way support of the Reservist's family and employer and the regular Air Force.

That successful mixture was most noticeable during Operation Just Cause. Many Reservists couldn't tell their families where they were going when they were notified of a mission. Many of them had to call their employers from their units or from a flightline to tell them they wouldn't be into the office or the shop that day. Their nation had called; they answered.

It's not unusual to find Air Force Reservists who put in more than 100 days a year in the Reserve, and that's beyond the civilian jobs they hold.

Our Air Force Reservists are combat ready. They can be mobilized in 24 hours and deployed within 72 hours.

*Maj. Gen. William Ward, Army Reserve:*

Of the 600,000 men and women who make up the Army Reserve, slightly more than half are members of units or have assignments as Individual Mobilization Augmentees (IMA).

Together, these two groups make up the Selected Reserve. The remainder are assigned to the Individual Ready Reserve (IRR).

The Army Reserve provides 53 percent of the Total Army's combat support elements, such as military police, military intelligence, and signal units and combat service support units, including transportation, supply, maintenance, and medical units.

Readiness has benefited from emphasis on getting Reserve units the equipment they need through the Dedicated Procurement Program and through providing units with Minimum Essential Equipment for Training (MEET) sets so that they have the equipment they need for effective training.

On the training side, the Overseas Deployment Training (ODT) program has allowed many units with an overseas mission to train in the area where they could go in wartime. During fiscal year 1989, 1,100 units participated in ODT in Europe, Southwest Asia, Korea, Latin America, and other areas.

As a result of increased attention to job training, the percentage of Reservists who are qualified in their Military Occupational Specialty (MOS) has risen from 65 percent to 75 percent since fiscal year 1986. We also have increased the emphasis on leadership training for non-commissioned officers (NCOs) and junior officers.

The quality of young people enlisting in the Army Reserve has increased, too. Since 1984 the percentage of high school graduates has gone from 82 to 86 percent in 1989, with a high of 94 percent at one point. At the same time, the number of enlistees in the higher mental categories has increased and the number of the lower categories has decreased.

## REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2273, AMERICANS WITH DISABILITIES ACT OF 1990

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 101-488) on the resolution (H. Res. 394) providing for the consideration of the bill (H.R. 2273) to establish a clear and comprehensive prohibition of discrimination on the basis of disability, which was referred to the House calendar and ordered to be printed.

## REPORT ON RESOLUTION PROVIDING FOR THE CONSIDERATION OF H.R. 4636, SUPPLEMENTAL ASSISTANCE FOR EMERGING DEMOCRACIES ACT FOR 1990

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 101-489) on the resolution (H. Res. 395) providing for the consideration of the bill (H.R. 4636) to authorize supplemental economic assistance for fiscal year 1990, to support democracy in Panama and Nicaragua, and for other purposes, which was referred to the House calendar and ordered to be printed.

## REPORT OF LOWER MISSISSIPPI DELTA DEVELOPMENT COMMISSION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. ESPY] is recognized for 60 minutes.

Mr. ESPY. Mr. Speaker, I would like to take this time to introduce to the Congress a report which was formally presented yesterday to the administration and to the House and Senate leadership regarding the development of an area in the Lower Mississippi River Valley. This is pursuant to a commission which was created at the end of the 100th Congress last year to create a commission called the Lower Mississippi Delta Development Commission, which for the last 18 months or so has been moving around the country having hearings under our authority and receiving recommendations that they then presented yesterday on how to bring this region, which is the poorest region in America, a region of 219 counties, parts of seven States, where the per capita income average is now, Mr. Speaker, about $8,000 per person per year.

□ 1340

The thesis of this action was to bring to the Congress an economic blueprint, an action plan, if you will, as to how to bring this region out from the doldrums, out from poverty by the year 2001.

We have had a very eventful couple of days. We had a very successful press conference yesterday on the Senate side where we were joined by the Senate sponsor of this, Senator DALE BUMPERS from the great State of Arkansas, and for those of us who work in this Lower Mississippi River Valley region, yesterday we did have an unveiling of this report over in the other body to bring to their attention this particular report.

This morning, Mr. Speaker, we had a meeting of the newly created working group. This is a group made up of 24 Members of Congress, about 17 Democrats and 7 Republicans, all with the express purpose of bringing this region up from poverty and promoting this economic blueprint, if you will. We had a working group with Governor Clinton who is the current chairman of this particular commission, the Lower Mississippi Delta Development Commission.

We have just now completed this morning a joint hearing held by the Subcommittee on Economic Stabilization of the Committee on Banking, Finance and Urban Affairs and the Subcommittee on Economic Development of the Committee on Public Works and Transportation.

This joint hearing was chaired by our friend and colleague, the gentleman from Illinois [Mr. SAVAGE]. It was a marvelous hearing, Mr. Speaker, and it was attended by many Members of this working group as well as members of each one of their respective committees.

My statement today, as I await the presence of other Members of Congress who might wish to join me in this special order, is that we commend them for bringing this important issue before Congress in this forum, and every one of them is credited with a series of successful legislation which has rekindled economic growth in communities all across America, and some programs which had a clear and decided regional focus will look to the subcommittee for continued leadership and guidance on community and regional economic development and stabilization legislation.

Let me say, Mr. Speaker, the contents of this final report, which contains some 400 recommendations and 68 goals, will be analyzed by this delta working group and before the appropriate committees of Congress. The 400 recommendations and 68 goals are directed to Congress, the President, mayors, county supervisors, churches, private and public community-based organizations, educational institutions, and all segments of society. In essence, what we have done, Mr. Speaker, through the submission of this report is not to come to Congress, not to come to the Federal Government asking for a handout. We are asking the Federal Government to join in a cohesive partnership with local entities, with regional entities to make sure that this report means something. It is not an offer of a handout, Mr. Speaker. It is, as has been said before, an offer for a hand up.

The first thing that comes to mind in the minds of most people watching this saga unfold is how much will it all cost. We know it will not be cheap. We know it will not be free. It depends on how much you do and when you decide to do it. It is like the famous commercial, Mr. Speaker, where the mechanic says you can see me now or you can see me later.

The longer we wait the more it will cost. Of course, we are talking today about the cost of raising this Lower Mississippi River Valley area up from the depths of poverty. But more importantly, right now we have the most comprehensive and current volume of information on the lower delta region, and just in time, because it will be outdated if we wait a long period of time, Mr. Speaker.

So I urge that we use this information as wisely as we can and allocate our resources as judiciously as matters warrant.

Mr. Speaker, I think we are off to a good start. There is a desperate urgency in the eyes of the youth in the delta, with the deaths of young babies, in the despair of chronic unemployment and in the wasted minds of high school dropouts. I know it takes a personal and an individual effort to overcome the economic stagnation of the region, but I know to the core of my being that the people in this region will be receptive to our movement. They do not want to be humiliated by a Federal handout, but they want to retain and regain a sense of self-worth and dignity by contributing to the betterment of their communities and the betterment of their State, and Mr. Speaker, even to the improvement of this Nation.

They will feel the obligation and the resonsibility that comes with being a contributing member of society, whether it is rebuilding local schools, or paying taxes. We know that those who live and breathe and work and inhabit this region yearn to be full participants in what this Nation has to

offer. This is basic to America's community values, and it is after all a centerpiece in the values of this delta region.

For many observers, some in close proximity to the problem, the crisis is viewed with commonplace concern, too often forgotten. It is a scene without change. This is one of the most serious barriers facing the rebirth of the delta region. Only when America realizes that there is a third world within its borders will it know that there is a quiet crisis that has dulled their senses and will no longer take wait for an answer.

I believe it is our responsibility to raise the volume, and let America know that a region of this great Nation needs their attention. My hope and my belief is that America will answer with the warm hand of a neighbor.

Mr. Speaker, today we are talking about the announcement of a report which I think will benefit this entire Nation because this region of which I speak could be characterized as a third world in America. In this region, Mr. Speaker, per capita income is about $3,000 below what it is for the rest of the Nation. In this region, Mr. Speaker, about one-fifth of all of the housing is classified as substandard or dilapidated. In this region, Mr. Speaker, out of every thousand live births in the delta, in the region that we represent, about 33 babies will not live to blow out the candle on their first birthday cake. In this region, Mr. Speaker, when it comes to diarrhea and dying from dehydration, we have about 500 children that die every 4-year period in this region, and about 56 of them live, and unfortunately die in the region that 24 Members of Congress represent.

Mr. Speaker, when we talk about these kinds of sad and sordid statistics, one would think that we were referring to Cuba, or Costa Rica, or Nicaragua, or some Third World nation in Africa. But Mr. Speaker, we are talking about current statistics in the Lower Mississippi River Valley, and that is really what we are here trying to speak of. This is here what we are trying to ameliorate.

If I were assessing the cost/benefit ratio of the commission's activities to date, I would judge it to be a worthwhile expenditure for the State of Mississippi. I base this on an experience that I had in Itta Bena, Mississippi during a major commission hearing where I saw several hundred people, both black and white. Many of them would never have seen one another but for the opportunity to share some common concerns and to realize that they were common allies.

For the Commission, these were some of the earliest signs of progress, a fusing and a unification in the identity of a region. These people were similar in their discussions about their community needs, and they spoke openly, and they spoke passionately, and but for the color of their skin, the message was all the same, that we might have come over here on different ships, some on the *Mayflower*, and some in the holds of slave ships, but Mr. Speaker, we are all in the same boat now. And if the color of their skin was secondary to their mutual interests in good schools, economic development, the need for housing, the shame of infant mortality and growing illegal drug use, these people found a new sense of strength in their numbers, a mutual identity, a sharing of common goals and a sense of community that transcended race and was growing among them.

□ 1350

One of the greatest divisions within the delta was dissolving, this Berlin Wall of race relations has now started to crumble within this particular region. In large measure, I credit the Delta Commission's grassroots approach in the conduct of this study and in its methodology.

At this time the critical question, aside from obvious apparent need within the region, is, "the appropriate allocation of resources." Are we ready to direct fuding and service supports to this region of America that will be commensurate with its needs?

This is not just a policy question, it is also a moral question and certainly a political question. But, Mr. Speaker, when Hurricane Hugo ravaged the east coast of the United States, it was appropriate that several assessments were made and assistance was quickly dispatched. That is great.

I voted for that. I think that that assitance was valid and certainly needed.

It was imperative that Federal aid be forwarded to the west coast when an earthquake measuring 7.1 on the Richter scale crumbled bridges, highways, and buildings in the city of San Francisco and in the bay area. That is fine. It was necessary, it was valid, and I voted for this aid as well.

In our sister States of Louisiana, Arkansas, and Texas, we now suffer a deluge of water. It is also incumbent now for the Federal Government to respond to alleviate human suffering during this time of crisis and to respond expeditiously.

If Congress can authorize nearly $5 billion for the concept of a superconducting super collider, a research project sending subatomic particles speeding around a 54-mile circle to collide and, hopefully, provide insight into the origins of the universe, that is fine. That is also valid, something which I also voted for.

I believe now that Congress must also consider building a protective ring around the delta to perhaps invigorate a region of this country that hungers for economic parity.

Mr. Speaker, we can build a superconducting network of 219 counties which contain 8.3 million people; we can generate economic activity that sparks housing, education, health care; we can create an industry that expands businesses and provides leadership development.

This superconducting region can be the beneficiary of America's interfocusing electricity and will produce substantive changes for the region.

I believe that the time has come for a report like this, and I hope that ameliorating legislation will follow soon on its heels.

For the Lower Mississippi Delta region, the needs are dramatic, just like the effects of this hurricane. The human misery is just as compelling as the devastation of the San Francisco earthquake and the call to the Federal Government is just as loud as the thunder of flooding water. Many who have been witness to the Third World conditions of this region know the chronic and persistent poverty that devastates lives and cripples coming generations.

It has been the responsibility of the Delta Commission to generate new data, to consolidate a host of new ideas and to recommend ways to correct 200 years of neglect.

We can no longer be callous to the human misery of this region, and it simply must be tended.

The young lives destined for the welfare lines must be embraced and shown that in this great Nation, they matter and they can make a difference.

The bountiful resources and untapped human potential can be developed but not to the detriment of the environment.

So I think we have an extraordinary opportunity to make an impact through this report and through our actions that will follow soon thereon.

Later today or tomorrow, Mr. Speaker, we will be considering for passage H.R. 4636, which is the Supplemental Assistance for Emerging Democracies Act for 1990, which will authorize an additional $1 billion in foreign aid appropriations to strengthen democracies abroad. That is fine. I am sure that when it comes on this floor, I will be one of those who will enthusiastically vote for this particular aid.

But, Mr. Chairman, I know a region of America that is already a democracy and which is eager to emerge, to emerge as a full economic partner in the American economic mainstream; $1 billion could be a tremendous investment and would pay dividends for generations. An embarrassing idea, but one which is easy to conclude, is for this impoverished region to apply for foreign aid from cash-rich nations

such as Japan, Taiwan, the Republic of Germany.

I have reviewed this report and found several areas in particular that I feel need to be a focus in our future discussions.

I am principally interested in housing, the formation of a regional development authority, a regional development or fiscal entity, if you will, and the enhancement of tourism. These elements of economic development can be a foundation for generating a regional economy.

I would like just for the next few moments, while we are awaiting the rest of our colleagues from the impacted area to arrive, I would like to spend just a few minutes highlighting the three areas of special interest to this Member:

Housing, developing a regional economic fiscal authority, and, of course, the development of tourism opportunities.

New housing: Housing is highlighted in the Commission report, and appropriately so. I would like to see housing lead the region out of its economic doldrums as it has generally led the Nation out of recessionary periods.

Housing is one of the macroeconomy's most reliable leading indicators. I believe housing construction could help lead the delta out of economic stagnation.

Mr. Speaker, we are awaiting other members of this region, the lower Mississippi delta working group, to appear. I see now there are several making their way in the Chamber. We do have 24 Members of Congress who work for districts within this impacted area; about 17 Democrats and about 7 Republicans, all energetic in a very bipartisan effort to bring this region up from the depths of poverty.

Before we were interrupted, and reasonably so, by the chairman of the Committee on Rules, I had been outlining three areas in which I have special interest: Housing, formation of a fiscal economic authority to generate capital within this impoverished region, and, third, using our unique situation with respect to tourism to develop our economic opportunities.

Now, with regard to housing, the current need to increase the region's housing stock is an urgent and pressing demand.

The Commission report establishes 10-year goals of 400,000 units of affordable rental housing for low-income delta residents.

Mr. Speaker, I have heard current estimates for substandard units in the delta may exceed 900,000. In my district alone, 27 percent of the housing is considered dilapidated and substandard, but our vacancy rates, for all units, is only 6 percent.

A lot of folks in my district are living in conditions our Federal housing policy considers to be unacceptable. Housing construction can be sparked and initiated in a number of ways, several of which are recommended by the commission.

□ 1400

The establishment of high in-rental escrow accounts to be used as downpayments for home purchases, another idea promulgated by this commission, is to create State-run housing trust funds to assist first-time low-income and moderate-income families to become homeowners, and a number of tax law changes that would encourage private investments in rental housing. I think that these initiatives are eminently doable, and the role of community-based organizations, conventional lenders, and investors insure that the public sector's responsibility to engender full exercise of their involvement will lead to increased affordable housing for purchase and for rent.

Housing as a leading economic indicator is part of the picture. The panoramic view, in my opinion, must include a regional development authority.

Mr. Speaker, I see members of the working group who have made their way to the floor. I yield to hear the viewpoint of a distinguished colleague, one who has worked diligently with Members on creating a Lower Mississippi Delta Working Group, the gentleman from Missouri [Mr. EMERSON].

Mr. EMERSON. Mr. Speaker, first of all, I would like to associate myself with the trenchant comments of the gentleman from Mississippi, the chairman of the working group that has been formed to deal with, to manage, to review, and to recommend for legislative action certain recommendations of the Lower Mississippi Delta Region Commission which made its report to Congress today.

I think that the Commission has done an outstanding job in the work in which it has been engaged over the course of the last 2 years. All of the commissioners or most of the commissioners were present this morning at a joint hearing of the Committee on Public Works and Transportation, the Subcommittee on Economic Development, and from the Committee on Banking, Finance and Urban Affairs, the Subcommittee on Economic Stabilization. It was most impressive. The substance of the remarks delivered by members of the Commission headed by Governor Clinton of Arkansas, the substance of their comments and the convictions of their delivery. I got the feeling that this Commission had indeed, as it was charged to do, spent a lot of time reviewing, listening to, analyzing grassroots comments about the needs of the delta region.

I think it is no secret that the delta region has long lagged behind the rest of the country in terms of economic development. I think that part of the reason for this lies in the fact that agriculture always has been the No. 1 industry of the delta region. Until the mechanization of agriculture which really followed World War II, there was economic activity to be pursued by most of the residents of the region, but with the mechanization of agriculture, there was a large displacement of the labor force, some of which emigrated from the area; other elements remaining, to the point that we have more than our fair share of poverty, proportionate to the rest of the country.

In saying that part of our problems stem from the fact that there was a displacement of workers following the mechanization of agriculture. I think also that we never, relying heavily as we did on agriculture, probably efforts were not made back when, back when to industrialize as perhaps much of the rest of the country has done. So that in this day we do find the delta region suffering certain disadvantages that the rest of the country as a whole does not find itself in.

I think that the recommendations made by the Commission today are realistic and obtainable goals. They are not pie in the sky. I think it is important to note that many of our options for opportunity are going to lie in legislative victories that are already in process. One example comes to mind. We are in the process now of holding hearings, looking toward the reauthorization of the Federal Highway Act next year. A number of the recommendations made by this Commission have to do with infrastructure needs, most particularly highway needs. Therefore, I would hope with the Committee on Public Works and Transportation, the Subcommittee on Surface Transportation, we could get a fair hearing, as I believe we will, for the recommendations of the delta commission vis-a-vis highway needs in the area. Of course, the Committee on Public Works and Transportation is also dealing in an ongoing way with the subject of water resources.

Mr. Speaker, a key to the entire delta region, of course, and part of the delta region comes from the Mississippi River. The key is the Mississippi Delta. Therefore, the Mississippi River is key and heart to the entire region. The river, this artery of commerce and industry that goes down the midsection of our country is, on some occasions our best friend and on other occasions our worst enemy. We have a vital need for flood control in the region. The Mississippi River and Tributaries Act, which is the key generic act that we refer to when we refer to flood control problems on the Mississippi River, has been in existence now ongoing of 65 or 70 years. Virtually 75 to 80 percent of the Mis-

sissippi and tributaries project was completed by the early 1980's. In the mid-1980's, we changed the policy on how the projects that are a part of the Mississippi River and tributaries project would be completed. We instituted for the first time in the 65-to-70-year history of the project the need for local cost sharing.

I submit that many of the communities that have projects remaining that are part of the Mississippi River and tributaries project do not have the funds, and we will never be able to complete this vital project unless we remove the need for local cost sharing of the MR&T project. A lot of people inside the Congress, and outside the Congress, from time to time, have indicated that the Mississippi River and any problems or benefits that it may generate should be regarded as local in nature. The fact of the matter is, Mr. Speaker, that the Mississippi River drains 41 percent of the continental United States. If anyone doubts the importance of the Mississippi River to this country as a whole, I would recommend their reading the first paragraph of Mark Twain's "Life of the Mississippi," a great bestseller that he wrote well over 100 years ago. It has been a bestseller in every generation since, yet many people have refrained from being educated about the importance of the Mississippi River to the country as a whole.

□ 1410

This great artery is not a local item. We do ask that the waters of 41 percent of the continental United States be sent down upon us, but come down upon us it does nevertheless. So one of the recommendations of the Commission is that we go back to the old policy and complete the MR&T project without the necessity of local cost sharing. This would be of enormous benefit to our No. 1 industry, agriculture, and to the ability of towns and communities in this economically depressed region to attract business and industry to the region, some of which are reluctant to locate there because of the potential of flood control problems. Properly completing the MR&T project would greatly enhance the economic viability of the region.

The gentleman from Mississippi referred to some social and human needs that exist in the area as a result of the fact that the entire region is not economically developed on a par with the rest of the country. These, of course, relate to problems of education, of drugs, of malnutrition, of infant mortality, and of all other social problems that plague us and which we in this body are continually trying to address.

Mr. Speaker, I think that the gentleman from Mississippi [Mr. ESPY] has given us a catalog of those problems, and I look forward to working with him. The gentleman mentioned most recently housing issues. I look forward to working with him in trying to find targeted solutions to these problems in this region.

Finally, I would like to say, Mr. Speaker, that one of the impressive aspects of this report is that it is not asking for a Federal handout to accomplish or to achieve all of the goals that it sets out. In order for the recommendations of the Commission to be fully implemented, it is going to require the best efforts, the very best efforts of the private sector, of local government, of State government, and of the Federal Government, all pulling together. There is a role for each entity in pursuing the goals of this Commission which I earlier said were not pie-in-the-sky goals. They are realistic, attainable goals, and if we are pulling together, the private sector working with different levels of government, I believe we will be able to achieve the recommendations of the Commission within the timeframe that it has set out.

Working with this Commission and with the Representatives who comprise the representation in Congress of the entire delta region has been one of the more rewarding experiences of my tenure in Congress. We are proceeding apace with our commitment to help to solve the problems of the region, and we are doing so on basically a bipartisan, nonideological basis.

We all recognize that there are problems. We know that these problems need to be solved. They must be solved. There is a broad and deep-seated commitment to solving these problems, and I want to thank the gentleman from Mississippi for the leadership that he has taken in forming the working group to work on behalf of the Commission's recommendations. I thank the gentleman for the leadership that he has provided, and I wish to extend my commitment to him to work in the immediate term and the long term to achieve the goals that have been set forth by the Commission and which will result in the attaining of those goals, which will result in turn in a better life for hundreds of thousands, indeed probably millions of people, who inhabit that region known as the Mississippi Delta.

Mr. Speaker, I thank the gentleman for yielding to me.

Mr. ESPY. Mr. Speaker, I thank the gentleman from Missouri [Mr. EMERSON] for his compliment, and I thank him for his very thoughtful comments. I would just like to say that it has been a pleasure to work with the gentleman thus far in making sure that we receive the report which we now have presented to Congress and to make sure that he knows I look forward to working with him in the future so that we may be sure that the 400 or so recommendtions contained in this report become reality. We think they are reasonable, and we hope they become a reality. I thank the gentleman for participating.

Mr. Speaker, I now wish to yield to a colleague of mine, the gentleman from Mississippi [Mr. PARKER], who represents the Fourth District of the State of Mississippi and who is also a very active member of this congressional group.

Mr. PARKER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, let me first commend the chairman of our working group, the gentleman from Mississippi. He has done an extremely effective job as far as working on this task force. The interest and involvement and leadership he has shown have been significant, and we as the people in the Mississippi River Delta area will feel the effects of his work for many, many generations to come.

This morning we had a working breakfast, and Governor Bill Clinton came and spoke to us. Some of the comments he made this morning were, I think, very personal, and they also stressed the importance of the work we are trying to achieve with this commission. It is with a great deal of pleasure that I publicly commend the Commissioners and the staff of the Commission itself for their efforts to resolve the plight of so many of the people in the lower Mississippi Delta region.

I have always thought it was very ironic that in a nation renowned for its freedom and prosperity, a land truly blessed with opportunity, there should exist a region that is so bound and so destitute, lacking in hope primarily, with individual incomes so well below the national poverty level, with unemployment rates in some areas averaging more than four times the national average, and infant mortality in some areas greater than that in some Third World countries. The statistics themselves are alarming.

Even more alarming, I think, is our witnessing of lost dreams in the eyes of children who have faced too many sorrows in their young lives, and it is discouraging to talk to people who have lost all hope that a better day will come.

Many people have said that awareness is the answer, that if more people realize the extent of the problems we have in the region, that if we can raise the social conscience of the American people, something would be done. Congress gave our region hope when in 1988 the Delta Commission was created and charged with identifying the needs of the region stretched across 219 counties in 7 States and making recommendations to meet those needs.

It is my goal to see that the hope that we feel is turned into reality and to see the Commission's recommendations and strategies implemented. A

perfect example, a classic example of what we need is occurring in my district now, and that is the beginning of the Natchez National Historical Park. I believe that the bodies of legislative branch of this Government, this House and the other body, must come to the realization and must explain to the American people the difference between what is commonly referred to as a pork barrel project and a true investment. Most people make the delineation somewhat like this: If it is in my district, it is an investment; if it is in your district, it is a pork barrel project. That is not the correct way to look at it.

We have forgotten what a true investment in America is today. Every business person out there in the country realizes that in order to have a true investment, we must have a return on that investment. The American people must realize that every city in this country is not doing well financially. We do have some areas of this country that are doing very well, but we are economically deprived in the Mississippi River Delta region. Because of that, we do not have the tax base to levy the taxes in order to implement some of the projects we need. The Natchez National Historical Park is a perfect example. We have tremendous resources in Mississippi all through the region, but in that particular area, in Natchez, we had a situation where it was deemed responsible on our part to authorize and fund the Natchez National Historical Park.

□ 1420

From an economic standpoint, Mr. Speaker, we do not have the tax base to implement it. We do not have enough people, and they do not make enough money, and, because of that, our tax base is too low. We are in a situation now with the implementation of the Natchez National Historical Park where we are going to be creating by the year 2000, by conservative estimates, over 1,000 jobs for the park and its peripheral business. An additional $18 million of personal income will be coming into that area each year because of that park. It is an investment in the future. We will get a return on the investment that we make.

Mr. Speaker, many of the projects that are discussed in the report of the Commission are centered around that type of ideology. We in Mississippi realize that our State will not prosper by relying solely on Federal assistance. We have begun an aggressive campaign to establish partnerships with the private sector with State and local Federal officials and the communities themselves. It is that kind of effort that is needed to pull the region out of the claws of poverty.

Mr. Speaker, I am looking forward to seeing the Mississippi River Delta grow, and I am looking forward to see it prosper as we, as a body, implement the strategies and recommendations of the committee.

Again, Mr. Speaker, I want to commend the chairman of our working group, congressional working group, the gentleman from the Second District of Mississippi [Mr. ESPY], and I appreciate the good work he has done, and I appreciate the fact that he called this special order together today.

Mr. ESPY. Mr. Speaker, I say, "Thank you," to the gentleman from Mississippi [Mr. PARKER], my friend and my colleague who is a distinguished Member of Congress and who has served very well making sure that we create some spark and enthusiasm to make sure that that manifests itself into some action through the work of the Lower Mississippi Delta Working Group.

Mr. Speaker, we have two other Members, distinguished Members of Congress, who also work within this particular region. I would like to call upon them at this time.

Mr. Speaker, I would like to yield first to the gentleman from the great State of Illinois [Mr. POSHARD].

Mr. POSHARD. Mr. Speaker, I would like to thank the distinguished gentleman from Mississippi [Mr. ESPY] for the tremendous work that he has accomplished in leading this working group and helping to get this report together. I thank him also for allowing me to participate in this special order.

Mr. Speaker, I am pleased to join my colleagues from the Mississippi Delta region to speak about this report, and I applaud, as I have said in the beginning, the leadership of our colleague, the gentleman from Mississippi [Mr. ESPY], on this issue.

When I walked into the meeting yesterday where the press conference was taking place and the results of the report were being given to the press, one of my colleagues from Tennessee looked at me, and he said. "I'd like to know how a Yankee and his district got included in a report on the Mississippi Delta region."

Well, Mr. Speaker, let me talk to my colleagues about that for just a second, if I may.

Mr. Speaker, I represent the southern 21 counties of Illinois. My district, almost all of it, lies farther south than Richmond, VA. It is 350 miles from my home to Chicago. It is less than 200 miles from my home to Memphis, TN, to Louisville, KY, or to Nashville, TN. So, in many ways, Mr. Speaker, we are very much oriented in our culture, in our economic potential, and in much of our history, to those States that are included in this report from the Southland of our great country.

I reviewed this report in a variety of ways, but let me identify some primary observations that I would like to emphasize.

Mr. Speaker, this, most importantly, is a blueprint for action. It is not and should not be received as another government think-tank study that we spent a lot of money on just to have a study. It is concise, precise, and specific. It identifies problems in health care, in infrastructure, in education, in public facilities, agriculture, and a host of other areas. Then it follows with real recommendations for change.

It must be pointed out that these suggestions do not always ask for additional Federal Government assistance, although we certainly have a role to play in that respect along with our individual States. In many of these areas my colleagues will see the importance that has been placed on community involvement, in solving problems and moving forward, and I might say to the distinguished gentleman from Mississippi [Mr. ESPY] also, "If your counties in your district are anything like mine, the areas that we represent have a history of pride, have a history of rugged individualism, of doing it on their own.

Mr. Speaker, it is very difficult for us to sit down with our individual counties and convince them that it is more cost effective, more cost efficient, to cooperate across county lines on any number of important economic development issues and other kinds of development strategies. It is the same thing with this area of the country.

The thing that we need to emphasize more than any other is a regional cooperative approach toward settling our economic, our social problems in this area of the world. This report, Mr. Speaker, emphasizes the cooperative nature of a regionalism, of a regional outlook, in terms of looking at the issues that have traditionally, perhaps, divided us, and deciding on effective, cost efficient ways to solve those issues.

Mr. Speaker, that is the importance of this report, encouragement and cooperation across artificial lines that have divided us in the past between States, between counties that serve the citizens along the Mississippi River.

It is also, Mr. Speaker, a strategy for investment. As my colleagues know, there is a great deal of Federal money coming to the delta region already. But a lot of that is tied up in the variety of public assistance problems that help sustain people through their daily lives. Understand, we are grateful for that assistance, but real investment in providing jobs, housing, economic opportunity, would help take those people off the public assistance and provide them the opportunity to contribute in real substantial jobs

through which they can support their families.

In the long run, Mr. Speaker, it could lessen the burden of the Federal Government in this area, which brings me to my final point.

This report is really about people. Other witnesses and members of the Delta Commission will make this point. So, I just want to reemphasize it.

This region of the country is hurting. Unemployment in my counties runs almost unanimously in the double digits, up to 28-percent unemployment in some of my counties, and with the Clean Air Act on the horizon, those numbers are only going to increase, because large numbers of coal miners are going to be put out of work. But I guarantee that the people of this region want to work. They want to contribute. We are tired of living in the middle of the most prosperous country on Earth and watching it all pass us by. We accept our responsibility for how that has happened, and this report shows that we are willing to work to make changes.

However, Mr. Speaker, it has to involve a partnership at the local, State, and Federal levels, and I have visited many of the towns in my district for many years now in areas that I would swear were not a part of the United States of America if I did not know better, if I did not live there, places where small house trailers sit on muddy lots next to the railroad tracks, places where every face is the face of desperation and fear that maybe tomorrow will not bring the necessary food on the table, or clothes on the back or school for the children.

□ 1430

I look at those faces, and it works on me. My goodness, how can we tolerate this in the richest, most prosperous nation on the face of the Earth.

I come away from those visits tremendously moved by the plight of our people and I find it hard to say that it is all their fault; but the last look I take before I leave those homes and those villages somehow always finds the face of a child or a working mother or the proud father of a family who is working at every job that he can find to make ends meet. I see courage and I see promise and I gain inspiration from those visits, as poor and as desperate as our people may be.

I hope that we will see those same faces in this report.

The people of the delta are wonderful people. They are caring. They are loving people who only want the chance to make a contribution to the greatness of this country.

This report outlines a plan that we can all follow to invest in their futures. That investment will produce returns in human dignity and an improved quality of life for the people of the delta and all our neighbors in this great country.

Mr. Speaker, I thank the gentleman again for this time and attention. I look forward to continuing to work with the gentleman to achieve the goals set forth in this report.

Mr. ESPY. Mr. Speaker, I thank the gentleman from Illinois for participating. I would like to associate myself with his very eloquent statement.

Let us assure those who doubt that the district he represents is within the impact area of this region, it certainly is, and the gentleman from Illinois has made substantial efforts thus far to beneift our work in this area.

Mr. Speaker, I would like also at this time to yield to another distinguished colleague who represents certainly a district within the impact area covered in this region and under the mandate of this report, and that is District 1 of the great State of Kentucky, ably represented by our good friend, the gentleman from Kentucky [Mr. HUBBARD], and I yield to the gentleman.

Mr. HUBBARD. Mr. Speaker, I would like to commend my friend and colleague, the gentleman from Mississippi [Mr. ESPY] for taking this 1-hour special order in order for us to discuss the delta initiatives, the Lower Mississippi Delta Development Commission, and this beautiful book which has been published and edited by David Wayne Brown. This is the report we have heard so much about in the last 53 minutes of this special order.

I would also like to commend a friend of mine, a former constituent of mine from Hopkinsville, KY, named Wilbur Hawkins, the executive director of the Commission, for the excellent work he continues to do.

I want to explain to Wilbur Hawkins and the gentleman from Mississippi [Mr. ESPY] and others why this Member of Congress had to miss an important breakfast meeting this morning. We had 158 Kentuckians on the Senate side for a breakfast sponsored by the Kentucky Rural Electric Cooperative, and I had to be at that breakfast, with about 30 constituents present in that group.

We are so proud in Kentucky to be a part of the Delta Commission—21 of the 24 counties which I represent are a part of this Commission. Four of the counties I represent are actually bordering the Mississippi River; namely, Ballard, Carlisle, Hickman, and Fulton Counties.

As Joey Lucas, a member of my staff, pointed out earlier today in helping me prepare these remarks, the representatives of the Lower Mississippi Development Commission recently indeed have completed a monumental task. The members of the Commission presented to President Bush their final report, as was required by legislation adopted by this body in 1988. I believe that is Public Law 100-460 in October 1988. This final report is based upon their exhaustive research efforts which have taken place over the last 18 months. In compiling this report, the members of the Commission listened to many hours of testimony that were offered in public hearings by those who live in this region that is so plagued by poverty and depressed economic conditions.

While the contents of the report are very detailed and informative, the underlying issues that are talked about in the report are not new to those of us who represent communities in this region. As I said before, 21 of the 24 counties in my western Kentucky congressional district are included in the delta region. I, like my colleagues who have spoken earlier this afternoon, recognize that the social and economic needs of this region are indeed unique. The problems of illiteracy, inadequate transportation, and the underdeveloped economic potential are just a few of the common problems that affect this region which spans seven States.

Actually, this beautiful report of which we are so proud and we have copies at our office, is actually a handbook for action, one that could turn the delta and its 8.3 million people into full partners in America's exciting future.

Mr. Speaker, I close by again commending the efforts of the Lower Mississippi Development Commission for their work in identifying the problems and possible solutions to these problems. I urge my colleagues in the House to take special note of the report's recommendations and to help us start looking for ways in which we in Congress can start to address the problems which have plagued this region throughout its history.

Yes, I am proud to represent western Kentucky and proud that we are a part of this Commission, and again to my colleague, the gentleman from Mississippi, my thanks for taking this special order.

Mr. ESPY. Mr. Speaker, I thank my friend from the great State of Kentucky. I look forward to working with him to make sure that the recommendations contained in this report become a reality.

Mr. Speaker, there are several Members of Congress representing districts within this impact area who were unable to be with us at this time, but have since we began this special order brought to their floor their own particular statements.

The specific statements that I have to present under the authority of general leave is a statement from the chairman of the Appropriations Committee, our colleague, the gentleman from Mississippi [Mr. WHITTEN]; the gentleman from Louisiana [Mr. BAKER]; the gentleman from Tennes-

see [Mr. FORD]; the gentleman from Arkansas [Mr. ALEXANDER]; and the gentleman from Louisiana [Mr. HOLLOWAY].

Mr. Speaker, with about 2 minutes or so left, not a whole lot of time to complete the unfinished portion of my own particular statement, but I would just like to mention two things. The first is that before we recognized and yielded to other Members, I had started to talk about my three interest areas.

One was, of course, housing. Inasmuch as about one-fifth of all the housing existing within my district are substandard and dilapidated, I have to mention that in communities all across my district, one in particular, a district called Blue Hill, MS, there are people living there, both black and white, who are still without running water in their homes. Some have fresh water wells. Others are reduced to having to collect rainwater for their sustenance.

Others, Mr. Speaker, have culverts, but there are a few who have to actually take buckets and go to the nearest stream to collect water, so that they might bathe, wash, cook, and clean.

Mr. Speaker, this is not certain Third World States. This is America, and I certainly think we can do better with regard to housing.

□ 1440

A second concern is to form a regional financial authority with the mandate and power to either capitalize or discount money to local lenders. We do not envision that this entity will supplant or displace our region's current lending and development structure. We believe that it should serve as an enabler, providing the circumstances and affordable capital infusion that will serve to ignite economic expansion.

This again is discussed in detail in the Commission report, and I am certain that it will be discussed, and I hope early on discussed, in the progress of the delta working group.

The third point that we want to emphasize is quick exploration in providing assistance in the further development of the tourism industry in the Mississippi Delta. This can be seen as economic growth in dormancy.

The ideas and strategies offered in the Commission report are varied and thoughtful. The Commission calls upon States, local governments, and the Federal Government to recognize tourism as a viable sector in the region's economy, and it takes steps to enhance the industry.

The endorsement of the tourism initiative for the delta is an endorsement of current legislation which I introduced last year and is nearing floor consideration. I make special mention of H.R. 2174, the Mississippi River National Heritage Corridor Act of 1989, which, if passed into law, would accomplish several recommendations offered in the Commission report.

A corridor commission would consolidate information about the historic, environmental, and commercial activities along the river in one place. For instance, Mr. Speaker, when Japanese tour companies came to America, to the Mississippi River Parkway Commission, 2 years ago seeking information about this great resource, they were disappointed and inconvenienced because they had to go to 10 different States for tourism and commercial information.

The same can be said for wildlife, hunting, swimming, boating, manufacturing, agricultural, and other types of information about the river. So this is simply a law to gather, consolidate and disseminate information to international or national inquiries which would be very helpful to develop a dormant tourism industry in the lower Mississippi Delta.

Mr. Chairman, I would like to read into the record comments from one of the Governors that serves on this particular Commission. I might add that the gentleman from Kentucky [Mr. HUBBARD] in his eloquent comments really did commend the Commission and the staff of this Federal Commission. I would just like to associate myself with his comments.

This Commission is made up of nine members, two Presidential appointees, a former Congressman, Webb Franklin, and Mr. Shepherd from the great State of Louisiana. It also contains participation by three sitting Governors, the Governor of my State, Gov. Ray Mavis from the State of Mississippi, Bill Clinton, who serves as its chairman, from the State of Arkansas, and, of course, Buddy Roemer.

We would like, of course, to read Buddy Roemer's comments before I conclude this special order.

One glance at a map of our Nation clearly illustrates that the Mississippi delta region, if not the body of the Nation, certainly is its major artery through which life can and should flow to all parts of our land.

However, I wish to advise you that much of this artery is clogged with obvious signs of abject poverty, pervasive illiteracy and lack of education, inadequate access to health care services, and scarcity of economic opportunity.

If untreated, the prognosis for the delta is bleak, for its youth will migrate top communities elsewhere offering a better quality of life and meaningful employment opportunities or remain to forfeit their future and concede to the prospects of never approaching the realization of the American dream as promised attainable by our Nation's forefathers, unless a combination of practical and creative remedies are applied immediately and generously, our Nation will be handicapped in its quest to compete and maintain a dominant position in the dynamics of the global economy due to its failure to capitalize on the wealth of human and natural resources within the delta region.

So as we conclude this special order, Mr. Speaker, and I cannot say it any better than that said by all of those participating in this last hour, except to say that we now have the mandate, we now have the charge. The Commission has fulfilled its goal, I think, and they did a pretty good job in doing this over an 18-month period. We have the call to action, Mr. Speaker, and now we have to respond.

Every night there is a very popular talk show host named Arsenio Hall. After he finishes his monolog and before he begins to introduce his first guest he raises his fist and he says to the audience there, he utters a now popular phrase. He says, "Let's get busy."

That is simply what we are saying to this Congress at this time. We now have the knowledge of poverty. We have the call to action, the handbook, the map, if you will. I say, Mr. Speaker, to this Congress at this time, let's get busy.

Thank you for allowing me to participate in this special order, and I thank all those who could come to the floor and share with us in this last hour. I want to thank them for doing so.

Mr. TAYLOR. Mr. Speaker, I am proud to join in this special order marking the release of the report of the Lower Mississippi Delta Development Commission.

I want to thank everyone from this seven-State region who contributed to the report we have before us. I would particularly like to commend my distinguished colleagues and fellow Mississippians, MIKE ESPY and JAMIE WHITTEN, for sponsoring the enacting legislation, and for their constant support and assistance to the Commission and the cause of the Lower Mississippi Delta.

I also wish to congratulate the efforts of the two Mississippians who served on the Commission, our Governor Ray Mabus, who served as vice chairman, and former Congressman Webb Franklin.

Mr. Speaker, the Commission has done its job and done it well. But a study is not a solution, and a report is not a remedy. This report is a call to action. I implore my colleagues to read the Commission's report and carefully consider the initiatives it proposes.

The Commission has identified the alarming problems facing the people of the lower Mississippi region. These are American citizens who are living in poverty, in grossly inadequate housing, without decent health care, and without properly funded schools.

The trends are ominous. If we ignore this report, the delta will continue to decline. The poor will get poorer, and another generation of children will suffer.

That does not have to happen. Trends are not destiny. Isn't it time that we focused our attention on solving the problems in our own country and helping our own people? I believe that it is, and the Lower Mississippi Delta is the best place to start.

Some Members of Congress may interpret the initiatives in this report as an appeal by these States for pork-barrel Federal projects. This is not the case. We are not asking for a

free ride. We are asking the Government of the United States to make a wise investment in the economic future of this country.

Before I was granted the privilege to serve south Mississippi in Congress, I served for 6 years in the Mississippi State Senate. During that time, I was fortunate to participate in the progressive movement in our State's government. We enacted improvements in education, in health care, and in economic development. The State government continues to address these concerns, and will do so for years to come.

But, Mr. Speaker, Mississippi and these other six States need some help. If the financial burden for necessary services rests on the shoulders of the States, then the poorest States will tend to afford the poorest services.

If we truly wish to combat poverty in this country, then we must take the necessary actions to alleviate the poverty of the Mississippi Delta. The rural poor of the delta live with little hope for jobs, for quality education, or for the future of their children. For the past 30 years, the primary means of escape for the rural poor has been to move to a city to join the ranks of the urban poor. That migration continues and will continue until we rebuild our rural economies.

Meanwhile, the best and brightest of the region have had little choice but to leave home to find opportunities. They have contributed to the growth and progress of almost every city and State in America. Now it is time for America to contribute to the growth and progress of the Mississippi Delta.

Mr. WHITTEN. Mr. Speaker, I would like to take this opportunity to join with my colleagues from the Mississippi Delta regions in commending the Lower Mississippi Delta Development Commission for the work it has done in pointing out the dire situation that exists.

The delta commission has done a rather thorough job of showing what the needs are, much of it caused by our open-door policy for imports, while failing to use the authority of law to provide for our producers the same protection other countries provide for their producers.

I hope the findings of the commission will help bring about policy changes and a return to a prosperous agriculture and increased production in industry. In view of our debt, the delta must be able in the future to join the rest of the country to produce more than we need and sell it in world trade, which under existing law is possible.

I speak to you as one who has had a lifelong relationship with the outstanding people of the region known as the Lower Mississippi Delta. My hometown of Charleston and my birthplace of Cascilla are nestled in the hills of Tallahatchie County, MI, overlooking the flat, fertile cotton and soybean fields of the Mississippi Delta.

I have lived and worked with the people of this region all my life, having served as a school principal, a district attorney, and as their Congressman. Until 1966, when Mississippi districts were altered, my district was composed mostly of delta counties. My current district includes several counties that are still tied to the economy of the Mississippi Delta.

That economy has been weakened for several years now, despite the best efforts and hard work of the area's people, by the failing of the farm economy and, I must add, the failure of the Federal Government to respond to the crisis in our rural areas.

Our people have done everything in their power to try to pull themselves out of this state. But many of the factors that affect the area go beyond the limits of human capabilities. That is why I am glad to have this kind of commission to bring the resources of the Federal Government together in a partnership with people who have already demonstrated their desire to improve their region.

As I have often said, we need to promote the kind of development this Commission points to: productive jobs and improved infrastructure, including highways, bridges, harbor development, water systems, and sewerage projects.

Looking back on the record, in 1940 we in Mississippi were in pitiful condition—our roads, housing, indoor conveniences, and just about everything lagged way behind. Since 1940, our material wealth, our schools, our factories, highways and airports, navigable rivers and harbors, many hospitals, and all the rest have multiplied 47 times. That has largely been through Federal programs of the United States, which tend to equalize opportunities of our people with the rest of the Nation. The improvements are never more apparent than in the delta region.

In northeast Mississippi, similar economic declines have been partially offset in recent years by a Federal program, the Appalachian Regional Commission. Congress recognized the need of the poverty-ridden area of Appalachia for special assistance, and that extra step has provided highways, development, improved health care, and increased opportunities for the people of the area. It is apparent that similar action is needed in the delta region.

Like the region of Appalachia, the delta region is largely a rural region, facing all the collective problems that face rural areas in a society that is moving more and more of its resources to larger urban centers. We cannot continue to neglect rural America without courting certain disaster.

I would like to point out, Mr. Speaker, that ours is an agricultural region, and agriculture has fallen on hard times in the last several years. Nationwide, millions of acres have been foreclosed or taken over by the lenders under the threat of foreclosure.

Our people and their livelihood are not only at the mercy of low farm prices, but also such variables as weather and insect infestation. Such a disaster also impacts surrounding communities and related industries. The delta region has suffered more than any section of the country.

Again, Mr. Speaker, I commend the Delta Commission for the work it has done in trying to bring relief to an area of our country that desperately needs it.

Mr. FORD of Tennessee. Mr. Speaker, I would like to applaud the efforts of the commission for the fine work they have conducted. Looking at statistical data of the delta region exemplifies the intensive need for this commission. A poverty rate for the delta region of 20.9 percent compared to a national average of 12.4 percent is unacceptable. A median income of $6,907 compared to a national average of $9,441 is unacceptable. A high school dropout rate of 28 percent for my own State of Tennessee is unacceptable. The Delta Commission was given a charge to tackle tough problems such as these and to provide some answers. They have met that charge.

The Commission has worked extensively to develop not just another report, but a comprehensive plan of action. Further, I would like to commend the approach undertaken for the research and recommendations for this report. From the outset, the Commission has worked to receive input and instruction from the people. The Commission understands that it is the local citizens who comprise the area and thus know the problems that they face and what is needed to help the area to solve those problems. This emphasis is what makes this report a unique document to be used by national legislators, State leaders, and local community residents alike.

Now it is our turn. The Commission has expeditiously and thoroughly prepared the way for progress, now we must proceed. It is important that we continue to work together on our problems. We must remember the binding forces that prompted the area to join efforts to form the Delta Development Commission as we begin to implement the many recommendations. The report should be used in the same manner as the method of research undertaken by the Commission, through a bottom-up approach with collaboration of all parties.

I look forward to working with my colleagues in the Congress. I am particularly interested in one of the recommendations which would require HUD, working with local housing authorities, to establish escrow accounts of a percentage of monthly rent for higher rent paying tenants to be used later for down payments on homes. This recommendation was also included in housing initiatives submitted to me by the Memphis Area Housing Authority. I have already begun the preliminary steps to introducing this initiative as legislation. In fact, I recently sent a letter to Chairman GONZALEZ asking for his comments on a similar proposal. This is but one recommendation. Yet, if we continue to involve all levels and work together, a brighter future is ahead for the delta region.

Historically, the delta region has lagged behind the rest of the Nation in all other areas. The delta continues to be the poorest of all sectors of the country. However, history does not have to continue to repeat itself. The delta region is an area of superior assets and untapped resources. Through careful management and planning, as the report submitted before us, this area can take the lead in economic growth and prosperity. A challenge is set before us today to help the delta region catch up with the rest of the country, to erase the afflictions that have continued to plague this area. I look forward to meeting this challenge.

Mr. COSTELLO. Mr. Speaker, today we are focusing our attention on a region of the United States that for too long has been ne-

glected. The Lower Mississippi Delta area, which includes my State of Illinois, is one of the most impoverished corridors in the country.

Throughout the States that make up this region, we have seen chronic symptoms of decline: a lack of quality health care, high unemployment rates, high infant death rates, an eroding of the industrial base, and a general decline in social services.

During the last 2 years, the Lower Mississippi Delta Commission has held field hearings and has heard testimony from the people of this area about their regional problems. This week, the Commission released its report and recommendations on ways to improve the economic standing in the Lower Mississippi Delta.

Mr. Speaker, the Midwest and many areas along the Mississippi River have been hit hard in the last 20 years by an enormous decline in America's industrial base. We must begin to address this decline and examine ways to rebuild economic strength in these areas.

The Lower Mississippi Delta Commission has given Congress and the President direction in the ways to address these problems. In particular, I am concerned about ways to improve our educational standards and prenatal care in the delta region.

I look forward to working with my colleagues to address these issues so that we can relieve some of the hardship that has been borne by the States in the Lower Mississippi Delta for too long.

Mr. MONTGOMERY. Mr. Speaker, I want to join my colleague from Mississippi today in this special order to bring attention to the Delta Initiatives and to the problems faced by the people who live in this region.

I want to commend Mr. ESPY for his leadership in this effort and I look forward to working with him and others who represent delta counties to help improve the opportunities for this region by laying out and developing a comprehensive long-range plan for economic development.

This project will require a team effort on the part of people on the local, State, and Federal level and it won't be done overnight. But this report is a good start and I congratulate the Commission for the work it has done to get things underway.

Mr. BAKER. Mr. Speaker, I am honored to be a colleague on the Lower Mississippi Delta Congressional Working Group and proud of the comprehensive economic development report, The delta initiatives, that addresses the vital problems of this region.

The Lower Mississippi River corridor contains nationally significant historic, economic, recreational, scenic, and natural resources, but this region is also plagued in pockets of severe levels of poverty, illiteracy, unemployment, infant mortality, and substandard housing. This 18-month study outlines the social, environmental, and economic problems and solutions for over 8 million residents of the United States' poorest region. Educating the future work force, combined with the development of business and technology, must be a No. 1 priority in order to help this poverty-stricken region. We need to use our abundant human and natural resources to help make these necessary changes. Therefore, I wholeheartedly support the findings of this Commission, and I look forward in the forthcoming days to work with the other Members of Congress to make this 10-year plan a success.

Mr. HOLLOWAY. Mr. Speaker, I am proud to pay tribute to the Lower Mississippi Delta Development Commission and its newly released report, "The Delta Initiatives: A Report by the Lower Mississippi Delta Development Commission—Realizing The Dream * * * Fulfilling The Potential." I appreciate the diligence with which Commissioners developed the recommendations made in the report. I salute the hard work of the Commission. At the same time, Mr. Speaker, I do not underestimate either the need for the delta region to grow, develop, and become a full partner in America's future or the difficulty of the challenge to do so. I look forward to the day when the poverty and dim expectations which have for so long plagued the delta are memories of a time gone and never to return.

Mr. Speaker, I look forward to the implementation of various recommendations by the Lower Mississippi Delta Development Commission. Among other themes, the report calls for the development of leadership; improvement of education at all levels; the need to build on and protect existing resources; improvement of physical infrastructure, levels of technical competence, and the creation and penetration of new markets for goods and services.

I take this opportunity to laud these recommendations and others as a harbinger of things to come. I believe in particular that advantage should be taken of the delta region's natural assets and resources. Foremost among them are its residents—people with demonstrated skill, ability, and limitless potential to succeed. That's why I believe priority should be given to reducing unemployment and developing a fiscal base which will stand the test, and stress, of time. I'm talking about creating a strong, viable economy the strength of which will continue to grow well into the next century—and beyond.

With the expanded economy will come an added benefit, one which will reap long-term dividends. Instead of establishing careers elsewhere, young people—natives of the delta—will be in a position to give something back to the region and its people. That is vital, Mr. Speaker, for the people of the Lower Mississippi Delta are its greatest asset. They are caring, industrious, God-fearing, moral people with hearts of gold and skills to match, who dream of a better future for themselves and their loved ones.

Mr. Speaker, of course the people of the delta have high hopes for the days and years ahead. They deserve a bright and prosperous future. They should have one. In time, they will. However, as a summary of the Delta Commission recommendations suggests, this report is not for anyone seeking easy answers or quick fixes. Instead, the Commission report is what it must be: a long-term plan of action for a better future. It should not be ignored. Time won't wait. The report, Mr. Speaker, is a blueprint for opportunity for this generation and those yet to come. We must meet the challenge of doing what we can to make the blueprint real.

Mr. ANTHONY. Mr. Speaker, the recommendations of the Delta Commission include a number of items that will greatly assist the economic and social infrastructure of the eastern portion of the Fourth Congressional District. Among the projects listed are several that have already been priorities of mine.

Economic development is closely related to an efficient transportation system. The Delta Commission's recommendations include development of a four-lane divided north-south corridor west of the Mississippi River. This will greatly improve the linkage of growing commercial activity in southeast Arkansas with the interstate network of I-40 and I-30 to the north and I-10 in Louisiana. In addition, highway transportation will also be aided by completion of the Great River bridge which will link Rosedale, MI, with Dumas, AK, to better coordinate east-west travel between the Eastern and Western United States.

Another item of highway transportation of which I have been personally involved is the construction of a bridge across Lock and Dam No. 4, recently designated as Emmett Sanders Lock and Dam. When the McClellan-Kerr Navigation System was designed earlier this century, this lock and dam was constructed with the capability of serving as the base of a bridge across the Arkansas River. Such a bridge will do much to provide safe passage from eastern Arkansas to the Pine Bluff area and beyond and fits in perfectly with the ongoing highway bypass construction in the Pine Bluff area.

Transportation is also served by the Arkansas River. Recent changes in the river's hydrology, however, threaten the long-term reliability of the navigation system. The Delta Commission recognizes the need to preserve the integrtity of the navigation system and recommends the construction of a lock and dam at Montgomery Point. This improvement is much needed to ensure that proper water levels can be maintained to support navigation along the river and provide access into the Mississippi now and in the future.

In addition to navigation along the McClellan-Kerr System, the Delta Commission also supports expansion of facilities along the Mississippi. For many years, I have worked with local sponsors and the U.S. Corps of Engineers to develop a slackwater port at Yellow Bend. Much work has been done to make this project a reality. The Delta Commission's recommendation to further develop this facility will greatly expand the ability of southeast Arkansas to access new markets through the diversity offered by different modes of transportation.

While the Delta Commission looks toward the expansion of new commercial activity, the Commission does not ignore the most dominant economic force in the region, agriculture. The delta of southeast Arkansas is right in water resources which are vital to reduce the risks of agricultural production. The Arkansas River to the north, Mississippi to the east, and Bayou Bartholomew to the west surround the row crop areas of southeast Arkansas with an abundant water supply.

Last year I worked with area farmers, the Soil Conservation Service, and other agencies to devise a demonstration project to provide a

system of water conservation, delivery, and storage to best take advantage of water resources. I was very pleased that the Delta Commission recommends the funding of this project as the first step in a deltawide water management system.

Economic development alone will not achieve a full revitalization of the quality of life in the delta. The Delta Commission makes several recommendations to develop the rich social and cultural resources of the area. The establishment of a system of parks along the Mississippi River will give residents and those traveling through the delta a better recognition of the rich history and natural beauty of the area.

The Delta Commission also recognizes the most valuable resource the delta has to offer, her people and, in particular, the children. No one can ignore the problems associated with an inferior education system. The Delta Commission supports funding for education and the creation of a regional magnet school in southeast Arkansas. The overall purpose of the Delta Commission is to provide a better future for her people. Without a solid educational foundation, all the other projects will serve as little more than a shell of concrete and steel. It is the people of the delta that give it life.

This is a summary of the recommendations of the Delta Commission that have a direct impact on my congressional district. The full force of the Commission's accomplishments must be gaged in respect to how all the pieces fit together throughout the region. This is the starting point from which the challenges are heard and it is now time for the Congress to act.

Mr. ALEXANDER. Mr. Speaker, I am pleased to participate in this special order to mark the release of the report of the Lower Mississippi Delta Development Commission.

I want to extend my congratulations and thanks to the staff of the Delta Commission and to all of those who participated in putting together the report we now have before us. I am proud that Bill Clinton, Governor of my State of Arkansas, serves as Commission Chairman.

This report represents a blueprint for economic expansion of the Mississippi River Delta. The plan is before us. Now, we must do something about it. As we say in Arkansas, it is time to fish or cut bait.

We cannot allow this to become just another study, just so many words. We must breathe life into the words because to do less would allow serious problems to fester and leave in doubt the future of an entire region—the heartland of America.

There are specific steps recommended in this study, representing a path to an economic revival in the delta. I am happy to see that the report accepts language I recommended that our region move to participate fully in the Nation's switch to cleaner burning, farm-grown ethanol.

I have worked to expand ethanol use and, in turn, the farm economy of our region for 15 years. It is not pie-in-the-sky. It is coming—accelerated by the public demand for clearer air. We must now ensure that our farmers are postitioned to take advantage of this significant change in our fuel consumption habits.

Mr. Speaker, as in the case of working to expand ethanol, we in the delta will do our part to implement this study, to build on this blueprint.

We have never been afraid of hard work, but bringing this plan to life will require outside assistance. The States do what they can, but this will require a national commitment. I pledge today to do my part here in Congress, in concert with my colleagues, to see that the assistance is available.

The delta is full of promise—a promise exemplified by the people who call the region home, the river which ties us all together, our agricultural bounty and business climate.

Our challenge is to build on our assets and unlock the full potential of the region.

To provide Federal money to implement this plan represents an investment in America. Our investments here at home have been lagging behind over the last decade, leaving our bridges crumbling, our roads in poor shape, and many of our people not getting the education and training they need.

We cannot allow what has been termed the "Decade of Disinvestment" to continue into the 1990's.

To do so would perpetuate the continuance of a healthy bicoastal economy—with things going well on the east and west coast—while the heartland suffers.

It would mean that America will not be in the best position to compete in today's global economy.

I read with interest recently a five-part newspaper series entitled "Children of the Delta." I believe one of the headlines said a great deal about the dichotomous situation we face in our region of the country.

It read "Children of the rich delta are among the poorest in the Nation."

The rich delta? Those words go to the potential I spoke about earlier, while poverty is the reality in too much of the region today.

A mother was quoted in this series of articles as saying her children didn't have much chance in life and another said life was just something which happened to them, not something over which they had much control.

These are cries for help, Mr. Speaker.

We must heed the cries and reach down with the type of assistance which will help alleviate these problems. We must take action so these children will have a chance, so life won't just happen to them.

The daily grind of poverty, lack of education, poor housing, and a feeling of hopelessness are eating at the heartland of America, Mr. Speaker.

And, we know what happens to the body when the heart dies.

We have a chance to make a real difference by assisting in the implementation of the Delta Commission plan. Let us not be hesitant to accept the challenge before us.

## GENERAL LEAVE

Mr. ESPY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include therein extraneous material on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

## SUNDRY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Kalbaugh, one of his secretaries.

## HOUSE CONCURRENT RESOLUTION 330, THE VICTIMS OF CRIME BILL OF RIGHTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. MICHEL] is recognized for 5 minutes.

Mr. MICHEL. Mr. Speaker, on October 10, 1988, Presidential candidate George Bush declared "I'm going to bring an attitude to the White House that has more sympathy for the victims of crime than for the criminal."

It is time the Congress takes up President Bush's pledge, and offers innocent victims of crime the light of justice.

Does the current criminal justice system do enough to protect the rights of victims of crime? If you think it does, ask Jacob McGrogan, John and Maureen Woods, or the countless thousands who are sure it does not. Mr. McGrogan would tell you how he was beaten blind by a man who had just been released from prison pending another assault case trial. The Woods' will tell you how their son, a 16-year-old honor student, was stabbed to death for trying to break up an argument, and how the murderer was able to plea bargain to a 4-to-12-year prison term from a 25-year prison term. As Mrs. Woods put it, "We have been victimized twice—by the killer and by the system." Another woman told President Reagan's Victims of Crime Task Force, after describing her victimization, "[My] sense of disillusionment in the judicial system is many times more painful [than the crime]. I could not in good faith urge anyone to participate in this hellish process."

Statistics show that of the 8.1 million serious crimes like murder, assault, and burglary, only 149,000 criminals actually spend any time in jail, of which 36,000 serve less than a year. They also show that one in six defendants who are free on bail are arrested for new crimes, and that up to 90 percent of the cases in some cities end in plea bargains.

Over 7,000 victims' organizations have found these numbers add up to one thing: The system needs reform. In fact great progress has been made at the State level. Thirty-three State legislatures have passed victims' bills of rights, 45 States have comprehensive victims' rights legislation, and 46 have victims' compensation programs. Victims' rights are spelled out in 1,500 laws passed by these legislatures in recent years. Unfortunately, these regulations are different in every State, resulting in victim ignorance and apathy. Greater awareness and uniformity are needed to eliminate ignorance of existing

rights and to promote a better distribution of fundamental victims' rights.

To reform the system and to increase awareness of victims' rights, I am proposing model legislation to be adopted by the States for a Victims of Crime Bill of Rights. If every State adopts the suggested Victims of Crime Bill of Rights, uniformity, as well as real progress for victims, will result.

The model I have proposed would redress the current imbalance which favors the criminals in the criminal justice system and would seek to better protect the victims of crime from both the criminal and from the system. If enacted, this model legislation would seek to give the victim compassion, information, protection, and, where possible, compensation, while reestablishing a true sense of justice in the public's mind.

The 10 provisions of this model legislation share a common purpose: To make the system more responsive to the needs of victims. Included in these provisions are guarantees that victims will be treated with respect and dignity, and that they will be protected from the accused throughout the process. There are also calls for reform of the exclusionary rule and habeas corpus procedures. Finally, there are demands that the victim be included more in the entire process, from the conviction, through the sentencing, and to the parole of the criminal.

The 10 provisions are as follows:

First, a victim of crime should be treated with compassion, respect, and dignity throughout the criminal justice process.

According to "The Crime Victim's Book," authored by Morton Bard and Dawn Sangrey, emotional support by the police and the courts can be vital to the victim's recovery. Fully informing victims how the system works and their rights in the system would contribute much to the healing process. This support should become a required part of the process in every State.

Second, a victim of crime should be reasonably protected from the accused throughout the criminal justice process.

This provision was addressed in part by the Victim Witness Protection Act of 1984, and must be expanded on the State level to guarantee the safety of all victims of crime.

Third, a victim of crime should have a statutorily designated advisory role in decisions involving prosecutorial discretion such as the decision to plea bargain.

This provision has been intimated in various State amendments, but never clearly spelled out. President Reagan's Task Force on Victims of Crime recommended that the sixth amendment be modified to guarantee that "the victim, in every criminal prosecution shall have the right to be heard at all critical stages of judicial proceedings." The victim should be fully briefed and consulted about decisions made in the prosecution process.

Fourth, a victim of crime deserves comprehensive reform of the exclusionary rule, the application of which often results in the release of criminals on technicalities, rather than for substantive reasons.

The exclusionary rule requires that evidence obtained in violation of the fourth amendment to the Constitution be suppressed at trial. This doctrine has been fashioned not by the legislative branch, but by the judicial branch. This rule, which releases suspected criminals on technical judgments, needs to be reformed. When law enforcement officers take action based on the objective, good faith belief that their conduct conforms with the fourth amendment, then evidence seized from defendants should not be excluded in criminal proceedings.

Fifth, a victim of crime has the right to a reasonable assurance that the accused will be tried in an expeditious manner.

This provision has long been a dream of judicial reformers. Habeas corpus reform, as proposed by Senator STROM THURMOND, would streamline and speed the criminal justice process. Long delays currently make a mockery of that system.

Sixth, a victim of crime has the right to be present at all proceedings related to the offense, unless the victim is to testify and the court determines that the victim's testimony would be materially affected by other testimony heard at the trial.

This provision comes straight from the recently passed Texas constitutional amendment, and its aim is to futher include the victims of crime in the criminal justice process.

Seventh, a victim of crime has the right to information about the conviction, sentencing, and imprisonment of the person who committed the crime.

This provision also comes straight from the recently passed Texas constitutional amendment. Fully informing the victim about the final justice accorded should be a basic element of the criminal justice system.

Eighth, a victim of crime should be compensated for the damage resulting from the crime, and to the fullest extent possible, the person convicted of the crime should provide at least part of that compensation.

Such compensation will come from the criminal, where possible, and by expanding the victim's compensation fund by including matching Federal and State grants, and a percentage of money generated from prison labor.

Compensation programs that are currently part of the American criminal justice system need expansion. Today, 44 States have established victim compensation programs. These programs could be greatly expanded by erasing the current cap on the fund, which is now at $150 million.

Restitution should be a mandatory part of the American criminal justice system. The necessary link between criminal damage and prison labor has not been sufficiently made in the Federal system. The framework is there, in the form of UNICOR, the federally owned prison industries corporation established in 1934, to get productive labor from the prisoners. The current prison system has not adequately promoted the benefits of restitution for both the victim and the criminal. An effort must be made to find work for the criminals that does not compete with labor, yet still promotes increased prison industries. Efforts have been made to allow products produced by prison labor to be sold on the open market. Those kinds of proposals should also be pursued. Finally, sentencing guidelines should be revised to promote a real connection between the criminal damages and the restitution.

Ninth, a victim of crime should have a statutorily designated advisory role in deciding the early release status of the person convicted of the crime.

Justice is not served if a criminal is paroled without the knowledge or consent of the victim, especially if the criminal has threatened the victim. This provision would reaffirm the necessity of including the victim in that determination. It is the duty of the criminal justice system to ensure that the victim will be fully informed and protected from the perpetrator after the criminal is released from prison. It makes no sense to release a criminal who is perhaps even more dangerous from prison to the streets without taking necessary precautions to protect the victim.

Tenth, a victim of crime should never be forced to endure again the emotional and physical consequences of the original crime.

Safeguards must be made to ensure that victims of crime wil never be forced to suffer the emotional or physical results of the original victimization. This includes adequate protection from being punished by the criminal once that criminal is released from prison.

The current criminal justice system does not offer enough bright light of true justice to victims of crime. Instead, it is a system that keeps victims in the darkness of fear and ignorance. It is time this system change to reflect the needs and demands of the innocent public at large, and victims in particular. It is time that our criminal justice system be a beacon of light to victims of crime, and not to the criminals. The innocent people of this country, like Jacob McGrogan and Mr. and Mrs. Woods, demand it.

H. CON. RES. 330

*Resolved by the House of Representatives (the Senate concurring),* That it is the sense of Congress that the States should make every effort to adopt the goals of the following Victims of Crime Bill of Rights:

(1) A victim of crime should be treated with compassion, respect, and dignity throughout the criminal justice process.

(2) A victim of crime should be reasonably protected from the accused throughout the criminal justice process.

(3) A victim of crime should have a statutorily-designated advisory role in decisions involving prosecutorial descretion such as the decision to plea-bargain.

(4) A victim of crime deserves comprehensive reform of the exclusionary rule, the application of which often results in the release of criminals on technicalities, rather than for substantive reasons.

(5) A victim of crime has the right to a reasonable assurance that the accused will be tried in an expeditious manner.

(6) A victim of crime has the right to be present at all proceedings related to the offense, unless the victim is to testify and the court determines that the victim's testimony would be marterially prejudiced by hearing other testimony at the trial.

(7) A victim of crime has the right to information about the conviction, sentencing, and imprisonment of the person who committed the crime.

(8) A victim of crime should be compensated for the damage resulting from the crime, and to the fullest extent possible, the person convicted of the crime should be required to provide at least part of the compensation.

(9) A victim of crime should have a statutorily-designated advisory role in deciding the early release status of the person convicted of the crime.

(10) A victim of crime should never be forced to endure again the emotional and physical consequences of the original crime.

## LETTER TO PRESIDENT CONCERNING LOWER MISSISSIPPI DELTA DEVELOPMENT COMMISSION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky [Mr. HUBBARD] is recognized for 15 minutes.

Mr. HUBBARD. Mr. Speaker, I have been requested by the staff of the Lower Mississippi Delta Development Commission to share with Members and others an important letter to the President of the United States from the Governor of Arkansas and the chairman of the Lower Mississippi Delta Development Commission. This letter is dated May 14 of this year.

LOWER MISSISSIPPI DELTA
DEVELOPMENT COMMISSION,
*Memphis, TN, May 14, 1990.*

The PRESIDENT,
*The White House, Washington, DC.*

DEAR MR. PRESIDENT: This is the final report to you and the Congress of the United States of America on the work of the Lower Mississippi Delta Development Commission. It is more than just another government report to be added to countless shelves of government studies that have gone before.

This is a Handbook for Action—one that can turn the Delta and its 8.3 million people into full partners in America's exciting future, full participants in the changing global economy.

The Lower Mississippi Delta Development Commission was established under Public Law 100-460 in October 1988 through legislation introduced by a bi-partisan group of senators and representatives from the seven states making up the Lower Mississippi Delta region, as well as Congressmen from other parts of the nation. The Lower Mississippi Delta area is comprised of 219 counties in Arkansas, Louisiana, Mississippi, Missouri, Illinois, Tennessee and Kentucky. Together they form the poorest region of the United States.

The Commission was given this mission: to study and make recommendations regarding economic needs, problems, and opportunities in the Lower Mississippi Delta region, and to develop a ten-year regional economic development plan.

To begin its work, the Commission had to collect all the information, opinions and ideas available in the region. And that is exactly what has been done. We have blanketed the Delta, seeking input from many thousands of people who attend public hearings, spoke to us, gave us written testimony or participated through providing research and statistical information. We have reviewed a mountain of material and considered every single, specific suggestion made by the citizens of the Delta—and they had many ideas on how to improve the overall quality of life for all the people of the region.

In October 1989, we issued an interim report entitled "The Body of the Nation", which outlined the problems and opportunities of the Delta, the vast human and natural resources and many impressive efforts now underway to move our region forward.

We agreed that the Delta was an enormous, untapped resource for America, that it can and should be saved. We agreed that our goal should be nothing less than full partnership for the Delta: rates of employment and income at or better than the national average.

Now, in this Final Report, all of the information, all of the opinions and ideas we have collected have been put together into an ambitious, aggressive plan for the development of the region.

It is a handbook for action that anybody can pick up—a congressman, a governor, a legislator, a chamber of commerce president, a mayor, a teacher, or a student—and see what he or she can do to help.

We also believe the plan comes just in time for the Delta and its people. The 1990s have brought us an entirely new world marked by the triumph of democracy and market economies. This new world provides economic opportunities for Americans prepared to compete in it, and enormous challenges for those who are not. The people of the Delta cannot become full partners in America's future without an honest assessment of where we are in the emerging global economy and what we have to do to increase the capacity of all our people to succeed in it. That is what we have tried to do in our interim report of October 1989 and in this final report.

If we do not implement a single recommendation made in this report, a lot of Americans who live in the Delta are going to do fine in the 1990s: those who are well-educated, on the cutting edge of change, and able to take advantage of the emerging global economy. But millions of people will be left behind, and the region as a whole, including its successful residents, will not achieve its full potential.

We call on you, our Congress, our state and local leaders, and our citizens to assume responsibility for the Delta's future.

Being in the vanguard of change need not be a distinction limited to the freedom-hungry citizens of Eastern Europe or Poland or the aggressive business people of Singapore or Korea. The people of the Delta belong in that vanguard. They want to be there, and they can be if each of us will do our part.

Respectfully,

BILL CLINTON,
*Chairman.*

□ 1450

Mr. ESPY. Mr. Speaker, will the gentleman yield?

Mr. HUBBARD. I am happy to yield to my friend, the gentleman from Mississippi.

Mr. ESPY. I thank the gentleman for yielding. The gentleman from Kentucky says he was asked by the staff of the Delta Commission to make this particular insertion at this time, which prompted a need for me to compliment the staff. Earlier I raised the name of the commissioners themselves, but certainly I want to compliment Wilbur Hawkins, the executive director of the Delta Commission, for his excellent work and his expertise in shepherding this report to fruition, and for that matter to thank the entire staff, most of them working out of the Office of the Agrocenter in Memphis, TN. These are unparalled experts gathered from all around this particular region, and they gave of their time, their sweat, and their labor and resources to make sure that this report is one that was presented today, and one that is really an excellent piece of work.

So with that, I want to compliment Wilbur Hawkins because I know how hard he worked, and also the staff under his direction and control.

Mr. HUBBARD. It will not be any surprise to anyone to know that the executive director, Wilbur Hawkins, and the staff are extremely complimentary of the young Congressman from Mississippi named MIKE ESPY. They are very proud of him, and they appreciate the work he has done.

I know that one Kentuckian serves on the lower Mississippi Delta Development Commission as a member, and that is my friend, Lee Troutwine. Lee and his wife, Betty, were in my office yesterday. Lee Troutwine is from the Kentucky Department of Local Government and serves as a commissioner. Other State Commissioners are Chairman Bill Clinton, the Governor of Arkansas; Vice Chairman Ray Mabus, Governor of Mississippi; Secretary Ed Jones, a former U.S. Congressman from Northwest Tennessee; Charlie Kruse of the Missouri Department of Agriculture; Buddy Roemer, our former colleague who is now Governor of Louisiana; Dr. Rhonda Vinson of the Department of Economic Development, Southern Illinois University at Carbondale; and the presidential appointees include, as MIKE ESPY earlier said, former Congressman from Mississippi Webb Franklin, and also John Shepherd, an attorney-at-law.

If I could close by giving my colleagues the themes of the report.

Twelve central themes came to light through the course of the work of the Lower Mississippi Delta Development Commission. These themes depict the most fundamental needs in the region, needs whose resoluton would help the Delta reach its potential and fulfill its promise. The 12 themes call for the following:

(1) Develop leadership.

(2) Change attitudes regarding tradition and image.

(3) Improve education at all levels.

(4) Build institutional know-how and capacity.

(5) Achieve comprehensive approaches to solving problems.

(6) Improve abilities to function in a multicultural society; face race and class problems and bridge the gap.

(7) Build on and protect existing resources.

(8) Streamline institutional processes.

(9) Increase capital for development.

(10) Create and penetrate markets.

(11) Improve physical infrastructure.

(12) Build technical competence.

Those major themes weave their way through the issues and the recommendations like golden threads which, when sewn

together, give form and strength to the fabric of this plan, truly making it a handbook for action.

All the recommendations that accompany the 68 goals are in some way related to the central needs of the region. Some require action by the federal government. Some place responsibility with state and local governments. Some require response by the private sector, by institutions of higher learning, by businesses and industries, by foundations and other non-profit organizations, by churches, schools and above all, by the people.

Mr. Speaker, I would mention to my colleagues that there is a reason why we are not adjourning soon. We are awaiting other Members to come to the Chamber. We have had now an hour and 10 minutes of this wonderful Lower Mississippi Delta Development Commission report, and I look over and see colleagues of mine from Maryland and California and others who perhaps would want to mention that there is another region in the United States other than the Lower Mississippi Delta Development Commission area, and we appreciate their efforts on behalf of their respective States.

Mr. Speaker, I am proud to represent 24 counties in western Kentucky, 21 of whom are members of this lower Mississippi Delta Development Commission.

Let me share with my colleagues another portion of this report while we are awaiting other Members. I am going to mention agriculture, because agriculture is central to each of the seven States in the region. Indeed, the most important issue in the district I represent is agriculture, and on page 78 of the Commission report the 10-year goal is listed as an agriculture technology development system with a comprehensive database will be created and made available to delta farmers by the year 2001.

Over the next decade, technological advancement in agriculture is expected to continue to accelerate to meet a growing demand. Research is being conducted by all Land Grant Institutions and other colleges of agriculture, private sector scientists and others to address the demand of technology advancement. The Delta lacks the ability to make full use of new technologies.

Mr. Speaker, I yield back the balance of my time.

□ 1500

## REAUTHORIZATION OF THE HIGHWAY AND MASS TRANSIT BILL

The SPEAKER pro tempore (Mr. PICKETT). Under a previous order of the House, the gentleman from California [Mr. MINETA] is recognized for 5 minutes.

Mr. MINETA. Mr. Speaker, I appreciate this opportunity to address the House on a matter that will be very important in 1991. As many are aware, the present highway authorization bill will be expiring on September 30, 1991, and at that time we will be then entering a new era, I guess, known as the postinterstate era in terms of the kind of highway and mass transportation program that we would like to see as we enter the 1990's and prepare ourselves for the 21st century.

The present highway bill that we have was actually instituted by President Eisenhower in 1955, as the National Interstate and Defense Highway System. So under that program, we have now constructed 42,500 miles of interstate highways at an investment of some $127 billion on the part of U.S. taxpayers.

Now, this is probably the most expensive public works project that has been undertaken; it is one that has served our country very well. But unfortunately it is also very fragile.

So we are in the process now of conducting hearings in the Committee on Public Works and Transportation to try to get a good insight as to what the public would like to see in their Highway and Mass Transit Program in the next 5-year authorization period.

In conjunction with this kind of an overview of what is happening in the field of transportation, the Secretary of Transportation Sam Skinner undertook a very ambitious program to get public input that culminated in his issuance, with the President announcing it on the 8th of March of this year, the National Transportation Strategy.

I would like to commend the Secretary of Transportation for his vision in terms of what he wanted to see in a national transportation program. It was one in which he had hearings across the country. As I recall, it was something like 146 public hearings across the country where he listened to those who are from the private sector, including contractors, manufacturers of equipment, and the business community, as well as from the public sector, those who are from the State highway officials to people who operate transit districts across the country.

Now I think the fact that the Secretary undertook this kind of a program is commendable. The problem I have is with the final work product that came out on March 8, known as the national transportation strategy and policy as it relates to highway and transportation development.

I thought it was long on rhetoric and not very explanatory in terms of what they would like to see. It was a good analysis of the problems we are facing in transportation, but when it came to solutions it really lacked a great deal of thought and insight.

So through our Public Works and Transportation Committee, we are going to use that as a basic document. It is a good start.

We are using that as a basis for our public hearings that will continue on the balance of this year. Our Subcommittee on Surface Transportation of the Committee on Public Works and Transportation will be holding regional hearings across the country as we try to get public input as to what kind of a reauthorization bill we would like to have starting October 1, 1991.

Now in conformance with the Secretary's program, I think we have to look beyond just the reauthorization of a highway and mass transit program.

So I think that what we have to do is to build the new program around several principles. Those general principles include: What will the next transportation bill do to help us in terms of being able to compete in an international global marketplace? Second, what will the next highway and mass transportation bill do to help local and State economic development? Third, what will this bill do to help the safety of the public? Fourth, what will the next highway and mass transit bill do to help us in terms of improving the quality of life for all of us? Fifth, what will the bill do in terms of helping to provide consistent and stable funding for highway and mass transit programs?

I think, given those five principles, we should be able to build a very, very fine program. I know that in our Public Works and Transportation Committee, through the leadership of our chairman, the very able chairman, the gentleman from California [Mr. ANDERSON], and our ranking Republican Congressman, the gentleman from Arkansas [Mr. HAMMERSCHMIDT], and the ranking Republican on my subcommittee, the gentleman from Pennsylvania [Mr. SHUSTER], who is probably as knowledgeable as anybody is about surface transportation law in this Congress, that through their efforts we will be able to devise a program starting October 1, 1991, that will really give this country an edge in terms of being competitive in the international marketplace as well as being able to give our State and local governments the ability to do what they do best, and that is to provide a quality of life and economic development at the local level.

## THE DECADE OF THE TROJAN HORSE

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Maryland [Mrs. BENTLEY] is recognized for 60 minutes.

Mrs. BENTLEY. Mr. Speaker, I ask unanimous consent to speak briefly on two subjects and then on my main subject.

### HUMAN RIGHTS ABUSES IN KASHMIR

Mr. Speaker, reports of human rights abuses in the Kashmir region of India have been pouring into my office—not only from my constituents,

but also from people across the Nation.

Although I have not taken a position on the territorial dispute between India and Pakistan, I am concerned that the people of Kashmir may not be receiving medical attention and medical supplies.

Over the past 4 months, I have urged the Indian Embassy and the State Department several times to monitor and comment on the situation.

My constituents have arranged, at no expense to the U.S. Government, for a shipment of medical supplies to be flown to Kashmir. Time and time again, I have requested that the Indian Government allow these supplies to be delivered to Kashmir. The official Indian Government response was: "We (India) are not experiencing a shortage of medical supplies, but thank you for your attention and concern."

Contrary to this reply, we continue to have complaints about medical shortages from constituents whose families live in Kashmir. By phone, residents of Kashmir have told family members residing in the United States about the shortage of medical supplies. Unfortunately, our Government cannot send medical supplies to Kashmir without Indian Government consent.

Since this reply, I again have met with officials from the Indian Embassy and have requested another formal response regarding the shortage of medical supplies in Kashmir. To date, the Indian Government has not replied to my request.

Just today, I received word that President Bush has formed a Commission which will travel to Kashmir this weekend to evaluate the situation. If a shortage of medical supplies is found to exist, I recommend that the Indian Government accept any assistance being offered.

Mr. Speaker, we must act to ensure that the Kashmir region has adequate medical supplies. Denying medical supplies is inhumane, especially when assistance is being offered with no strings attached.

## THE FARM LOBBY VERSUS WHAT'S BEST FOR AMERICA

Mr. Speaker, it is a matter of great concern for every Member of Congress that the looming debate over carriage of American Government-donated food cargoes by U.S.-flag vessels has pitted farm interests versus maritime interests.

Despite the compromise that was worked out by maritime and agricultural groups regarding cargo preference in the 1985 farm bill, certain commodity interests are determined to launch another attack this year on a law that plays a vital role in ensuring our Nation's shipping capabilities.

The refusal of the big commodity traders and their friends to accept the results of the 1985 compromise has resulted in the question being rasised: If we are determined to ship Government-generated food cargoes as cheaply as possible, then why not let the aid recipients purchase the commodities for the lowest cost available anywhere in the world?

It is unfortunate that the debate has reached this point. It seems to me this Nation has the ability to sustain viable and strong agricultural and maritime sectors. After all, both communities are vital to our national interest.

Those who are tying to roll back the 1985 cargo preference compromise have galvanized the maritime community to take a look at the subsidies that agricultural export groups receive from the U.S. Government.

Mr. Speaker, I would like to submit for the RECORD an article on this subject that appeared in the April edition of the Seafarers Log, the offical publication of the Seafarers International Union; and I urge my colleagues to read this very informative article and to give it serious consideration in future debates on the cargo preference issue.

[From the Seafarers Log, April 1990]

### THE FARM LOBBY VERSUS WHAT'S BEST FOR AMERICA—BLIND TO THE NATIONAL INTEREST, COMMODITY PROFITEERS WOULD DESTROY AMERICAN FLEET

Heavily subsidized by the American government so they can sell farm commodities overseas, profit-swollen agribusiness interests are scheming on Capitol Hill to eliminate U.S.-flag shipping from carrying these taxpayer-supported cargoes.

In what would amount to torpedoing a five-year-old pact between farmers and the maritime industry, agricultural and commodity interests are gearing up to wipe out cargo preference laws which mandate that 75 percent of government-subsidized cargoes must be carried on American bottons.

The goal of these agricultural giants is to completely eliminate U.S.-flag shipping as a factor in this nation's aid programs. In search of added profits, they apparently are willing not only to destroy American shipping but also to sacrifice national security, since the presence of a domestic fleet in peacetime is vital to assure the carriage of military cargo in time of crisis. Additionally, a U.S. fleet ensures that essential products can reach America even in the event of economic embargoes and boycotts called by foreign interests.

As Congress prepares to debate renewal of the 1985 Food Security Act, giant farm groups are trying to line up support in the House and Senate to change the rules so that they will have unlimited freedom to use foreign-flag ships exclusively in carrying their cargo to overseas markets.

In fiscal 1989, the Department of Agriculture spent nearly $1.4 billion of the taxpayers' money to underwrite the foreign sales of agricutural products by the giant commodity brokers under the provisions of P.L. 480.

Subsidies to American shipping for the carriage of these cargoes cost Agriculture a mere $72.2 million in that same year. That represented the Department's share of the differential between American and foreign ocean freight costs involved in carrying 50 percent of P.L. 480 cargoes in American vessles.

The Department of Transportation laid out an additional $448 million in maritime subsidies that same year to cover the remaining 25 percent of the Government-impelled cargo reserved for American-flag vessels under the terms of the 1985 Food Security Act.

In other words, the total ocean freight differential paid to carry farm commodities in American-flag vessels amounted to approximately $116 million—a scant 8 percent of what the American taxpayers shelled out to farm interests to subsidize the sale of their products overseas.

The huge sums of money handed over to agribusiness for P.L. 480 sales abroad are dwarfed by the total amount of tax dollars shelled out to the agricultural industry to help it compete in the world market.

In addition to the $1.4 billion to cover the P.L. 480 shipments, 1989 outlays to promote the sale of American farm products overseas included:

More than $5.1 billion in export credits to assure that the agricultural giants were paid even when foreign purchasers defaulted on their debts.

$338.3 million for an "export enhancement program" and $200 million for "targeted export assistance"—both expenditures for the purpose of making American farm commodities more attractive to foreign buyers.

$95.1 million for the Foreign Agricultural Service, which places American representatives in key embassies and consulates around the world, whose fulltime job is to represent American agricultural interests abroad.

$37.6 million for the Office of International Cooperation and Development to provide market development and trade promotion services for American agribusiness.

All this adds up to 1989 outlays totaling $7.26 billion for farm interests—just to promote and sell American farm products in foreign countries. That doesn't include any of the billions of dollars spent by the government annually to stabilize domestic agricultural prices to assure a profitable existence for the farm industry.

Those sums stand in sharp contrast to the pittance the federal government allocates to the entire maritime industry. In addition to the $115.9 million which the government spent in 1989 for the ocean freight differential under cargo preference, it invested $220.4 million in operating differential subsidies. That's an annual total of just over $336 million for all of maritime—compared with the $7.6 billion just to cover subsidies for the agricultural commodity industry's foreign sales.

Why do these agricultural giants—whose subsidies for overseas sales are more than 22 times the total government outlay for the maritime industry—want to write American-flag shipping out of the next farm bill?

Their argument is that the national interest would better be served if the tax dollars which now go to maritime's ocean freight differential subsidies were used, instead, to buy additional agricultural commodities.

The ploy is not a new one. Last year, during debate on legislation to provide emergency aid to Poland, the maritime industry had to beat back efforts on the floor of both the House and Senate to waive U.S. maritime policy reserving a portion of that cargo for American-flag vessels.

Proponents of the scheme to delete cargo preference requirements on food shipments to Poland claimed that such action was necessary to maximize the amount of commodities being made available to the Polish people.

The maritime industry's supporters on Capitol Hill pointed out that if it was logical to target U.S.-flag shipping for supposed economies, it would make equal sense to deny the participation of American agricultural interests in the emergency aid program.

In theory, they pointed out, the federal government could maximize food allocations to Poland by purchasing less expensive agricultural products from foreign nations.

But, said these members of Congress, agriculture is vital to the U.S. economy, and so is the merchant marine because it is a vital component of our national defense structure.

The giant agribusiness interests were defeated as Congress rejected efforts to waive, weaken or undermine cargo preference requirements on food aid for Poland.

The maritime industry will be looking to these same enlightened House and Senate members to turn back this new effort by the heavily subsidized commodity dealers to sink the American-flag fleet.

The national interest is all-embracing and covers the public welfare, security and economic considerations.

In the case of both the agricultural export and maritime communities, each is forced to do business in a world where no level playing field exists.

The 1985 Food Security Act was enacted at a time when America's share of commercial wheat and flour exports dropped from 50 percent to about 33 percent between 1981 and 1984. The law was designed to assist American food producers to compete in a world market in which many governments subsidize their agricultural exports even more liberally than does the United States.

The success of that legislation can be measured by the fact that American wheat exports have increased by 30 percent since that time, proving that government policy can have a major effect on supporting a domestic industry.

The maritime industry understands a world trade dominated by protectionist policies of governments. It is forced to operate in a market that includes direct subsidies, tax credits and preference systems designed by many nations to promote their own fleets.

Failure to help American-flag shipping compete in that world market would do more than merely endanger the maritime industry itself.

At stake is the ability of the merchant marine to fulfill its historic role as the nation's fourth arm of defense in time of crisis. To have a fleet in readiness to carry out its national defense requirements means that America must have an active merchant marine functioning in the peacetime carriage of cargo to and from our shores.

No political considerations—and certainly no considerations of the need to gain special favor for other segments of the American economy—can justify trading off the nation's maritime capabilities.

## THE DECADE OF THE TROJAN HORSE

Mr. Speaker, every 10 years a national phenomenon takes place—decade naming. Trend watchers trip over each another to categorize and stereotype the decade—Roaring Twenties, Depression thirties and so on, are just a few of the labels thrown about to describe a generation and its socioeconomic preferences.

When fishing for labels, trend watchers look for a variety of things, but they pay special attention to what we do in our spare time because it is indicative of America's personality. What movies do we watch, what cars to we drive and what music do we listen to.

To me, music seems an especially appropriate barometer of the American psyche. One pop song, entitled, "Don't Worry, Be Happy," struck me as ironic. I thought, if this is what America is thinking and feeling, where is our country headed, and how can we function if people are living day-to-day without caring to look ahead and think about the future? Were the eighties the decade of "Don't Worry, Be Happy?"

Recent headlines have been telling us that corporations are making less money; that foreigners are gobbling up our firms because American investors can't afford them; that foreign car manufacturers are selling more cars in the United States than the big three; and, that the Japanese are bankrolling the resurgence of the U.S. steel industry. We are bombarded by these headlines daily, yet we are told—"Don't Worry, Be Happy."

Like Dorothy in the Wizard of Oz, we think that closing our eyes real tight and clicking our heels together three times, while repeating, Don't Worry, Be Happy, will make the reality of our situation go away.

In my speeches, I repeatedly have called attention to the continuing takeover of American resources and talents by foreign interests, primarily the Japanese. On September 19, 1989, I spoke of the efforts being made by Japanese investors to take over New York University Medical Center-Tisch Hospital.

I pointed out how the takeover of such an important university research hospital would give the Japanese access into the new ideas and technical innovations spawned by our medical university laboratory system.

In the same speech, I reviewed the sale of a major portion of the American rubber and tire industry to Japanese interests. Already, three giants of that industry, Mohawk Rubber, Firestone and Dunlop, are gone. I also discussed the shadow warriors, individuals, both American and Japanese, who are engaged in selling America to the Japanese in the imagemaking, lobbying and public-relations aspects of Japanese interests, and in the operation of Japanese-owned factories and businesses in the United States.

These shadow warriers, as described by Edward Klein in the May 1989, issue of Manhattan, Inc., "are the shock troops of Japan's campaign to buy into America. They constitute a unique sort of intermediary—a whole army of buffers, front men and stand-ins.

"They are the men who sniff out the best deals, who make the first approach, who protect the final decision-makers from mistakes or embarrassments of any kind."

For the record, I enumerated a number of the key American shadow warriors, all based in New York. Many of these shadow warriors are former Government officials. Could the eighties have been the decade of economic treason?

Should anyone doubt the power of foreign interests in this country, indeed within our own Government, I refer them to the reauthorization of the Technology Administration Act.

The first draft of the Technology Administration Act, which appropriates funds for research and development, limited foreign participation to North American Companies with the stipulation that majority ownership in the company be American.

This was not good enough for foreign companies and, surprisingly enough, it was not good enough for the AFL-CIO. Intense lobbying by foreign firms and the AFL-CIO brought about one very important change in the legislation.

Namely, foreign-owned firms would be eligible for U.S. R&D money to help develop high-definition television [HDTV] and other important technologies.

My first reaction to the change in the Technology Authorization Act was that I was confusing the bill with a foreign aid package. Why would the U.S. Government be funding foreign companies' research and development efforts?

I have been told that American industry is not capable of handling HDTV R&D on its own. Industry and labor representatives have said, "We need foreign expertise."

I also have been told that Sony Inc. of Japan was barred from participation in domestic Japanese R&D programs—that is why Sony located its HDTV R&D center in the United States. It wasn't because of any love of America, it was because they could not set up shop in Japan. And now, Sony may be eligible to receive American taxpayer dollars.

This is an issue that the American Electronics Association and the Electronics Industry Association should be monitoring closely. They should ask themselves what kind of future they can expect if they cannot compete with foreign technology advancements.

As I remarked on September 20, we have heard so much about HDTV and its importance as the linchpin of the electronics industry in the future, that

investments in HDTV today, will determine who controls that very vital market in the future.

Efforts by former DARPA director Craig Fields to spur HDTV research and development initially were greeted with enthusiasm—a pat on the back from the Pentagon for HDTV was like a gold seal of approval—it spurred interest and investment in HDTV technologies.

Now, however, the administration has moved the Pentagon away from HDTV research and we are left to wonder about the taboos of managed trade for industry by our left hand while our right hand manages agricultural trade.

While our technology base suffers setback after setback, foreign companies have been acquiring trendy American assets. The Japanese have purchased Rockefeller Center, Columbia Pictures, a minor league baseball team called the Birmingham Barons, Firestone, 7-Eleven—and the list goes on and on—where will it end? Were the eighties the decade of the colonization of America? Where we sell everything and own nothing?

We are selling our factories, importing our goods, selling our properties, and codeveloping and coproducing our weapons. We create less real wealth each year and, if we were ever challenged militarily, we would not be able to protect ourselves without the assistance of Japan and Europe.

David Geffen, chief executive officer of an independent record and film company, told the Washington Post: "If the Japanese came in and bought all the textbook manufacturers in this country, you can be sure someone in Congress would complain about the potential for abuse."

He continued saying, "Well, a giant part of the education of young people in this country comes from film and TV and someone should be paying attention to what is going on." Couple that remark with an earlier observation by Washington Post reviewer Jonathon Yardley, who said, "Hollywood not merely manufactures dreams but fixes them in the national psyche."

The potential for this industry to affect both how we view ourselves and our moral principles is troubling to me. Other countries have laws precluding the selling off of their communications and cultural businesses. In Canada you must have government approval to buy a distribution system for any cultural industry.

Americans or any other nationality cannot buy into the Japanese entertainment industry. Even in business, as T. Boone Pickens has found out, foreign shareholders of Japanese corporate stock are excluded from participation in the corporate decisionmaking process. Were the eighties the decade of the "One Way Street?"—where others can buy and sell anything in the United States, but the United States is not given the same prerogative abroad?

Sony's acquisition of Columbia Pictures provides them with a rich harvest for several reasons. First, they become the owners of one of the best and largest film libraries in the world, with 27,000 hours of television programs, 40 years' worth of films—including some of the great classics such as "Bridge Over the River Kwai"—and over 300 television series. Second, they become proprietors of the Loew's movie theater chain.

Third, with our American films, Sony Inc., can also penetrate the Asian market, where American films are beginning to do well. More importantly, they can now use our 2,500 plus American film properties to put themselves in the network business in Europe.

Fourth, owning Columbia's software—movies—will enhance greatly Sony's marketing and sales potential for its hardware, including cameras, VCR's, and advanced television products. In fact, the software or movies are critical to the Sony hardware. Each step of the way, Sony has integrated itself vertically to control software and hardware associated with movies and television.

Only a Japanese company could get away with such a feat because American companies are proscribed by the Justice Department from vertically integrating their companies. Although they call themselves American, a truly American Sony would have been in violation of U.S. antitrust laws and would have been barred from purchasing Columbia Pictures.

In fact, I wrote to the U.S. Attorney General and requested that the Justice Department investigate the antitrust implications of this acquisition. They replied, "Thank you for your letter * * * but pursuant to a longstanding liaison agreement with the Federal Trade Commission [FTC], the Commission rather than the Department will investigate the matter." The Justice Department referred my letter to the FTC and typically no action was taken.

Another difficult situation for America is the state of the semiconductor industry. Semiconductors are critical components of virtually every electronic device.

Sony, by immensely increasing its market for VCR's through the acquisition of Columbia Pictures, further tightens the noose. Even more ominous, almost all of our weapon systems, our first line of defense, require semiconductors.

In the 1980's we spent $2 trillion reequipping our country to meet aggression abroad. How can we meet foreign aggression when we have placed ourselves at the mercy of foreign technology and suppliers to keep our defense operational?

Some policy people claim these developments are just a matter of the inevitable march of history—that we must accept the decline of our country and now it is someone else's turn to take world leadership. Were the eighties the decade of the "Hollowing Out of America?"—where our components are purchased overseas?

The A, the M, the E, and the R are made in Kyoto and the I, the C, and the A are made in Tokyo. The components are shipped to the United States, assembled and stamped—Made in the U.S.A.—but the product was actually made in Japan. Is this part of the inevitable march of history?

I reject this, emphatically, as do most Americans. I say no to this reasoning, or perhaps I should call it lack of reasoning. We are the captains of our fate, but we first must recognize what is happening—then we can do something about it. Drift is fatal. While we have permitted our trading partners and competitors to operate in this country under the world's most open, generous, and liberal rules, we have in turn been shut out of markets in other countries through nontariff barriers to trade.

In stark contrast to our competitors, we have provided little or no export infrastructure for American companies. My colleague from Pennsylvania, Mr. RIDGE, is trying to remedy this situation and has introduced legislation to provide a central export infrastructure. Rather than push exports made in the USA by American companies, our tax laws and costs of doing business have encouraged industry to locate their factories abroad.

Make no mistake about it: We are up against formidable competitors who are relentless and understand how to compete as a nation. They know what governance and ownership of property means in being a strong country. The acquisitions America has allowed would never be permitted in France, Italy, or Japan.

Foreign acquisitions of American assets, lobbying through trade unions, dominance in fields such as semiconductors, vertical integration of corporations, monetary donations to schools and charities, all are interrelated. We must not sit still and watch this happen.

Time is short. It is time we face the fact that we are engaged in an economic struggle—that to survive in the 21st century we must think of America as a nation—not a Monopoly board for the rest of the world.

In 1986, I introduced a bill to create a Marshall plan for America, just as we created a plan to revitalize Europe and Japan after World War II.

We helped build up Europe and Japan after the war; surely we can do

as much for ourselves. Although my Marshall plan for America has lain by the wayside, the premise is correct—before we decide to build up another competitive block in Eastern Europe, we should not neglect our own foundation; neglect surely will destroy our country.

Although much has been said about education in America, I see many Japanese, Korean, and other foreign students in our private and public graduate and undergraduate universities. The majority of our schools, professors and students are good—we cannot blame them for the problems Government and private business have created.

After all, it was Americans who discovered the use of semiconductors for electronic circuitry and who invented transistors, microelectronics, lasers, VCR's, and electronic digital computers. The irony, of course, is that so many of these innovations are produced efficiently by other countries. We have the technology, but oftentimes we lack the engineering processes that were the hallmark of production in the eighties.

Given a sense of mission and direction, Americans can lead the world. The brilliant teams that created new technologies can use their skills to revolutionize production of commercial products. We have not lost our touch.

The problem of international competitiveness only can be challenged by bringing these issues to the attention of the voters and the policymakers. I look forward to the day when no self-respecting American will consider serving as a "shadow warrior" for any foreign country, no matter what the financial reward.

As Mr. James Fallows said in his piece in the Atlantic Monthly entitled "Containing Japan,"

> There is a basic conflict between Japanese and American interests and it would be better to face it directly rather than pretend it doesn't exist.

He also says,

> Americans who promote Japan's acquisitions and interests in our country do not serve the best interests of the United States and would be well advised to look to other pursuits.

We will never reform or fundamentally change Japanese culture—we can only ask that they accept the premises of free and fair trade or accept the consequences of Section 301 of our trade laws.

For, in reality, when considering the differences between American and Japanese trade policies, we should label the eighties "The Decade of the Trojan Horse."

We opened our arms, our markets, and our wallets to imported gifts; but we did not realize that these gifts contained the chains of our economic subserviance.

Americans came to these shores to be free—and for over 200 years they continued to come here for freedom and opportunity. We should never change our values to become "more like the Japanese." It just won't work. Instead, we must take control of our economic ship and guide it to the course of economic productivity and prosperity.

If we do not take the helm, I fear that we will become an international labor pool from which the rest of the world drinks, but to whom no one is responsible.

□ 1530

## MILITARY SPENDING AND THE BUDGET

The SPEAKER pro tempore (Mr. PICKETT). Under a previous order of the House, the gentleman from Massachusetts [Mr. FRANK] is recognized for 60 minutes.

Mr. FRANK. Mr. Speaker, the President has acknowledged a need to revisit the budget figures. One of the major points of difference between ourselves on the majority side and the President had to do with the military spending numbers. The budget crisis that now appears to be upon us in my mind reinforces the points that many of us have made earlier about the urgency of beginning a path of reducing military spending. We will not solve the budget crisis by military spending alone, and military spending reductions have to be done in a reasonable way. We do not want to cause disruption in communities, and we certainly do not want to break faith with the young people who volunteer to serve in the armed services. Those who volunteered to serve for a particular period in my judgment are entitled to have that respected.

However, Mr. Speaker, as we look at a 3- and 4-year budget picture, military spending becomes very relevant.

Let me begin making one suggestion, Mr. Speaker, as to where we would save, it seems to me, a considerable amount of money: the Philippines. We are in the Philippines today in the posture that the kids in, I think it was Hannibal, MO, were to Tom Sawyer. We are begging and begging to be allowed to paint their fences. The United States is there in a very substantial way benefiting the Philippines.

What we see now is that Filipino leaders on both the opposition and government side are highly critical of us. Our Armed Forces personnel have recently been murdered, and their lives have been threatened, and certainly it is our obligation to protect people in the armed services from situations where they walk unarmed and are set upon by murderers.

Mr. Speaker, I do not understand why we continue to act as if the people of the Philippines are doing us an enormous favor by allowing us to spend I do not know how many billions of dollars that we spend there. The military picture has improved some. We have Trident submarines; we have other means available to us.

I must say that it seems to me that the likelihood that either the People's Republic of China or the Soviet Union plans a massive, seaward invasion of our allies has diminished, and this is an example of, it seems to me, cultural lag that is putting strains on us financially when, as the President has acknowledged, we need to be going the other way.

Let us move geographically to Japan. A very instructive document was prepared by the General Accounting Office at the request of our colleague, the gentlewoman from Colorado [Mrs. SCHROEDER] who chairs a subcommittee of the Committee on Armed Services, and she and her ranking member, I believe the gentleman from Flordia [Mr. IRELAND], have done some very good work on this burden sharing.

The General Accounting Office has documented that in today's dollars we are spending, if I recall correctly, about $8 billion in Japan. Now the primary beneficiary of that is Japan. We are there primarily defending Japan, although it has some associated defense benefits to us. The Japanese, as I recall the number, pay out $3 billion in compensation. It was appropriate 45 years ago for the United States to provide subsidies to Japan, as we did, in an act of real generosity. After World War II, the United States set an extraordinary example of generosity by helping, not just our former friends, but our former enemies, Germany and Japan. Now, thanks in part to enlightened policies on the part of the United States, Japan is an extraordinarily prosperous and democratic nation. We can take pride in our contributions to that fact.

What we should not do is continue to subsidize the Japanese as if this were 45 years ago when they were impoverished.

□ 1540

We are subsidizing our competition. There is not a sensible reason that I can think of why United States taxpayers should be putting $8 billion a year into the defense of Japan, primarily for its benefit, although we get some secondary benefits, while they pay us merely $3 billion in compensation.

Mr. Speaker, what has been distressing to me is the mind-set of some of those in our national security apparatus when this issue was raised. In a General Accounting Office report, the Defense Department said that we were being unkind to the Japanese, or

rather the General Accounting Office was, by giving them credit for only about $3 billion in spending. They said the Japanese in fact are spending more than $3 billion. There is an additional $600 million, they said, in this spending. They documented that.

The General Accounting Office was told by the Defense Department that the Japanese should get credit in this accounting and burden-sharing because when American troops ride in American vehicles on Japanese roads, they are not required to pay tolls.

Now, Mr. Speaker, that seems to me rather odd to be giving the Japanese credit, because when our troops who are stationed there at their request to protect them primarily, although also to help us, when our troops who are stationed there at our expense to help protect them ride the roads, they are not charged tolls. They also said the Japanese should get credit because after all when we have bases, they do not levy property taxes, and they said the Japanese do us the favor of not charging us taxes on fuel.

Mr. Speaker, that is absurd. It is absurd that we should consider they are doing us a favor when they simply do not charge us for the privilege of defending them. That would be equivalent to owning a movie theater, having a fire and then when you paid your property tax bill, deducting a sum equivalent to the amount of admissions you did not charge the firefighters when they came in to put out the fire.

We have people there in Japan to help Japan and we are told by our Defense Department that we ought to give them some kind of financial credit because they do not charge us for the privilege of defending them.

Western Europe, of course, is the most glaring example. Once again policies that were appropriate 40 years ago are wholly inappropriate today. President Bush says yes, he accepts the fact that we can diminish our troops in Western Europe, but not the whole 225,000.

Mr. Speaker, there is no valid military purpose for those 225,000 troops. We do not know what is going to happen forever in the Soviet Union, but that troop placement there is aimed at preventing a land attack by the Soviet Union and its allies against Western Europe.

Mr. Speaker, I am prepared to make a very radical and bold statement. Poland and Hungary do not intend in the foreseeable future to invade France; but President Bush's budget assumes that is something against which we must still guard. There is no reason whatsoever for us to keep 225,000 troops in Europe at a cost of tens of billions of dollars when you look at the troops and the civilian and the supporting personnel. Tens of billions of dollars are now being spent by the United States each year to protect France, Germany, and Denmark, against an invasion by Poland, Hungary, Bulgaria, and the Soviet Union. I do not believe there is any likelihood of that.

We need to keep up our defenses vis-a-vis the Soviet Union. There are needs for us to keep a nuclear deterrent, but a land-based war in Europe is not a reasonable prospect.

Well, we are told we have to keep 225,000 troops in Europe anyway because we have to reassure the allies.

Mr. Speaker, I am very skeptical of the argument that we always have to keep reassuring our allies, particularly when it costs us billions of dollars. I do not know why our allies do not take a turn at reassuring us.

We will be returning to these issues.

I acknowledge that some of these savings cannot be accomplished in this fiscal year, but many of them can be accomplished in the fiscal year to come and immediately thereafter. The fact is that we have made only a start in reducing military spending. We ought to be the strongest nation in the world and well able to protect the interests of our vulnerable allies. We have budgetary plans now to do far more than that, including the subsidy of some very wealthy allies.

I strongly urge, Mr. Speaker, that the President and the Armed Services Committees as part of these budget negotiations take realistic look at what our military needs are, and I believe that we will be able to substantially reduce them and that will help, it will not by itself solve, but it will help resolve our crisis.

## NEED FOR NUCLEAR STANDARDIZATION BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee [Mr. CLEMENT] is recognized for 10 minutes.

Mr. CLEMENT. Mr. Speaker, today I had a real opportunity. I feel like I made history. I had the privilege of speaking before 2,000 women at the First Lady's luncheon today honoring First Lady Barbara Bush. I had the honor of getting the entertainment for the event, since I represent Nashville, TN, "Music City, U.S.A.," or what I might refer to as Andrew Jackson's district.

Andrew Jackson was a man of great vision, a man who served his country well. He was the first Congressman from Nashville, or what is called the Hermitage District.

Well, Gary Morris was the entertainment today at the First Lady's luncheon. Gary is a native of Texas, but he calls Tennessee his home now. He has had many No. 1 recording hits, one of which was "Wind Beneath My Wings," which he recorded in 1983 and for which he was awarded the Country Music Association Song of the Year. He has been in the Broadway cast of "Les Mis." He starred opposite Linda Ronstadt in the Joseph Papp production of La Boheme. He is seen on TV and has starred on the Colbys and Another World. He is an artist, an entertainer, and singer, and actor. And he is very active in environmental issues.

I know he is very concerned, as we all are, about clean air and whether we are going to pass a clean air bill. I think and feel very strongly that Congress will pass a clean air bill presently.

I also want to talk about another subject that I had an opportunity to get to know, and that is nuclear energy. I had the opportunity to be on the TVA Board of Directors for 2 years. I am the only TVA Director ever elected to the U.S. Congress. Because of my service, I also came to the conclusion that we need nuclear, we need coal, we need hydro, we need all sources of energy for our future energy needs. We should not put all our eggs in one basket. We should not be all nuclear. We should not be all coal. Surely, we should not be all oil.

We are too dependent on foreign oil. I think all of us believe that very strongly. As a matter of fact, we are 42 percent dependent on foreign oil.

You know, if you look at the facts and what has been happening to us, a lot of these oilspills that have occurred, have involved foreign oil being transported to the United States. As I mentioned, we are 42 percent dependent on foreign oil today. If we do nothing between now and the year 2000, we are going to be 60 percent dependent on foreign oil.

Have we forgotten about those long lines? Have we forgotten about the inconveniences that we have had in the past? I think probably we have. I hate to say that, but we have.

That is why I have introduced a piece of legislation called nuclear standardization. If we had standardized nuclear designs a decade or two ago, nuclear would have been safer and it would have been cheaper. Today if we adopt the Clement legislation on nuclear standardization, we could save 55 percent of the capital costs of what it costs to build a nuclear plant so we can have nuclear energy for the future—so we do not have to be dependent on foreign oil.

Oil dependency is dangerous. It is not in the best interests of our national security.

Therefore, I ask my colleagues to look seriously at the facts, at my bill on standardization and at the future of nuclear energy so we will not put all our eggs in one basket, so we will be diversified, so we will be energy independent.

□ 1550

## ANNUAL REPORT OF DEPARTMENT OF TRANSPORTATION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore (Mr. PICKETT) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Energy and Commerce. The Committee on Merchant Marine and Fisheries, and the Committee on Public Works and Transportation:

(For message, see proceedings of the Senate of today, Wednesday, May 16, 1990.)

## REPORT ON MEASURES TAKEN IN RESPONSE TO MILITARY CRACKDOWN IN CHINA—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 101-192)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Foreign Affairs and ordered to be printed:

(For message, see proceedings of the State of today, Wednesday, May 16, 1990.)

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. PARRIS (at the request of Mr. MICHEL), for today, on account of official business.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MCEWEN) to revise and extend their remarks and include extraneous material:)

Mr. EMERSON, for 60 minutes, on May 22.

(The following Members (at the request of Mr. SKAGGS) to revise and extend their remarks and include extraneous material:)

Mr. FORD of Michigan, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. DORGAN of North Dakota, for 60 minutes, today.

Mr. ECKART, for 60 minutes, today.

Mr. GONZALEZ, for 60 minutes, today.

Mr. GAYDOS, for 5 minutes, on May 22 and 23.

Mr. ESPY, for 60 minutes, on May 22.

(The following Member (at the request of Mr. EMERSON) to revise and extend his remarks and include extraneous material:)

Mr. MICHEL, for 5 minutes, today.

(The following Member (at his own request) to revise and extend his remarks.)

Mr. MINETA, for 5 minutes, today.

(The following Member (at his own request) to revise and extend his remarks and include extraneous material:)

Mr. HUBBARD, for 15 minutes, today.

(The following Member (at his own request) to revise and extend his remarks and include extraneous material:)

Mr. FRANK, for 60 minutes, today.

(The following Member (at his own request) to revise and extend his remarks and include extraneous material:)

Mr. CLEMENT, for 10 minutes, today.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. MCEWEN) and to include extraneous matter:)

Mr. MADIGAN.
Mr. HILER.
Mr. COUGHLIN.
Mr. GALLEGLY.
Mr. CRANE in two instances.
Mr. GILMAN in two instances.
Mrs. ROUKEMA.
Mrs. SAIKI.
Mr. ROTH.

(The following Members (at the request of Mr. SKAGGS) and to include extraneous matter:)

Mr. DARDEN.
Mr. ATKINS in 12 instances.
Mr. WISE.
Mr. ROE.
Mr. BOSCO.
Mr. MRAZEK.
Mr. HAMILTON.
Mr. LAFALCE in two instances.
Mr. TORRICELLI.
Mr. MATSUI in two instances.

## ENROLLED BILLS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1805. An Act to amend title 5, United States Code, to allow Federal annuitants to make contributions for health benefits through direct payments rather than through annuity withholdings if the annuity is insufficient to cover the required withholdings, and for other purposes; and

H.R. 3961. An Act to redesignate the Federal building at 1800 5th Avenue, North in Birmingham, AL, as the "Robert S. Vance Federal Building and United States Courthouse."

## BILL PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a bill of the House of the following title:

H.R. 2364. An act to amend the Rail Passenger Service Act to authorize appropriations for the National Railroad Passenger Corporation, and for other purposes.

## ADJOURNMENT

Mr. CLEMENT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 51 minutes p.m.) the House adjourned until tomorrow, Thursday, May 17, 1990, at 10 a.m.

## EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Reports and amended reports of various House committees concerning foreign currencies and U.S. dollars utilized by them during the second, third and fourth quarters of 1989 and the first quarter of 1990 in connection with foreign travel pursuant to Public Law 95-384, as well as 1989 foreign travel reports for various miscellaneous groups of the U.S. House of Representatives, are as follows:

AMENDED REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON ARMED SERVICES, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN APR. 1 AND JUNE 30, 1989

| Name of Member or employee | Date | | Country | Per diem [1] | | Transportation | | Other purposes | | Total | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | Arrival | Departure | | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] |
| Visit to France and United Kingdom Apr. 20–24, 1989: Delegation Expenses. | 4/20 | 4/23 | France | | | | | | 1,599.02 | | 1,599.02 |
| Committee total | | | | | | | | | 1,599.02 | | 1,599.02 |

[1] Per diem constitutes lodging and meals.
[2] If foreign currency is used, enter U.S. dollar equivalent; if U.S. currency is used, enter amount expended.

LES ASPIN, Chairman, Apr. 26, 1990.

AMENDED REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON ARMED SERVICES, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN JULY 1 AND SEPT. 30, 1989

| Name of Member or employee | Date | | Country | Per diem [1] | | Transportation | | Other purposes | | Total | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | Arrival | Departure | | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] |
| Visit to Philippines, Taiwan, Thailand, Japan and Korea, Aug. 10–20, 1989: Delegation expenses. | 8/14 | 8/17 | Thailand | | | | 817.71 | | 1,552.66 | | 2,370.37 |
| Committee total | | | | | | | 817.71 | | 1,552.66 | | 2,370.37 |

[1] Per diem constitutes lodging and meals.
[2] If foreign currency is used, enter U.S. dollar equivalent; if U.S. currency is used, enter amount expended.

LES ASPIN, Chairman, Apr. 26, 1990.

AMENDED REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON ARMED SERVICES, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN OCT. 1 and DEC. 31, 1989

| Name of Member or employee | Date | | Country | Per diem [1] | | Transportation | | Other purposes | | Total | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | Arrival | Departure | | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] |
| Visit to Morocco, Egypt, Oman, and Portugal, Nov. 26–Dec. 5, 1989: Delegation expenses. | 11/28 | 12/1 | Egypt | | | | 550.00 | | 432.79 | | 982.79 |
| Visit to Korea and Thailand, Dec. 9–Dec. 15, 1989: Delegation expenses. | 12/12 | 12/15 | Thailand | | | | 889.87 | | 901.69 | | 1,791.56 |
| Visit to West Berlin, Germany, Czechoslovakia, and Austria, Dec. 13–17, 1989: Delegation expenses. | 12/15 | 12/16 | Czechoslovakia | | | | 754.97 | | | | 754.97 |
| Committee total | | | | | | | 2,194.84 | | 1,334.48 | | 3,529.32 |

[1] Per diem constitutes lodging and meals.
[2] If foreign currency is used, enter U.S. dollar equivalent; if U.S. currency is used, enter amount expended.

LES ASPIN, Chairman, Apr. 26, 1990.

AMENDED REPORT OF EXPENDITURES FOR OFFICIAL TRAVEL, COMMITTEE ON ENERGY AND COMMERCE, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN APR. 1 AND DEC. 31, 1989

| Name of Member or employee | Date | | Country | Per diem [1] | | Transportation | | Other purposes | | Total | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | Arrival | Departure | | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] | Foreign currency | U.S. dollar equivalent or U.S. currency [2] |
| Bruce Chafin | 4/1 | 4/9 | Egypt | | 1,184.00 | | | | | | 1,184.00 |
| Commercial air fare | | | | | | | 2,284.00 | | | | 2,284.00 |
| Joe Barton, MC | 11/12 | 11/14 | Switzerland | | 498.00 | | | | | | 498.0 |
| Al Swift, MC | 12/18 | 12/20 | Cuba | 286.00 | | | | | | | 286.00 |
| Commercial air fare | | | | | | | 567.00 | | | | 567.00 |

TOM LANTOS, Chairman, Apr. 26, 1990.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3186. A letter from the Director, Defense Security Assistance Agency, transmitting notification concerning the Department of the Air Force's proposed letter(s) of offer and acceptance [LOA] to Norway for defense articles (Transmittal No. 90-33), pursuant to 10 U.S.C. 118; to the Committee on Armed Services.

3187. A letter from the Director, Defense Security Assistance Agency, transmitting notification concerning the Department of the Air Force's proposed letter(s) of offer and acceptance [LOA] to Denmark for defense articles (Transmittal No. 90-34), pursuant to 10 U.S.C. 118; to the Committee on Armed Services.

3188. A letter from the Administrator, General Services Administration, transmitting the agency's 11th quarterly report on its administration of the Personal Property Donation Program and the identification and use of Federal real property to assist the homeless, pursuant to Public Law 100-77, section 501(e) (101 Stat. 510); to the Committee on Banking, Finance and Urban Affairs.

3189. A letter from the Secretary of Housing and Urban Development, transmitting a report on section 3 of the Housing and Urban Development Act of 1968; to the Committee on Banking, Finance and Urban Affairs.

3190. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Air Force's proposed letter(s) of offer and acceptance [LOA] to Denmark for defense articles and services (Transmittal No. 90-34), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

3191. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Air Force's proposed letter(s) of offer and acceptance [LOA] to Norway for defense articles and services (Transmittal No. 90-33), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

3192. A communication from the President of the United States, transmitting a copy of the President's determination that he has exercised the authority granted him under section 451(a)(1) of the Foreign Assistance Act of 1961, as amended, to provide

emergency assistance for Nicaragua, pursuant to 22 U.S.C. 2261(a)(2); to the Committee on Foreign Affairs.

3193. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting copies of the original report of political contributions by Robert E. Lamb, of Georgia, Ambassador Extraordinary and Plenipotentiary-designate to the Republic of Cyprus, and members of his family, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

3194. A letter from the Secretary of Health and Human Services, transmitting a study on whether payments should be made under section 1886(d) of the Social Security Act to a hospital for administratively necessary days, pursuant to 42 U.S.C. 1935c; to the Committee on Ways and Means.

3195. A letter from the Chairman, Lower Mississippi Delta Development Commission, transmitting a final report on a 10-year strategic economic development plan for the lower Mississippi delta; jointy, to the Committees on Banking, Finance and Urban Affairs and Public Works and Transportation.

3196. A letter from the Chairman, Physician Payment Review Commission, transmitting a copy of recommendations on the Medicare volume performance standard for fiscal year 1991, pursuant to Public Law 101-239, section 6102(a) (103 Stat.; jointly, to the Committees on Ways and Means and Energy and Commerce.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 4205. A bill to authorize appropriations for fiscal year 1991 for the Maritime Administration, and for other purposes; with an amendment (Rept. 101-487). Referred to the Committee of the Whole House on the State of the Union.

Mr. GORDON: Committee on Rules. House Resolution 394. Resolution providing for the consideration of H.R. 2273, a bill to establish a clear and comprehensive prohibition of discrimination on the basis of disability (Rept. 101-488). Referred to the House Calendar.

Mr. MOAKLEY: Committee on Rules. House Resolution 395. Resolution providing for the consideration of H.R. 4636, a bill to authorize supplemental economic assistance for fiscal year 1990 to support democracy in Panama and Nicaragua, and for other purposes (Rept. 101-489). Referred to the House Calendar.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DYMALLY:

H.R. 4827. A bill to amend title 39, United States Code, to provide a means by which any municipality may elect to have its name included in all mailing addresses within its boundaries; to the Committee on Post Office and Civil Service.

By Mr. WHITTEN:

H.R. 4828. A bill making dire emergency supplemental appropriations for disaster assistance, food stamps, unemployment compensation administration, and other urgent needs, and transfers, and reducing funds budgeted for military spending for the fiscal year ending September 30, 1990, and for other purposes; to the Committee on Appropriations.

By Mr. DEFAZIO:

H.R. 4829. A bill to amend the Military Selective Service Act to prohibit registration and to halt the activities of civilian local boards, civilian appeal boards, and similar local agencies of the Selective Service System; to the Committee on Armed Services.

By Mr. FEIGHAN (for himself and Mr. MOAKLEY):

H.R. 4830. A bill to enhance the ability of law enforcement officers to combat violent crime in America by providing criminal and civil enforcement of standards established by the National Institute of Justice for body armor; to the Committee on the Judiciary.

By Mr. HILER:

H.R. 4831. A bill to amend the Internal Revenue Code of 1986 to deny the possessions tax credit for certain business operations relocated from the United States; to the Committee on Ways and Means.

By Mr. McDADE:

H.R. 4832. A bill to prohibit disposal of solid waste in any State other than the State in which the waste was generated; to the Committee on Energy and Commerce.

By Mr. MADIGAN:

H.R. 4833. A bill to amend the Internal Revenue Code of 1986 to treat as sale proceeds of a residence amounts paid by the Secretary of Defense representing the reduction in the value of the residence on account of a military base closing; to the Committee on Ways and Means.

By Mr. MAVROULES:

H.R. 4834. A bill to provide for a visitor center at Salem Maritime National Historic Site in the Commonwealth of Massachusetts; to the Committee on Interior and Insular Affairs.

By Mr. MOODY (for himself, Mr. PRICE, and Mrs. LLOYD):

H.R. 4835. A bill to establish a grant program to provide health insurance information, counseling, and assistance to individuals eligible to receive benefits under title XVIII of the Social Security Act, and for other purposes; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. MORRISON of Connecticut:

H.R. 4836. A bill to amend title 38, United States Code, to provide for adjustments on a State-by-State basis of income thresholds for eligibility for health care from the Department of Veterans Affairs; to the Committee on Veterans' Affairs.

By Mr. ROTH:

H.R. 4837. A bill to extend the temporary suspension of duty on power-driven weaving machines for weaving fabrics more than 4.9 meters in width; to the Committee on Ways and Means.

By Mrs. SAIKI:

H.R. 4838. A bill to prohibit the shipment of chemical munitions to Johnston Atoll for demilitarization or storage; to the Committee on Armed Services.

H.R. 4839. A bill to amend the Internal Revenue Code of 1986 to permit the use of an annual accrual method of accounting for the trade or business of farming bananas or pineapples; to the Committee on Ways and Means.

By Mr. WYDEN (for himself, Mr. WAXMAN, Mr. WALGREN, Mr. DINGELL, Mr. ROYBAL, Mr. SCHEUER, Mr. SIKORSKI, Mr. BATES, Ms. SLAUGHTER of New York, and Mrs. UNSOELD):

H.R. 4840. A bill to require Medicare supplemental insurance policies to meet standards relating to simplification, nonduplication, and minimum loss ratios, and for other purposes; to the Committee on Energy and Commerce.

By Mr. MICHEL:

H. Con. Res. 330. Concurrent resolution to express the sense of the Congress that the States should make every effort to adopt a Victims of Crime Bill of Rights; to the Committee on the Judiciary.

## ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 41: Mr. DERRICK.

H.R. 4718: Mrs. ROUKEMA.

H.R. 4761: Mr. SUNDQUIST.

H.R. 4763: Mr. MFUME.

H.J. Res. 81: Mr. MORRISON of Washington.

H.J. Res. 418: Mr. LEWIS of Georgia, Mr. YATES, Mr. KASTENMEIER, Mr. EDWARDS of California, Mr. WALGREN, Mr. TOWNS, Mr. BORSKI, Mr. MAVROULES, Mr. DWYER of New Jersey, Mr. RINALDO, Mr. MARTINEZ, Mr. ENGEL, Mr. SOLARZ, Mr. WEISS, Mr. MATSUI, Mr. NAGLE, Mr. FALEOMAVAEGA, Mr. SHAYS, Mr. SKAGGS, and Mr. LEVINE of California.

H.J. Res. 518: Mrs. PATTERSON, Mr. BEVILL, Mr. GINGRICH, Mr. GUARINI, Mr. MONTGOMERY, Mr. TOWNS, and Mr. DARDEN.

H.J. Res. 519: Mr. QUILLEN and Mr. HAYES of Louisiana.

H.J. Res. 540: Mr. MAVROULES, Mr. DE LA GARZA, Mr. GALLO, and Mr. RICHARDSON.

H.J. Res. 555: Mr. PERKINS, Mr. ROBERTS, Mr. SKEEN, Mr. SKELTON, Mr. SLATTERY, Ms. SLAUGHTER of New York, Mrs. SMITH of Nebraska, Mr. STALLINGS, Mr. BALLENGER, Mr. BROOKS, Mr. BROOMFIELD, Mr. BROWDER, Mr. BROWN of California, Mr. CARR, Mr. CHANDLER, Mr. CHAPMAN, Mr. DARDEN, Mr. DEFAZIO, Mr. DE LA GARZA, Mr. DELLUMS, Mr. FAZIO, Mr. FIELDS, Mr. FOGLIETTA, Mr. GONZALEZ, Mr. GRANDY, Mr. HASTERT, Mr. HOLLOWAY, Mr. HOUGHTON, Mr. KILDEE, Mr. LEHMAN of Florida, Mr. LEVIN of Michigan, Mr. THOMAS A. LUKEN, Mr. MACHTLEY, Mr. MANTON, Mrs. MARTIN of Illinois, Mr. MAVROULES, Mr. MCCOLLUM, Mr. MCEWEN, Mr. MCGRATH, Mr. MILLER of Ohio, Mr. MILLER of Washington, Mr. MONTGOMERY, Mr. MOORHEAD, Mrs. MORELLA, Mr. NATCHER, Mr. NEAL of Massachusetts, and Mr. PARRIS.

H. Con. Res. 128: Mr. ECKART and Mrs. KENNELLY.

H. Con. Res. 264: Mr. HORTON, Mrs. MARTIN of Illinois, and Mr. RIDGE.

H. Con. Res. 285: Mr. CRANE, Mr. WAXMAN, and Mr. PARRIS.

H. Con. Res. 312: Mr. ANDERSON, Mr. NEAL of North Carolina, and Mr. KANJORSKI.

## DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H. R. 2584: Mr. QUILLEN.

H. R. 3732: Mrs. MEYERS of Kansas.

## PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

174. The SPEAKER presented a petition of the Board of County Commissioners, St. Johns County, FL, relative to the interstate allocation of Federal aid grant funds; which was referred to the Committee on Government Operations.

# SENATE—*Wednesday, May 16, 1990*

*(Legislative day of Wednesday, April 18, 1990)*

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

The PRESIDENT pro tempore. As we prepare to worship God, our shepherd and our shield, the Senate will be led in prayer by the Senate Chaplain, the Reverend Dr. Richard C. Halverson.

Dr. Halverson.

## PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

*But thou, O Lord, art a God full of compassion, and gracious, longsuffering, and plenteous in mercy and truth.*—Psalm 86:15.

Gracious God our Father, perfect in truth, justice, love and compassion, rarely will the Senate be called upon to deal with an issue more complicated by prejudice, fear, and emotion, nor more presently or potentially destructive, than the issue of AIDS. Grant to Your servants and their leaders a full measure of Godly wisdom, love, and compassion as they discuss, debate, and decide this issue. Grant to them the courage not to yield to prejudice or political pressure. Give them the illumination of the Holy Spirit that they may deal objectively with the substance of the issue.

Mighty God, overrule all human frailty and let Thy will be done in the Senate. In His name whose love is unconditional, universal, and eternal. Amen.

## RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the standing order, the majority leader is recognized.

## THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## SCHEDULE

Mr. MITCHELL. Mr. President, this morning following the time for the two leaders, there will be a period for morning business not to extend beyond 10 a.m., with Senators permitted to speak therein for up to 5 minutes each.

At 10 this morning, the President pro tempore will swear in DANIEL K. AKAKA as the junior Senator from Hawaii. Following the swearing in and disposition of various related housekeeping resolutions, the Senate will then resume consideration of S. 2240, the AIDS CARE bill, at which time Senator HELMS will be recognized to offer an amendment. Other amendments are expected upon disposition of the Helms amendment, and rollcall votes are anticipated relative to some of these amendments.

## RESERVATION OF LEADER TIME

Mr. MITCHELL. Mr. President, I reserve the remainder of my leader time and all of the leader time of the Republican leader.

The PRESIDENT pro tempore. The time for the two leaders will be reserved.

## MORNING BUSINESS

The PRESIDENT pro tempore. There will now be a period for morning business not to extend beyond the hour of 10 o'clock a.m., with Senators permitted to speak therein for up to 5 minutes each.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## EXTENSION OF MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the period for morning business be extended until 10:30 a.m.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum having been suggested, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## SENATOR FROM HAWAII

The PRESIDENT pro tempore. The Chair lays before the Senate the Certificate of Appointment of the Honorable DANIEL K. AKAKA, as a Senator from the State of Hawaii.

Without objection, it will be placed on file, and the certificate of appointment will be deemed to have been read.

The certificate of appointment is as follows:

There being no objection, the certificate of appointment was ordered to be printed in the RECORD, as follows:

CERTIFICATE OF APPOINTMENT

*To the President of the Senate of the United States:*

This is to certify that, pursuant to the power vested in me by the Constitution of the United States and the laws of the State of Hawaii, I, John Waihee, the governor of said State, do hereby appoint, effective May 16, 1990. Daniel K. Akaka a Senator from said State to represent said State in the Senate of the United States until the vacancy therein, caused by the death of The Honrable Spark M. Matsunaga, is filled by election as provided by law.

Witness: His excellency our governor John Waihee, and our seal hereto affixed at Honolulu, Hawaii this Twenty-eighth day of April, in the year of our Lord 1990.

By the Governor:

JOHN WAIHEE,
*Governor.*

The PRESIDENT pro tempore. If the Senator-designate will present himself at the desk, the Chair will administer the oath of office as required by the Constitution and prescribed by law.

Mr. AKAKA, of Hawaii, escorted by Mr. INOUYE, advanced to the desk of the Vice President; the oath prescribed by law was administered to him by the President pro tempore; and he subscribed to the oath in the official Oath Book.

[Applause, Senators rising.]

The PRESIDENT pro tempore. The Senate will be in order.

Mr. INOUYE addressed the Chair.

The PRESIDENT pro tempore. The Senator from Hawaii [Mr. INOUYE] is recognized.

Mr. INOUYE. Mr. President, I ask unanimous consent that I be given the privilege of addressing the body.

The PRESIDENT pro tempore. The Senator has that right.

## CONGRATULATIONS FOR SENATOR AKAKA

Mr. INOUYE. Mr. President, DANIEL KANIELA KAHIKINA AKAKA is a noble son of Hawaii. He is keiki o ka aina, child of our land, and he is the first native Hawaiian, a Polynesian, to serve in this body, and the first native American to serve in this body. Through his veins flow the blood of ancient navigators and brave warriors who sailed across uncharted waters of the Pacific to seek their promised land Hawai 'iki.

He has served our Nation in war on the battlegrounds of Saipan and Tinian; as a teacher; and he has served his people as a principal, as an administrator, and as a public servant.

He has served our people in Hawaii for seven terms in the U.S. House of Representatives.

Mr. President, you will find that he is a very gentle person. He is a gentleman, and he epitomizes the highest virtues of what we proudly call the aloha spirit of Hawaii.

A few moments ago, he took the oath of office to fill the chair that was recently and sadly vacated by our late and beloved colleague, Spark Matsunaga.

Mr. President, it is my high honor and great privilege to present to you, sir, and to this distinguished body, the new Senator from the State of Hawaii, the Honorable DANIEL KANIELA KAHIKINA AKAKA.

[Applause, Senators rising.]

Mr. AKAKA. Mr. President, I thank my senior Senator, DANIEL K. INOUYE, for his personal remarks. I also thank my senior Senator for the support that he has given me from day one. I also thank the majority leader and the Republican leader for their respect and support.

Mr. President, I cannot adequately describe my sense of pride and honor in serving as a Member of the Senate of the United States. I am proud, not only for my lady, Millie, the Akaka family, my loved ones, but also for the native-Hawaiian people and all of the citizens of Hawaii.

The Hawaiian people invested their trust in the Government of the United States, first, as a source of protection from other colonial powers, and now as a vehicle of fairness and opportunity. To serve as the first Senator of native-Hawaiian ancestry, to be in the highest legislative body of our land and in the world fills me with enormous pride and profound humility. To the citizens of Hawaii, who place their faith in me as their representative to our Nation's Capital, my deepest gratitude. I pledge to fill this high office with dignity and honor.

The circumstances that bring me to this office are tragic. The shoes of Senator Spark Matsunaga, a hero for peace, a champion of justice, and an international statesman and a dear, dear friend will never be filled.

I promise to do my best to carry on his legislative agenda and vision, including his efforts to establish an academy of peace, to deliver reparations to Japanese-Americans interned during World War II, to develop nonpolluting and renewable sources of energy, and to finally establish a veterans medical center in Hawaii for aging and ill military veterans. To Sparky's widow, Helene, his sons and daughters, the people of Hawaii, I promise his goals will be mine; his legislative legacy will endure.

Mr. President, the Hawaiian language has a wonderful word that is used on many occasions, "aloha." It means a fond farewell. It means welcome. It means a bond of friendship. It means a new beginning.

My fellow Senators, I extend to each of you my warmest aloha.

Mr. MITCHELL addressed the Chair.

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. MITCHELL. Mr. President, I want to extend, on behalf of all of my colleagues, a warm welcome to our new and distinguished colleague, Senator AKAKA. His remarks this morning demonstrate why the Governor and people of the State of Hawaii have entrusted him with this great responsibility. This is a moving moment for all of us, especially so for me, since it was almost exactly to the day 10 years ago that I was sworn into this Chamber under similar circumstances.

I was filled then with the same sense of awe and honor that Senator AKAKA has expressed, and I must say that I still am. It has been the greatest honor of my life to serve as a Member of this institution, and I know that Senator AKAKA feels the same way. I am confident that he will discharge his responsibilities with the dignity and honor which he pledges. We welcome him, we look forward to working with him, and we wish him the very best of success.

Might I also pause for a moment to again express to the Matsunaga family the deepest regret and sympathy of every Member of the Senate. Senator AKAKA does have enormous shoes to fill, as he indicated. Spark Matsunaga was loved by the people of Hawaii and by every Member of the Senate. But we know that Senator AKAKA will fill those shoes capably and with honor.

So, Senator AKAKA, on behalf of all of the Members of the Senate, we welcome you and look forward to serving with you, and we can say to you that you can do no more than follow the advice of the other DANIEL K. from Hawaii.

Mr. AKAKA addressed the Chair.

The PRESIDENT pro tempore. The Senator from Hawaii [Mr. AKAKA] is recognized.

Mr. AKAKA. Mr. President, I thank the majority leader very much for his kind remarks, and I will make every effort to live up to my pledge.

Mr. COATS addressed the Chair.

The PRESIDENT pro tempore. Senator COATS.

Mr. COATS. Mr. President, I want to join my colleagues and the majority leader in welcoming my friend and former House colleague, DANIEL AKAKA, to the U.S. Senate. We served 8 years together in the House and became close friends in a number of different ways. It is a happy day for me to have DANNY here, because I no longer am isolated in a special class as an appointed Senator. There are now two of us. And the Senator will find that there are special challenges facing those who are appointed and running statewide for election for the first time.

We now will be able to go jointly, on a bipartisan basis, to the majority leader and inquire about what time the Senate will be recessing so we can catch a plane back to our respective States, begging him for no votes on Monday, and I am happy to have the Senator join me in that quest.

Also, let me say that, obviously, being appointed to the Senate is not a barrier to success. Our distinguished majority leader has already indicated his appointment, and I believe our ranking member of the Appropriations Committee was initially appointed to the Senate, if my memory serves me correctly.

So, there is a small but growing caucus of appointed Senators here.

I personally welcome the Senator and look forward to working with him.

The PRESIDENT pro tempore. The Senator from Wyoming [Mr. SIMPSON] is recognized.

Mr. SIMPSON. Mr. President, on behalf of those on our side of the aisle we indeed welcome and greet Senator AKAKA. That was a very impressive ceremony. We have all come to have the deepest admiration and respect for the senior Senator from Hawaii. He is a role model for all of us and he has been that for me. So welcome.

It is good for us to kind of renew our vows when we hear you with the President pro tempore giving you the oath of office in his very, very precise and powerful way, especially that you well and faithfully discharge the duties of your office. So that is good for us to renew our vows.

Spark Matsunaga, our departed and lovely friend, would have been very

thrilled to hear you talk about carrying on the agenda, especially that VA veterans center in Hawaii. I remember that very well and he used to work me over on that, and now you will be doing the same. That will be good.

So welcome. It is a great pleasure and honor to have you, and we will look forward to serving with you.

Thank you.

The PRESIDENT pro tempore. The Senator from Georgia [Mr. FOWLER] is recognized.

Mr. FOWLER. Mr. President, let me just quickly join this extraordinary welcome for my friend and our friend from Hawaii, now Senator AKAKA.

As the Senator from Indiana was saying, "Not only do we now have a distinguished class of appointed Senators who will soon face the voters but in my mind the Senator from Hawaii was characteristically humble in his initial presentation to his new colleagues."

There are many of us in the House, many of us in this body who served in the House, with Senator AKAKA. We know him already to be a skilled legislator. We know him already to have promoted those goals that he shares with our departed colleague, and we know that he will continue, along with his senior colleague, in the great tradition of the distinguished Senators from the State of Hawaii. His legislative accomplishments already speak for themselves and there are many of us who had the distinct pleasure of serving with him who know that our body is enriched and our Nation will be enriched by his presence and service to the U.S. Senate.

The PRESIDENT pro tempore. The Senator from Illinois [Mr. SIMON] is recognized.

Mr. SIMON. Mr. President, briefly, I wish to join in welcoming our new colleague. I had the privilege of serving in the House both with Spark Matsunaga and with the new Senator from Hawaii. They were both superb House Members. Then I had a chance to serve with Spark Matsunaga here, who was, as we all know, a very respected and effective Member of this body.

The senior Senator from Hawaii used the word "gentleman" to describe the new Senator from Hawaii. I cannot think of a better word. We use that word very loosely and very freely. Senator AKAKA is a gentleman in the finest sense. He will be effective, as my colleague from Georgia said. He is a skilled legislative craftsman, but he has the low-key style that I think will fit this body very, very well. I think he will be a superb U.S. Senator, and I am pleased to join in welcoming him.

The PRESIDENT pro tempore. The majority leader is recognized.

## APPOINTMENTS TO THE COMMITTEE ON ENERGY AND NATURAL RESOURCES, THE COMMITTEE ON GOVERNMENTAL AFFAIRS, AND THE COMMITTEE ON VETERANS' AFFAIRS

Mr. MITCHELL. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDENT pro tempore. The resolution will be stated.

The legislative clerk read as follows:

A resolution (S. Res. 285) making appointments to the Committee on Energy and Natural Resources, the Committee on Governmental Affairs, and the Committee on Veterans' Affairs.

*Resolved,* That the Senator from Hawaii (Mr. Akaka) is hereby appointed to serve as a member on the Committee on Energy and Natural Resources, the Committee on Governmental Affairs, and the Committee on Veterans' Affairs for the 101st Congress.

The PRESIDENT pro tempore. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to the consideration of the resolution.

The PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 285) was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

---

## ADDITIONAL MAJORITY APPOINTMENTS TO THE COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS, THE COMMITTEE ON FINANCE, AND THE COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. MITCHELL. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDENT pro tempore. The resolution will be stated.

The legislative clerk read as follows:

A resolution (S. Res. 286) making additional majority appointments to the Committee on Environment and Public Works, the Committee on Finance, and the Committee on Labor and Human Resources.

*Resolved,* That the Senator from Ohio (Mr. Metzenbaum) is hereby appointed to serve as a member on the Committee on Environment and Public Works, in lieu of the Committee on Energy and Natural Resources; the Senator from Louisiana (Mr. Breaux) is hereby appointed to serve as a member of the Committee on Finance, in lieu of the Committee on Environment and Public Works; and the Senator from New Mexico (Mr. Bingaman) is hereby appointed to serve as a member on the Committee on Labor and Human Resources, in lieu of the Committee on Governmental Affairs.

SEC. 2. Strike in paragraph 4(h)(2) of rule XXV the words "Committee on Governmental Affairs" and insert in lieu thereof "Committee on Labor and Human Resources."

SEC. 3. Strike in paragraph 4(h)(9) of rule XXV all after "(9)" through the word "Judiciary" and insert the following: "A Senator who is appointed on May 16, 1990, to serve on the Committee on Environment and Public Works and is serving on the Committee on the Judiciary."

The PRESIDENT pro tempore. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to the consideration of the resolution.

The PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 286) was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDENT pro tempore. The Senator from Alaska [Mr. STEVENS] is recognized.

Mr. STEVENS. Mr. President, I join in welcoming the new Senator from Hawaii. As has been stated, I also came to this Chamber by appointment, and I know the feelings that he has today.

I have also known him and his brother for many years. There are very few of us here that come from States, only two States that have just been Members of our Union for 31 years, and we have worked together for a long time, the Alaskans and Hawaiians, to demonstrate our willingness to be equal partners with the other States and to really honor the commitment that has been made to us by the Government of the United States by admitting our areas into this union.

I look forward to working with Senator AKAKA, and I am very pleased to have heard the statement he made here today. It was a true, warm Hawaiian statement and address. He, I think, will find that, as he says, those are big shoes he has to try to fill.

Thank you, Mr. President.

The PRESIDENT pro tempore. The Senator from Indiana [Mr. COATS] is recognized.

Mr. COATS. Mr. President, I want to correct something I said a few moments ago referring to Senator STEVENS as initially appointed Senators. I forgot in insert the words "Defense Subcommittee ranking member." Senator HATFIELD called to remind me that he was elected. I indicated to him that he had an opportunity to join a very exclusive club of a limited number of appointed Senators. We were happy to welcome him for 5 minutes.

In order to correct the RECORD let me indicate that I was referring to the senior Senator from Alaska who is

ranking member of the Defense Appropriations Subcommittee.

The PRESIDENT pro tempore. The Senator from North Carolina [Mr. HELMS] is recognized.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ROBB). The absence of a quorum has been suggested. The clerk will call the roll.

The asssistant legislative clerk proceeded to call the roll.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Utah is recognized.

Mr. GARN. I thank the Chair.

(The remarks of Mr. GARN and Mr. WARNER pertaining to the introduction of S. 2636 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. WARNER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## FREE AND FAIR ELECTIONS IN ROMANIA

Mr. KENNEDY. Mr. President, this Sunday, after a quarter century under the dictatorship of Nicolae Ceausescu, the people of Romania will go to the polls to elect the government which will oversee the drafting of a new constitution and the beginning of a new era for Romania. All friends of freedom and democracy hope that these elections will be free and fair.

While the democratic transformation of most of Eastern Europe was peaceful, the Romanian revolution of December 1989 was bloody and violent. The cost of life, human suffering, and emotion continues to have profound effects on that nation and its people.

Romanians under Ceausescu were more repressed than perhaps any other people in Eastern Europe. He destroyed entire villages in his effort to modernize Romania. He built grotesque monuments to himself while the people starved. He instituted harsh policies of discrimination and cultural destruction against Romania's ethnic groups.

He permitted the health care system to deteriorate to an extent that is only now beginning to be fully understood. High infant mortality, a high incidence of children with AIDS, orphanages filled with unwanted, abandoned children are tragic continuing reminders of the Ceausescu era.

Ceausescu's grip on power was so strong that he ruthlessly eliminated opposition leaders. Romanians did not have the benefit of a strong center of dissent within the church, or prominent dissidents ready to lead the country now. An entire generation of Romanians have no experience with democracy and little understanding of how it works. The last free elections were held in 1937. The void created by Ceausescu's harsh repression has contributed to the pervasive climate of fear, intimidation, and violence.

Yet the current provisional National Front Government has helped improve the situation in the aftermath of the revolution. Human rights conditions have improved, religious worship is permitted, Romanians are free to travel, and food is more available. While we welcome the progress which has been achieved during these difficult months, our concern remains about continuing violence, allegations that access to the media has not been equitable for all candidates, and reports of fear and intimidation used against the opposition.

Sunday's elections will be watched by many international observers, including the National Democratic Institute, the National Republican Institute, the International Human Rigths Law Group, a presidentially appointed observer group, and observers from other Western democracies and the newly established Eastern European democracies. All of us hope that free and fair elections will be held, so that the people of Romania can get on with the task of building a democracy and rebuilding their country.

Americans care about Romania, and we will watch these elections with high hopes and great expectations. The new Romanian Government will face many challenges. It must draft a new constitution, assure the compliance dismantlement of the Securitate, build democratic institutions and improve the quality of life for the people. These will not be easy tasks, but Romanians should know that they are not alone, and that the United States is prepared to help.

Following free and fair elections, the United States should restore MFN status to Romania. More than money and credits, however, Romania needs American know-how. We have an abundance of skills to make available—business executives, entrepreneurs, labor representatives, economists, engineers, consultants, accountants, managers, election experts, journalists, and professionals in countless other areas with a wide range of skills to assist Romania as it struggles to rebuild its society and economy.

In January, I introduced the Partnership for Democracy Act of 1990 to encourage Americans to join in the process of rebuilding Eastern Europe. This bill would match experts in a variety of fields with the specific requirements of those nations. The benefits would be significant for Romania, but they would also help the United States. The people-to-people contacts that take place will enhance the understanding between our two societies long divided by the Ceausescu regime. And private entrepreneurs in this country will be able to explore new business and investment opportunities for Romania.

U.S. businesses and labor organizations would be encouraged to participate in the program by contributing their skilled employees and other resources. Experts could be assigned to Romania on a project by project basis, or for specific periods of time.

Many of the provisions of this bill have been incorporated into the Support for Eastern Europe Democracy Act, which is currently pending in the Senate Foreign Relations Committee. I welcome the fact that President Bush has now endorsed this concept in his Citizen's Democracy Corps. It is my hope that such assistance will become law as soon as possible, and its benefits will soon begin flowing to the people of Romania and all the other new democracies of Eastern Europe.

## OPPRESSION OF CATHOLICS IN CHINA

Mr. PELL. Mr. President, I regret to report that the crackdown on Catholics in China has intensified recently. Over 30 Roman Catholic bishops, priests, and lay leaders are reported to have been arrested in recent months. Their only "crime" is remaining loyal to the teachings of the Vatican. Those who do not want to suffer under the tight surveillance imposed by the government-sponsored Catholic Patriotic Association are forced underground.

Many priests have been in prison since the 1950's, but despite decades of harsh conditions, have refused to renounce their religious faith. Many of these prisoners are now quite old and some in frail health, but their imprisonment continues.

One of these men was Father Philip Wang, who, according to human rights monitoring groups, recently died in a Chinese labor camp. Another is Bishop Fan Xueyuan, who is 83 years old and in desperate need of proper medical attention.

While recent moves by the Chinese leaders releasing political prisoners are welcome, the Chinese should also remember that the eyes of the world are still on prisoners held in violation of international norms of human rights. Mr. President, in order to draw attention to the plight of religious prisoners, I ask unanimous consent that a list compiled by Amnesty Internation-

al of those recently arrested and of long-term prisoners be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JOSEPH LI SIDE, TIANJIN MUNICIPALITY

Joseph Li Side, Bishop of Tianjin diocese, is reported to have been arrested at his home during the night of 8 to 9 December 1989. According to information received, he was called to administer the last rites to a sick person in Hulu village, but as he was leaving his house he was met by a large contingent of Public Security personnel and arrested. He was consecrated bishop in 1982. Amnesty International first featured his case in an Urgent Action of 28 December 1989 when it first heard of his arrest and the arrests of Liu Guangdong, Li Side and Anthony Zhang Guangyi (AI Index: ASA 17/105/89).

LI YONGFU, TIANJIN MUNICIPALITY

Li Youngfu, a lay Catholic from Tianjin city, is reported to have been arrested in late December 1989 or early January 1990, but the exact date and circumstances of his arrest are not known. His arrest may be related to that of Bishop Li Side (see above).

PETER LIU GUANGDONG, HEBEI PROVINCE

Peter Liu Guangdong, First Bishop of Yixian diocese in Hebei province, was arrested in Baoding (Hebei) on 26 November 1989. According to information received, he was asked to present himself to Baoding Public Security Bureau on that date, which he did, and was arrested. According to reports, police later raided his house and took away books and a sum of 2,000 yuan (about US$540). Liu Guangdong had been consecrated bishop in 1982. He is one of those mentioned in the Urgent Action (AI Index: ASA 17/105/89) of 28 December 1989.

MATTHIAS LU ZHENSHENG, GANSU PROVINCE

Matthias Lu Zhensheng, second Bishop of Tiashui in Gansu province, is reported to have been arrested between mid-December 1989 and mid-January 1990. Now aged 71, he was ordained priest in 1981 and is reported to have been consecrated bishop in 1983 by Bishop Casimir Wang Milu. Wang Milu was himself arrested in 1984 and sentenced to 10 years' imprisonment (see the section entitled "Previous arrests and long-term prisoners").

PEI GUOJUN, HEBEI PROVINCE

Pei Guojun, a priest from Yixian diocese in Hebei province, is reported to have been arrested in December 1989 or January 1990. The precise date and circumstance of his arrest are not known.

PEI JIESHU AND PEI SHANGCHEN, HEBEI PROVINCE

Pei Jieshu and Pei Shangchen, two Catholic community leaders of Youtong village, Hebei province, are reported to have been arrested on 23 October 1989. There has been no news about them since. It is not known whether their arrest is related to that of Fr Pei Ronggui (see below).

PEI RONGGUI, FROM HEBEI PROVINCE, ARRESTED IN BEIJING

Pei Ronggui, a Trappist priest in his 50s, was arrested on 3 September 1989 by Public Security officers in Beijing after administering the last rites in Catholic's home. Father Pei was a priest in the village of Youtong, Hebei province, half of whose inhabitants have been Catholics for generations. On 18 April 1989, Youtong village was raided by police after villagers refused to demolish a tent erected on the site of their former church. The police raid reportedly left over 300 people injured and two dead, and 32 people were arrested. (Amnesty International issued an Urgent Action on the incident on 3 May 1989 (AI Index: ASA 17/17/89). The organization also featured Fr Pei's case in an Urgent Action on 28 December 1989 (AI Index: ASA 17/105/89). In that document he was incorrectly referred to him as Pei Konggui). Father Pei is reported to have escaped during the 18 April police raid and to have later gone to Beijing. He was reportedly arrested after being denounced by a Catholic in Beijing.

PEI SHANGCHEN (SEE PEI JIESHU AND PEI SHANGCHEN ABOVE)

PEI ZHEMPING, HEBEI PROVINCE

Pei Zhenping, the parish priest in the village of Youtong, Hebei province, is reported to have been arrested on 21 October 1989. Pei Zhenping is a priest from the Trappist order. There has been no news of him since his arrest.

SHI WANDE, HEBEI PROVINCE

Shi Wande, a priest from Baoding diocese in Hebei province, is reported to have been arrested on 9 December 1989 in Xushui county (in Hebei province, about 70 kilometres southwest of Beijing).

SU ZHIMIN, HEBEI PROVINCE

Su Zhimin, recently nominated Vicar-General of Baoding diocese in Hebei province, was arrested on 17 December 1989 in Baoding city. According to unconfirmed reports, he may have since died in prison as a result of a hunger-strike. After rumours of his death circulated his family reportedly tried to see him but were unsuccessful. His whereabouts are not known.

SUN XIMAN, GANSU PROVINCE

Sun Ximan, a priest from Tianshui diocese in Gansu province, is reported to have been arrested between mid-December 1989 and mid-January 1990. His arrest may be related to that of Bishop Matthias Lu Zhensheng (see above).

WANG RUOHAN (SEE WANG RUOWANG AND WANG RUOHAN BELOW)

WANG RUOWANG AND WANG RUOHAN, GANSU PROVINCE

Wang Ruowang and Wang Ruohan, two priests from Tianshui diocese in Gansu province, are reported to have been arrested between mid-December 1989 and mid-January 1990. They are the brothers of the imprisoned Bishop of Tianshui, Wang Milu (see the section entitled "Previous arrests and long-term prisoners").

WANG TIANZHANG, GANSU PROVINCE

Wang Tianzhang, a deacon from the diocese of Lanzhou in Gansu province, is reported to have been arrested between mid-December 1989 and mid-January 1990. His arrest is probably related to that of Wang Ruowang and Wang Ruohan (see above).

WANG TONGSHANG, HEBEI PROVINCE

Wang Tongshang, a deacon and community leaders working in Baoding diocese Hebei province, was arrested on 16 December 1989.

WEI JINGI, HEILONGJIANG PROVINCE

Wei Jingyi, a priest from Qiqihar in Heilongjiang province, is reported to have been arrested either in December 1989 or in January 1990. His arrest may be related to that of Bishop Guo Wenzhi (see above).

XIAO SHIXIANG, HEBEI PROVINCE

Xiao Shixiang, a priest from Yixian diocese, Hebei province, is reported to have been arrested on 20 October 1989 while he was on his way to Shandong province (east of Hebei). There has been no news of him since.

YANG LIBO, GANSU PROVINCE

Yang Libo, Bishop of Lanzhou, in Gansu province is reported to have been arrested between mid-December 1989 and mid-January 1990. He had been ordained priest in 1949 and was consecrated bishop in 1981. According to foreign press correspondents in Beijing, an official in Gansu province confirmed his arrest in late January 1990.

BARTHOLOMEW YU CHENGDI, SHAANXI PROVINCE

Bartholomew Yu Chengdi, Bishop of Hanzhong diocese in Shaanxi province, is reported to have been arrested between mid-December 1989 and mid-January 1990. He was consecrated bishop in 1981 and he in turn is reported to have consecrated other bishops and priests, including his brother, Yu Chengxin (see below).

YU CHENGXIN, SHAANXI PROVINCE

Yu Chengxin, a priest in Hanzhong diocese, Shaanxi province, is reported to have been arrested at the same time as his brother Bishop Yu Chengdi (see above).

ANTHONY ZHANG GANGYI, SHAANXI PROVINCE

Anthony Zhang Gangyi, a parish priest in a village from Sanyuan diocese, located some 40 kilometres from Xi'an city in Shaanxi province, he was originally from Ankang diocese, in the south of Shaanxi. He is reported to have been arrested at his home at 0200 hours on 11 December 1989. He was apparently released shortly afterwards on health grounds but was rearrested on 28 December 1989. Now aged 83, he was a chaplain in Italy during World War II and visited Italy again in 1988 to receive the "Heroes of the Resistance" medal for his activities during the war. He is reported to have spent some 30 years in prison off and on after he returned to China in 1949. Zhang Guangyi is one of those mentioned in an Urgent Action (AI Index: ASA 17/105/89) of 28 December 1989.

ZHANG LIREN, NEI MENGGU AUTONOMOUS REGION (INNER MONGOLIA)

Zhang Liren (or Jiang Liren), Bishop of Hohot in the Autonomous Region of Inner Mongolia (Nei Menggu), is reported to have been arrested in late December 1989 or early January 1990. He had been consecrated bishop in late June 1989.

ZHANG XIAOCHENG, GANSU PROVINCE

Zhang Xiaocheng, a priest in Tianshui diocese, Gansu province, is reported to have been arrest between mid-December 1989 and mid-January 1990. His arrest is probably related to that of Wang Ruowang and Wang Ruohan (see above).

BISHOPS UNDER SURVEILLANCE: FAN XUEYAN, GUO WENZHI, LI ZHENRONG

Three other bishops who were reported to have been detained since December 1989 are said to have been released recently. According to information received, they are still under police surveillance and restricted in their movements and contacts.

Peter Joseph Fan Xueyan, Bishop of Baoding in Hebei province, was reported to have been arrested in Baoding on 11 December 1989, when he was taken away by local police from his residence. He apparently returned to his residence in March 1990, but is still under police surveillance. The place where he was taken is not known. Now aged 82, Bishop Fan Xueyan was imprisoned

twice since the 1950s for his advocacy of religious freedom. He was one of the last Chinese bishops officially consecrated by the Vatican in 1951 and was first imprisoned from 1958 to 1979. Re-arrested a few years later, he was sentenced in 1983 to 10 years' imprisonment on charges of "colluding with foreign forces to jeopardize the sovereignty and security of the motherland", for maintaining links with the Vatican and secretly ordaining priests and bishops. He was released on parole in November 1987 and later placed under house arrest.

Since 1987, he went missing from his residence in Boading several times and was officially said on one occasion to be on a "sightseeing tour". According to unofficial sources, these enforced "absences" were ordered by the local Public Security (police) Bureau because he was too influential among Catholics in Baoding.

Guo Wenzhi, Bishop of Harbin in Heilonjiang province (northeast China), was arrested on 14 December 1989 in Qiqihar, some 270 kilometres from the provincial capital Harbin. He is reported to have been released in March 1990, and assigned to stay in his home village. Born on 11 January 1918, he was ordained priest in 1948 and consecrated bishop in May 1989. He had been imprisoned twice: from 1954 to 1964 and from 1966 to 1979. Following his release in 1979, he taught foreign languages in Hebei province until 1985 and then went to live in his home village of Qiqihar in Heilongjiang province.

Paul Li Zhenrong, Bishop of Xianxian diocese in Hebei province, was reported to have been arrested between mid-December 1989 and mid-January 1990. He was apparently released in March 1990 and ordered to stay in his home village. A Jesuit aged 70, he had been ordained a priest in 1951 and consecrated bishop in 1983. He had spent 23 years in prison between 1957 and 1980 and returned to Xianxian in Hebei province after his release in 1980.

PREVIOUS ARRESTS AND LONG-TERM PRISONERS

*Widespread arrests of lay Catholics in Hebei province during 1989*

Widespread arrests of lay Catholics are reported to have been carried out in Hebei province during 1989, though most of those detained are reported to have been released after periods in detention varying from a few days to a few months. According to some sources, 19 people were arrested in Handan diocese, 19 others in Xingtai diocese and 20 people in Shijiazhuang diocese during the year. All are believed to have been released.

Thirty-two Catholics from the village of Youtong (Luancheng county in Hebei province) were also arrested in April 1989 when police raided the village in an incident which reportedly left 300 people injured and two dead. (For further details on this incident see the case of Fr Pei Ronggui, above. Amnesty International issued an appeal about it on 3 May 1989 (AI Index: ASA 17/17/89.) Thirty of those detained in Youtong were released in several groups in May and June 1989.

Two of the villagers beaten during the 18 April police raid at Youtong were reported in late June 1989 to be still in a critical condition at the Second Provincial Hospital at Shijiazhuang. According to information received, they were not expected to recover; they had been beaten unconscious during the raid and by late June they had still not regained consciousness. According to information received, they are Dong Shuyuan, a 43-year-old man and Feng Jinfeng, a 38-year-old woman. No further news has been available about them.

DONG ZHOUXIAO, LAY CATHOLIC, AND PEI GUOXIN, LAY LEADER

Two men arrested in Youtong village in April 1989 had not yet been released by the end of June 1989: Dong Zhouxiao, aged 38, a lay Catholic, and Pei Guoxin, aged 35, a lay leader. According to unofficial sources, local police said at the time that the two men were still detained in Luancheng county Detention Centre, but there were rumours that they had been beaten to death. There has been no news of them since.

HOUSE ARREST: BISHOPS JIA ZHIQUO & LIU SHUHE & FR HUO BINZHANG

Two bishops and one priest who were detained in 1989 or previously and later released are also reported to be still under house arrest in Hebei province.

Julius Jia Zhiguo, aged 54, Bishop of Zhending in Hebei province, was arrested on 7 April 1989 and released on 11 September 1989. He is said to have been under house arrest since then. He was consecrated bishop in 1981.

Paul Liu Shuhe, Second Bishop of Yixian in Hebei province, was arrested in Beijing in late October 1988 and released on 16 January 1989. He is reported to have been placed under house arrest in his home village for a period of three years. He was consecrated bishop in 1982.

Father Huo Binzhang, Vicar-General of Baoding (Hebei) until his arrest in 1982, was arrested together with Bishop Fan Xueyan (see above, the section entitled "Recent arrests"). Huo Binzhang was sentenced to 10 years' imprisonment in 1983, but is believed to have been released in May 1988. He is said to have been under house arrest since then.

ARRESTS IN OTHER PROVINCES

Several other Roman Catholic priests and bishops are known to have been arrested in various provinces over the past few years. Some are serving long terms of imprisonment and are believed to be still detained. According to information received by Amnesty International, they include:

FROM HENAN: LI FANGCHUN, JIN DECHEN, ZHANG SHENGTANG, ZHU BAOYU

Four priests from Henan province in central China who are reported to have been arrested during the early 1980s. Some of them are reported to have been sentenced, but the dates and details of the trials are not known. They are: Father Li Fangchun of Guide diocese, Shangqin prefecture; Father Jin Dechen, Vicar General of Nanyang diocese (Nanyang is the provincial capital of Henan), he was arrested for the first time during the mid-1950s, released for a short period in 1982 and rearrested; he is reported to have been sentenced to 19 years' imprisonment for objecting to birth control and abortion; Father Zhang Shengtang, believed to be of Nanyang diocese, is reported to have been sentenced to 17 years' imprisonment for printing religious books without official permission; Father Zhu Baoyu, also believed to be of Nanyang diocese, is reported to have been sentenced to 10 years' imprisonment for taking Catholics to a pilgrimage in Sheshan, near Shanghai. They were reported to be still imprisoned in late 1988 but no news of them has been received since then.

FROM FUJIAN: YANG SHUDAO, WANG YIQI, WANG JINGJING, CHEN YOUPING

On bishop and several priests and lay Catholics were also arrested in Fujian province (on the east coast of China) in February and September 1988. Yang Xhudao, Bishop of Fuzhou (the provincial capital of Fujian), is reported to be still imprisoned, but the fate of the others is unknown. Bishop Yang had been imprisoned previously but was released around 1980. He is believed to have been consecrated bishop around 1987. According to information received, he was arrested at 0800 hours on 28 February 1988 in the village of Liushan, Heshang district, in Changle county of Fujian province.

One priest, Wang Yiqi, and a lay Catholic, Wang Jingjing, were reportedly arrested at the same time and place as bishop Yang Shudao. A lay Catholic, Chen Youping, was also arrested at the same place two days later (on 1 March 1988). Their present situation and whereabouts are unknown.

FROM FUJIAN: FENG YONGBING, GAO YIHUA, LIN SHANMING & LIN WENMING

Further arrests took place in Fujian province a few months later: two priests, Feng Yongbing, aged 35, and Gao Yihua, aged 29, both from Changle county, were arrested on 14 September 1988, as well as Lin Shanming, a 25-year-old seminarian from Pingtan county, and Lin Wenming, a 24-year-old lay Catholic from Fuqing county. Their present situation and whereabouts are unknown.

OTHER CLERGY DETAINED: LIAO HAIQING, WANG MILU AND WANG ZIYANQ

Liao Haiqing, aged about 50, a priest from Jiangxi province (in southeast China), is reported to have been arrested in Wuzhou (Jiangxi province) on 19 November 1981 during a wave of arrests of Roman Catholic priests throughout China on that date. Most of those arrested at that time were elderly priests who had remained loyal to the Vatican and had served previous terms of imprisonment from the 1950s to the late 1970s. Several of them were Jesuits from Shanghai who were tried and sentenced on "counter-revolutionary" charges in 1983. Most of those known to have been arrested in November 1981 were released in 1987 and 1988: some were released on parole before the end of their sentence, others had served their full sentence. Father Liao Haiqing, however, was reported to be still detained at the end of 1988. He was then held at Prison No. 4 in Nanchang, the capital of Jiangxi province. There has been no news of him since then.

Casimir Wang Milu, aged 48, Bishop of Tianshui in Gansu province (north China), was arrested in 1984 in his home province of Gansu. Officially labelled the "black bishop of Tianshui", he was tried the following year and sentenced to 10 years' imprisonment and four years' deprivation of political rights on charges of carrying out "counter-revolutionary propaganda and incitement." This charge was based on the following accusations: he had been secretly consecrated bishop in 1981 by Bishop Fan Xueyan of Baoding and subsequently sought recognition of his consecration from Rome; he himself had secretly ordained priests; he opposed an article of China's Constitution which prohibits "foreign domination" over the Chinese Churches, and he had criticized the official policy on religion and the government's interference into religious affairs. Following his trial, Wang Milu was sent to a penal institution in Ping Liang, Gansu province, where hs is reported to be still held.

Joseph Wang Ziyang, the former Vicar-General of Yanggu diocese in coastal Shangdong province, was last reported to be in a penal farm in the province in 1989. Now

in his 80s, Wang Ziyang was appointed Vicar-General of Yanggu at the time the People's Republic of China was established in 1949. According to some sources, he was arrested during the 1950s and sentenced to life imprisonment, but his sentence was later reduced to 15 years' imprisonment. He was last reported to be held in the May the First "reform through labour" farm in Guangzao county of Shangdong province. His sentence has long expired and it is believed that he may have refused conditions set by the authorities for his release. According to information received in March 1990, however, his release was said to be imminent.

## A WISCONSIN TRIBUTE TO THE AMERICAN FLAG

Mr. KOHL. Mr. President, this week the Supreme Court heard arguments about the constitutionality of a law to prohibit flag burning. I happen to believe that law is constitutional, and I hope the Court agrees.

Whatever the outcome of that case, I think we need to recognize that people have very strong feelings on this subject. Recently, one of my constituents, Mark Wolf, wrote an essay on this subject. Mark is currently in the Air Force. As he wrote this essay, he thought about his brother, Matthew, and his grandfather. Both of those fine men served this country and made real sacrifices to defend our flag. Mark's mother, Marietta Wolf, requested that I share this essay with my colleagues and I am happy to do so. I do not know what Mark thinks about the need to adopt a constitutional amendment to protect the flag—but this essay makes it clear how he feels about the freedom that our flag represents.

Mr. President, I ask unanimous consent that Mark Wolf's essay on our flag be printed in the RECORD.

There being no objection the essay was ordered to be printed in the RECORD, as follows:

SOLDIERS TORN

I am the American Flag. I was conceived long ago as a symbol of the American way. I stand for freedom, and represent those who fought and died for truth and justice. But I cannot rest easy, for some of you want to destroy me and all that I've stood for over the course of American history. I'm known the world over, and everyone knows that I stand for freedom. I was created by your forefathers as a remembrance of those who fell in battle in the name of freedom, the same freedom that allows you to destroy me. Withstanding all your abuse, I will still stand proud for you with dignity and honor. I will be sympathetic to you and try to understand your many reasons for hurting me.

Why do you hate me so? I've done nothing to hurt or disgrace you. I love each and every one of you. I admit, people have died in many battles and wars because of me, but I always led the way. I've stood tall and proud above many battles, gazing through the smoke at the dead who lie beneath me, feeling both sadness and pride of the same time. Even when bullets pierced me, and I was falling to the ground all tattered and torn, one of my sons or daughters was always there to catch me. Now, the very people who fought for what I stand have allowed you to burn me—Me, the one you stood in front of as children. So proud you were, with your little hands over your hearts, pledging allegiance to me. You were always loyal to me as you grew into adults, and I to you. I was there for you whenever you traveled, in good times and bad. I tried to protect you the best I knew how. I've always embraced those who fought for me and paid the ultimate price for what I stand for. I protected the dead bodies of my children so no more harm could come to them. I kept their bodies warm as I laid across their cold steel caskets and embraced them with all the love in the world until they could be brought home to the land they cherished so much. I weep each time one of my soldiers is torn, or when I must deliver him to the arms of his loved ones. I will never let you forget that he died out of loyalty for me, as well as you; he perished in the name of freedom.

It hurts me each time you abuse me, because you're not just abusing me, you're hurting the ones who died for your rights. You repay the memories of so many who thought nothing of dying for your well being, not with reverence, but by burning me.

But, understand this my children, I will defend freedom at all costs, and protect the ones I love—yes, even you, the one who wants to hurt me. So before you tear me down, burn me, and try to put me to death, remember whom you'll be hurting. You will be hurting your loved ones, friends, and your very existence. I hold America's hopes and dreams within me, and I'll always stand tall and proud in the minds of those who love me. I would never turn my stars and stripes on you.

T/SGT. MARK S. WOLF,
*USAF, Ankara, Turkey.*

## TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,887th day that Terry Anderson has been held in captivity in Beirut.

I would also like to remark that according to reports, British hostage Terry Waite, special envoy to the Archbishop of Canterbury, is alive and well. Not having received any word as to Mr. Waite's condition since he was abducted on January 20, 1987, that is indeed good news.

I ask unanimous consent that the New York Times article concerning Terry Waite be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, May 16, 1990]

WAITE SAID TO RECOVER IN LEBANESE CAPTIVITY

BEIRUT, LEBANON, May 15.—The Archbishop of Canterbury's special envoy, Terry Waite, is alive and well after 40 months as a hostage in Lebanon and has recovered from a recent illness, people with connections to pro-Iranian factions in Lebanon said today.

They said that two Iranian physicians regularly attended Mr. Waite until his condition worsened about a month ago, when he was treated by a doctor from Beirut's American University Hospital and recovered.

"Waite is being held in acceptable conditions in the southern suburbs and is receiving regular medical attention," one of the informants said.

These were the first reported details of Mr. Waite's welfare in captivity, and they appeared intended to dispel rumors that he was dead. But the informants would not say what the 50-year-old Mr. Waite suffered from, nor did they provide any evidence to support their assertions. No photograph of Mr. Waite in captivity has ever been released.

Mr. Waite, a layman who served as an intermediary in Lebanon for the Archbishop of Canterbury, the Most Rev. Robert Runcie, vanished on Jan. 20, 1987, when he left his West Beirut hotel for negotiations on the release of Western hostages.

## PUERTO RICAN STATEHOOD

Mr. HATCH. Mr. President, I would like to address briefly this morning an issue which the Senate is expected to consider sometime this year: the authorization of the plebiscite in 1991 that would allow the Puerto Rican people to determine their political future. As many of my colleagues know, the enactment of S. 712 would authorize balloting in which the Puerto Rican people would choose to become an independent nation-state, to continue Commonwealth status, or to become the 51st State of the Union.

While I have expressed my support for Puerto Rican statehood in the past, I strongly believe that this decision is not wholly ours to make. Instead, we must give the people of Puerto Rico the means by which to exercise their right to define their future relationship with the United States. As citizens of the United States, they must be accorded the same basic right of political choice as their compatriots. I therefore hope that the Senate will soon consider S. 712 as the best means to ensure that 3.5 million Hispanic Americans have the opportunity to decide the political future of their island.

In this respect, I have recently had brought to my attention an excellent letter to the editor by the former Governor of Puerto Rico, Luis A. Ferre, which recently appeared in the Washington Times. I would like to excerpt a few points from this letter. Ferre rightly reminds us of the great contributions made to our national security by the "200,000 veteran Puerto Ricans who have served in the U.S. military forces and * * * the thousands of dead and wounded who fought during all the wars our country has waged in this century"; by "such men as Fernando Ledesma, who won the Congressional Medal of Honor because he thrust himself upon a grenade to save the life of his companion in Korea * * * and Air Force Maj. Fernando Ribas Dominici, who gave his life to serve his country and his President, Ronald

Reagan, during the military against Moammar Gadhafi's Libya"; and by other "Puerto Ricans in the armed services—Adm. Horacio Rivero, Vice Adm. Diego Hernandez and Gen. Pedro del Valle."

He adds that other important contributions have been made by "professionals like Dr. Enrique Mendez, assistant secretary of health for the Defense Department, and Dr. Antonia Novello, who was just confirmed as U.S. surgeon general"; by "actors like Jose Ferrer and Raul Julia, opera singers Justino Diaz and Pablo Elviro, both of the Metropolitan Opera Co., and the brilliant pianist Jesus Sanroma of the Boston Symphony"; and by the "hundreds of thousands of Puerto Ricans who work in U.S. factories, as university professors, teachers and businessmen and who each, in his own way, contributes to the growth and prosperity of the country."

In closing, I would also like to insert former Governor Ferre's thoughtful views on Puerto Rico's future:

Puerto Rico is a community of loyal American citizens who have evolved within the American way of life and who seek to assume full responsibilities in the Union. We want to pay taxes, not to be an economic burden, as we are today . . .

We were brought into the American family, without our request, by unilateral action of the United States, which understood that Puerto Rico's position in the Caribbean was essential to its defenses.

Certainly we welcomed the U.S. soldiers as deliverers. We took at face value the promises of Gen. Nelson Miles, who upon arrival in 1898 proclaimed, 'We have come to bestow the immunities and blessings of our enlightenment and liberal institutions and government.'

Except for a handful, all Puerto Ricans living today were born under the American flag; most everyone speaks English. We pose no more of a threat to the use of English than do the other 15 million Hispanic Americans living in the United States. We feel we have the right now to achieve the goal that is due every U.S. citizen—equality through statehood.

Finally, we have faith and confidence in the spirit of Thomas Jefferson and Abraham Lincoln that has inspired Presidents Reagan and Bush to spread the winds of freedom and self-determination throughout the world.

The time has come to practice these same principles at home, with Puerto Rico.

## CONGRATULATING GORDON NEGUS

Mr. COHEN. Mr. President, it is my pleasure today to recognize the accomplishments of Gordon Negus, who has served since 1985 as the Defense Intelligence Agency's [DIA] Executive Director.

On April 30, 1990, Mr. Negus retired after 32 years of distinguished service to our Nation. For the past 5 years, he has been DIA's senior civilian executive, with responsibility for the day-to-day operations of the Agency, as well as for long-term planning and strategic resource management.

As vice chairman of the Senate Select Committee on Intelligence, I have had the pleasure and opportunity to work with Mr. Negus and to observe firsthand the significant contribution he made to the intelligence community and the Nation. His leadership at DIA has been appreciated by members of the committee, and his accomplishments have been recognized within the executive branch throughout his career. A measure of this came in 1985, when he was awarded the Presidential Rank of Distinguished Executive.

Mr. Negus began his Government career at the Rome Air Development Center's Directorate of Communications in 1958, and he has held increasingly responsible positions within the civil service since that time. He joined DIA in 1967, and he was named Defense Intelligence Officer for Strategic Forces and Strategic Arms Limitation in 1975.

Later, as Assistant Deputy Director for Research, he prepared a major study for the Chairman of the Joint Chiefs of Staff prior to the strategic arms reduction talks [START] with the Soviets. After a brief assignment as Vice Deputy Director for Foreign Intelligence, he was named the Agency's Executive Director.

Too often, Mr. President, we fail to acknowledge the contributions of dedicated civil servants such as Mr. Negus whose efforts are so critical to our Nation. As he retires, I am pleased to add my congratulations to him for his many substantial and lasting contributions to our national security.

## FAIR TRADE IN FINANCIAL SERVICES ACT

Mr. GARN. Mr. President, 6 weeks ago the Banking Committee held a hearing on the Fair Trade in Financial Services Act. This legislation is designed to strengthen the negotiating position of the Treasury Department in seeking full national treatment for U.S. financial institutions in foreign markets.

At our hearing, the Treasury Department rejected any new authority, even discretionary authority, to take action against countries that deny national treatment. Their fear is that other countries will retaliate against U.S. firms in their markets. During my 15 years in the Senate, I have watched four Presidents and countless Secretaries of the Treasury take this same timid approach. We talk about open markets and equal access, while our competitive position declines and our domestic market is taken over by foreign institutions.

This weekend, I understand that Treasury Under Secretary David Mulford will return to Japan to continue his endless series of discussions on opening up the Japanese financial market. The Japanese are past masters at delaying reform of their markets while taking a major share of ours. They are apparently at it again. Rumor has it that they will pledge to open up their financial markets—but not for 3 more years.

This is a totally unacceptable basis for negotiations. What is the argument—that they need to protect their infant financial industry from rampaging U.S. banks? Fifteen of the world's top 20 banks are Japanese. Any step short of immediate liberalization is unacceptable. We have to put the Japanese on notice that we are not going to wait for 3 years—or for 1 year. If they do not play by the rules, Congress will take action.

I am sure this idea will sow panic at the Treasury, but I frankly don't share their fear of retaliation by Japan. What can they do to us? Market access for U.S. firms is already completely controlled by the Ministry of Finance.

I want to make myself as clear as possible on this point, to both our Treasury negotiators and the Japanese side. I have no patience left on this issue, nor does the rest of the Congress. No more talk. Don't come back without an agreement on full market access.

## FINANCIAL DISCLOSURE

Mr. LEAHY. Mr. President, my Senate public financial disclosure report is on file with the Secretary of the Senate's Office of Public Records. I am adding additional material relating to my net worth, beyond what is required by the U.S. Senate.

| | |
|---|---|
| Senate Salary | $89,500 |
| Additional income (honoraria, interest, et cetera, as reported on Senate Public Financial Disclosure Report) | 42,037 |
| Total income | 131,537 |
| Taxes | 38,594 |
| Charitable contributions | 1,690 |
| Equity in Middlesex, VT, residence | 105,036 |
| Equity in Washington, DC, area residence | 401,503 |
| Value of personal property (savings accounts, cars, furniture, books, et cetera) | 50,000 |

## FARMERS NEED HIGHER TARGET PRICES AND LOAN RATES

Mr. PRESSLER. Mr. President, rural Americans urgently need higher farm commodity prices. Because farm commodity prices in the past have been below production costs, talented young farmers and ranchers have been forced to leave their farm homes and find employment elsewhere. The aver-

age age of a farmer in my home State of South Dakota is 57 years of age. Mr. President, I cannot emphasize enough our tremendous responsibility as lawmakers to write Federal farm policy that will bring adequate income to the agricultural community.

As Members of Congress we have an overwhelming budget deficit to deal with. History shows that farm program budget outlays are easy targets of unsympathetic budget-cutting members of the administration and Congress. According to figures released in a recent Congressional Budget Office [CBO] report, spending by USDA on price support programs—which directly add to net farm income—fell from $25.8 billion in 1986 to $10.4 billion in 1989. This is a 60-percent decrease. In comparison, defense spending is projected to decline 22 percent in the period from 1985 through 1995.

The message I am trying to get across, Mr. President, is that we cannot be like the proverbial "dog that bites the hand that feeds it." We must responsibly take care of our farmers and ranchers, a very small segment of our population, who provide us with an inexpensive and dependable food supply.

Lowering loan rates and target prices from current levels seems like an easy way to cut costs and decrease our Federal budget deficit. Let me remind you that target prices and loan rates have been decreasing since 1986. Lowering them even further for another 5 years, as many advise we do, would result in 10 consecutive years of declining prices. The CBO study projects that, when adjusted for inflation, net cash income could decline by 18 percent and net farm income could decline by 20 percent between 1991 and 1995. The study also points out that if real incomes for farm producers were to fall to these projected levels, nearly 500,000 farms would be forced out of business or additional off-farm income would need to be realized. This analysis is based on the assumption that target prices remain at current levels. How can we in good conscience advocate farm policy that offers our farmers and ranchers a 20-percent drop in income for the next 5 years?

Mr. President, we must increase target prices and loan rates to levels that provide adequate income for those responsible for our food supply. I have sent letters to all members of the budget summit urging sensitivity to the needs of the agricultural community. I will fight unfair budget cuts to programs affecting rural America. I urge my colleagues to do likewise.

## ROLAND O. FERLAND: A TRUE HALL OF FAMER

Mr. PELL. Mr. President, it is a great pleasure for me to note the induction of Roland O. Ferland of Pawtucket, RI, into the National Housing Hall of Fame. The National Housing Hall of Fame honors individuals who have made a lasting and significant contribution to the American housing industry and is sponsored by the National Association of Home Builders.

No one in Rhode Island deserves this honor any more than Roland Ferland. A World War II Army Veteran, Roland Ferland joined his father's home building business, A. Ferland & Sons, and immediately set to work in providing attractive, low cost housing for other returning veterans. He established a visionary mortgage guarantee program similar to the modern FHA program which enabled many veterans to buy homes that would otherwise have been out of reach.

Many young Southeastern New England families of the 1940's and 1950's also benefited from Roland Ferland's streamlined development techniques. These techniques, which Ferland & Sons shared with other builders, facilitated the construction of enough well-constructed, afforable housing to meet needs of a growing society.

During the decades that followed, the Ferland Corp. has built more than 10,000 single family homes, apartment units and commercial structures. Roland Ferland has always stood squarely behind his work, even to the point of offering to buy back any home that was shown to be defective.

Roland Ferland is a member and past president of the Rhode Island Builders Association, an organization that has for decades served the housing needs of all Rhode Islanders. He is also a life director of the National Association of Home Builders, where he has served on numerous special committees throughout the years, helping the home builders in their efforts to meet the housing challenges of the future.

Along with his involvement in the housing industry, Roland Ferland has dedicated his time throughout the years to causes and organizations that truly benefit the State of Rhode Island. He have given his attention and expertise to hospitals, colleges and numerous charitable organizations such as the Rhode Island Heart Association and the United Way of Southeastern New England.

I am sure that I speak for all Rhode Islanders when I say how proud and happy I am for Roland Ferland. His contributions to his community are well known in Rhode Island and I am pleased that the rest of the country will now learn of the accomplishments of this outstanding Rhode Islander.

## THE FLAG AMENDMENT

Mr. DOLE. Mr. President, earlier this week, the Supreme Court heard oral argument on the constitutionality of the so-called Flag Protection Act of 1989.

Within 6 weeks or so, the Supreme Court will settle—once and for all—the question of whether the flag statute passes, or flunks, the constitutionality test.

I've predicted that the Supreme Court will affirm the two lower court opinions striking down the statute. Obviously, I am not a mindreader, and I could be dead wrong on this one.

But what the critics can't dispute is the simple fact that the American people still—to this day—stand foursquare behind a constitutional amendment to protect Old Glory from desceration.

Last Friday, the American Legion officially released the results of a Gallup poll testing the opinions of Americans on the flag-burning issue. And the results show that Old Glory—as well as the constitutional amendment—have won with landslide numbers.

According to the poll, an overwhelming 72 percent of the American people "disagree that burning the flag should be protected under the free speech guarantee of the first amendment;" 71 percent favor "a narrow constitutional amendment that would allow Federal and State governments to make flag-burning illegal," just like the amendment that the Senate considered last year.

And 73 percent of the American people do not "believe that a constitutional amendment would place our freedom of speech in jeopardy," while only 25 percent think it would.

So despite what you may hear or read in the media, the commitment of the American people to a constitutional amendment remains as strong as ever—almost a full year after the Texas versus Johnson decision. And this commitment will grow even stronger if, and when, the Supreme Court finally strikes down the so-called Flag Protection Act.

I commend the American Legion for its unrelenting work on behalf of the constitutional amendment. And I commend the legion for bringing the poll results to the attention of their elected representatives in Congress.

Mr. President, I ask unanimous consent that the text of the American Legion poll results be printed in the RECORD at this point.

There being no objection, the results were ordered to be printed in the RECORD, as follows:

THE AMERICAN LEGION,
*Washington, DC, May 11, 1990*

DEAR SENATOR: Although it has been almost a year since the Supreme Court's controversial decision, 72 percent of the American public still believes that burning the American flag should not be a protected form of free speech as guaranteed by the Constitutions First Amendment. As a reinforcement of that belief, 71 percent of Americans favor a narrowly-drawn constitu-

tional amendment to make flag burning illegal, and 73 percent are convinced that such an amendment would not jeopardize their freedom of speech.

These are only three findings of a recent Gallup poll clearly showing that most Americans are still enraged over the whole matter of flag burning. In fact, 57 percent of them stated their intention to vote for or against elected officials because of where they stand on the issue. These are not "soft" opinions or attitudes because it was also found that only 15 percent of the poll participants expressed any uncertainty in stating their positions.

The American Legion is convinced that this poll, conducted April 11 through May 2, is a clear indicator of public opinion. We see it as proof that Americans have considered carefully all sides of the issue, they have made up their minds, and they are demanding that flag burners be dealt with as lawbreakers.

A more detailed presentation of the Gallup poll results is enclosed for your review.

Sincerely,

MILES S. EPLING,
*National Commander.*

---

GALLUP POLL RESULTS ON AMERICANS' OPINIONS ON THE FLAG-BURNING ISSUE

Statistics just released to The American Legion by The Gallup Organization, Inc. show that a significant majority of Americans support a constitutional amendment to protect the United States Flag. The poll, which was conducted from April 11 through May 2, and has a "maximum standard-error rate of 2.7 percent at the 95 percent level of confidence, "reported that 71 percent favor a narrowly drawn constitutional amendment; 73 percent do not believe such an amendment would jeopardize their freedom of speech; and 57 percent would vote for or against an elected official because of his position on this issue.

The questions asked and the responses, by percentage, follow.

1. Do you agree that burning the American flag should be protected under the free speech guarantee of the First Amendment or do you disagree that burning the flag should be protected under the free speech guarantee of the First Amendment?

Agree, 25 percent; disagree, 72 percent; no opinion, 2 percent.

2. On May 14th the Supreme Court is going to hear final arguments on the Flag Protection Act of 1989, the law which was written to make flag burning a crime. If the Supreme Court finds the Act to be unconstitutional would you favor or oppose a narrow constitutional amendment that would allow federal and state governments to make flag burning illegal?

Favor, 71 percent; oppose, 26 percent; no opinion, 3 percent.

3. Do you believe that a constitutional amendment outlawing flag burning would place your freedom of speech in jeopardy?

Yes, 25 percent; No, 73 percent; don't know, 2 percent.

4. How strong is your opinion on the flag burning issue? On a 1 to 5 scale where 5 means you completely made up your mind on your position on the issue and 1 means you're unsure of your position on the issue, where would you rate yourself regarding the flag burning issue?

(1) Unsure of position, 3 percent; (2), 3 percent; (3), 9 percent; (4), 16 percent; (5) completely made up mind, 68 percent.

5. Please tell me yes or no if you would be likely to participate in the following activities as a result of your position on the flag burning issue. Would you be likely to:

A. Donate to a group that supported your position?

Yes, 53 percent; No, 44 percent; don't know, 3 percent.

B. Sign a petition that supported your position?

Yes, 86 percent; No, 13 percent.

C. Vote for or against an elected official because of his position on the issue?

Yes, 57 percent; No, 40 percent; don't know, 3 percent.

D. Do volunteer work for a group that supported your position?

Yes, 44 percent; No, 54 percent; don't know, 2 percent.

E. Write a letter to an elected official stating your position on the issue?

Yes, 65 percent; No, 34 percent.

---

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The period for morning business is now closed.

---

## COMPREHENSIVE AIDS RESOURCES EMERGENCY ACT OF 1990

The PRESIDING OFFICER. The Senate will resume consideration of S. 2240 which the clerk will report.

The legislative clerk read as follows:

A bill (S. 2240) to amend the Public Health Service Act to provide grants to improve the quality and availability of care for individuals and families with HIV disease, and for other purposes:

The Senate resumed consideration of the bill.

Mr. KENNEDY. Mr. President, I ask unanimous consent that Senator HELMS be recognized to offer his amendment and request with respect to the distribution of syringes and bleach, and that there be 30 minutes of debate equally divided on the amendment, with no second-degree amendments in order; that following the conclusion of debate on the Helms amendment, Senator KENNEDY be recognized to offer an amendment with respect to the provision of syringes and needles, on which there will be 30 minutes equally divided, and that no second-degree amendments be in order to the Kennedy amendment.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. Reserving the right to object, and I will not object, I wonder if I might see the Senator's amendment. He has seen mine.

Mr. President, I do not object.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from North Carolina [Mr. HELMS] is recognized.

Mr. HELMS. Mr. President, I thank the chair and the distinguished manager of the bill, Mr. KENNEDY.

An amendment which I will send to the desk will be on behalf of myself, Senator COATS, Senator NICKLES, Senator SYMMS, Senator THURMOND, and Senator LOTT.

I shall not send the amendment to the desk just now.

But let me tell you what it does. Then I will have the clerk read it.

It simply says to the American people that the U.S. Senate will not permit this Government to aid and abet drug abuse which is unlawful in every State and under Federal law, both State law and Federal law.

This amendment will put the Senate on record once more as opposing the distribution of money authorized under this law of the United States from going to any State metropolitan area or rural area if those entities carry out any program of distributing sterile needles for the hypodermic injection of any illegal drugs or distributing bleach to clean those needles.

The point is this: We have two crisis in this country—the drug crisis and the AIDS crisis.

And this Senate should not and has not in the past consented to swapping the devil for the witch. That is the point.

We all do what we can about AIDS, but we do not want to be on record as doing anything to permit the distribution and the use of drugs in any shape, fashion, or form.

The language of the amendment should be familiar to most Senators.

AMENDMENT NO. 1624

(Purpose: To prohibit the use of funds made available under this act for the distribution of needles or bleach for cleaning needles)

Mr. HELMS. Mr. President, I send an amendment to the desk and ask that it be stated, and in this case, I am going to ask the distinguished clerk to read it all.

The PRESIDING OFFICER (Mr. BREAUX). The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina [Mr. HELMS], for himself, Mr. COATS, Mr. NICKLES, Mr. THURMOND, Mr. SYMMS, and Mr. LOTT, proposes an amendment numbered 1624.

At the appropriate place, insert the following new section:

SEC. . PROHIBITION ON USE OF FUNDS.

None of the funds authorized by this Act, or an amendment made by this Act, shall be allocated to any State, metropolitan area, or rural area, if such State, metropolitan area, or rural area, carries out any program for the distribution of—

(1) sterile needles for the hypodermic injection of any illegal drug; or

(2) bleach for the purpose of cleansing needles for such hypodermic injection;

unless the President certifies that such programs are effective in stopping the spread of HIV and do not encourage the use of illegal drugs.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I ask unanimous consent that the text of the amendment just read appear at this point in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following new section:

SEC. . PROHIBITION ON USE OF FUNDS.

None of the funds authorized by this Act, or an amendment made by this Act, shall be allocated to any State, metropolitan area, or rural area, if such State, metropolitan area, or rural area, carries out any program for the distribution of—

(1) sterile needles for the hypodermic injection of any illegal drug; or

(2) bleach for the purpose of cleansing needles for such hypodermic injection;

unless the President certifies that such programs are effective in stopping the spread of HIV and do not encourage the use of illegal drugs.

Mr. HELMS. Mr. President, I am doing it this way so it will be in context in the RECORD tomorrow morning.

The language that the distinguished clerk just read is virtually identical to language which became law as part of the omnibus drug bill of 1988 and the language I introduced along with the distinguished Senator from Indiana [Mr. COATS] on September 21 of last year. And on that day, the Senate endorsed this amendment by a vote of 99 to nothing. It was a unanimous vote.

It is also important for Senators to know that I have retained the safety net which I included in my original amendment back in September on the recommendation of Senators SPECTER and HARKIN. I agreed to include a provision which would allow the President to release funds if the President determines that the distribution of needles does nothing to spread HIV.

Mr. President, the argument has been made that we should allow the Department of Health and Human Services to continue supporting programs for the distribution of bleach for the purpose of cleansing needles so that the drug addict can clean the instrument of his own destruction.

What kind of message does that send? We are saying that the disease AIDS is more important than the war on drugs, or the way it will be read among drug abusers is that, "Well, the Government is telling us how to avoid some difficulty. They are even furnishing us the bleach."

I think Senator KENNEDY and I agreed on the first part of the amendment. It is on bleach that we do not agree. I do not want to send a message to anybody that this Government is encouraging or assisting drug abuse.

But be it needles or bleach the outcome is the same. We would be facilitating the unlawful activities of an element in this country which is not only contributing to the rapid spread of AIDS but is the foundation of the growing crime wave we are now experiencing, and those of us who live in the Washington, DC, area know a little bit about that.

For the information of Senators, this get tough attitude toward drug abuse has the support of Bill Bennett and Secretary Sullivan. Furthermore, Congressman CHARLIE RANGEL has introduced what he calls the Drug Abuse Treatment Policy Act of 1989 which would prohibit the use of Federal money for the distribution of needles and bleach for the injection of unlawful drugs.

Mr. President, a few years ago I read a report—and I have it here somewhere in the file—recommending that the Government dispense clean needles to drug addicts as a method of AIDS prevention. I remember thinking what nonsense this is. Illegal drug use is killing and injuring literally thousands of Americans and this Nation is said to be in an all-out war with drugs. To date, we have spent more than $5 billion to prevent or control the use of narcotics and other dangerous drugs, but nobody in his right mind, or at least I thought, would embrace the idea of retreating from the drug war to take up arms against the disease AIDS.

Yet, that is exactly what is happening. State and local governments are now seriously reviewing, and many local governments have in fact approved, a clean needle program where drug addicts are given needles for illegal drug use.

My friend, Chubb Seawell, down in North Carolina, used to say that does not even make good nonsense, and it does not make sense or nonsense.

There are several Members of this body who apparently would cave in to the AIDS lobby rather than get tough on drugs. Make no mistake about it. The use of drugs is immoral; it is unlawful; it is killing thousands of Americans. We all know that. They run a toll every morning on the radio here in Washington reviewing how many people killed each other the night before as a result of drugs. I am saying that we should not give up one battle for the sake of another. Do not swap the Devil for the witch.

As a matter of fact, some Members of this body decried the so-called failure of President George Bush's war on drugs because the number of addicts is growing.

Well, I say to them, put up or shut up. Let me see what you are going to do behind your rhetoric. And I have heard a great deal about how the U.S. Government has to do more for treatment. Well, that is fine. But at the same time we need to take a closer look at what is happening to the average American.

Drug users, Mr. President, are not the only ones dying in the drug war. The shopkeeper, the gas station attendant, the bank teller, the pizza deliverer, the policeman, and thousands of others are dying at the hands of the drug addicts. Drug use is feeding the fires of crime. How many times have you picked up the paper or switched on your radio and read or heard about a violent crime linked to drug use? I think we cannot forget an innocent category of the drug war: the children who are being born right and left addicted to narcotics.

In New York State alone, the State Division of Substance Abuse estimates that less than 2 years ago, 8,000 children were born to drug addicts and over 500,000 children under 18 live with parents who are now drug addicts. That was 2 years ago. I wonder what the figures are now.

I think most people agree that distributing needles will not help diminish these atrocities, Mr. President. As our colleague on the House side, Mr. RANGEL, said in March of last year, "Needle distribution puts public authorities in the business of death on the installment plan."

New York City has the needles distribution program. It does not work. Police Commissioner Benjamin Ward condemns it, and Sterling Johnson, the chief prosecutor of the New York Special Narcotics Division, calls the logic of giving needles to addicts ridiculous.

As he said: "How does one expect addicts who do not clean themselves to clean their needles?"

I am pleased to say that the mayor of New York has called for a halt to the distribution of needles to addicts in his city.

In an effort to expedite the conclusion of this particular amendment, I will not say any more except to say that the issue is clear, and I feel we should get tough on drugs and not condone or appear to condone the use of unlawful drugs.

Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. The yeas and nays are requested. Is there a sufficient second? The Chair would point out that there is an insufficient second at this time.

Mr. HELMS. Mr. President, I would say that the Chair has ruled properly. There is not a sufficient second. But I would indicate that Senator KENNEDY has agreed to this.

The PRESIDING OFFICER. That motion would be in order at an appropriate time.

Mr. HATCH. I ask unanimous consent that the yeas and nays be ordered on this amendment.

The PRESIDING OFFICER. The Chair would, reluctantly, acting as a Senator from Louisiana, be required to object at this point.

Mr. HELMS. Very well. I say to my friend from Utah that the Chair has ruled properly on that. There is not

any Member of the Democratic side here.

I reserve the remainder of my time.

By the way, Mr. President, how much more time do I have?

The PRESIDING OFFICER. The Senator from North Carolina has remaining 4 minutes.

Mr. HELMS. I thank the Chair.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. Who yields time? Time is controlled. Who yields time?

Mr. HATCH. Mr. President, I yield myself such time as I require.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, I hate to, but I rise in opposition to the amendment of my distinguished colleague from North Carolina. I agree that no Federal funds should be used to distribute so-called clean needles. I do not think the Government should do anything to encourage or condone drug abuse. Drug abuse is killing people in America. It is killing our country. Drug abuse is ruining our neighborhoods. I believe drug abuse should be stopped.

Mr. President, I know what the distinguished Senator from North Carolina is trying to do, but I do not think his amendment does it in the way it should be done. I note that my colleague from Massachusetts will offer an amendment immediately following this amendment—upon which we are going to vote immediately following the vote on the Senator's amendment—which will bar free needle distribution. I believe Senator HELMS' amendment goes too far.

According to Dr. James Mason, who is the Assistant Secretary for Health at the Department of Health and Human Services, he is very concerned about prohibiting the use of HHS funds for any program of distributing bleach to IV drug users. Let me just read his letter. He said:

I am concerned about the effects on Public Health Service (PHS) AIDS Programs of any amendment to the Labor/HHS appropriations bill (H.R. 3566) that would prohibit the use of HHS funds for any program of distributing bleach to intravenous drug users.

There is a distinct difference between programs that distribute needles and those that distribute bleach to drug users. We agree that programs distributing clean needles could be interpreted as encouraging drug use by giving individuals the means to support their illegal use of drugs. However, bleach is readily available legally. In addition, providing bleach as part of a comprehensive drug abuse outreach program only gives drug users the means to protect themselves and others from a fatal infection until they can be brought into treatment. Programs of this type, currently funded by the Department, show no evidence of having contributed to the spread of drug abuse. If they did, we would not support them. Such comprehensive programs include services like referral for drug treatment and other medical services, and counseling regarding bleach use and the risks associated with needle-sharing, as well as sexual and perinatal transmission.

Mr. President, I ask unanimous consent that the full text of the letter be printed in the RECORD.

There being no objection, the text of the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF HEALTH
AND HUMAN SERVICES,
*Washington, DC, Nov. 17, 1989.*

Hon. TOM HARKIN,
*U.S. Senate, Senate Hart Office Building, Washington, DC.*

DEAR SENATOR HARKIN: I am concerned about the effects on Public Health Service (PHS) AIDS Programs of any amendment to the Labor/HHS appropriations bill (H.R. 3566) that would prohibit the use of HHS funds for any program of distributing bleach to intravenous drug users.

There is a distinct difference between programs that distribute needles and those that distribute bleach to drug users. We agree that programs distributing clean needles could be interpreted as encouraging drug use by giving individuals the means to support their illegal use of drugs. However, bleach is readily available legally. In addition, providing bleach as part of a comprehensive drug abuse outreach program only gives drug users the means to protect themselves and others from a fatal infection until they can be brought into treatment. Programs of this type, currently funded by the Department, show no evidence of having contributed to the spread of drug abuse. If they did, we would not support them. Such comprehensive programs include services like referral for drug treatment and other medical services, and counseling regarding bleach use and the risks associated with needle-sharing, as well as sexual and perinatal transmission.

The PHS strongly supports projects whose purpose is to prevent the spread of HIV infection and to encourage intravenous drug users to enter drug abuse treatment and stop using drugs. We strongly support the President's National Drug Control Strategy, and our outreach efforts do reinforce that drug use is illegal and that the responsible course of action for the user is to stop using drugs and to get into treatment.

There is a limited and appropriate role for the distribution of bleach as one component of this type of comprehensive program to help contain the spread of HIV infection. Bleach distribution is only one small element, and not the primary focus of these programs. These programs represent a significant public health contribution in protecting the sexual contacts of drug users and their children from the risk of HIV infection by using bleach to break the chain of infection, and helping them to get into treatment.

Thank you for consideration of this concern.

Sincerely yours,
JAMES O. MASON, M.D., Dr.P.H.,
*Assistant Secretary for Health and Acting Surgeon General.*

Mr. HATCH. I think he makes a very important point.

In addition the author of that letter is, in my opinion, I think, the leading health authority, outside of Dr. Sullivan himself, the Secretary of Health and Human Services, in our country.

I also oppose the amendment of my good colleague, the Senator from North Carolina [Mr. HELMS] because he not only leverages the use of Federal funds, but also the use of State and local funds. He says that no funds could be used for bleach distribution.

I feel very uncomfortable in dictating to the States and local governments what they can and cannot do with their own funds. This amendment says to the States and our local communities that you cannot carry out certain prevention activities that you decide are improtant and necessary. If we adopt this amendment of the distinguished Senator from North Carolina, we are saying you cannot use your own State money or even private funds to carry out this activity even if you have decided as a State that it is necessary to do so.

Mr. President, I have to urge my colleagues to vote against the Helms amendment and to support the Kennedy amendment as an alternative because it preserves for our States and local communities the flexibility to carry out those prevention activities they have put in place to meet their own needs, and it does require that no funds under this act could be used to support activities that would provide clean needles to IV drug abusers or drug users.

So, Mr. President, we will be voting soon on two amendments. One will be the Helms amendment, which forbids the States to do what they think is in their best interests to do; and the other is the Kennedy amendment, which forbids the distribution of needles but allows the States the flexibility of distributing bleach, if they think that is a better program. And the Kennedy amendment follows the recommendations of the very distinguished Assistant Secretary for Health over at Health and Human Services.

I have to say, as much as I understand and admire and appreciate what the distinguished Senator from North Carolina is trying to do, the Kennedy amendment is superior because it does give the flexibility that the States need. I believe and hope our colleagues will support it.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. I want to address the comments of the Senator from North Carolina briefly, and then yield such time as the Senator might need.

Mr. President, I would like to bring the Senate up to speed about where we are about Federal funding for needle exchange programs. That is prohibited. There are no Federal funds now being used for needle exchange programs in any place in these United States. It was never intended that money would be used for a needle exchange program under this legislation, and the amendment which will

follow the vote on the Helms amendment will make it explicit. It will be introduced on behalf of the Senator from Utah and myself.

It did not seem to be necessary. That was never intended, but since the issue has been raised, that will be the result. After we dispose of the Helms amendment, that will be the question we will address.

But there is another part of the Helms amendment. The other part of the Helms amendment says if any local jurisdiction or any State jurisdiction is involved in providing bleach for IV drug users, they will not be eligible for any of the funding under this legislation. We are not talking about funding for the use of bleach under this legislation. But, under the amendment of the Senator from North Carolina, if any of the States on their own are making a decision to do this, they would not be eligible to receive any kinds of funds.

Some 16 States are already doing that, Mr. President. We believe that is a judgment that ought to be left up to the local States and communities, and public health officials. Frankly, there do seem to be some important reasons why, in a number of the communities, particularly where there is a high incidence of IV use, it is desirable.

The reason, as has been pointed out by Secretary Mason, is a recognition that in a number of communities there is a significant waiting time to get into various programs for rehabilitation and treatment. In the most recent study by State agencies, some 66,000 persons were on waiting lists in 44 States. The statistics from NASADAD, dealing with the survey that they have published in October of 1989 for alcohol and drug abuse directors indicates 66,000 persons are on waiting lists. That means they cannot get into treatment.

What have a number of jurisdictions suggested? They said, in many instances some of those individuals, if they have to go to outpatient care, they have to wait 22 days; if they are going to inpatient, residential treatment, 45 days. Here, individuals who effectively want to get free from the habit but are not getting the counseling, not getting treatment, and are not getting the care, in limited circumstances are protected because there is a program that permits the use of bleach.

Under the amendment of the Senator from North Carolina, he would say the benefits of this particular legislation would virtually be prohibited from any jurisdiction. What is the public health implication, if we follow the Helms amendment? I think it is spelled out very clearly in Secretary Mason's letter. I know it has been printed, but I would like to highlight the points which are relevant to this debate.

There is a distinct difference between programs that distribute needles and those that distribute bleach to drug users. We agree that programs distributing clean needles could be interpreted as encouraging drug use by giving individuals the means to support their illegal use of drugs. However, bleach is readily available legally. In addition, providing bleach as part of a comprehensive drug abuse outreach program only gives drug users the means to protect themselves and others from a fatal injection until they can be brought into treatment. Programs of this type, currently funded by the Department, show no evidence of having contributed to the spread of drug abuse.

It is additional protection before treatment for those who want to be free from drugs, and there is no expansion of use.

Finally, I think probably the most relevant part of the Secretary's letter is in the last paragraph.

These programs represent a significant public health contribution in protecting the sexual contacts of drug users and their children from the risk of HIV infection by using bleach to break the chain of infection, and helping them to get into treatment.

We have talked, during this debate, about the tragedy that exists in our country in so many communities that so many of the babies being born now in many of our urban areas are HIV positive. Here we have Secretary Mason, as well as the other public health officials, saying one of the ways to protect those babies from having it is through this continued use of bleach for those individuals who want to gain treatment.

Mr. President, I feel both because of the public health justification for this program and the fact that we are not funding it with this money, but it is being funded by the States, we should not say to the States, when we have this sound public health evidence, that they are going to be eliminated from any eligibility. We should not prevent them from developing more comprehensive programs that can reach out to rural areas of this country, to the teenage population where this scourge is growing, and to the pediatric AIDS victims.

It just seems to me to make no sense.

I hope that, at an appropriate time, Mr. President, under the agreement, we will vote in favor of the proposal of the Senator from Utah and myself and vote down the amendment of the Senator from North Carolina.

Mr. GORTON. Will the Senator from Massachusetts yield 5 minutes?

Mr. KENNEDY. How much time do I have?

The PRESIDING OFFICER (Mr. SIMON). The Senator from Massachusetts controls 2 minutes, 40 seconds.

Mr. KENNEDY. I yield the remaining time to the Senator.

The PRESIDING OFFICER. The Senator from Washington is recognized for 2 minutes and 40 seconds.

Mr. GORTON. Mr. President, the distinguished Senator from Massachusetts knows that we do not always agree on matters coming before the Senate, but I wish to commend him for both his clarity and logic in connection with this amendment, as well as that of the distinguished Senator from Utah. The sponsor of the amendment, of course, has designed this amendment to discourage drug use by restricting the availability of needles and bleach to those who are drug addicts. The impact of his amendment, however, would, I believe, be exactly the opposite; that it would increase both drug use and diseases, most particularly AIDS. As a consequence, I firmly believe that this amendment should be rejected and the amendment of the distinguished Senators from Massachusetts and Utah be accepted.

I spoke at length, Mr. President, over the Christmas recess, to Dr. Robert Wood, of Seattle, on this subject, a major investigator of an outreach program which does distribute bleach and a man who is also the director of AIDS control for King County, WA. He has persuaded me that that program dramatically helps both to control the spread of AIDS and reduce drug use. Research has shown in five cities that between 15 and 50 percent of those who enter a bleach program have stopped IV drug use by the time of a follow-up interview 6 to 12 months later and that others have at least reduced that drug use.

Mr. President, that is dramatic success in connection with intravenous drug use. Very few programs will show a greater degree of success.

The rejection of this amendment and the adoption of the amendment by the distinguished Senators from Massachusetts and Utah will be important in our attempt to control and to limit drug use. I agree with them completely. This amendment should be defeated and their amendment should be adopted.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. As I understand it, Mr. President, all of the time that is under my control has expired; am I correct?

The PRESIDING OFFICER. The Senator has 15 seconds left.

Mr. KENNEDY. I yield back my time.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I find a certain degree of novelty about the arguments against the amendment because all three of the Senators who have spoken against it voted for it last November. My suggestion is let us approve both amendments.

In talking about the bleach program, the point is, it is a flop, as I alluded in my earlier comments. New York City has such a program; it does not work. The police commissioner, Benjamin Ward, condemns it. The chief prosecutor of the New York special narcotics division, calls it ridiculous. Again how does one expect addicts who do not clean themselves to clean needles that they use? So, what we are doing, if this amendment is defeated, we are sending a message, go ahead and use drugs, but, just like safe sex, have safe drug abuse. I hope the Senate will not take that position.

This past November, the Senate took the opposite position; it supported my amendment unanimously—I think it was 99 to nothing. So what are we doing here? Are we going to have all sorts of rhetorical exercises that I have to believe that no Senator believes in?

We are going to have back-to-back rollcall votes, first on mine and then on the amendment of the distinguished Senator from Massachusetts. My recommendation to Senators is vote for both of them. The yeas and nays have been ordered on mine. Have they been ordered on Senator KENNEDY's?

The PRESIDING OFFICER. The yeas and nays have not been ordered on Senator KENNEDY's amendment.

Mr. HELMS. I ask for the yeas and nays on Senator KENNEDY's amendment.

The PRESIDING OFFICER. The Chair will advise the Senator from North Carolina they have not been ordered on his amendment yet.

Mr. HELMS. The Chair is correct. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from North Carolina has 1 minute remaining.

Mr. HELMS. I reserve that time unless the Senator from Massachusetts wishes to yield back his time.

Mr. KENNEDY. Mr. President, I yield back the remainder of my time.

Mr. HELMS. I yield back my time.

The PRESIDING OFFICER. All time has expired.

AMENDMENT NO. 1625

(Purpose: To prohibit the use of funds for needle distribution programs)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY] proposes an amendment numbered 1625.

At the appropriate place insert the following:

SEC. . PROHIBITION ON USE OF FUNDS.

None of the funds made available under this Act, or an amendment made by this Act, shall be used to provide individuals with hypodermic needles or syringes so that such individuals may use illegal drugs.

Mr. KENNEDY. Mr. President, I yield myself such time as I might use.

Mr. President, I want the Senate to understand that the Helms amendment that was passed overwhelmingly last year applied to the ADAMHA Block Grant Program. That is different from the Helms amendment that is being offered here today. His amendment last fall applied to needles and bleach under the ADAMHA Program. I read the provisions of the amendment in the act: "A State may not use amounts under this subpart pursuant to this subsection." That is the ADAMHA Block Grant Program.

What his amendment effectively is saying today is you will not be eligible for any of the funding under this program if the State has made an independent judgment and a decision as part of a treatment program for drug addicts that they use bleach. Sixteen States have done so, and many of those States that have done so have had the highest incidence of IV drug users and have the longest waiting list. That is why Secretary Mason rejects the kind of proposal that is offered by the Senator from North Carolina and supports the kind of proposal that is offered by the Senator from Utah and myself, and that is why the AIDS Commission, as well, supports that different proposal.

So last year, the Helms amendment dealt with needles and bleach with regard to ADAMHA. Now he is saying he wants to deal with needles and bleach not just in the bill, but saying you cannot receive a cent under the bill if the State makes that judgment and decision. That is a good deal different, Mr. President. That is not the same question or vote. We are going to give the people an opportunity to ensure that no money in this bill will be used for clean needle exchange.

We never believed that it would be. We believe that it is prohibited under other provisions in Federal law, but we are glad to make that a part of the record so that members can make it very clear that they do not want money to be used under that.

But what we are not prepared to say is that if States in their own judgment, from the public health point of view, are going to use bleach in the limited circumstances while they are cutting down on the waiting list for IV drug users, they are going to be prohibited from the kind of emergency help and assistance that can make such a difference to thousands of pediatric children, to young teenagers, to those living in rural America with the kind of extensive program that we have developed in this bill for outreach.

So, Mr. President, that is essentially the issue. We have had an opportunity to discuss that earlier in the debate.

Mr. President, it would appear to me we are talking here 40 to 50 cities scattered across 16 different States where as part of the treatment program there is a limited use of the bleach, and the Public Health Service says these programs should continue or lives will be lost.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

If no Senator yields time, the time will be divided equally.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Senator from Utah [Mr. HATCH] be included as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. How much time remains?

The PRESIDING OFFICER. The Senator from Massachusetts has 10 minutes and 40 seconds remaining. The Senator from North Carolina has 15 minutes remaining.

The Senator from North Carolina is recognized.

Mr. HELMS. Mr. President, I thank the Chair.

I say to the Senator from Massachusetts it would be my suggestion that since we have discussed this matter in the previous 30 minutes, I say a few words and we yield back the time and vote. I see him nodding his head.

Mr. KENNEDY. My only hesitancy is what those few words are going to be, but in basic concept I certainly would agree.

Mr. HELMS. Absolutely. That is a two-way street.

There is not any difference whatsoever in the implication of the amendment last November which passed unanimously on a rollcall vote and this one. We are talking about what kind of message we are sending.

Now, you can identify cities, but right and left law enforcement officials are saying this bleach proposition is a flop. I read in the RECORD twice in the previous half-hour about New York City.

So let me say just one last thing about what we are doing. We have, under the Kennedy-Hatch bill, which is S. 2240, a program to provide medical care. But the irony is that we want to send money for the treatment at the same time we are giving people the go ahead to keep on using drugs.

That is what this is all about. This is the argument. I do not have one scintilla of objection to Mr. KENNEDY's amendment. I shall vote for it with great pleasure, because it is a good amendment, but so is the so-called Helms amendment, which has a number of cosponsors who are distinguished members of this Senate.

So my suggestion to Senators, who might as well prepare to come over to vote twice, once on the Helms amendment first, second on the Kennedy amendment, is that you vote aye in both cases, and you will be doing something for the betterment of America.

Mr. KENNEDY. I ask the Senator, because I missed his earlier remarks, is he suggesting that Secretary Sullivan is supporting his position on bleach?

Mr. HELMS. I understand that Secretary Sullivan has now taken the position of Director Bennett on needles, and that Director Bennett supports my position on bleach.

Mr. KENNEDY. Just on the needles.

Mr. HELMS. Yes.

Mr. KENNEDY. Fine.

Mr. HELMS. I do not know what his position on bleach is.

Mr. KENNEDY. That is basically what this debate is about, because the question is, we are going to prohibit the use of needles. But the assistant Secretary of Health does not agree with the approach of the Senator.

I yield back the remainder of my time.

Mr. KENNEDY. I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. The Chair would advise both Senators that we do not have yet a request for a rollcall on the Kennedy amendment.

Mr. KENNEDY. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second. There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. Mr. President, let me be clear. I know what the answer is, but the first vote will be on the Helms amendment, the second vote will be on the Kennedy amendment?

The PRESIDING OFFICER. The Senator from North Carolina is correct.

Mr. HELMS. I thank the Chair.

The PRESIDING OFFICER. The Chair advises the Senators that under the previous order the first vote will occur on the Kennedy amendment.

Mr. HELMS. Under unanimous consent. But in any case, I ask for the regular order.

The PRESIDING OFFICER. The question is on agreeing to amendment No. 1624, the Helms amendment. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Kentucky [Mr. FORD] is necessarily absent.

Mr. SIMPSON. I announce that the Senator from Vermont [Mr. JEFFORDS] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 28, nays 70, as follows:

[Rollcall Vote No. 93 Leg.]

YEAS—28

| | | |
|---|---|---|
| Armstrong | Gramm | Nickles |
| Bond | Grassley | Pressler |
| Boschwitz | Heflin | Rudman |
| Burns | Helms | Shelby |
| Coats | Humphrey | Simpson |
| Cochran | Kasten | Symms |
| DeConcini | Lott | Thurmond |
| Dole | McClure | Wallop |
| Domenici | McConnell | |
| Garn | Murkowski | |

| Dixon | Lieberman | Wilson |
| Dodd | Lugar | Wirth |
| Durenberger | Mack | |
| Exon | McCain | |

NOT VOTING—2

| | |
|---|---|
| Ford | Jeffords |

So the amendment (No. 1624) was rejected.

Mr. KENNEDY. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CRANSTON. Mr. President, I rise in support of the Kennedy amendment and in opposition to the Helms amendment. It would restate current law with regard to needle exchange programs. Although I would prefer to let the public health experts determine whether or not any of the clean needles or bleach programs can be effective in stopping the spread of AIDS and should receive Federal funding, I will support this amendment because it would allow research concerning bleach distribution to IV drug users to continue.

I would like to bring some important facts to the attention of my colleagues. The National Institute on Drug Abuse is currently supporting more than 60 research programs that involve the distribution of bleach to IV drug users as a means to stem the spread of AIDS among those individuals. If the Helms amendment had been adopted and enacted, this very valuable and important research would be abruptly halted.

How are we ever going to know if these programs work unless we allow the research to go on? How are we ever going to know if these programs are effective in bringing IV drug users into treatment programs or slow the spread of the AIDS virus unless we allow the research to go on?

Mr. President, preliminary results from one such program in San Francisco, called "Bleach and Teach," are very encouraging.

Dr. John Watters, assistant professor at the school of medicine, UCSF, reports that, among individuals who participated in the program, demand for drug treatment by addicts increased from 40 percent to 60 percent from 1986 to 1989. Disinfection of syringes by drug users has become a common practices, and needle sharing has dropped dramatically.

The most important question that the research addresses is can bleach distribution slow the spread of AIDS? Dr. Watters reports that HIV infection among heterosexual IV drug users in San Franscisco has remained stable since 1986, when the program was introduced. That's a remarkable finding given that the overall HIV infection rate among IV drug users has continued to rise.

Mr. President, I want to make clear that there is a significant distinction between a bleach distribution program and a needle exchange program. Bleach distribution does not place drug paraphernalia into the hands of drug users. Any concerns that a needle exchange program may contribute to greater drug usage simply do not apply to a bleach program. In the words of a recent New York Times editorial, "Whatever Congress thinks about needles, the ban on bleach is murderous mischief."

I urge my colleagues not to lose sight of the single most important issue that must be considered on any AIDS issue—whether a given policy will help save lives. We must be willing to look beyond the traditional way of doing things—if it will help stop the spread of this deadly virus. In particular, we need novel approaches to reach IV drug users—to encourage them to seek treatment and, where that's not possible, to encourage them to change behaviors that could spread the HIV virus. Bleach distribution programs appear to be successful on both counts.

Mr. President, I urge my colleagues to oppose the Helms amendment and support the Kennedy amendment.

AMENDMENT NO. 1625

The PRESIDING OFFICER. The question occurs on the amendment numbered 1625 offered by the Senator from Massachusetts [Mr. KENNEDY]. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Kentucky [Mr. FORD] is necessarily absent.

Mr. SIMPSON. I announce that the Senator from Vermont [Mr. JEFFORDS] is necessarily absent.

The PRESIDING OFFICER (Mr. KERREY). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 98, nays 0, as follows:

[Rollcall Vote No. 94 Leg.]

YEAS—98

| | | |
|---|---|---|
| Adams | Fowler | McConnell |
| Akaka | Garn | Metzenbaum |
| Armstrong | Glenn | Mikulski |
| Baucus | Gore | Mitchell |
| Bentsen | Gorton | Moynihan |
| Biden | Graham | Murkowski |
| Bingaman | Gramm | Nickles |
| Bond | Grassley | Nunn |
| Boren | Harkin | Packwood |

NAYS—0

NOT VOTING—2

| | |
|---|---|
| Ford | Jeffords |

So the amendment (No. 1625) was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SPECTER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Republican leader is recognized.

Mr. DOLE. Mr. President, I wonder if I might proceed to use 5 minutes of my leader time on another subject, and have it not interrupt the debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

## CONGRESS "FIDDLES" WHILE CHAMORRO GOVERNMENT "BURNS"

Mr. DOLE. Mr. President, the U.S. Congress is fiddling, while Sandinista mobs, masquerading as labor union strikers, try to burn the 19-day-old democratic government of Violeta Chamorro.

Yesterday, I spoke briefly about Nicaraguan President Chamorro's urgent plea to President Bush for immediate economic assistance. As the President and others have, I urged the conferees on the dire emergency supplemental to complete its work.

I understand the conferees will meet today. I hope they will not only meet—but act. It is time to move the supplemental; get it to the President; and get the aid it provides to Violeta Chamorro and President Endara in Panama.

It is one of the understatements of the year to acknowledge that not every dire emergency supplemental we have acted on in this Senate dealt with a real dire emergency. It is an equally impressive understatement to say that not every appropriation in this supplemental responds to a real dire emergency.

But today's news stories demonstrate that there is a genuine dire emergency in Nicaragua. A fledgling democracy—19 days old—that we have spent hundreds of millions of dollars to help establish—is under direct assault. Unless we respond soon, President Chamorro's government could go down the tubes.

President Bush is reportedly considering a $40 million bridge loan, to help get the Chamorro government through these critical days. If the President can find the authority and the money to do that, I will support him strongly.

The other day, when there was some suggestion that part of a budget package might include things like a line-item veto, there were cries of outrage from some Members of Congress. It would undercut the power of Congress to appropriate, they cried.

I happen to think the line-item veto is a pretty good idea, and probably something the President has the power to do right now.

But in any case, it seems to me we ought to be concerned about what is happening in Nicaragua. I hope the conferees will take a look at this issue.

There is no more urgent issue. It is a dire emergency. It should be treated as a dire emergency. I suggested yesterday there ought to be some way to separate out at least the Nicaraguan part of the Panama part. If one emergency was more urgent than the other, just take out Nicaragua, if Panama can wait a few more days.

But if my colleagues read the lead story this morning in the Washington Post, "Sandinista-Led Union Paralyze Nicaragua," they would understand the problems the new President, Violeta Chamorro, is having.

Again I urge my colleagues. It seems to me this ought to be a bipartisan effort. I would think there are many Democrats who are also concerned about these fledgling democracies, and I hope we can have immediate action so this aid that has been promised and has been justified can be delivered to President Endara of Panama and President Violeta Chamorro in Nicaragua.

Mr. President, I reserve the remainder of my time, and I thank my colleagues.

Mr. KENNEDY. My President, for the benefit of the Members, we are making good progress toward hopefully completing this measure, in a timely way. We anticipate now, after a brief recess, we will reconvene to consider the Helms amendment, and I think we will dispose of that amendment and/or or substitute, or vote on the Helms amendment and then vote on the Kennedy-Hatch amendment after a time agreement. Then, after that we will vote, hopefully, on an amendment of the Senator from Indiana [Mr. COATS] and then a possible Nickles amendment. The one that has been submitted, we are, I believe, close to working out and accepting.

That is all we know of at the current time. We are not encouraging further amendments, but, if there are others, just to give the benefit of the information to my colleagues, I am hopeful we will be able to move along to complete this legislation.

I again want to thank all the Members for their cooperation.

## RECESS

Mr. KENNEDY. Mr. President, I ask unanimous consent the Senate stand in recess until the hour of 2 p.m., and at the hour of 2 p.m. the Senator from North Carolina be recognized to be able to offer his amendment.

There being no objection, the Senate, at 1:01 p.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. ADAMS].

Mr. REID addressed the Chair.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Mr. President, I ask unanimous consent that I be allowed to proceed as if in morning business.

The PRESIDING OFFICER. Is there objection? Hearing no objection, the Senator from Nevada is recognized.

## CONTRA REFUGEES

Mr. REID. Mr. President, one of the oldest roots of the word "hunger" goes back to an ancient Lithuanian word meaning torment, suffering, ache.

There is a lot of suffering in the world—a lot of hunger. In at least one of these places, we, here in this body, have created that hunger.

In a place called Quilali, in the Yemales Valley of Honduras, we are responsible for over 2,000 starving people, though that figure decreases daily as babies die in their mother's arms.

The 2,000 I speak of are former Contras and their families in this remote spot in Honduras. I am talking about

525 men, some of them old, some of them suffering from wounds. I am talking about 760 women. I am talking about perhaps 1,000 children.

Mr. President, I have never supported the military aid for the Contras. From the time I was in the House of Representatives to my days here in the Senate, I was not a supporter of military aid to the Contras. But whether or not I believe in their military cause, I do believe they should not be forgotten and left to die in the jungles of Honduras.

AID, the Agency for International Development, has given over responsibility for the people in the Yemales to the U.N. High Commissioner for Refugees. I must say that, at this point, I think that is an unfortunate turn of events.

These Contras have given up their weapons, signed a cease-fire, and have been handed over to the United Nations with refugee status.

Under the care of AID, each person was allotted 7 ounces of rice per day. That is not much, but it is enough to get by on. The United Nations says it will provide only half that amount—3½ ounces per day per person. But pay attention to my verb tense: The United Nations says it will supply 3½ ounces of rice per day. At this moment, the warehouses are not being used. There are two that have nothing in them. There is one that has a lot of food in it, but the United Nations simply is not using that food. The food has not been forthcoming.

Mr. President, 3½ ounces of rice is not very much rice per day per person. Mr. President, this is 3½ ounces of rice. It certainly is not very much to feed one person for 1 day, no matter the size of that person. This is what has been promised. This is not what has been forthcoming.

Babies have had no milk for 3 weeks, for 21 days. Yet the United Nations promises a half ounce of powdered milk per day.

On contacting the U.N. Office of the High Commissioner for Refugees with these concerns, I was told: "We are still assessing the problem—we still don't know how many people are there—we are still counting." The more this agency assesses the situation, the less there will be to assess because people are dying on a daily basis.

Doctors from the International Medical Corps are there. They are doing the best they can. They are beginning to see the first signs of severe malnutrition, including the changing color of hair on the victims, which is one of the first signs of malnutrition.

Mr. President, you probably have not read about any of that about which I have spoken in any of the newspapers or watched any of it in the media or listened to it on the radio. I have not seen it reported anywhere. But I have been receiving reports from a former Governor of Nevada, Mike O'Callaghan, who is on the scene. Governor O'Callaghan was one of the members of President Carter's observation team for the Nicaraguan elections, and he has a long history of personal involvement in this area of the world.

Governor O'Callaghan, after hearing from his contacts about the suffering and starvation, flew to Honduras at his own expense to see what he could do. Governor O'Callaghan lost part of a leg as a result of combat in Korea, and it is difficult for him to get around. But it did not take 2 weeks for him to assess the situation in Yemales. He took action.

I received a call from him this morning, and he told me that the United Nations High Commissioner for Refugees received, on April 10, over 30 days ago, almost 10,000 pounds of rice, almost 10,000 pounds of beans, almost 16,000 pounds of cornmeal, almost 17,000 pounds of powdered milk, and a number of other items in bulk. He went on to say, and I repeat, that none of it has been distributed to date. And they have been promised, even though they have not received it, 3½ ounces of rice a day.

AID has calculated per person caloric requirements ranging from 2,200 calories per day for a woman to 3,500 calories per day for an active man. The United Nations High Commissioner for Refugees' allowances come nowhere near these requirements. For example, AID calculated that 8 ounces of beans per day would be required. The United Nations High Commissioner for Refugees will allot they say, in the future, only 2.3 ounces. But the food has not be allotted. For some reason that this Senator cannot determine, the food is being withheld. Soon UNHCR will be counting corpses instead of hungry people.

Governor O'Callaghan describes how mothers with their babies clinging to them have followed him around the camps begging him for milk. We have created this hunger. We have created this suffering. But what are we doing about it.

On Monday, two United States helicopters—two Chinooks—began evacuating another group of 1,600 Contras isolated in the Bocay region of Honduras and brought them to Las Vegas, Honduras. These people, too, have been low on food.

These Contras were given a choice. Those that were located in Bocay: First, remain in the Bocay and not be supplied; second, walk to Nicaragua; or third, be evacuated to Las Vegas, Honduras. Staying in the Bocay meant starving to death; walking through the jungle to Nicaragua with women and children seemed equally as deadly, and supplies for the Contras within Nicaragua will last only a few more days; their only choice was to be airlifted to a refugee camp in Honduras.

The U.S. military personnel involved in this operation have been doing a magnificent job. They have been working very hard with limited resources, and they deserve credit for their efforts.

The dirt field in Las Vegas where these people have been left is nothing more than that: a dirt field. There are no real tents, only some tarps pulled over some sticks. There are no water pipes. They promised to install some. The sanitation is very bad.

Mr. President, this U.S. Government needs to take action. President Chamorro has sent President Bush a telegram saying "My country is broke."

There is plenty of blame to pass around as to why Nicaragua is broke, and we need not go into that, as to whose fault it is that they are broke. The fact is they are broke. But there is no question that there are starving men and women and children left in various places, but I am talking today about the Yemales Valley.

Hunger and death are indiscriminate. Men, women, and babies are all its victims. Where is the President now on aid to the Contras—the freedom fighters he has so highly exalted? Where is he now? And where are the Members of this body and the other body who pressed for so hard for Contra aid? Will we leave them to die now that they have served their purpose?

While the administration is studying, as I read in the press this morning, the possibility of a loan to Nicaragua, while the Congress is arguing over the supplemental appropriations bill, while the U.N. is counting refugees, there are some people, like Mike O'Callaghan, who are taking action. I urge the United Nations High Commissioner for Refugees, Thorvald Stoltenberg, I urge President Bush, and I urge all of us here to follow the example of Mike O'Callaghan.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The majority leader is recognized.

## CAMPAIGN FINANCE REFORM DEMOCRATIC NEGOTIATING TEAM

Mr. MITCHELL. Mr. President, the distinguished Republican leader and I have been discussing for some time the status of the legislation regarding campaign finance reform. Today, Senator DOLE and I are each naming four Senators to participate with us in negotiations on campaign finance reform.

Senator DAVID BOREN of Oklahoma will be leading a group of Democrats that will include Senators JOHN KERRY of Massachusetts, JOHN BREAUX of Louisiana, and TOM DASCHLE of South

Dakota. Senator WENDELL FORD of Kentucky, as chairman of the Rules Committee, will be participating with me in actively monitoring and, hopefully, guiding these discussions.

I understand Senator DOLE will shortly announce that he is taking similar action in this regard.

Democrats and Republicans have each introduced substitutes to S. 137, the campaign finance reform bill. They will serve as the basis for negotiations.

None of us have any illusions about the difficulty of this process. Democrats and Republicans have tended to see this issue from vastly different perspectives, and even within our parties there are sharply divergent views about campaign reform which I understand, given its significance to each Senator. But I believe there is one thing that brings the two parties and all Senators together and that is dissatisfaction with the current system.

As I said on numerous occasions, I believe the current system does not serve our Nation well. It interferes with our ability to be effective legislators, representing our constituents' best interests, and it undermines the public's trust in the Congress.

S. 137 was brought up for floor consideration last Friday. I hope and expect that these talks will take place in a spirit of cooperation and good faith. We will have another day of debate this Friday, without amendments being offered, to permit Senators to offer their views on this issue. I hope we will be able to make progress in a responsible and constructive way, and I look forward to those discussions.

## CAMPAIGN FINANCE REFORM REPUBLICAN NEGOTIATING TEAM

Mr. DOLE. Mr. President, I thank the managers for yielding briefly to the leaders. I, too, want to join the majority leader in announcing the Republican team for the coming campaign finance reform negotiations.

I have asked Senators MCCONNELL, NICKLES, PACKWOOD, and RUDMAN to participate in these negotiations. Senator MCCONNELL will be the lead negotiator. I have also asked Senator STEVENS, ranking member of the Rules Committee, to serve as an adviser to the Republican negotiating team.

During their tenure in Congress, each of these five Senators has closely studied the campaign finance issue. It is fair to say that they are campaign finance experts and I have full confidence in their ability to strike a deal that will be strong on reform and fair to both parties.

Last week I said I was optimistic about the prospects for developing a comprehensive and bipartisan reform package. I still remain optimistic, but no one should expect any miracles from me and the majority leader, nor should anyone expect any miracles from the Senators who have been appointed to the two negotiating teams.

There are many differences. There are different points of view and many areas of disagreement. But, now that we have both reform bills introduced, it is my hope our negotiators—through some hard work and hard-nosed but good faith bargaining—will be successful in identifying those areas on which the two parties can find some common ground.

Again, I would think one cautionary note is there are 100 Senators here so there are 100 different plans for campaign finance reform. I have a perfect plan for myself and I am certain that other Senators can devise one for themselves. But, in the interests of good government and integrity of the process, I join the majority leader in hoping we can come to some successful closure on this issue in the near future.

## COMPREHENSIVE AIDS RESOURCES EMERGENCY ACT OF 1990

The Senate continued with the consideration of the bill.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

## UNANIMOUS-CONSENT AGREEMENT

Mr. KENNEDY. Mr. President, I ask unanimous consent that Senator HELMS be recognized to offer an amendment with respect to criminalization of blood donations; that there be 30 minutes of debate, equally divided, on the amendment; that no second-degree amendment be in order; that following the conclusion of time for debate on the Helms amendment, the Helms amendment be laid aside and that Senator KENNEDY be recognized to offer a Kennedy-Hatch amendment relating to the same subject matter of the Helms amendment on which there be 30 minutes of debate equally divided; that no second-degree amendment be in order; that, following the conclusion of the debate on the Kennedy-Hatch amendment, there be a vote, on or in relation to, the Helms amendment, to be followed, without any intervening action or debate, by a vote on, or in relation to Kennedy-Hatch amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask for the yeas and nays on both amendments.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. HELMS. Is the request in order?

The PRESIDING OFFICER. The amendments are not yet offered.

Mr. HELMS. Mr. President, I ask unanimous consent it be in order to ask for the yeas and nays.

The PRESIDING OFFICER. Is there objection? Hearing no objection, it is so ordered.

Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The yeas and nays are ordered on each amendment. Under the previous order of the Senate, the Senator from North Carolina is recognized.

AMENDMENT NO. 1626

Mr. HELMS. Mr. President, momentarily I shall send to the desk an amendment. First let me explain the purpose of it. Then I shall ask the distinguished clerk to read it all, as I did earlier this morning.

I want this amendment to be regarded as the Ryan White amendment. There is not a Senator who did not admire that young fellow. There is not a Senator who does not deeply regret the tragedy the befell him. And I hope there is not a Senator who is unwilling to do whatever is necessary to prevent happening to other children what happened to Ryan White.

The amendment I shall momentarily send to the desk is very simple. I tried to make it simple. It woud ensure the safety of the blood supply of this Nation. And it would do that by codifying a 1986 recommendation of the Public Health Service that individuals who know they have AIDS or know that they are at high risk of contracting AIDS, must not, and should not donate blood or tissues.

The amendment would simply ensure compliance with this recommendation by imposing a fine of up to $20,000 or a prison term of up to 10 years or both. And that ought to give pause to some of these people who have done, and might do again, this dastardly act of providinig the kind of blood that caused the death of little Ryan White.

This amendment has another purpose. I want to do everything I can to ensure that no family will ever again suffer the anguish that the family of Ryan White endured for 6 years. That is why I am specifying that this amendment be dedicated to young Ryan White, because he was young fellow with great courage and it is well known that he contracted this deadly disease from a blood transfusion contaminated by a donor with AIDS.

Mr. President, I send an amendment to the desk and ask for its immediate consideration. I will ask the clerk to read it all.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Carolina [Mr. HELMS] proposes an amendment numbered 1626:

At the appropriate place, insert the following new section:

Chapter 51 of title 18, United States Code, is amended by adding at the appropriate place the following:

" . PROTECTION AGAINST THE HUMAN IMMUNODEFICIENCY VIRUS.

"(a) It shall be unlawful for any individual to knowingly donate, or sell, or to knowingly attempt to donate, or sell blood, semen, tissues, organs, or other bodily fluids if such individual—

"(1) knows on the basis of clinical or laboratory evidence, that such individual is infected with the Human Immunodeficiency Virus or;

"(2) is an individual who, on or after January 1, 1977, is or has been a user of any intravenous drug, the sale, distribution, or use of which is prohibited under Federal or state law at the time the individual injected the drug or;

"(3) is an individual who has engaged in prostitution on or after January 1, 1977 or;

"(b) Transmission of the Human Immunodeficiency Virus does not have to occur for a person to have committed a violation of this section.

"(c) Any person who violates the provisions of subsection (a) shall be subject to a fine of not less than $10,000 nor more than $20,000 and imprisoned for not less than 1 year nor more than 10 years, or both."

Mr. HELMS. Mr. President, I thank the distinguished clerk.

The PRESIDING OFFICER. The Senator from North Carolina is recognized for 30 minutes under the previous order.

Mr. HELMS. I thank the Chair. Mr. President, we are all familiar with Ryan White, and I suppose everybody in the Senate knows the story of the family of the Broadway and television actor Paul Glaser. Mr. Glaser's wife was infected by contaminated blood and she passed the AIDS virus on to two of their children, one of whom died. That is one additional reason for this amendment.

The second reason and equally important to me is I happen to have a daughter who is a registered nurse. As a matter of fact, she earned her master's degree in nursing just last week. I am very proud of her. But she and all the nurses and all doctors, all other people who work with patients in hospitals confront a situation that is almost a nightmare.

Some months ago, Nancy was inadvertently—Nancy being one of my daughters—pricked by a needle that had been left in a bed by a patient believed to have AIDS. Fortunately, it turned out that the needle had not been used on the patient and everything was all right with Nancy. But suppose she was dealing with tainted blood during a transfusion and somehow came in contact with that blood, which is not a rarity by any means in any hospital? So I am thinking about Ryan White; I am thinking about Paul Glaser's family; and I am thinking about Nancy Stuart, and everybody else who may innocently end up losing his or her life as a result of tainted blood.

Mr. President, the able Senator from Massachusetts has an amendment which states that States cannot get funds unless they have laws and punish those who donate blood knowing they have AIDS. Senator KENNEDY told me yesterday, and I believe him, that he wants to stop anyone who poses a threat to the blood supply. I commend him for his position, which I share, obviously. However, I am convinced Senator KENNEDY's approach will not do the job. So the question is do we want to have a feel-good amendment, or do we want to have an amendment that will work?

The point is this, Mr. President: At the present time, there are 20 States which have laws making it a crime to donate blood when the individuals know that they are infected with HIV. Senator KENNEDY's approach allows bureaucrats to write letters to Washington to say that a little creative prosecution they can—they can—put people in jail for knowingly giving tainted blood.

We are going to have a chance to vote on Senator KENNEDY's proposition and on my proposition. The first vote under the unanimous-consent agreement just reached will be on my amendment; the second on Senator KENNEDY's.

Despite the tragedies that I have alluded to and which have been alluded to in 2 or 3 days on the floor, I can already hear the knees jerking within the AIDS lobbies. When I began to ask questions of the national blood organizations, I found, to my astonishment, that elements of the lobby and certain allies in and out of the Senate had been there before me. These activists warned the blood banks that old Senator HELMS was up to some things. That is right; I am up to something.

As I pointed out yesterday, the radical elements of this lobby have almost written the rules of debate on this bill. As I said yesterday, a lot of things are unmentionable. They will tell you that we cannot pick on those who practice sodomy; we cannot criticize the IV drug users anymore because there is no longer a problem with donating infected blood. Bullfeathers. Let them read the April 25 Journal of the American Medical Association, or the recommendation of the AMA House of Delegates, released just a few weeks ago.

I have in hand, Mr. President, a study conducted for the AMA by Johns Hopkins Hospital in Baltimore. The Johns Hopkins researchers studying only blood banks and commercial plasma centers in the city of Baltimore found that the risk of individuals with HIV infecting the blood supply is very real despite the testing of individuals who sell, donate blood, or blood products.

The reseachers studied over 2,900 IV blood users, many of whom had sold blood to commercial blood plasma centers which generally pay about $10 or $15 for each donation. A smaller number of addicts had donated blood to nonpaying blood collection centers. According to the study, 11 percent of the subjects reporting donation since 1985 had tested positive for HIV. The researchers found that among the hard core addicts, education, counseling and treatment had little or no effect on the addict's habits or propensity to sell their blood.

The report concluded by saying that although HIV should be detected by current screening procedures, incidental infections that are in the so-called window period prior to the full development of the disease might just be missed. One wonders if little Ryan White would still be running around today, maybe wanting to be a pitcher for the Baltimore Orioles or maybe running for President of the United States someday. But hs is not going to be able to do that, because he died because he had tainted blood pumped into his system.

The Johns Hopkins team warned that the continued donation of blood and plasma by individuals at high risk for AIDS, particulary but not exclusively IV drug users, presents what they called a troubling problem for the future of our blood supply.

I think it is fair to conclude that if this problem exists to this extent in the city of Baltimore, what makes us think that the threat is any less when we take the Nation as a whole? Already States like California, Illinois, Texas, South Carolina, Oklahoma, among others, have enacted laws which punish those who donate or sell blood when that individual knows he or she has HIV.

Prosecutions have already begun in South Carolina and Oklahoma for violations of this law, but the point is that there are only 20 States out of the 50 that have such laws.

Some may say, "Look. What is the Senator from North Carolina doing about States rights on this?" I tell you what I am doing. I take a backseat to nobody in my belief that States have the right to govern their own affairs. But this is not a State problem as such. It is a national problem. Blood donors can slip over the border. So it is fair and reasonable to view this as a Federal issue because bloodbank safety is a national problem. We are talking about the national blood supply.

The CDC, the Centers for Disease Control, has reported that 3,040 cases of AIDS have been reported due to contaminated blood.

I do not believe the Senate should stand by and wait for another HIV drug user or high-risk user to donate or sell contaminated blood. I do not want any more Ryan Whites.

The American Medical Association itself recommended sanctions against those individuals who knowingly and willingly risk infecting an innocent, unsuspecting person. And this, by the way, includes sanctions against those who infect the blood supply knowing that they have AIDS.

Currently bloodbanks and hospitals using the enzyme-linked immunosorbent assay [ELISA] test can identify most blood donations contaminated with the human immunodeficiency virus. Although they do a pretty good job, these tests are not foolproof. The National Academy of Sciences has warned that all infected donors are not detected by the current tests. It states in the report titled, "Confronting AIDS":

The small fraction of false-negative test results and the length of time between infection with the virus and the appearance of antibodies underscore the need for those who have engaged in high-risk behaviors to refrain from donation; even with available screening techniques, this is still of paramount importance.

In addition, researchers continue to find new viruses associated with AIDS, making the current testing procedures dismally inadequate to prevent future contamination of our Nation's blood supply. Dr. Essex, of the Harvard School of Public Health, has been quoted as saying that the blood test used to detect antibodies against HTLV-III can only detect around 92 percent of individuals with antibodies against LAV-II or HTLV-IV, in contrast to 99 percent of individuals infected with HTLV-III. Researchers at the Pasteur Institute in Paris believe that the rate of detection of LAV-II may be as low as 30 to 50 percent.

Does that grab your attention, Mr. President?

In light of these facts, this country must do more to insure a safe blood and tissues supply. Imposing a criminal penalty on anyone who attemtps to contribute to a blood and tissues bank when that individual knows he or she is infected with the human immunodeficiency virus or is at high risk of infection should deter such individuals from donating, and ultimately insure a safer blood supply.

Mr. President, I ask unanimous consent that a report from the April 25 edition of the Journal of the American Medical Association entitled "Blood and Plasma Donations Among a Cohort of Intravenous Drug Users," and a summary of the 20 State laws regarding blood and tissue donations be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From JAMA, Apr. 25, 1990]

BLOOD AND PLASMA DONATIONS AMONG A COHORT OF INTRAVENOUS DRUG USERS

(By Kenrad E. Nelson, MD; David Vlahov, PhD; Joseph Margolick, MD, PhD; Marie Bernal; Ellen Taylor)

We evaluated the blood and plasma donation histories of a cohort of 2921 intravenous drug users in Baltimore, MD, and correlated these histories with their human immunodeficiency virus (HIV) serologic status, numbers of CD4 lymphocytes in the peripheral blood, and stigmata of intravenous drug use (scarred veins). Of the 793 intravenous drug users (27.1%) who had donated blood or plasma, 652 (82.2%) donated after they had started using intravenous drugs. Most subjects donated at commercial plasma centers, where they were paid $10 to $15 per donation. Although the HIV-1 seroprevalence of the entire cohort was 24.1%, the HIV-1 seroprevalence among those reporting plasma or blood donations declined progressively with time, from 17.1% in those who last donated in 1985 to 3.6% in those who last donated in 1988-1989. Many of the 437 intravenous drug users who had donated plasma or blood since 1985, when screening for HIV-1 was initiated, had not been notified and counseled about their HIV test results. Current programs to exclude individuals with a history of intravenous drug use from the plasma donor pool should be reevaluated and improved—(*JAMA*. 1990;263:2194-2197)

All blood and plasma donors in the United States have been screened for antibodies to human immunodeficiency virus, type 1 (HIV-1), since March 1985 to prevent transmission of HIV-1 by transfusion of blood or blood products.[1] While serologic screening of blood and plasma donors has reduced the risk of the transmission of HIV-1 by blood products, the risk has not been entirely eliminated.[2, 3] An important additional component of the strategy to increase the safety of the blood supply is voluntary deferral of individuals at high risk of HIV-1 infection. Voluntary deferral of homosexual/bisexual men as donors was instituted in the United States in early 1983. However, intravenous drug users (IVDUs) had been excluded as donors prior to that time because of their risk of carrying other agents, especially hepatitis B and hepatitis non-A, non-b viruses.

Despite these voluntary exclusion policies, blood and plasma donation centers that pay donors attract a clientele in need of money, including active or past users of illicit intravenous drugs. We were made aware of this potential problem when several IVDUs were referred for clinical evaluation to Johns Hopkins Hospital, Baltimore, MD, from the health department after having test results seropositive for HIV at plasma donation centers. Therefore, we studied a large chohort of IVDUs who had been recruited for a prospective study of the natural history of HIV infection to evaluate (1) the recent pattern and extent of blood and plasma donations among IVDUs, (2) demographic and socioeconomic characteristics of IVDUs that correlated with blood and plasma donation, and (3) the effectiveness of screening methods to exclude HIV-1-infected donors.

Footnotes at end of article.

SUBJECTS AND METHODS

*Study Population*

Intravenous drug users were recruited from the Baltimore metropolitan area between February 1988 and March 1989 for enrollment in a natural history study of HIV-1 infection among IVDUs, the ALIVE (AIDS Link to Intravenous Experiences) study. Eligibility criteria included residence in the Baltimore metropolitan area, age over 17 years, and a history of illicit drug injection any time in the previous 10 years. The ALIVE study recruited and screened 2921 IVDUs, of whom 703 (24.1%) were HIV-1 seropositive at baseline. The study population was recruited through drug treatment centers, street outreach, homeless centers, and emergency departments and clinics and by personal contact with participants who had already enrolled in the study. Subjects were reimbursed for each visit. Although the study population was chosen from a variety of sources, it was not possible to obtain a random sample of IVDUs in Baltimore since the identity and number of individuals who are drug users are unknown. The ALIVE population is predominantly male (82.5%) and black (88.6%), and nearly all the subjects are currently using illicit drugs—commonly both cocaine and heroin. Of the 2921 subjects, 2616 (89.6%) had most recently injected illicit drugs during the same year as the baseline visit, and 2252 (77.1%) reported their last injection during the month of enrollment. The median duration of use of illicit drugs was 12 years. Additional details of the ALIVE study protocol, recruitment procedure, and characteristics of the study population will be published elsewhere.[4] At the time of this report, about 85% of the initial sample had been followed for 6 to 18 months. The protocol, which included informed consent, pretest and post-test counseling, and assurances of strict confidentiality of all study data, was approved by the Institutional Review Board of The Johns Hopkins School of Hygiene and Public Health.

*Questionnaire Data and Phlebotomy Screening*

The baseline questionnaire for the study was administered by trained interviewers after informed consent and pretest counseling procedures were completed. In addition to demographic and socioeconomic data, the questionnaire included items on the history of illicit drug use in the past 10 years and details of the use of intravenous drugs in the past 6 months, sexual practices, and medical history. One item asked whether the participant had ever donated blood or plasma. If so, the participant was asked the year of his or her donation and whether he or she donated at a blood bank or a commercial plasma center. In addition, the study phlebotomist independently recorded the presence or absence of scarred veins on the upper extremities and other stigmata indicating long-term use of illicit drugs.

*Blood Bank and Plasma Center Characteristics*

In the Baltimore area, blood banks do not use paid donors. However, commercial plasma centers pay volunteers, typically $10 to $15, for each donation. All blood and plasma centers screen for HIV-1 antibodies using licensed enzyme-linked immunosorbent assay and Western blot methods.[1] Both blood and plasma centers maintain donor deferral lists based on medical history data and results of laboratory testing for

hepatitis B surface antigen, hepatitis B core antibody, antibodies to HIV-1, positive serologic test results for syphilis, and elevated alanine aminotransferase levels. However, separate donor deferral lists are kept by plasma centers and blood banks that are not shared (Paul Ness, MD, oral communication, 1989).

*Laboratory Tests*

In the ALIVE study, antibodies to HIV-1 were detected using a commercial enzyme-linked immunosorbent assay (Genetic Systems, Seattle, Wash), and all specimens that were repeatedly positive for HIV-1 by enzyme-linked immunosorbent assay were confirmed with a Western blot assay (DuPont Co, Wilmington, Del). Subsets of T cells were measured in subjects seropositive for HIV-1 and in a sample of seronegative subjects enrolled in the semiannual follow-up. Peripheral blood was stained with the monoclonal antibodies Leu-4 (total T cells), Leu-2 (suppressor-cytotoxic T cells), and Leu-3 (helper-inducer T cells), as previously described,[5] and stained cells were enumerated by flow cytometry, as previously described.[6] Absolute numbers of circulating T cells and T-cell subsets were obtained by multiplying the percentages of Leu-4-, Leu-3-, and Leu-2-positive cells by the absolute lymphocyte count, as determined from a complete blood cell count, including an automated 10,000-cell differential count.

*Data Analysis*

Frequency distributions were generated, and cross-classification of variables was performed using $\chi^2$ statistics to guide interpretation.

RESULTS

Data concerning the history of blood and plasma donation were obtained from 2921 participants in the ALIVE study. Blood or plasma donations between 1978 and 1988 were reported by 793 participants (27.1%). Of these, 97 (12.2%) reported that they last donated at least 1 year prior to first injecting drugs; 652 (82.2%) had been injecting drugs at least 1 year when they last donated. Four hundred thirty-seven participants (15.0%) reported donating since 1985, when routine HIV-1 screening was implemented. Of these, 385 (88.1%) donated at a commercial plasma center and 52 (11.9%) donated at a blood bank.

Forty-eight (11.0%) of those reported donations since 1985 had test results positive for HIV-1 antibody when they were screened at enrollment in the ALIVE study in 1988-1989. This is significantly less than the seroprevalence of 26.5% found among the 2126 subjects in the ALIVE population at baseline who did not have a history of blood or plasma donation since 1985 ($\chi^2 = 48.1$, $P<.0001$). Furthermore, HIV-1 seroprevalence among recent donors at the time of enrollment decreased progressively as the interval between our baseline HIV-1 screening and the last plasma or blood donation became shorter (Table 1).

TABLE 1.—HIV SEROLOGIC STATUS AT STUDY ENTRY (1988–89) AMONG INTRAVENOUS DRUG USERS (LAST BLOOD OR PLASMA DONATION BETWEEN 1985 AND 1989) [1]

| Year last donated | HIV serologic status | | | | Total No. |
|---|---|---|---|---|---|
| | Negative | Percent | Positive | Percent | |
| 1985 | 68 | 83 | 14 | 17 | 82 |
| 1986 | 73 | 79 | 19 | 21 | 92 |
| 1987 | 83 | 90 | 9 | 10 | 92 |
| 1988 | 140 | 96 | 6 | 4 | 146 |
| 1989 | 25 | 100 | 0 | | 25 |
| Total | 389 | 89 | 48 | 11 | 437 |

[1] HIV indicates human immunodeficiency virus, type 1.

There were 263 individuals in our study who last donated between 1987 and 1989. Of these, 206 (78.3%) had injected illicit drugs prior to their last donation, and 210 (79.8%) had scarred veins or other stigmata of long-term intravenous drug use at the time of their baseline screening visit to the ALIVE clinic. Fifteen subjects (5.7%) were seropositive for HIV-1 at the time of study enrollment in 1988-1989; 14 of these subjects reported illicit drug use at the time of their most recent donation, and 12 had stigmata of drug use on their upper extremities when they enrolled in our study in 1988-1989. The presence of stigmata suggests that the drug injection history of these individuals was not limited to the very recent past, confirming data obtained on interview. T-cell subset enumerations were performed for 11 of these 15 seropositive individuals; 5 had CD4 cell counts less than $0.5\times10^9$/L, and a sixth had a CD4 cell count of $0.513\times10^9$/L (Table 2). Taken together, these data suggest that the acquisition of HIV-1 infection probably preceded the most recent plasma donation in these 6 individuals.

In many seropositive individuals with a history of recent blood or plasma donation, notification and posttest counseling by plasma centers concerning HIV test results were ineffective. Seven of 15 individuals who reported donations in the previous 2 years denied that they had ever been tested for HIV infection (Table 2). Three seropositive individuals reported that they had been told their HIV serologic test results were negative in the previous 2 years. These 3 individuals might have had an incubating HIV-1 infection at the time of their most recent donation, or they might not have been infected, or their self-reports might have been inaccurate. Thirteen of 15 subjects reported that their most recent donation was at a plasma center; the other 2 had donated most recently at a blood bank.

It seems likely that the major motivation for donation in this population was economic. The ALIVE study population is quite poor; only 31.9% have an annual income above $5000. Homelessness, unemployment, and a history of imprisonment are common (Table 3). The socioeconomic characteristic that had the strongest correlation with a history of blood or plasma donation was a history of homelessness (Table 3). Duration of intravenous drug use, frequency of injection, age, and HIV seropositivity all had inverse associations with a history of plasma or blood donations (Table 3). The small number of individuals (n=28) who donated at blood banks since 1987 had demographic and socioeconomic characteristics similar to those of the larger number of plasma center donors (n=240), except that a history of homelessness in the past 10 years was more common among plasma center donors (57.1% vs. 77.9%, $P<.01$). Donation histories were more frequent among males and among nonblacks in the cohort (Table 3).

COMMENT

Our data support the conclusion that the program to screen serologically all blood and plasma donors and to exclude donors from groups at high risk of HIV-1 infection has reduced the seroprevalence of HIV-1 among donors and has reduced the risk of HIV-1 transmission through blood or plasma components. Although a history of plasma donation was common among the IVDUs we studied, the rate of HIV-1 seropositivity among these donors had declined substantially since 1985. However, the continued donation of plasma among IVDUs is cause for some concern. Although virtually all prevalent infections with HIV-1 should be detected by the serologic screening process, incident infections that are in the "window period" prior to the development of antibodies might be missed.[7] We found an annual incidence of HIV-1 infection of 6.6% in our study cohort, so the risk of false-negative serologic test results in this population is substantial. Transmission of HIV-1 infections by the transfusion of blood that has been screened and found to be seronegative has been reported previously in the United States.[2,3]

Nearly 90% of the participants in our study gave a history of donation at a commercial plasma center rather than a blood bank. The financial reimbursement for each plasma donation would be attractive for an IVDU of lower socio-economic status seeking income and might also serve as a disincentive for candor about illicit drug use. Since donors at plasma centers commonly donate at frequent intervals, eg, twice weekly, in comparison to blood banks, where the interval is measured in months, the risk that individuals may donate while they are in the "window period" between infection and seroconversion may be greater in this population. Nevertheless, IVDUs might feel that the serologic screening would eliminate any risk associated with the transfusion of their blood or blood products.

It has been demonstrated that the Cohn fractionation process inactivates HIV-1 and hepatitis B virus.[8] Therefore, it could be argued that donors who are HIV-1 carriers but who are found to lack antibodies on the enzyme-linked immunosorbent assay present no risk of transmission as long as their plasma is processed by Cohn fractionation. However, preparation of fresh-frozen plasma and certain plasma protein fractions, such as factor VIII, bypasses the Cohn procedure and could allow transmission of HIV-1. Generally, commercial plasma centers do not prepare and sell fresh-frozen plasma, and plasma concentrates currently are pasteurized to reduce or eliminate the risk of transmission. However, the efficacy of pasteurization depends on the specific procedures used,[9] and transmission of HIV-1 by heat-treated clotting factor conjugates has been reported.[10-12] Therefore, effective measures to exclude IVDUs from the donor pool continue to be critically important.

We believe that voluntary self-deferral in populations of addicts along with serologic screening and Cohn fractionation of donated plasma to sterilize the components are insufficient to ensure that HIV-1 infected IVDUs do not enter the plasma donor pool. In our opinion, the most efficient method for minimizing the risks of transmission of HIV-1 and other infectious agents by blood and blood components would be to discontinue payment of plasmapheresis donors. However, it is extremely unlikely that a completely voluntary system of plasma donation would meet the demand for components. Given this dilemma, more effective deferral of plasma donation by IVDUs and other individuals at high risk of HIV-1 infection is needed, along with better screening tests and more effective notification and counseling of plasma donors who test seropositive. In this regard, our data indicate that only about half of the sero-positive IVDUs who donated at plasma centers in the 2 years before this article was written reporting having been notified of their test results. Although this could have occurred in part because the donors could not be located for counseling, these results are disturbing and underscore the need for more effective contact with and follow-up of potential donors.

Our data suggest that some plasma donors had physical stigmata of illicit drug use, ie, scarred veins, at the time they last donated plasma. Such stigmata might be more readily connected with a history of illicit intravenous drug use of the context of a clinic dealing specifically with IVDUs than in a plasmapheresis center, where intravenous drug use might have been denied. Nevertheless, phlebotomists at plasma centers should be able to exclude potential donors with such stigmata more effectively.

Our data suggest that there has been a progressive decline in the numbers of HIV-1 seropositive IVDUs who have donated plasma and blood in recent years. The recent decline in the HIV seroprevalence of voluntary blood donors[13,16] is most likely due primarily to improvements in procedures for the exclusion of high-risk donors. Although recent data on the seroprevalence of paid donors at plasma centers have not been reported, HIV seropositivity among this population was significantly greater (0.086%) than among voluntary blood donors in a population studied in 1987.[7] It is quite possible that serologic screening of potential donors has played an important role in the identification and exclusion of HIV-1 seropositive donors from repeated donations at plasma centers. General education of IVDUs about the risk of AIDS transmission by transfusion has also likely played an important role in this trend. Since our study population was recruited from a group of currently active IVDUs and we reimbursed subjects for their participation, our data may be biased in favor of detection of individuals who have a history of donating plasma to receive compensation. Nevertheless, the continued donation of plasma, and occasionally blood, by IVDUs, who are at high risk of HIV-1 infection, is troubling and warrants further attention.

WHICH STATES MAKE IT A CRIME TO KNOWINGLY EXPOSE ANOTHER TO HIV INFECTION?

Alabama, H.B. 338, Act 87-574 (87)—misdemeanor (risks transmitting or conducts himself in a manner likely to transmit the disease).

Arkansas, H.B. 1496, Act 614 (89)—felony—"sexual intercourse" (without 1st informing others).

California, S.B. 1002, Chapter 1154 (88)—felony, blood donation.

Delaware, H.B. 637, Chapter 335 (88)—felony, blood donation.

Florida, H.B. 1519 (88)—felony of the third degree, blood/body fluids donation.

Florida, H.B. 1313, Chapter 86-220 (86)—misdemeanor "sexual intercourse"; (88)—misdemeanor (if person has been informed of modes of transmission).

Georgia, H.B. 1281, Act 1440 (88)—felony (after obtaining knowledge of infection) knowing intercourse, donation, sharing syringes.

Idaho, H.B. 653, Chapter 70 (86)—prohibits knowing or willful exposure; H.B. 433 (88)—felony (provides affirmative defense if sexual activity occurred between consenting adults).

Idaho, H.B. 433 (88)—felony, knowing transmission or transmit with the intent of infection.

Illinois, H.B. 1871 (89)—class 2 felony for criminal transmission-intimate contact; blood, semen, tissue or organ donation; sell, exchange, etc. nonsterile IV drug paraphernalia. Provides an affirmative defense if the person exposed knew that the infected persons were infected with HIV, knew that the action could result in HIV infection and consented to the action with that knowledge.

Indiana, S.B. 9, Public Law 88-123 (88)—Class C felony, blood donation.

Kentucky, H.B. 50 (88)—Class C felony, blood donation (also any health facility, physician or health care worker who knowingly transfuses untested blood when there is not an emergency situation is guilty of Class C felony.

Louisiana, H.B. 1728, Act 663 (87)—fine of not more than $5,000, imprisonment with or without hard labor for not more than 10 years "sexual contact" without knowing consent of other person.

Maryland, S.B. 719, Chapter 789 (89)—misdemeanor (may not knowingly transfer or attempt to transfer).

Michigan, H.B. 5026, Public Act 490 (88)—felony, sexual penetration (if they do not inform other person of the presence of disease).

Mississippi, H.B. 515, chapter 557 (88)—knowingly and willfully violating health department orders.

Missouri, H.B. 1151 and 1044 (88)—Class D felony, donation of blood, organ, sperm, tissue; sexual contact.

Oklahoma, H.B. 1798 (88)—felony (with intent to infect).

South Carolina, H.B. 2807, Ramification 547 (88)—sale, donation, exchange of blood products; "exposing another person to HIV without first informing."

Texas, S.B. 959 (89)—felony for "engaging in conduct likely to transfer."

Source: AIDS Policy Center, Intergovernmental Health Policy Project, the George Washington University, October 1989.

Mr. HELMS. I reserve the remainder of my time.

Mr. KENNEDY. Mr. President, I rise in opposition to the Helms amendment because it is poor health policy and an unnecessary expansion of Federal Government authority in an area best left to State regulation. After the Senate disposes of that amendment, I intend to offer an alternative with Senator HATCH.

The Helms amendment would make it a Federal offense for an individual to give blood if: First, the person knows he is infected with the HIV virus; second, is or has been an intravenous drug user since January 1, 1977; or third, has engaged in prostitution since January 1, 1977.

Our alternative amendment would bar the Secretary of Health and Human Services from making grants to a State under this act unless the Secretary determines that the criminal laws of that State are adequate to prosecute any individual who knowingly and intentionally donates or attempts to donate blood, blood products, semen, tissues, organs, or other bodily fluids if the person has been diagnosed to have the HIV virus, and has been informed that he or she is infected and has knowledge of the risk of transmission of such virus through the donation of blood, blood products, semen, tissues, organs, or other bodily fluids.

In other words, no State could receive funds under the act, unless laws are in place to prosecute a person who donates blood or organs if one knows that he or she is infected with the HIV virus and knows of the risk of transmission from making such a donation.

In addition, our amendment makes it clear that nothing in the bill would preclude a State from making it a crime for an individual to donate blood or organs if the individual is or has been an intravenous drug user since January 1, 1977, or has engaged in prostitution since January 1, 1977.

The major organizations that deal with blood and organ donations strongly caution against the overly intrusive regulation of donations such as are included in the amendment of the Senator from North Carolina.

The American Red Cross says:

The American Red Cross opposes legislation which limits the right or ability of blood banks to exercise control over who may donate and to screen donated units for blood transmitted-diseases.

That means that the Red Cross wants to be able to devise the protocol by which they are going to screen donors and receive blood.

The American Association of Blood Banks writes that it "is concerned that criminal proceedings against donors who may have engaged in at-risk behavior may be inappropriate and would not be an effective measure to assure a safe blood supply."

Our amendment would ensure that States seeking Federal funds have adequate criminal sanctions against blood and organ donations by persons who know they are infected. That is fully appropriate.

At the same time, the amendment would preserve this as a matter of State regulation. The Senator from North Carolina has often complained about the size and intrusiveness of the Federal Government but his amendment would create a new Federal crime with new prosecutorial responsibility in an area where the States are fully capable of protecting public safety. The Helms amendment is also flawed in adopting a blanket criminal prohibition against blood or organ donation by persons in certain risk groups. The consequences could be tragic.

Suppose a former prostitute has a child who is in need of a kidney transplant. The Helms amendment would make it a Federal criminal offense, punishable by up to 10 years in jail, for that woman to donate her kidney to save the child's life, regardless of whether or not she is infected with the HIV virus.

Suppose a man who once used illegal intravenous drugs 12 years ago has a brother with a rare blood disease who needs a blood transfusion to live. The Helms amendment would make it a crime for that man to donate blood to save his brother's life, regardless of whether or not that man is infected with the HIV virus.

No one here approves of illegal drug use or prostitution. But make no mistake about it. If you vote for the Helms amendment, you will be making it a crime for someone who has never engaged in these activities to donate blood to save a life, even if they are not infected with the HIV virus.

Our amendment, by contrast, protects the blood and organ supply while permitting the States to exercise their criminal jurisdiction to pass sensible and responsible laws in this area.

I urge my colleagues to reject the Helms amendment, and to support our amendment.

Finally, Mr. President, I hope that after we dispose of these amendments, we can act on the suggestion that has

been made by the Senator from Utah, and approve an amendment which would add additional inspectors for these blood banks and provide funding to the Food and Drug Administration. I would hope this amendment would be unanimously accepted. That, quite frankly, would probably make a much greater difference than what the Senate ultimately determines on this particular amendment.

That is where you could really come to grips with gaining further assurance of the safety and the security of the blood supply. They do not have adequate personnel out there at the Food and Drug Administration. There have been cutbacks in the number of persons who are responsible for inspections and other oversight activities.

It seems to me that the kind of approach will be included in the amendment, which will be introduced momentarily, that represents the best judgment of the Senator from Utah and myself, combined with providing an increased authorization, and an increased authorization for inspectors for the FDA, is really the responsible and sensible way to go.

Mr. President, I also have a list here of those organizations that oppose the Helms amendment. They include the American Association of Blood Banks, American Bar Association, American Red Cross, the Association of State and Territorial Health Officers, National Conference of State Legislators, National Governors Association, and the National Hemophilia Foundation. I ask unanimous consent to include in the RECORD letters from some of those organizations that reflect their opinion in opposition to the Helms amendment.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMERICAN ASSOCIATION
OF BLOOD BANKS,
*Arlington, VA, May 1, 1990.*

Hon. EDWARD M. KENNEDY,
*U.S. Senate, Russell Senate Office Building, Washington, DC.*

Dear Senator Kennedy: I understand that Senate Bill 2240, on disaster relief for those areas most affected by AIDS, is expected to be brought before the full Senate for a vote soon. I also understand that amendments dealing with the blood supply and blood banking may be proposed to the bill on the Senate floor.

I am writing to express the opposition of the American Association of Blood Banks (AABB) to attachment of these amendments to your bill. The amendments are expected to address important issues concerning blood donation and we believe it would be inappropriate for such provisions to become law as floor amendments to S. 2240. In addition, the amendments are unnnecessary and ill-advised.

The American Association of Blood Banks (AABB) is a private, nonprofit, voluntary health organization. AABB member facilities collect nearly half the nation's blood supply and transfuse over 80 percent of all the blood collected in the United States. AABB members are located in all 50 states and more than 40 foreign countries. The Association's 2400 institutional members include community blood centers, where blood and components are collected and prepared, and hospital blood banks and transfusion services, where patients are managed and components are transfused. AABB's individual membership, which approaches 8000, is multidisciplinary and includes physicians, scientists, technologists, nurses, donor recruiters as well as administrative and management personnel. Throughout its 42-year history, the AABB has worked to maintain an adequate blood supply and make it as safe as possible for the American people. Blood has saved thousands of lives that otherwise would have been lost.

An amendment to S. 2240 requiring testing of all donated blood for the Human Immunodeficiency Virus (HIV) would be unnecessary. All donated blood is routinely tested for HIV as required by the Food and Drug Administration (FDA), and mandatory testing of donors does not need to be legislated into this statute. Pre-donation testing, as would be required in the amendment language, would be extremely burdensome to both the blood banks and voluntary blood donors and could jeopardize the supply of blood for critically ill patients, without any evidence that it could improve blood safety. In addition, such a mandate would frighten patients into believing there are great risks involved in a blood transfusion from the public blood supply when in fact the risks are minimal, and are invariably much less than the risks of foregoing a necessary blood transfusion.

An amendment to S. 2240 requiring collectors and distributors of blood to provide patients with the option of using an autologous or directed donation would also be unnecessary and inappropriate.

The AABB recommends autologous donation of blood prior to surgery whenever possible. AABB sets standards for and accredits blood banks and transfusion services. AABB's publication, Standards for Blood Banks and Transfusion Services, now in its 13th edition, has included standards on the use of autologous blood since 1976. AABB established the National Autologous Blood Resource Center, which distributes information and patient brochures on autologous blood donation. The Center also assists institutions in setting up autologous blood programs.

Because of concerns that directed donations may promote the misconception that there are two levels of blood safety, and because of other potential legal and ethical problems, the AABB does not encourage the use of directed donations. In many cases, directed donations have proven less safe than blood donated voluntarily by the public. Nonetheless, if such donations are permitted by AABB member institutions in response to local demands or state law, they must meet all AABB standards for the protection of blood safety.

Both autologous and directed blood donations programs are widely available. Mandating these programs as a condition of licensure is not justified, considering the burden this would place on some providers.

Criminal proceedings against donors who may have engaged in at-risk behaviors may also be introduced as an amendment. An initial concern is that the criteria for high risk donors subject to penalties parallel the FDA criteria for high risk donors. The AABB is also concerned that such a policy may be inappropriate and would not be an effective measure to assure a safe blood supply. Offering penalties to prospective donors may create disincentives for persons who would otherwise be willing to be candid during their donor interview, where blood center efforts are made to encourage high risk persons to self-defer from blood donations. Several states have proposed or already promulgated criminal penalties for donating blood when knowingly infected with AIDS or the AIDS virus, but the value of these laws has not yet been determined.

We hope these comments have been helpful. Please keep us informed as to the status of your legislation, and let Cynthia Kelly of our national office staff know if we can assist you further in any way.

Sincerely,

TOBY L. SIMON, M.D.,
*President.*

---

AMERICAN RED CROSS,
NATIONAL HEADQUARTERS,
*Washington, DC, May 1, 1990.*

Hon. EDWARD M. KENNEDY,
*Chairman, Committee on Labor and Human Resources, U.S. Senate, Washington, DC.*

DEAR SENATOR KENNEDY: Thank you for sharing the information regarding possible amendments concerning blood banking to the AIDS Care Bill, Senate Bill 2240.

With respect to statutory requirements for HIV testing of blood donors, the American Red Cross has been and will continue to be committed to a safe blood supply. Like other blood banks, we currently perform extensive testing consistent with the best known medical practice and Federal Drug Administration requirements. Thus, from our perspective, such a federal law would be redundant to current practice and would not contribute to a safer blood supply.

With respect to a statutory requirement for blood banks to offer directed donation services, the American Red Cross opposes legislation which:

Limits the right or ability of blood banks to exercise control over who may donate and to screen donated units for blood-transmitted diseases.

Compromises the confidentiality of the donor.

Imposes implementation dates that do not provide sufficient time for planning and the development of adequate protocols.

Caps the amount that can be charged for directed donation services that is less than the real cost of the service.

We would welcome the opportunity to comment more extensively on these matters if circumstances permit.

Thank you again for bringing this matter to our attention.

Sincerely,

STEPHEN H. RICHARDS,
SENIOR VICE PRESIDENT,
*Secretary and General Counsel.*

---

THE NATIONAL HEMOPHILIA
FOUNDATION,
*New York, NY, May 2, 1990.*

Hon. EDWARD M. KENNEDY,
*Chairman, Committee on Labor and Human Resources, Dirksen Senate Office Building, Washington, DC.*

DEAR MR. CHAIRMAN: On behalf of the National Hemophilia Foundation, we share with you the importance of keeping intact S. 2240, the CARE Act of 1990, as reported by the Committee on Labor and Human Resources. This legislation is critical to providing comprehensive care to people with AIDS

and HIV disease without fear of discrimination or legal impediments. We are especially moved by the decision of the cosponsors to dedicate this major legislation to Ryan White, a young man with hemophilia, who fought the disease with courage and who dedicated his remaining time to dispel public ignorance and speak against discrimination against persons with this disease.

In giving our strongest support to Senate passage of S. 2240, we would be opposed to crippling floor amendments that would undermine the carefully interwoen fabric of this major legislation.

We look forward to working with you in the Conference Committee to ensure that comprehensive care for the hemophilia population is achieved.

Sincerely,

ALAN P. BROWNSTEIN,
*Executive Director.*

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, will the Senator from Massachusetts yield some time to me?

Mr. KENNEDY. Mr. President, how much time remains?

The PRESIDING OFFICER. Senator KENNEDY has 7 minutes.

Mr. KENNEDY. I yield such time as the Senator may need.

Mr. HATCH. Mr. President, today is a banner day. In fact, the world is turned upside down because here we have one of the leading liberal Senators in the Senate arguing for States rights and here we have one of the leading conservative Senators in the Senate arguing for Federal preemption. I never thought I would see the day. It shows that we have diversity in the Senate, and that we have the ability to cut across what heretofore seemed to be rigid lines.

Mr. President, we have two amendments before us. Both amendments have a similar intent. I applaud the intent of the distinguished Senator from North Carolina. I certainly applaud the intent of both Sentor KENNEDY and myself on the second amendment. I have to say while they both have similar intent, they have differing meanings.

My distinguished colleague from North Carolina is offering an amendment to make it a Federal criminal offense to knowlingly or intentionally donate blood if such individual has AIDS. My distinguished colleague from Massachusetts requires the States to enact such laws.

I would note that the amendment of Senator KENNEDY is, if anything, more protective of a State's right to legislate as a criminal offense the contamination of the blood supply, and that is where it ought to be. While this amendment prohibits the Secretary of HHS from approving a grant to a State that fails to provide adequate criminal laws against the knowing and intentional donation of contaminated or suspect blood, it also specifies that nothing in this act shall preclude any State from making it a crime to donate blood on any basis that the State shall choose. For example, one State may decide that certain reckless or even grassly negligent behavior is criminally wrong and should be remedied. Even though that conduct will not cause the Secretary to refuse a grant, nothing in the act, as amended by the Kennedy-Hatch amendment, will affect the State's right to punish that conduct.

I note that nothing in the Helms amendment would provide such broad protection. I do not want our blood supply contaminated, and I want strong laws against those who would intentionally harm our blood supply. I am going to support the Kennedy-Hatch amendment because it will strengthen State efforts to arrest and convict those who intentionally donate infected blood.

In addition, I believe we must do more to inspect our current blood supply. I will propose an amendment, as Senator KENNEDY has indicated, to increase funding and manpower at the Food and Drug Administration to do such inspections. We must ensure that we take every step to protect the Nation's blood supply. The real issue is inspection of the blood supply. And the real issue is to let us allow the States to do that which they should do, and the Kennedy-Hatch amendment gives them plenty of flexibility to do tough things against those who knowingly or intentionally sell blood that is contaminated with AIDS.

Mr. President, we reserve the remainder of our time.

Let me just say I hope that our colleagues will vote for this second amendment. Even though the intent of the distinguished Senator from North Carolina is a good intent, and even though his amendment would normally be a good approach to this, the Kennedy-Hatch amendment is the better approach to solving the problem. It gives the power where it ought to be, and gives the flexibility where it ought to be; with the States.

Mr. KENNEDY. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Massachusetts has 3 minutes and 10 seconds.

Mr. KENNEDY. I yield myself the remainder of the time.

Mr. President, I just want to add one additional thought to the presentation that was made earlier; that is, if a person who knows that he or she is infected intentionally donates blood and knows of the risk of transmitting the AIDS virus, that conduct can be prosecuted under criminal laws banning murder, aggravated assault, and reckless endangerment. All States have adequate laws to carry out prosecutions of this type at the present time.

Mr. President, I am prepared to yield the remainder of our time on this amendment.

Mr. HELMS. Mr. President, I wonder if I might have 3 or 4 minutes off the bill. I have a few more things to say.

The PRESIDING OFFICER. there is no time off the bill. There is 1 minute left.

Mr. KENNEDY. Mr. President, I ask unanimous consent that Senator HELMS be able to proceed for 5 minutes more.

The PRESIDING OFFICER. Is there objection? Hearing no objection, it is so ordered.

The Senator is recognized for 5 minutes.

Mr. HELMS. Mr. President, Lewis Carroll wrote a fairy tale where Humpty-Dumpty said, "When I use a word it means precisely what I intend it to mean; nothing more, nothing less."

I thought I heard the words from the beginning of the debate on this bill that this is a national crisis being addressed by the Federal Congress, specifically the U.S. Senate. Now all of a sudden the people who are not noted for believing in States rights say let us let the States do it, when 30 States have not done it and are not going to do it, probably.

Mr. President, I do not know where anybody gets the idea that the Kennedy-Hatch amendment—and that is an odd couple—I do not know where they get the idea that the No. 2 amendment in line will be more protective of future Ryan Whites than the Helms amendment.

I am not a member of the State legislature of any State, and neither is Senator HATCH nor Senator KENNEDY.

We are addressing what has been described by the authors of the bill as a national crisis. Furthermore, with the crossing of State lines, there is nothing to prevent an individual with tainted blood from crossing the State line to give it. He can go into a State where there is no law, or his blood sent across State lines.

As Senators KENNEDY and HATCH did on yesterday, let me now refer again to the monthly report by the Centers for Disease Control. It is entitled, "HIV/AIDS Surveillance Report."

The Centers for Disease Control report 3,040 cases of AIDS due to contaminated blood. But in the fine print, there is an interesting footnote. The CDC states that six transfusion recipients and one tissue recipient received tainted blood that had already been screened for HIV antibody.

As I stated earlier, cases have been prosecuted in Oklahoma and South Carolina. There are people who will continue to threaten the safety of the American people. With my amendment, but not with the Kennedy-

Hatch amendment, we put the word out on the streets that if you know you have AIDS and you put the national blood supply at risk, you go to jail. We will take you off the street, and you will no longer be a threat to society. The Kennedy-Hatch amendment does no such thing.

Mr. President, I suppose the Senators who have not heard the debate will come in and vote along the party lines, and that is all right with me. I have done the best I can to try to protect children who may be tomorrow's Ryan Whites. My amendment will do that. The Kennedy-Hatch amendment will not do that.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HELMS. I yield the floor.

The PRESIDING OFFICER. The Senator from Massachusetts has 2 minutes 28 seconds remaining.

Mr. KENNEDY. Mr. President, I am prepared to yield back the time to be able to lay down our amendment.

The PRESIDING OFFICER. The time is yielded back. The Senator from Massachusetts is recognized pursuant to the prior order of the Chair.

AMENDMENT NO. 1627

(Purpose: To condition the receipt of grants on the provision of assurances by State officials that State laws are adequate to protected donated blood)

Mr. KENNEDY. Mr. President, I send an amendment to the desk on behalf of myself and Senator HATCH and ask for its immediate consideration.

The PRESIDING OFFICER. Under the previous order, the Helms amendment is laid aside. At this point, the clerk will report the Kennedy-Hatch amendment.

The assistant legislative clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY], for himself and Mr. HATCH, proposed an amendment numbered 1627.

Mr. KENNEDY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following new subsection:

SEC. . REQUIREMENT OF STATE LAWS PROTECTING DONATIONS OF BLOOD.

The Secretary of Health and Human Services shall not make a grant to a State under this Act, or an amendment made by this Act, unless the Secretary determines that the criminal laws of the State are adequate to prosecute any indivudal who knowingly and intentionally donates, or knowingly and intentionally attempts to donate, blood, blood products, semen, tissues, organs, or other bodily fluids if such individual—

(1) has been diagnosed on the basis of laboratory evidence as infected with human immunodeficiency virus; and

(2) has been informed that he or she is infected with the human immunodeficiency virus and has knowledge of the risk of transmission of such virus, through donated blood, blood products, semen, tissues organs, or other bodily fluids.

Nothing in this Act shall preclude any State from making it a crime to donate, knowingly and intentionally donate, or knowingly and intentionally attempt to donate, blood, blood products, semen tissues, organs, or other bodily fluids by (1) an individual who, on or after January 1, 1977, is or has been a user of any intravenous drug, the sale, distribution, or use of which is prohibited under Federal or State law after the time the individual injected the drug or; (2) an individual who has engaged in prostitution on or after Janaury 1, 1977.

Mr. KENNEDY. Mr. President, just to address the concluding remarks of the Senator from North Carolina, the fact is that we are facing a national crisis on the delivery and the provisions of health services to deal with the HIV virus, and that is what this legislation is all about, making a national commitment, a national plan to try and deal with something that has hit our population with enormous speed and tragic and sad results.

We have a proposal for financing research, and now we have a proposal for services. I am sure that services need to be upgraded. That is the reason we want to have a national program on that. Historically, we have not relied on the FBI to be involved in every kind of implementation of every kind of law that is passed here in Congress. We find that we have relied upon local and State, as well as Federal, cooperation to try and deal with measures that have been introduced. That is very clearly involved in this legislation. Any preliminary reading of it would demonstrate that, Mr. President.

Very clearly, what our amendment does is say that States are going to have laws in place to be able to prosecute those individuals who test positive for HIV, and who are involved in donating blood to the various blood supplies. So we are leaving it up to the States to be able to develop adequate laws.

In our program, there is nothing that precludes the States from developing other kinds of protections in terms of blood supply. We leave that up to the States again.

The interesting fact is that the CDC, which has been concerned about the safety and the security of the blood supply, has never suggested the kind of Federal intervention that is suggested in the Helms amendment. Those organizations which historically have been committed to a safe blood supply oppose it, because they really feel that we are going to endanger the ability to be able to get blood; the experts' concern is that we are going to have individuals who, if they do not know about this prohibition, will lie in terms of their own kind of contacts or history, and thus constitute a greater risk to the blood supply.

Mr. President, we think that those kinds of issues and questions should be resolved at the State level. We make it very clear with regard to the intentional involvement of someone who does test positive and does contribute to the blood supply that they will be able to be prosecuted.

But as I illustrated before, there are instances in which people could have had contact with intravenous drug use 10 or 12 years before and are now completely reformed, and have rare blood, and a member of their family needs that transfusion. But if that person goes in there and gives blood, off they go to jail for 10 years.

So, Mr. President, I hope that the proposal we have advanced, Senator HATCH and I, is in response, basically, to the kinds of recommendations and suggestions that have been made by the Red Cross and by the other blood bank organizations that all of us are dependent upon in this country to provide the resources for blood donations.

They do not always have the answers to all these questions, but nonetheless, I think we should follow their guidance in this area. Moreover, the recommendations by the National Commission on AIDS indicate that the kind of approach that we have suggested, both in terms of this amendment and what we are committed to providing for in a follow-on amendment, to both increase the number of FDA inspectors of our blood supply by some 150 and increase the authorization by $1.5 million to permit the FDA to develop and hire those individuals. This is really the way to provide for the safety of the American blood supply.

So, Mr. President, I hope that the Senate will reject the amendment of the Senator from North Carolina and support our amendment.

Mr. HATCH. Mr. President, will the Senator yield a couple minutes to me?

Mr. KENNEDY. I yield such time as the Senator may desire.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, the Senator from Massachusetts has made a very good case. The fact of the matter is the real question here is inspection of the blood supply. That is the real question. That is what we really ought to be trying to do. By giving the States flexibility to get tough in the areas where they should get tough and have flexibility in the areas where they need flexibility, the Kennedy-Hatch amendment does make sense. This is in contrast to what the distinguished Senator from North Carolina would do, even if it is well-intentioned, and that is to lay down hard rigid Federal criminal laws preempting the State laws in an area that is continually changing.

The real issue is, are we going to have contaminated blood, and the answer is inspection. It is not whether

or not we enforce tough criminal laws. That is going to happen regardless, because the States are going to get tough on those people who knowingly, willfully, and intentionally donate blood knowing they are infected with the AIDS virus. Some people, however, give contaminated blood not knowing they are HIV-infected. That is why inspection is the only meaningful answer.

This amendment is the type of an amendment that will lead to inspection. I intend to offer an amendment later that will give us the personnel and the people to do that inspection so that we have no more tragic cases such as Elizabeth Glaser, Ryan White, and my friend down in Texas—circumstances were they get contaminated blood and, through no fault of their own, they become infected with AIDS.

This is an intelligent, decent, reasonable, and really acceptable way to solve this problem. It has flexibility built in, and nobody in this body believes that the States are not going to be tough on those who knowingly and willfully donate contaminated blood. They ought to be tough.

Let us at last give the States flexibility as the Kennedy-Hatch amendment does. We are not trying to have a political contest here. This is not a political issue. This is compassionate and bipartisan issue and it should be a consensus issue. We think Kennedy-Hatch makes this a consensus issue, and, most important, it preserves the principle of federalism, the rights of the States to make their own determinations.

I thank the distinguished Senator for his work on this. I believe it is the right way to go. As I mentioned before, we will add an additional Kennedy-Hatch amendment so that we will have the necessary personnel to make sure we do not have contaminated blood in our Nation's blood supply, something that you cannot be absolutely sure of today because we do not have the necessary resources for adequate inspection.

I do not want my words to freighten people. In most instances the blood supply is just fine, but there are some isolated cases—they have been cited—where people have gotten AIDS through contaminated blood. And the contaminated blood supply was there because the inspection process was not in existence or because inspections were too infrequent.

Mr. President, I recommend that Senators vote down the Helms amendment, as well-intentioned as it is, because it is too rigid and it flies in the face of the principles of federalism. Immediately thereafter I recommend a vote for the Kennedy-Hatch amendment, which I think has all the flexibility that is needed to compassionately, reasonably, legally, and practically handle this problem.

I reseve the remainder of my time.

The PRESIDING OFFICER (Mr. SARBANES). Who yields time?

The Chair recognizes the Senator from North Carolina, who has 15 minutes under the agreement.

Mr. HELMS. Fifteen minutes?

The PRESIDING OFFICER. Fifteen minutes.

Mr. HELMS. I thank the Chair.

Mr. President, I am not going to take nearly that long. I appreciate the several references to my being well-intentioned. I will say the same thing about the authors of the Kennedy-Hatch amendment. They are well-intentioned, but they are wrong. They are sincere, but they are sincerely wrong.

All of a sudden there is this outburst of support for States' rights. This is a national crisis, and they have described it as a national crisis. Some think it is not. But I tell you any case of tainted blood is a crisis for the child who gets it or anybody else. It was a crisis, it was a tragedy, for Ryan White.

I say to the Senate that the Kennedy-Hatch amendment will not do the job. They may prevail with the vote, but Senators will regret having voted for it. They will not regret it today, but I content that down the line they will.

I have just had faxed up to me from Raleigh a letter from the chairman of the Governor's Committee on Drugs and AIDS, Mr. Bill Peace. I am not going to read it all because it will not be necessary, but in a moment I will ask unanimous consent that it be made a part of the RECORD at the conclusion of my remarks.

Mr. Peace, I reiterate, was chairman of the Governor's Committee on Drugs and AIDS. Incidentally, he is a black citizen, and a fine black citizen, of North Carolina. He says:

> The spread of AIDS in North Carolina continues to be quite small in actual numbers of reported cases. The disease continues to pose no appreciable health threat—

And he is talking about statistically.—

> No appreciable health threat to the State's minority communities. Only 23 women of all races, not found in the two major at-risk groups: IV drug users and/or sex partners with the disease, have to date contracted AIDS. To date, only 18 babies have been born with the disease, 15 had a parent with AIDS or HIV; and there have been three hemophiliacs born with the disease.

Mr. President, I think that I will not proceed further reading from the letter from Mr. Peace because one paragraph would require that I read the next one and by that time all time would have been exhausted.

So, I do ask unanimous consent that the full text of the letter from Mr. Peace be printed in the RECORD at the conclusion of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Senator JESSE HELMS,
*U.S. Senate, Washington, DC.*

DEAR SENATOR HELMS: Let me apologize for the length of this letter. It is composed of a report that I just completed, as Chairman of the Drugs and AIDS Committee/NC Governor's Council of Minority Executives.

On May 25, 1989, I submitted a report to the Council, "The Stats on Aids in North Carolina: 1980 through April 27, 1989". I summed the subject up as follows:

"Conclusions: If there is a so called AIDS Epidemic in North Carolina, the stats do not reflect it. With respect to the state's minority communities, the stats reveal only isolated cases of AIDS, appreciably quite small in numbers (399). As of this date through 1992, this will remain the case even though the numbers may increase."

Further investigation led me to discover that the hype about the AIDS epidemic was being fueled by money: an absolutely, incredible amount of money. According to the Health Care Financing Administration, total AIDS spending in America is projected to reach a whopping 12 billion dollars by FY 1992. Incredibly, it all began in 1982 with a portly $6 million allocation of federal dollars. After that the money for AIDS spending exploded.

Please note, that national AIDS spending has created an "AIDS industry". Led by AIDS advocacy groups and the nation's news media, the extent of the disease within the country's population as a whole has been sensationalized. This industry has fabricated "predictions" of Apocalyptic proportions, year after year for the spread of the disease; none of which have materialized to date.

Attached are copies of the April 27, 1989, and April 20, 1990 "Surveillance Reports" for your comparisons for the calendar year under security. There were 378 new cases of AIDS reported in North Carolina. The latest report shows the disease at 1289—up some 469 cases. However, 91 of them were reported late and cover past years. Of the 1289 cases to date, 645 are black, 17 are Hispanic and 9 are native Americans.

I am also attaching, for your very close examination, a statistical chart which I prepared based on the two Surveillance Reports currently under committee's security. The following conclusions are based on that security.

CONCLUSIONS

The spread of AIDS in North Carolina continues to be quite small in actual numbers of reported cases. The disease continues to pose no appreciable health threat to the state's minority communities. Only 23 women of all races, not found in the two major at-risk groups: IV drug users and/or sex partners with the disease, have to date contracted AIDS. To date, only 18 babies have been born with the disease, 15 had a parent with AIDS or HIV; and there have been 3 Hemophilias born with the disease.

This report is not intended to minimize the potential health threat that any life threatening disease can have on the general public, but rather is intended to put AIDS in perspective. Very few people are actually contracting the disease. True, there were noticeable increases in the number of female cases of AIDS from 1989 to 1990: 58 new cases. However, 50 of those cases were women who were in the two major female at-risk groups. Only 8 new cases were reported among females not at risk. Thus, for the not at risk female, Heterosexual population of North Carolina, AIDS is not a health

threat. AIDS in this population group can be construed as threat only by way of accidental exposure; which has thus far proved to be slight.

With respect to the state's male Heterosexual population, 85% of the 1128 cases of AIDS reported have been confined to three primary at-risk groups: Homosexuals or bisexuals, IV drug users, and/or combination of both. Only 37 cases of the disease in not at-risk males contracted it as a result of Heterosexual contact. The report shows that 162 other males contracted the disease through accidental contact.

Is the disease being spread into the state's Heterosexual population is the question that most of us are concerned about? Not according to the stats: 44 women and 37 men listed Heterosexual contact as the cause of the disease. That comes to a total 81 people out of Heterosexual population in North Carolina of over 6,000,000 people. After more than a decade of "the AIDS epidemic" and only 81 reported cases of the disease in a non-at risk population group as large as the aforementioned. These 81 AIDS cases must be regarded as "fluke" cases of the disease within the state's not at risk, Heterosexual population.

We are also concerned about the matter of babies in our state being born with AIDS. Is AIDS a health threat to North Carolina's newborn infants? A recent study, January 30, 1989, Study Tracks HIV Infection Among N.C. Women "A new study indicated that 12.4 of every 10,000 North Carolina women giving birth are infected with the AIDS virus." The study further on indicates that 30 to 50% of these women are going to pass the disease on to their unborn babies.

The estimated number of births in our state during 1989, was approximately 350,000. What does this figure mean in terms of the number of babies born with AIDS for the year, predicated on the study's dyer predictions?

10,000÷350,000=35x12.4 pregnant women=434 babies

30 percent of 434 babies=130.2 babies

The study is asking us to believe that by December 31, 1990, at the very least, 130.2 babies will be born with AIDS. Again, the numbers on the ground, 18 babies to date have been born with AIDS; this over an eleven year period. These tiny numbers simply do not support the study's predictions; no matter what the testing revealed.

Despite the study, for non-at-risk women in North Carolina, AIDS through April 20, 1990, continued to be a rare disease. As for babies born with AIDS, the disease continued to be so rare as to be labeled an "exocit" one in our state. AIDS posed little or no consequential health threat to the state's not at risk Heterosexual population during the period covered by this report. As of this date through 1992, this will likely remain the case even though the actual numbers of reported cases of AIDS may slightly increase, mainly within the three at-risk groups."

Is AIDS a health threat to the state's not at risk minority communities? Absolutely not. That the majority of the cases to date in the three major at risk groups are black becomes insignificant. Most of North Carolina's majority population is not gay/bisexual, IV drug users and/or a combination of same. For those few blacks, Hispanics, and native Americans who are, AIDS represents a definite health threat. However, the point is that AIDS represents such a threat to everybody, regardless of race, who falls within the three major at risk groups. Everyone already knew that prior to setting up my Drugs and AIDS Committee. The concern was that AIDS has spread into the Heterosexual population, and was at epidemic proportions within the state's black community. This has proved not to be the case. In my view, the question now becomes, how did such an assertion get started.

The North Carolina AIDS Control Program: This program is a state agency funded with both federal and state dollars. Its purpose is to inform the public about the danger of AIDS. It also monitors and tracks the disease, coordinates and funnels grants to various community action AIDS groups around the state. This it does. However, it also serves as an AIDS "advocacy group." Therein lies the problem.

Advocacy groups, no matter what it is they are advocating for or against all begin by exaggerating the extent of the problem; inflating the numbers by way of distorting "percentages" rather than presenting actual on the ground reported cases of AIDS, and followed by "the sky is falling" predictions for everyone unless their grants are funded. That is the nature of the beast. Advocacy groups just don't squeak, they scream. Grantees also become advocacy groups as well. Thus, everyone involved in and/or is receiving grant funds due to the problem becomes an advocacy group; including the likes of Duke University, North Carolina State University and University of North Carolina, the state's health care systems, research community, etc. No "AIDS epidemic," no more money; thus the continuation of the alarm about the AIDS epidemic in North Carolina spearheaded by the state's AIDS Control Program. With an estimated $33,000,000 in AIDS dollars spent in North Carolina during FY 1989, the cry about the AIDS epidemic will be heard all during 1990. The fact that just a hand full of people will contract the disease, will not mean a thing.

Why black folks and the AIDS epidemic? Why sick the disease on us? Start telling the whole country that AIDS is now primarily a disease that disproportionately effects blacks? Listen to the words taken from State AIDS Control Program's flyer on the study.

"Approximately twenty-three percent of the state's population is black, but 49 percent of its AIDS reported cases are black. Race is associated with certain socioeconomic conditions and behavior, such as drugs and unprotected sexual activity with other high risk for infection, which increases the likelihood of getting the AIDS virus, said Dr. Adaora Adimora, Assistant Chief for Science of the Department's (North Carolina) Communicable Disease Section."

In other words, black folks by nature engage in reprobate behavior more so than do whites. Everybody white in America believes and swears by that nonsense. White folks have demonstrated a history of excepting on face value any thing anyone says that is negative about black people. As we all know, you can get away with murder in this country, if you are white. If you are a white man, you want to murder your wife, mother, sister, anyone white and need enough time to make a clean get away, just say, "A black man did it." By the time somebody white stops and thinks about it, the guy would have enough time to go around the world twice, in a sail boat. Just ask anyone black from Boston, Mass.

What is the point, AIDS is a "dirty" disease. The gay community has long been offended that it was in effect tagged as "their disease." Therefore the attempt to claim that AIDS was spreading into the Heterosexual population. But again, why tag black folks with the disease? Money, that $12 billion dollars that is in the pipe line. That is a lot of money for a disease that very few people are actually getting. The Homosexual community is now practicing safe sex and is claim that they are not getting it anymore. "Shooting up" isn't the drug problem in this country; it's cocaine. However, you can't get AIDS from just snorting or smoking it. There are not enough "junkies" in America to warrant $12 billion dollar worth of concern.

White folks in the general public are not getting AIDS. If you are in the AIDS money chain, you know that with that with billions and billions of "unquestioned" dollars flowing in, at some point somebody is going to do a head count: a white head count. When they do, that will be the end of the so called AIDS epidemic and the money facet will get shut off. Well, somebody is going to have to come down with the disease in large numbers in order to prevent that white head count from happening. No problem, the AIDS advocacy groups then decided to do this:

"Let's all tell everybody, in the whole country, that AIDS is spreading in the black American community like wild fire. Since its a "known fact", that because of race, blacks engage in the type of behavior that brings on AIDS; therefore it must be true. And because black folks will be the ones now tagged with the disease, No ONE WHITE WILL BOTHER TO CHECK and see if it is, in point of fact, true".

That ladies and gentlemen, is how and why black America has been tagged with the "AIDS epidemic"; to keep the AIDS money flowing and to prevent anybody from doing a white Hetoresexual head count of the disease. It's working just like clock work. Only North Carolina, U.S. Senator, Helms has bothered to take a head count and he has found the exact same thing that I discovered. Folks who don't engage in Homosexuals/bisexual acts or shoot drugs are not at risk of contracting AIDS.

RECOMMENDATIONS

1. That the report be forwarded to the Governor with a request that it be made public upon his approval.

2. That no state funds be appropriated for further AIDS spending for FY 1990.

3. That the NC AIDS Control Program be ordered to publicly retract its claims that there is disease known as AIDS has reached epidemic proportions in North Carolina; retract its claims that AIDS is spreading into the not at-risk population of our state; and retract its claims that the state's not at-risk black community is being disproportionately effected by this disease.

4. That the NC AIDS Control Program be ordered to stop serving as an AIDS advocacy group; that it act in a more responsible manner in presenting the extent of the threat of the disease to the state's not at-risk population. That it get out of the "AIDS predicting" business, period.

5. That is develop reasonable "number of ceases" on the disease upon which to base, what constitute cases of AIDS at epidemic levels.

POSTSCRIPT

People do get AIDS in North Carolina, mainly people in the three major at-risk groups' but on a whole not many of them are contracting the disease either. In our state, as a disease, AIDS has never been nor is it today, within the general population of

North Carolina, a real health threat. AIDS continues to be what it has always been: a disease that predominately effect Homosexuals, bisexuals and IV Drugs users. And even so, AIDS is not readily contracted.

So, how do you get AIDS? I don't think anyone really knows because the disease is so uncommon within the Nation's population as whole. It seems to me that homosexual activity and shooting drugs are "links", but that's it. We know that lung cancer is "linked" to cigarette smoking, but for all of these many years nobody has yet to prove that smoking causes lung cancer. I am 54 years old, I have been smoking cigarettes for 42 years. To date, I have yet to come down with lung cancer, and there are millions of Americans in my age groups, who smoke and haven't got it yet, either. My dad smoked for almost 70 years. He died at age 82 of prostrate cancer.

My point is this with respect to AIDS; a lot of people, scores of millions of people, who smoke don't get lung cancer. And millions of other people, who engage in homosexual behavior and people who shoot drugs do not get AIDS. Like in the case of cigarette smoking, nobody really knows WHY?

Enclosed are copies of all of the documentation that I used in preparing my report to the council.

Sincerely yours,

WILLIAM H. PEACE III.

Mr. HELMS. I reserve the remainder of my time.

Mr. LEVIN. Mr. President, I think it ought to be a crime for individuals to donate or sell blood if they know that they have been infected with the AIDS virus.

However, the Helms amendment goes far beyond that point and is so extreme that it would under some circumstances make it a criminal offense for a parent who was not infected with the AIDS virus to donate blood to save his or her child's life. For example, take the case of an individual who in 1979 was a drug addict when 20 years old. Assume that individual successfully underwent drug rehabilitation in 1980 and later got married and had a child. Finally, assume that this parent's child suffered from an life-threatening illness in 1990 which required a blood transfusion for the child to survive and for which there was no other available donor or for which the blood-type involved was very rare. The Helms amendment would make this parent a criminal for trying to give the child a life saving blood transfusion, even though the parent had been tested for the virus and there is no evidence that the parent was infected with the AIDS virus and even though it had been more than a decade since the parent had used illegal drugs.

I agree that we must do what we can to effectively protect our Nation's blood supply. I believe that the Kennedy-Hatch amendment which was adopted by the Senate and which I supported will establish a way for this goal to be accomplished without running the risk of the tragic consequences that could arise if the Helms amendment were enacted.

The PRESIDING OFFICER. The Senator from North Carolina has 11 minutes and 20 seconds remaining, and the Senator from Massachusetts has 6 minutes and 27 seconds remaining.

Mr. HELMS. Mr. President, I am glad to yield back the remainder of my time.

Mr. KENNEDY. I am glad to yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

The question now occurs on the Helms amendment on which the yeas and nays have been ordered. The yeas and nays have also been ordered on the Hatch-Kennedy amendment, which will follow immediately after the Helms amendment for voting.

VOTE ON AMENDMENT NO. 1626

The PRESIDING OFFICER. The question is on agreeing to the Helms amendment. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Pennsylvania [Mr. HEINZ] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 47, nays 52, as follows:

[Rollcall Vote No. 95 Leg.]

YEAS—47

NOT VOTING—1

Heinz

So the amendment (No. 1626) was rejected.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOTE ON AMENDMENT NO. 1627

The PRESIDING OFFICER. The question now is on agreeing to the Kennedy-Hatch amendment, No. 1627.

The yeas and nays on the amendment have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Pennsylvania [Mr. HEINZ] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 99, nays 0, as follows:

[Rollcall Vote No. 96 Leg.]

YEAS—99

NAYS—0

NOT VOTING—1

Heinz

So the amendment (No. 1627) was agreed to.

Mr. HATCH. Mr. President, I move to reconsider the vote.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The distinguished Republican leader is recognized.

Mr. DOLE. Mr. President, there is no question that there is a need to develop and sustain vital health and social service support to persons who are infected with [HIV] human immunodeficiency virus and for persons with the acquired immune deficiency

syndrome [AIDS]. The impact of the AIDS epidemic on our hospitals, nursing-subacute care facilities, clinics and community health centers is extraordinary. This impact will require heroic measures to overcome.

According to the National Commission on Acquired Immune Deficiency Syndrome, the epidemic of the 1990's will be far worse than what we have seen thus far.

I wholeheartedly agree with President Bush when he says:

In this Nation, in this decade, there is only one way to deal with an individual who is sick * * * with dignity, compassion, care, confidentiality and without discrimination.

This bill attempts to assist States in doing just that.

As noted in an article in the Atlanta Constitution:

The AIDS epidemic has slammed into the Nation's biggest cities, causing as much economic damage as any hurricane. * * *

This is the first major bill to authorize funds to care for people who are sick with AIDS and those at risk of disease with HIV infection. Funds are urgently needed to be targeted to avert collapse of our health care system and to help the sick and alleviate suffering.

This bill directs Federal support to the 13 metropolitan areas hardest hit by the epidemic. But it also appropriately notes the growing problem of rural communities. The local consortium of services envisioned by this bill should facilitate access to services in both rural and urban areas.

The bipartisan support for the bill in the Congress coupled with the support of more than 100 national organizations is a testament to the seriousness of the problem facing many citizens of this Nation.

Mr. President, it is clear that our current health care system is struggling to deal with the needs of people with HIV infection and their families. We have made some strides by directing resources toward education, prevention and research but additional attention to the complex needs of these families is essential. This bill provides for an array of services including respite care, home care, day care and psychosocial services which seek to decrease the number of hospitalizations of adults and children with AIDS.

In conclusion, Mr. President, I think it is fair to say, this bill is by no means perfect. It, unfortuantely, builds on to a health care delivery system that is already fragmented and not the most effective in delivering the essential health services for an increasingly uninsured population. And we have to recognize that we are faced with a severe budget deficit while the health industry is consuming greater and greater financial resources. We have to be cautious in what we do. Our willingness to scale back some other program while attending to this emergency is a challenge we all must face.

AMENDMENT NO. 1628

(Purpose: To provide resources to the Food and Drug Administration to assure a safe supply of blood and blood products.)

Mr. HATCH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Utah [Mr. HATCH], for himself and Mr. KENNEDY, proposes an amendment numbered 1628.

Mr. HATCH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place insert the following:

There is authorized an additional 150 full time equivalent positions to the Food and Drug Administration. The positions established by this authority are to be used for the inspection of blood banks and producers of blood products.

There is also authorized an appropriation of $1,500,000 to carry out this activity in fiscal year 1991 and such sums as may be necessary through fiscal year 1995.

Mr. HATCH. Mr. President, I filed this amendment on behalf of the distinguished Senator from Massachusetts and myself.

I have to say that the Senator from North Carolina has expressed his concern about the Nation's public health during the AIDS crisis. One of the major concerns that health officials have is the safety of the Nation's blood supply. We looked at that issue in the last debate, and it has been good that we did.

There are over 2,400 institutions throughout this country that process blood and blood products. We know that there is some risk associated with any kind of blood donation. However, through the efforts of professional and voluntary associations and the Food and Drug Administration, our blood supply is one of the safest in the world today. However, with the AIDS epidemic, we have found that we do not have the adequate resources to perform frequent enough inspections of the blood banks and blood product manufacturers.

The FDA needs additional resources for this effort. The FDA needs to assure that those who process blood supplies and blood products are technically proficient. The FDA needs to assure that recordkeeping is adequate to keep tainted blood and blood products away from patients.

We frequently hear about the risks to hemophiliacs. Hemophiliacs rely on a safe blood supply. Patients undergoing surgery frequently need additional blood to survive. Surgical patients should not be put at additional risks the way they have been in the past.

The way to avoid this is to increase the resources of the FDA so that the inspection process can be enhanced, and all fears regarding this country's blood supply can be allayed.

Mr. President, this amendment addresses this very shortage of personnel at the FDA.

So I encourage my colleagues to join me in support of the amendment. Specifically, this amendment increases the number of full-time inspectors by 150 and authorizes $1.5 million for such efforts.

Mr. KENNEDY. Mr. President, I will not take the time of the Senate at this moment. I indicated in the debate earlier this afternoon that quite frankly in the minds of most health professionals, the addition of some 150 inspectors who are carefully trained and have the support of the FDA will do more than either one of those previous amendments in terms of assuring the safety of the blood supply.

The Senate has made its decision in supporting our amendment, the Kennedy-Hatch amendment, which I think responds to the principal kinds of outrageous behavior that all of us want to prohibit, ensuring that the States are going to have adequate enforcement, or criminal laws, hopefully, with adequate enforcement to protect the blood supply.

But this amendment will make a very significant and important contribution. I hope the Senate will accept it.

The PRESIDING OFFICER. Is there further debate on the amendment?

If there be no further debate, the question is on agreeing to the amendment of the Senator from Utah.

The amendment (No. 1628) was agreed to.

Mr. HATCH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DODD. Mr. President, I enthusiastically support the Comprehensive AIDS Resource Emergency Act of 1990.

First, I would like to congratulate the chairman and ranking member of the Labor and Human Resources Committee, Senator KENNEDY and Senator HATCH, for their truly outstanding efforts in bringing this emergency legislation to the floor. They worked tirelessly in a bipartisan fashion to secure 64 cosponsors and the support of countless national organizations for this legislation. I am proud to be an original cosponsor of this important legislation.

I think the CARE bill is going to go a great way toward providing needed resources to combat the AIDS crisis. I

am very proud to be a Member of this body today, Mr. President, considering the strong votes that this measure is receiving on both sides of the aisle to provide needed resources for this particular problem.

Mr. President, I also want to pay tribute to the young man to whom this legislation is dedicated—Ryan White. Ryan died on April 8, 1990, after a 6-year battle against AIDS.

Beginning at the age of 13, Ryan valiantly fought not only the HIV virus itself but also fears about AIDS that were based on ignorance and senseless discrimination against people with AIDS and HIV disease. Ryan spent the last 6 years of his life not only fighting for his life, but also fighting for the lives of all people living with AIDS. Although we have now lost Ryan, we cannot lose sight of his courage and his hope. As Ryan himself said, we must fight the disease of AIDS and not the people who have it.

Mr. President, the AIDS epidemic has slammed into the Nation's largest cities, causing as much economic damage as any major hurricane or tornado. The AIDS crisis is an expanding emergency and each year, the sobering figures move inexorably higher.

As of March 31, 1990, it is estimated that about 1 million Americans are infected with the virus that causes AIDS. More than 128,000 cases of full-blown AIDS have been reported, and more than 78,000 people have died. By the end of this year, public health experts project that another 50,000 cases will be diagnosed. By next year AIDS will be the leading cause of death for Americans between the ages of 25 and 44.

One of the most tragic and disturbing developments is that there are almost 2,200 reported cases of children with AIDS. This number does not include children who are HIV infected. And it is estimated that for every child reported to have AIDS, there are 2 to 10 other unidentified cases. It is estimated that nearly 3,500 children will have AIDS by 1991 and approximately 20,000 will be HIV infected.

In my own State of Connecticut, every week, two children are born to HIV-infected mothers. Connecticut now ranks first in the Nation in the percentage of AIDS cases among children. The percentage of Connecticut women infected with the AIDS virus is double the national average.

This legislation and the money that will be provided by it will provide some needed resources in my home State of Connecticut as well as nationally for all of those affected with this disease.

The toll on individuals is, of course, indescribable. But there is a public health impact, too. Because the disease has struck so unevenly, just 4 percent of the Nation's hospitals are treating more than half the people with AIDS.

The burden of AIDS care threatens to overwhelm city hospitals, severely limiting their ability to help other seriously ill people. In addition, the low incomes of many AIDS patients and the high cost of their care threatens to drive public hospitals into insolvency.

As taxing as the epidemic has been to the public health system, the worst is yet to come. The first 100,000 cases of AIDS occurred over 9 years. The next 100,000 cases are expected to require only 15 months.

This legislation recognizes the urgent need we are confronted with. First, it would direct $300 million in emergency relief to the 13 cities with the highest number of AIDS cases. The money would pay for both hospital and outpatient care.

Next, the measure would distribute another $300 million to States to develop comprehensive programs to care for people with AIDS. One of the uses for the money might be to defray the high cost of drugs like AZT for people who cannot afford them.

The principles that underlie this bill are clear: Help those suffering from this devastating disease who have neither resources nor insurance; provide early intervention that can delay the onset of this disease; promote the development of alternatives to expensive hospital care clinics, home health services, and hospices; and save the big city hospitals that can no longer cope with the crisis unaided.

The CARE bill promotes aggressive management of the AIDS crisis rather than reactive management. Continued neglect of the need only compounds devastating disease with financial waste.

This legislation will allow us to follow the advice of President Bush when he said:

> In this Nation, there is only one way to deal with an individual who is sick—with dignity, compassion and care—with confidentiality, and without discrimination.

The CARE bill represents bold action to alleviate the tremendous suffering brought on by AIDS and to prevent further tragedy. I urge all of my colleagues in the Senate to support the enactment of this important legislation.

Mr. KENNEDY. Mr. President, I thank the Senator from Connecticut. As we all know, he is head of the children's caucus. No issue that involves the very young and most vulnerable escapes his very careful attention.

We appreciate all the work he has done in the development—particularly in those aspects—of the legislation. I thank him.

## THE REMARKS OF VICE PRESIDENT QUAYLE

Mr. MITCHELL. Mr. President, yesterday speaking at a cermony honoring National Police Memorial Day, Vice President QUAYLE criticized the Congress for failing to act on the President's crime legislation. He said that Congress has "sat on the package" for the past year, and "has done nothing at all during that time."

The Vice President's remarks were incomplete, inaccurate, and highly misleading.

Last June, President Bush submitted an anticrime proposal to Congress. Shortly thereafter, Drug Director William Bennett asked the chairman of the Judiciary Committee, Senator BIDEN, not to introduce anticrime/antidrug legislation until after the President's September drug strategy was released. Senator BIDEN consented. Meanwhile, the Senate Judiciary Committee reported an assault weapons bill, S. 747.

After the President's drug strategy was unveiled in September, the Judiciary Committee reported a death penalty bill, S. 32, and the full Senate considered—and went beyond—the funding elements of the President's request. Due in large part to the efforts of the President pro tem, Senator BYRD, moneys to fight crime were added to the transportation appropriations bill. The appropriation gave the President every penny he requested in his crime package—every FBI agent, every DEA agent, every Customs agent, every prison cell, every prosecutor and every marshall. It almost doubled the President's request for FBI drug fighters and Federal drug prosecutors. And it more than doubled the President's request for aid to State and local law enforcement.

The Senate also passed other tough anticrime legislation, S. 1711. Among other things, it would increase penalties for selling drugs to minors, authorize forfeited funds to be used to obtain guns for law enforcement officers, require drug testing for every Federal prisoner released on parole, give new power to the Attorney General to order the bulldozing of crack houses, and extend Medicaid to cover drug treatment.

What was left, Mr. President, was consideration on the Senate floor of legislation dealing with the following issues: further extension of the death penalty, habeas corpus reform, the exclusionary rule, Justice Department reorganization, international money laundering and the availability of firearms for purchase. On September 26, 1989, the Senate entered a unanimous consent agreement to take up these items before ajourning for the year. It was my intention to turn to these items the week of November 20, 1989.

When November came, Senator BIDEN was prepared to manage the legislation, and had ready for floor action a bill, S. 1970, which incorporated all six elements of the agreement. Howev-

er, on the Senate floor on November 19, 1989, I had the following exchange with the Republican leader and I quote that exchange in full because it demonstrates the inaccuracy of the Vice President's statement.

Mr. MITCHELL. Mr. President, on September 26 of this year, the Senate reached a comprehensive agreement on how to consider legislation dealing with the control of drugs and with the issue of crime and criminal sanctions and procedures. The funding portion of that proposal was sent to the President as part of the Transportation approriations bill; the several committees' legislative initiatives as well as certain of the legislative initiatives of the President's drug proposal, have been passed by both Houses and are now in conference. In addition, the House is considering the Senate's action on a bill containing several additional antidrug proposals.

The remaining portion of the agreement reached on September 26 provided that the majority leader, after consultation with the Republican leader, would determine a method for the consideration of a bill or a motion to proceed to such bill dealing with the death penalty, habeas corpus reforms, exclusionary rule, Justice Department reorganization, international money laundering, and the availability of firearms for purchase; and that this vehicle or motion to proceed to such vehicle shall occur not later than sine die adjournment.

I continued, and again I remind my colleagues I am quoting now from a statement I made on November 19, 1989. I said:

Mr. President, I had been preparing to proceed to this legislation on Monday, Tuesday, and Wednesday of this coming week. Senator Biden has told me that he is prepared to manage the legislation and has a bill that incorporates the elements of the agreement ready to introduce. However, the Republican leader asked me at the end of last week if, given the time constraints that are facing us all at this point and the need to give concentrated attention to this topic, I would mind deferring action on this legislation until just prior to the February recess. Mr. President, I have no problem agreeing to the Republican leader's proposal; I have checked with Senator Biden, and he indicated that if the joint leadership wished to defer action until February, he would accede to the request. I would ask the Republican leader if I have stated the situation as he understands it as well?

That is the end of my comments of last November 19, Mr. President.

In response to my question, the distinguished Republican leader, Senator DOLE, responded, and he said the following:

Mr. President, the majority leader is correct. I have discussed this with Senators on this side of the aisle and with officials in the administration, and they agree that it would be preferable to defer action on this important legislation until February. I believe that it needs more focused attention than time permits at this point, because, as indicated by the majority leader, we are under rather severe time constraints.

Mr. President, the above colloquy establishes two facts: First, the delay was requested by the Republican leader, and second, it followed his consultation with officials in the administration. For the Vice President to criticize Congress for delay without mentioning either of these facts is highly misleading. In an apparent effort to gain political advantage, he has omitted important and relevant facts. It is a most unfortunate way to proceed.

Following the above colloquy, the unanimous-consent agreement was modified to allow the majority leader to move to consider this legislation beginning any time on or after February 7, in consultation with the Republican leader. As Senators will recall, by February we were deeply involved in the clean air legislation—important to the administration as well as ourselves—and, therefore, we did not act on the crime legislation at that time.

On April 2, 1990, I had another colloquy with the Republican leader about the appropriate time to take up the crime bill. It was my view, and the view of the Republican leader, that there was not sufficient time before the Easter recess to take up the crime legislation, and so I suggested that we turn to the legislation on or about May 21, so as to permit nearly a full week's consideration of it before the Memorial Day recess. I asked the distinguished Republican leader to comment. After noting that he had discussed the issue with the ranking Republican member of the Judiciary Committee, Senator THURMOND, the Republican leader said: "I think we would prefer to have it set aside until late May."

Mr. President, I emphasize that the Republican leader and I have never had a disagreement on the scheduling of this matter. All decisions have been mine and mine alone. I take full responsibility for them. But as the RECORD shows, they have followed full and fair consultation with the Republican leader. My disagreement is not with him; it is with the inaccurate and highly misleading statements made by the Vice President.

It is time to stop playing politics with crime. We will take up the crime bill next week, and I hope that what is said in that debate will be accurate and focus on the issues in dispute.

Mr. President, I yield the floor.

Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized.

## COMPREHENSIVE AIDS RESOURCES EMERGENCY ACT OF 1990

The Senate continued with the consideration of the bill.

Mr. HUMPHREY. Mr. President, the matter before us involves a great deal of emotion. It should, because it involves human suffering. Suffering on the part of those afflicted with AIDS, and suffering on the part of their families and friends. AIDS is a national tragedy. It is only natural that we would want to do something about it. And, even, absent this bill, we are. Of course, whatever we do, many will feel it is not enough. They will demand more be done. Under the circumstances, that is perfectly understandable.

My purpose today is to try and put things in perspective, if that is possible in an emotionally charged situation. Can we ask the question, are funds for various health programs being allocated according to medical need, or are they being allocated according to political pressure? It seems a fair question. We do not want to mix politics with medicine. But I am afraid we have. I am afraid we are allocating health funds according to which lobbying groups bring the most pressure to bear on Congress. I am afraid we are allocating health funds according to which organized groups have the most political clout in elections.

Let me cite some budget figures to illustrate the point. The White House has proposed 1991 spending of proposed $3,463,000,000 for AIDS-related expenditures—$1,245 million for research, $1,346 million for treatment, $567 million for prevention, and $305 million for income support. That is a total of $3.463 billion for AIDS programs of various kinds.

The same budget document proposes $603,185,000 for heart and vascular diseases within the National Heart, Lung, and Blood Institute. Heart disease will claim between 760,000 and 950,000 lives in 1990 alone—a figure far in excess of the 78,000 deaths from AIDS over the past 10 years. Yet we're spending only 17 percent as much on programs dealing with vascular disease as we are spending on AIDS programs.

Cancer is expected to kill 518,000 Americans this year. Yet, total funding for the National Cancer Institute, contained in the proposed budget is only $1,694,059,000.

Diabetes affects 11 million people. Approximately 36,000 of those afflicted with diabetes die each year. Yet, the budget for diabetes, endocrinology and skin diseases in the National Institute of Diabetes and Digestive and Kidney Diseases—contained on page A-702 of the President's budget—is $259,039,000.

In other words, these three diseases, which kill around 1½ million Americans each year—nearly 20 times the total AIDS fatalities over the past 10 years—collectively received nearly $1 billion less than the President had budgeted for AIDS. The bill before us would add $600,000,000 to the $3.463 billion for AIDS in 1991.

Is this rational? Is this a logical allocation of funds among the various programs dealing with major health af-

flictions? It does not seem so, if you relate the amounts to the numbers of Americans afflicted.

My second dissatisfaction with the bill is that it is unfair to the AIDS victims of my State. Based on its population, I expect that my State would spend roughlv $2,400,000 to pay for this bill, if it were fully funded. New Hampshire would almost certainly receive nothing under title I of the bill, which is directed to the 13 metropolitan areas with the highest number of AIDS cases. According to the committee, it would receive only $386,995 under title II. In other words, New Hampshire would receive only 16 cents for every dollar it paid. Little or none of the bill's funding would go to research on a cure for AIDS—money which could benefit the persons in my State suffering from AIDS.

Instead, New Hampshire would pay to fund New York's AIDS crisis—and San Francisco's. Even the committee concedes that the total cost of this epidemic will be at least $13 billion per year. This means that, if New Hampshire begins to undertake to solve New York's AIDS crisis, it will be more than a camel's nose under the tent.

New Hampshire has the resources to deal with its modest health crisis. But, even by sending 84 cents of every dollar to other parts of the country, it will not be able to tackle the Nation's AIDS crisis. And if ever there was a bill begging to increase twentyfold during the second and third years of its existence, this is such a bill. In the outyears, the bill authorizes "such sums as may be necessary." In other words, we are waiting a blank check, which, given the politics here, we can be assured will be generously filled out when the time comes.

But even with respect to the purported beneficiaries of this legislation, this bill would not guarantee that its funds would be directed to their health needs. Title I funds could be used to "enhance the quality of services, care, and treatment" by a broad range of facilities to low-income individuals. Nowhere is the funding limited to health care or health expenditures.

Title II is even more explicit. Its funding may go to health care and support services, including benefits advocacy and legal services. We have seen this shell game in operation before. Basically, we appropriate money to advocacy groups, which use our money to come back to us and lobby for more money.

What sorts of organizations will have their political lobbying and advocacy arms enhanced by this legislation? We can take a clue from the membership of the pediatric AIDS coalition, which includes the Children's Defense Fund and, yes, the Planned Parenthood Federation of America.

Mr. President, I will vote against S. 2240—not because I do not sympathize with the victims of the terrible AIDS epidemic. I will vote againt the bill because it is badly designed, and because our generous and ever-growing expenditures for AIDS programs are all out of proportion to our expenditures for other health programs which threaten many more Americans than does AIDS. Out of fairness, do we not owe our constituents a more even-handed allocation of funds for medical programs? Out of fairness to all of our constituents, should we not remove politics from medicine?

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. BRYAN). Who seeks recognition?

Mr. KENNEDY. Mr. President, In response to the remarks of the Senator from New Hampshire, I would like to outline the six very solid reasons why we should make a special effort in the area of AIDS CARE.

First, it is transmissible and accelerating in severity;

Second, in terms of years of life lost, it is one of the biggest killers;

Third, the impact of AIDS threatens the entire health care system;

Fourth, the impact of the epidemic is unevenly distributed across the Nation;

Fifth, carefully targeted aid can actually bring the Nation's total AIDS CARE bill down; and

Sixth, there is a long history of providing emergency Federal aid to relieve areas hit by disasters. AIDS is a disaster.

Let me explain each of these points.

AIDS IS TRANSMISSIBLE

AIDS is fundamentally different than the many other "big killer" diseases which confront the American people. Unlike heart disease, cancer, pulmonary disease, diabetes, and pneumonia, AIDS is a classic public health epidemic. It is a transmissible illness.

In the words of HHS Secretary Louis Sullivan, we must make a special effort in AIDS because "this is a problem which is growing and threatens to continue to grow at a rapid rate if we don't get control over it."

It is this acceleration in new AIDS cases that is imposing impossible burdens on the Nation's health care system.

Between 1988 and 1989, the change in disease-specific death rates was as follows:

Heart disease, −1.6 percent; cancers, +6.1 percent; cerebrovascular disease, −1.5 percent; and HIV disease, +31.0 percent.

In 1986, there were 14 times more deaths from cereberovascular disease than HIV and 7 times more deaths from pulmonary disease than HIV. But, by 1992, those ratios will have shrunk to about 2 to 1 and 1.3 to 1, respectively.

This acceleration is most prevalent in the minority community. AIDS is increasing disproportionately in black and Hispanic communities. Based on CDC data Hispanics are 8 percent of the population but have 14 percent of total AIDS cases. In the black population the numbers are more frightening—12 percent of the population and 25 percent of the AIDS cases.

THE TOLL IN YEARS OF LIFE LOST

In terms of total years of potential life lost, AIDS is particularly severe because of the young age at which it strikes.

Between 1986 and 1987, the change in disease-specific loss of potential years of life was:

Heart disease, −0.3 percent; cancers, −4.0 percent; cerebrovascular disease, +0.1 percent; and HIV disease, +44.8 percent.

AIDS THREATENS THE ENTIRE HEALTH CARE SYSTEM

There has been virtually no funding provided to help our Nation's health care system gear-up to meet the growing demand for services caused by AIDS and HIV. Thus, we are imperiling the system's ability to deliver services to everybody.

Overcrowded emergency rooms.

Burn-out of health care professionals.

Poor utilization of resources, including in-patient hospital beds.

Targeted assistance is needed where these problems are most severe.

THE IMPACT IS UNEVENLY DISTRIBUTED

One of the most compelling reasons for providing targeted, emergency AIDS CARE assistance is its uneven impact of the epidemic across the Nation.

Over 55 percent of all AIDS cases are concentrated in 13 cities in 6 States.

Moreover, AIDS is having a disproportionate and growing impact on the poorest members of society. These poor patient populations are ones that hospitals and health care providers already lose money serving—because of inadequate reimbursement or a total lack of insurance coverage.

We do not face that problem in cancer or heart disease or diabetes. Those illnesses are spread relatively equally across the entire population—economically and geographically.

AIDS, on the other hand, has literally drained the social and health service resources of the impacted areas—including the Medicaid system and local resources for providing uncompensated care.

The General Accounting Office, in its report on AIDS CARE issued last September, concluded:

As the epidemic progresses * * * Medicaid as well as private insurers will pay for more expensive AIDS health services if communities have not developed lower cost alternative delivery systems. The federal govern-

ment has a strong incentive to encourage less costly, quality conscious AIDS delivery systems.

TARGETED FUNDS CAN HELP CONTROL TOTAL COST

Our bipartisan AIDS CARE proposal is designed specifically to stimulate development of more affordable AIDS CARE options. The GAO report goes on to say:

Expanded assistance to more communities * * * [has] the potential to help many communities replicate successful AIDS delivery systems or create their own. Such assistance * * * can help control the costs of caring for people with AIDS.

AIDS IS A DISASTER

There are many precedents for providing special, targeted assistance to deliver health care services:

Black lung programs primarily assisting individuals in West Virginia, Kentucky, and other mining areas;

Hansen's disease (leprosy); and

Of course, Federal assistance is provided for other natural disasters, a primary use of such funds is for medical and support services for victims of the disaster.

For all six reasons, the Labor and Human Resources Committee unanimously recommends this measure for approval by the Senate.

The PRESIDING OFFICER. Who seeks recognition?

Mr. NICKLES. Mr. President, I am not aware of the parliamentary position that we are in right now. I might inquire of the Chair are we considering the Coats amendment?

The PRESIDING OFFICER. The committee substitute to the bill is pending and is open for possible amendment.

AMENDMENT NO. 1629

(Purpose: To make various technical corrections in the Prison Testing Act of 1988)

Mr. NICKLES. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Oklahoma [Mr. NICKLES] proposes an amendment numbered 1629.

Mr. NICKLES. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

At the appropriate place insert the following:

TITLE —MISCELLANEOUS PROVISIONS

SEC. . TECHNICAL CORRECTIONS TO THE PRISON TESTING ACT OF 1988.

Section 902 of the Prison Testing Act of 188 (42 U.S.C. 300ee-6) is amended—

(1) in subsection (b)(2)—

(A) by striking out "may" in subparagraph (A) and inserting in lieu thereof "will"; and

(B) by striking out subparagraph (B) and inserting in lieu thereof the following new subparagraph:

"(B) victims of aggravated sexual abuse, as described in subsection (c)(2), will be informed of the results of the test, if the person convicted of the aggravated sexual assault tests positive for exposure to the human immunodeficiency virus and if the victim requests to be so informed after the victim is notified of the right of the victim to be informed under this subparagraph.";

(2) in subsection (c)(2)—

(A) by striking out "99" and inserting in lieu thereof "109A"; and

(B) by striking out "rape" and inserting in lieu thereof "aggravated sexual abuse"; and

(3) in subsection (g), by striking out "1990" and inserting in lieu thereof "1995".

Mr. NICKLES. Mr. President, this is basically the same amendment that passed the Senate on April 28, 1988, by a vote of 97 to 0 which became title IX of the health omnibus programs extension of 1988.

My purpose today is to simply offer an amendment which would extend the authorization for the Prison Testing Act beyond 1990 to 1995. In doing so, I would like to make a few technical corrections which I feel will clarify my original intent. The Prison Testing Act establishes a program to assist the States in the confidential testing of persons convicted of IV drug- and sex-related crimes.

I have made two changes to my original language, the first change is necessary, because the original definition of rape under chapter 99 of the title 18 of the United States Code has been repealed. Therefore, in the definition section of this amendment, I am now referencing chapter 109A of title 18 of the United States Code. The definition of aggravated sexual abuse is now included in my amendment.

The second change is to clarify that victims of aggravated sexual abuse will be informed of the result of the HIV test if the person convicted of the aggravated sexual assault tests positive for exposure to the human immunodeficiency virus and if the victim requests to be so informed after the victim is notified of the right of the victim to be informed.

One of only two incidents, when the confidentiality of the test results should be waived, is in order to provide the victim with information that could drastically change her life. This is a very important clarification that I feel must be made. The anguish that a victim of a sex crime must experience need not be exacerbated by the fear of HIV infection. Married women who would fear infecting a spouse or might be planning a family should be provided that information.

Mr. President, I think that is the least we can do for victims of sexual abuse. If we find out that the convicted person tests positive of HIV, then the rape victim should be notified of the results of that test if they request.

An additional purpose of the amendment is to increase testing for two high-risk category groups, persons who are convicted IV drug users and people who are convicted of sex-related crimes, including prostitution. I think it is a commonsense amendment. It is an amendment that did pass previously. This would extend the authorization for 5 years.

Under the legislation, a drug or sex offense is defined as follows:

First, an offense that is punishable under State law relating to intravenous use of a controlled substance—other than a law relating to simple possession of a controlled substance—by imprisonment for a term exceeding 1 year;

Second, a State offense of the same type under chapter 109A of title 18, United States Code, relating to aggravated sexual abuse; or

Third, a State criminal offense involving prostitution.

DISCUSSION OF PRISON TESTING

According to the intergovernment health policy project, there are currently 15 States that have mass screening for HIV infection including Oklahoma. This means that at some time during the prisoner's incarceration, he or she will be tested. It may be upon conviction, during incarceration, or upon prior to release. Furthermore, nine States currently test individuals convicted of sex-related crimes. The State laws vary as to whether or not victims of rape are informed of the results of the perpetrator's test. Some States have a worker notification policy, so that if prison personnel may have been exposed to the virus, he or she could know of the results of the test of the aggressor.

The States are moving toward testing programs in the State correctional facilities. This act would encourage other States to follow suit.

The following is the most recent information from the National Institute of Justice on the current AIDS exposure in the prison systems:

As of November 1989, a total of 5,411 confirmed AIDS cases had been reported among inmates across the U.S. Federal, State, and larger city/county correctional systems. These represent cumulative totals since the beginning of the epidemic. Of these cases, 3,661 occurred in 45 State systems and the Federal system, while 1,750 occurred in 30 city/county jail systems.

Data suggests that IV drug use in the predominant exposure category. IV drug use is the leading risk factor for HIV infection and AIDS in all of these systems, although the actual percentages vary somewhat among the State institutions which provide information.

For the first time in the 5-year period the NIJ—National Institute of Justice—has sponsored this survey,

the percent increase in cumulative total correctional cases in the United States—72 percent—exceeded the increase in cases in the U.S. population at large—50 percent. The change results from a reduced rate of increase among cases in the population at large as well as a jump in the rate of increase in the correctional systems.

Mr. KENNEDY. Mr. President, this has been an area of public policy that the Senator from Oklahoma has been interested in for some time. He has raised this issue and similar issues on other legislation.

How we deal with those that are addicts in prisons is a sensitive and important issue, not only in our criminal justice system but for safety and security in our community. We want States to develop sensible programs, and we should recognize that the States will require resources to implement sound public health approaches to carry out testing, counseling, and also provide the treatment for them.

If sensibly implemented, there could be benefits that will come from this amendment. We are prepared to accept it and are grateful for the attention that the Senator has given to the question.

I understand there have been some technical changes and we are prepared to accept them as well.

Mr. NICKLES. I thank the Senator.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Oklahoma.

The amendment (No. 1629) was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NICKLES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NICKLES. I thank my friend and colleague.

AMENDMENT NO. 1630

(Purpose: To remove the provision relating to the waiver of the infants and women set-aside requirement)

Mr. COATS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Indiana [Mr. COATS], for himself, Mr. HELMS, and Mr. BRADLEY proposes an amendment numbered 1630.

Mr. COATS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 57, strike out lines 8 through 15.

Mr. COATS. Mr. President, I was especially pleased that this bill made a special provision for the most vulnerable victims of HIV infection so that they would not be overlooked in the distribution of these treatment funds. Section 2541(B) mandates that a State must use no less than 15 percent of the block grant funds to provide health and support services to infants, children, women, and families.

Every case of HIV infection is a tragedy, regardless of how contracted, and I trust that everyone agrees that we must provide every victim who is medically and economically eligible with the best possible treatment, and that is exactly what the CARE bill does.

However, the infants, children, families, and certainly many of the women with AIDS are different. They are the innocent victims. They never had a chance. They took no risk and did nothing to invite this calamity. Their suffering is especially poignant; and if you see them as I have in intensive care nurseries, they break your heart.

The vulnerability of these innocent victims calls us to take special measures to insure that they are given an appropriate level of care. Section 2541(B) gives them that protection.

There is a provision in the bill, Mr. President, that grants a waiver to States for transfer of funds if the funds are not fully used for this purpose.

However, as we have discovered in our State of Indiana, and in many, many other States, the cost of care for those victims that are classified under section 2541(B) is significantly more in most cases than it is for other victims of the disease. Therefore, we think the 15 percent is very appropriate.

In addition, if you count those with HIV infection, particularly the young who most likely will end up with the disease, you find that you are going to quickly use up the 15-percent funds. Given the broad definition of how these funds can be applied in support for the infants, children, and families of these victims, I think it is very appropriate that we set that level.

So my amendment merely would strike that section of the bill which would grant the waiver. I believe that it has been agreed to by the manager of the bill.

I wish to thank Senator HATCH for including section 2541(B) and working so hard to have it included in the bill and others who have supported this concept, including the chairman. They fought hard for this language. I commend them for their help for helpless victims. I thank them for their cooperation in helping us clarify this particular section.

Mr. KENNEDY. Mr. President, we feel the amendment of the Senator from Indiana is sensible. This whole issue of pediatric AIDS has really crashed into our society in a way that has brought an enormous amount of anguish and suffering to thousands of families. In the early days, say 3 years ago, it was extremely difficult to document the full extent of pediatric AIDS. Our committee was the first committee that actually allocated some direct funding in that area.

But to be able to get the documentation was extremely challenging. It was more, really, anecdotal information that was gained by our committee from different hospitals around the country. But over the period of these last 2 years, due to the Pediatric AIDS Foundation and Mrs. Elizabeth Glaser's group and others such as the Pediatric AIDS coalition who have been very much involved in these programs, there is a much wider understanding of both the need and the challenge that exists. We thank them for their help and support in shaping this legislation.

In my own city of Boston, the Boston City Hospital was the first hospital that had a pediatric AIDS clinic. People in the health care team who are part of that program are some of the most inspiring health professionals I have ever had the chance to meet.

The foster parents who come in there and work with these infants over a period of time are men and women of extraordinary compassion and decency. The particular burden that it has placed upon those different facilities has been absolutely extraordinary. And I think today there is a greater understanding and awareness of this particular aspect of the overall HIV problem we are facing in our society.

We had wanted to insist that there be a designated amount of resources for that particular effort in this legislation. Again, we were searching to make sure whatever moneys we did have were going to work effectively. But I am increasingly impressed that certainly the 15-percent set-aside is a clear indication of the importance we place on this particular aspect of the HIV and AIDS challenge. I believe, probably in a number of areas, more of the allocation will actually be spent on that particular function.

It is important to recognize that certainly there is no prohibition to a State including a greater percent of its allocation to work in the areas with the kinds of support programs that are included in the legislation.

We certainly urge the Senate to accept the amendment. The Senator can be assured we will make every effort to see it is maintained in the conference.

The PRESIDING OFFICER. The Senator from Utah, Mr. HATCH is recognized.

Mr. HATCH. Mr. President, I do not want to prolong this but I strongly support Senator COAT's amendment. It is well thought-out and it needed to be brought to the floor. I orginally authored the 15-percent set-aside for

children with AIDS because more State and Federal efforts really have to occur on their behalf. Children with AIDS are the most vulnerable. I want every State to dedicate at least 15 percent of their funds for those children and their families.

Today, we know of 2,200 reported cases of children with AIDS, but the real number is probably at least 10 times greater because of an inability to diagnose some cases. We must provide these children and their families with treatment. We must be advocates on their behalf.

I thank Senator COATS for this amendment which will not allow the States to waive this requirement. I did not realize the waiver was in the bill. Senator COATS has done us all a favor.

I thank Senator KENNEDY for his graciousness in recognizing this and recognizing the value of the 15-percent set-aside for children with AIDS and their families.

Again, I am very grateful to the distinguished Senator from Indiana and my colleague from Massachusetts and this side is prepared to accept this amendment.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. COATS. I thank both the Senator from Massachusetts and the Senator from Utah for their kind words. I also want to note that, while yesterday we dedicated this bill to the memory of Ryan White, it is this very section that is applicable to the Ryan White case. His courage and his outspoken advocacy of the need for treatment of the victims of this disease I think touched millions of Americans, and his experience has made it graphically clear that AIDS has no mercy for the young.

Several weeks ago I had the pleasure of meeting Jean White, Ryan's mother. It had to be especially difficult for her to travel to Washington so shortly after her son's death. However, she was convinced that this AIDS CARE bill and particularly this section was important enough to make that sacrifice. She was a most convincing advocate. Even though I, early on, suggested that this particular section dealing with treatment help for children, infants, and families of victims of the disease be named the Ryan White section, Mrs. White wanted the entire bill to be named such and I certainly respect her wishes on that.

But it was Ryan's courageous example that galvanized the attention of millions of Americans to the tragedy of this disease and I think it is very appropriate that this legislation includes a section which dedicates a certain percentage of funds to provide treatment for the children, infants and families of those victims who have suffered this disease.

So I thank again Senator KENNEDY and Senator HATCH for their assistance in this.

I yield the remainder of my time.

The PRESIDING OFFICER. Is there further debate?

If there be no further debate, the question is on agreeing to the amendment of the Senator from Indiana.

The amendment (No. 1630) was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote.

Mr. HATCH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KENNEDY. Mr. President, we know of no further amendments. We are prepared to move to final passage.

Mr. President, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. BRADLEY. Mr. President, I rise to support this bill because we need to do all we can to set up humane system of care for individuals who will be living with AIDS for many years. America's health care facilities that are buckling under the weight of caring for individuals with AIDS need the emergency relief provided in this bill. And communities need help to build a network of humane home and community systems to care for our citizens with AIDS.

Mr. President, many of my colleagues have spoken about the vast human tragedy that this epidemic has created in this country. Others have talked about the tragedy yet to unfold as hundreds of thousands of Americans infected with the virus develop the disease. This country has made remarkable strides in treating the deadly infections that accompany the disease and has developed treatments to mitigate the destruction that the virus brings to individuals. This progress is extremely costly. As we begin to be able to offer some hope to Americans with AIDS, the cost per case rises because victims will live longer. Many do not belong in hospitals. They have a substantial chance of leading a normal life. The crucial challenge for this country will be in our ability to support a health care system that will provide these patients with the valuable services needed to keep them alive and functioning members of our society. The task for communities will be to invite these citizens back to a full and productive life while supporting their health and service care needs brought about by the infection.

Mr. President, in my home State of New Jersey, nearly 9,000 citizens have been afflicted with the disease. The tragedy of AIDS in New Jersey is compounded by the high proportion of women and children among those affected. While AIDS in children constitutes less than 2 percent of the cases in the Nation, nearly 11 percent of the cases in New Jersey involve children. Heterosexuals and children constitute the highest proportion of cases in my State.

Mr. President, America needs this bill. Hospitals who treat AIDS patients are losing as much as $200 a day on each person that they treat. They need financial assistance to avoid buckling under the burden of this caseload. This bill also provides vital funds to help develop the community-based care system that is essential to provide needed services to victims of AIDS in a cost-effective, coordinated, and humane fashion. In the long run, these community-based systems will save money. An acute care hospital is not the provider of choice for most AIDS patients today. AIDS is clearly becoming a manageable chronic disease. Where community-based systems do not exist, hospitals are overwhelmed by AIDS patients who have nowhere else to go.

Mr. President, I urge my colleagues to expeditiously enact this important piece of legislation. It is a needed and humane measure that will help alleviate some of the misery inflicted by a tragic epidemic.

Mr. MOYNIHAN. Mr. President, I speak today to a subject which presents itself as a public health emergency. To wit: acquired immune deficiency syndrome or AIDS. Senators KENNEDY and HATCH have taken a bold first step in changing the way in which we provide compassionate and appropriate health care to people with AIDS and the human immunodeficiency virus, HIV. S. 2240, the Ryan White Comprehensive AIDS Resources Emergency Act of 1990, of which I am proud to be an original cosponsor, begins the process whereby we will provide emergency assistance, by means of coordinated health care delivery systems, to areas of the country disproportionately impacted by this epidemic. The subject engages much emotion. But our response to it needn't nor should it. Rather, it is our Government's responsibility to see to it that this epidemic is contained.

It was stated:

> The present inadequacy of political strategies to deal with the AIDS epidemic is a concern around the world but nowhere more than in the United States. Politicians there have dealt haltingly with AIDS issues thus far, even when clear advice and consensus have been available from such credible sources as the Institute of Medicine, the National Academy of Sciences, and the Presidential Commission on the Human Immunodeficiency Virus Epidemic. This hesitancy is potentially disastrous, given the magnitude of the AIDS threat, and reflects both cultural confusion and inequity, brought into relief by the ferocity with which the epidemic has attacked the fringes of American society. Clearly, there has been a failure

of political will in proportion to the need for public understanding and compassionate response.

Dr. June Osborn, then dean of the School of Public Health at the University of Michigan and now our chairperson on the National Commission on Acquired Immune Deficiency Syndrome, wrote those words for an article which appeared in a series of articles on this subject in Daedalus in 1989. These opening words from her article, entitled "Public Health and the Politics of AIDS Prevention," on this labyrinthine issue serve to focus our attention on the unique characteristics of AIDS as a medical and social crisis, and the continued inability of some to recognize what any epidemiologist would subscribe to as a public health crisis.

AIDS is a public health emergency. This is where our debate must begin and where it should, for the moment, end. Some 128,000 Americans have, as of March 1990, been diagnosed with AIDS. Over 78,000 have died—men, women, and children. The Centers for Disease Control [CDC] estimate that as many as one and one-half million Americans may be infected with the human immunodeficiency virus [HIV]. As the committee report indicates, "while the first 100,000 cases of AIDS were reported from 1981 to 1989, another 50,000 are expected to be diagnosed in 1990 alone." As one witness recently testified before a congressional committee, "data recently released from the CDC indicate the expected number of new AIDS cases will increase 46 percent between 1990 and 1993." In short, this epidemic has not yet reached its peak. Indeed, the impact of it will be felt throughout this decade and possibly well into the next.

When I held the first and only hearing on this epidemic in the Committee on Finance in 1987, we had recorded 45,000 cases. That was as a matter of fact. Previously, in 1983, we had asked for research moneys to begin finding out what was happening. It was something new and extraordinary that had appeared. It was recognized as a disease, always fatal, which had already made its way into a large segment of the population in certain areas of the country. The research that commenced and has since provided us with major increases in both our knowledge of AIDS as well as in our ability to treat it is the result of our capacity to learn and understand the science involved. Nonetheless, AIDS remains incurable and always fatal.

We have appropriately devoted much of our scientific infrastructure to the cause and cure of AIDS. The residual benefits to medicine, generally, have also been invaluable. However, we have failed to take what we have learned in the research laboratory and provide it to many whose lives have been devastated by the opportunistic infections which constitute AIDS. This must change. This bill begins that process. It is a first step. And it is indeed a comprehensive one.

By providing emergency relief funds to cities which have a high incidence of AIDS we will begin to end the financial and medical impact the disease is having on our hosptials, and acute and subacute care facilities. In addition, moneys will be directed toward establishing new, more cost-effective and more humane coordinated outpatient health care services for people with AIDS. The second provision of the bill proposes establishing grants to States to be used for establishing community-based, consortia models of care which will serve to coordinate AIDS health care services.

In 1987, we began to hear about the specific financial burden of medical institutions this disease would impose. That burden is today a reality. I know this too well. Our hospitals in the city of New York—one of the two original epicenters of AIDS, the other being San Francisco—are now suffering the impact of this epidemic and its twin; crack cocaine abuse. Senator KENNEDY noted on Monday in his opening remarks that the two—AIDS and "crack"—have converged. This is indeed the case. For those who are increasingly becoming infected with this disease—the poor, children, women, and minorities—our emergency rooms are frequently their first entry into the health care system.

In New York City, we have on our hands a hospital crisis. Overcrowding is common. Many of those being treated simply do not have adequate health insurance if they have any at all. In addition, providing health care to the indigent population is threatening many of our institutions; filling a limited number of acute care beds when more appropriate, less costly, options could be and should be made available.

In short, the number of hospitals providing hospital-based AIDS services increased nearly 40 percent from 1987 to 1988. In 1988, 59.4 percent of hospitals provided general inpatient care for people with AIDS. Public hospitals are obviously feeling the impact most severely. Public hospitals treated on average more than twice as many AIDS patients as private hospitals in 1987.

In my State, in 1988, 34 hospitals provided care to almost 80 percent of the AIDS patients. Those 34 hospitals had, in aggregate, operating losses of over $740 million. A case in point is our own New York Hospital which received its charter in 1771 from King George III, making it the State's oldest hospital and the second oldest in the Nation. But this hospital—an institution founded in the years just preceding the establishment of our Republic—has, since 1988, been forced to transfer $41 million from its endowment of $170 million to its operating budget in part to pay the increasing demand of providing health care to people with AIDS, as well as other patients unable to pay for services. Certainly, this must change. And it just may, if we enact both Senator KENNEDY's authorization bill before us today and then achieve a full appropriation for it.

But I must also stress that this is only a beginning. We must turn to our entitlement programs, namely Medicaid, if we are to provide consistent, long-term access to cost-effective health care services for people with AIDS. Recently, I introduced a bill, S. 2536, the Medicaid AIDS and HIV Amendments of 1990, which would accomplish this goal.

In sum, Mr. President, we do not entirely know what we have at hand here nor do we know what the final impact will be. The disease continues to challenge our medical sciences, our institutions which must provide care, and our capacity for compassion as a people. Providing care and making care financially possible, with institutions and individuals, is something we can do and if we can, we ought.

AMENDMENT NO. 1619

Mr. ARMSTRONG. Mr. President, during yesterday's debate on S. 2240, I said that I would consider offering an amendment to clarify congressional intent with respect to State partner notification and reporting requirements under this act. Upon reflection, and after legal review, it appears this legislation, as amended by the Kennedy amendment No. 1619, sends a strong message to the States to adopt mandatory reporting requirements. Mandatory reporting is the only sure way for a State to collect accurate epidemilogical and demographic information that the Kennedy amendment requires. Mandatory reporting of positive HIV test results—along with identifying information—is also essential to carrying out the partner notification provisions of the Kennedy amendment. Although the Kennedy amendment could have been more explicit in requiring States to adopt a mandatory reporting program, I believe that it is virtually impossible for a State to meet the conditions of the amendment if it does not require reporting.

While requiring many States to change their policies with respect to reporting requirements and partner notification, this legislation is sensitive to the needs of local communities by granting health officers some discretion in fashioning partner notification programs. It is the clear intent of the Senate that such discretion cannot be arbitrary, however, and must be consistent with sound public health policies.

Mr. President, I do not share the concerns of some who feel that the reporting requirements contained in the Kennedy amendment would compromise the confidentiality of people who test positive for infection with HIV. To the contrary, the Kennedy amendment requires the reporting of only sufficient information needed to perform accurate epidemiological analysis and effective partner notification programs. As many of my colleagues are aware, Colorado State law requires mandatory reporting for the very reasons reporting would be required under the Kennedy amendment, but Colorado's program does not require an individual to submit their name when being tested; a pseudonym and a phone number would be acceptable. This approach protects privacy rights in a manner consistent with important public health goals. This program has successfully located many people who were unaware of their risks without compromising confidentiality, and without requiring the use of names.

The importance of requiring accurate epidemiological information cannot be overstressed. Tracking HIV infection is important to effectively target programs to slow the spread of the disease. This legislation requires the State receiving a grant to report to the public health officers information sufficient to perform statistical and epidemiological analyses of the incidence of cases with infection with the etiologic agent for the acquired immune deficiency. So that Members understand the impact of reporting requirements on accuracy I ask unanimous consent to have printed in the RECORD two letters concerning accuracy questions raised without mandatory reporting requirements.

There being no objection, the letters were ordered to be printed in the RECORD, as follow:

HOUSE OF REPRESENTATIVES,
*Washington, DC, May 9, 1990.*

Col. DONALD BURKE, M.D.,
*Walter Reed Army Institute of Research, Rockville, MD.*

DEAR COLONEL BURKE: As you may know, next week the full Energy and Commerce Committee will mark up H.R. 4470, the AIDS Prevention Act of 1990. It is my intention to offer several amendments to the bill, including one that would require states to confidentially report positive HIV test results to public health officials for purposes consistent with the public health (*i.e.*, partner notification, etc.)

I understand that several years ago the military briefly tested military applicants on an anonymous basis, and found that the data subsequently generated grossly overstated the true extent of HIV infection among military recruits. Could you describe the military's experience with such a system, and what pitfalls you encountered? Specifically, to what extent were seropositive individuals counted more than once, and what might explain such a result?

Do you believe that these concerns are unique to the military population, or do they apply to the civilian population as well?

H.R. 4470 includes a provision to require states to collect information with respect to positive HIV test results that is sufficient to perform statistical, demographic, and epidemiological analysis of the extent of HIV infection in the state. I have enclosed a copy of the relevant language for your review. It is my suspicion that this requirement implicitly requires states to maintain identity-coded reporting systems in order to guarantee that the data submitted pursuant to it is accurate. Do you agree?

Thank you for your prompt attention to this matter.

Sincerely,

WILLIAM E. DANNEMEYER,
*Member of Congress.*

---

WALTER REED ARMY INSTITUTE OF RESEARCH, WALTER REED ARMY MEDICAL CENTER,
*Washington, DC, May 19, 1990.*

Hon. WILLIAM E. DANNEMEYER,
*House of Representatives, Rayburn House Office Building Washington, DC.*

DEAR CONGRESSMAN DANNEMEYER: In response to the questions you posed to me yesterday about the value of identifier-linked reporting of HIV infections, you may find the following information about our experience in the US Army to be of interest.

In early 1985, at the time that we began testing of blood donated at Army blood banks, the Army had not yet developed a specific requirement that a name or social security number must be provided for each specimen submited to our HIV testing laboratory. Most specimens arrived without any information that could be linked back to an individual donor or patient. Nonetheless, we though we could accurately measure the prevalence of HIV infections among Army donors because we knew the number of donations per month thoroughout the Army, and because we were keeping track of the number of specimens from positive donations we received. Based on this data, we originally estimated the prevalence of infected donors to be 5 to 7 per 1000, and we disseminated this data on a limited basis through our command channels. Subsequently, when an Army policy was implemented requiring that a name and/or social security number be provided for each specimen tested, we discovered that this original estimate was far too high, by a factor of 3 or 4 fold, and that the actual prevalence was 1.5 per 1000.

Why the discrepancy? Most of the overcounting errors came from the fact that several specimens were submitted and tested from each donor, without our knowing that this was occurring. In some instances multiple repeat samples were submitted from a single donor simply because the local blood bank wanted to be sure of the test results, and did so by using multiple samples. In some instances the individual had donated more than once, and was found to be positive on two or more occasions but was counted as a separate person each time. In other instances a single specimen was divided into two or more tubes before submission, without any clear indications that the two specimens in fact were both derived from the very same blood sample, and both tubes were counted as individual positive persons.

Accurate statistics on the prevalence of HIV among the population of Army donors became possible only when specimens were clearly marked with personal identifiers and records were kept by name and/or social security number, as is the standard laboratory and public health practice for all other diseases.

While the logistics of HIV testing and reporting by civilian public health agencies may of course differ in may respects from our circumstances in the Army in 1985, it seems to me that the lesson is quite clear: unless testing and reporting are done with individual identifiers, the accuracy of measurements of HIV prevalence will always be suspect.

Since 1985, all testing and reporting of HIV in the US Army has been done with all specimens clearly identified. Test results and individual identifier data have been kept in confidential records, just as is done with countless other types of personally sensitive information. I am convinced that the extraordinary success of HIV epidemiologic studies conducted by the Army could not have been possible without identifier-linked testing, reporting, and record keeping.

Please note that the comments in this letter are my own as an expert on diagnosis and epidemiology of HIV, and do not necessarily reflect the official positions of the Army or the Department of Defense.

Sincerely,

DONALD S. BURKE,
*Colonel, U.S. Army,*
*Director, Division of Retrovirology.*

Mr. ARMSTRONG. Mr. President, I think the Kennedy amendment represents a strong step toward instituting responsible public health measures to slow the spread of this devastating epidemic. The Kennedy amendment, agreed to by voice vote, will ensure the collection of accurate epidemiological information concerning the incidence of the HIV epidemic, and more importantly will allow those innocent individuals who are unknowing placed at risk of infection to be notified of their risk.

Mr. President, as policy makers, we will be asked in the future to target limited resources to areas most impacted by this virus. Accurate information on where the disease is and how it is spreading may now be assured because of the requirements of the Kennedy amendment. We are also faced with the responsibility of doing all we can to halt the spread of this disease, another goal which the Kennedy amendment may help reach.

Mr. ROTH. Mr. President, the legislation we are now considering, the Comprehensive AIDS Resources Emergency Act, sets out to achieve a worthy goal. However, while I have supported legislation in the past to combat the AIDS epidemic, I feel I cannot support the bill in its current form. For many States, this bill is a bill of compassion, yet my home State of Delaware will benefit very little from this proposal. Of the $600 million authorized under this bill, Delaware may only get $665,891 according to the State grant apportionment formula.

According to the Centers for Disease Control HIV/AIDS Surveillance Report of May 1990, Delaware now

has a cumulative caseload of 253 individuals reported as having AIDS. And unlike some of the Western States with similar prevalence numbers, my home State is contiguous with 3 of the 10 States with the highest significant incidence of AIDS—New Jersey, Maryland, and Pennsylvania. Four of the thirteen cities with the highest AIDS cases diagnosed are within 150 miles of Delaware. In fact, Delaware is located only 2 hours away from New York City by car, which is to receive $59.8 million next year under this bill—more than twice any other city will receive. Yet, of the $300 million allocated to States as block grants, Delaware will receive 0.22 percent of the total amount made available—less than a drop in the bucket. It seems to me that the bill does not adequately address my home State's particular situation.

In the past, my concerns with the tragedy of the AIDS epidemic led me to support legislation providing for education and research, and later to support legislation passed by the Senate to establish the AZT Program. I also supported the amendment to a prior Labor-HHS appropriations bill that provided $30 million to continue to make AZT available to persons with AIDS. Treatment which would have been suspended for thousands of individuals was maintained because those funds were made available. In my view, these measures brought more compassion and needed care to individuals in Delaware than this bill purports.

In addition to my concerns with the legislation's treatment of my small State, I do not believe this is the appropriate time for the consideration of an authorization bill prior to the completion of the budget resolution. I am well aware of the tragedy inflicted on individuals suffering with AIDS, but there are also hundreds of thousands of people suffering from cancer, people without homes, food programs, community care programs and health care programs—all matters of great merit which must wait their turn to be considered as part of the budget resolution.

While the $665,891 would help assist the State of Delaware in developing intervention and prevention programs, I do not believe the grant apportionment process is sensitive enough to meet the needs of States in an equitable manner.

Mr. CONRAD. Mr. President, as an original cosponsor of this legislation, I rise today to urge my colleagues to support this important bill.

This bill is an attempt to address some of the gaps in a health care system that has been beset by a difficult and growing public health threat, namely, the AIDS virus. As of March 31, 1990, over 128,000 cases of AIDS have been reported to the Centers for Disease Control. Over 78,000 Americans have died of the disease. The virus is growing at a rapid rate. The first 100,000 AIDS cases were reported to the CDC from 1981 to 1989; another 50,000 are expected in 1990 alone. By 1991, AIDS will far exceed all other causes of death for people ages 25 to 44.

The virus has literally taken this Nation's health care delivery system by surprise. As the Committee on Labor and Human Resources noted in its report:

> In 1980, no federal, state, or local health care planning agency could possible have foreseen the introduction of a novel and lethal infectious disease into 20th century society.* * * Neither health planners nor policy makers knew that—during the decade of the eighties—primary health providers, support agencies and major medical institutions would suddenly be required to gear up to provide desperately needed services to hundreds of thousands of Americans, most of whom had formerly had little contact with the health care system.

I believe that the legislation before us today will help the Nation cope with this growing public health threat and ease what has become crushing financial burdens for health care facilities and providers in many part of this country.

Title I of the bill will provide emergency assistance to those cities hardest hit by the AIDS crisis. Because many AIDS patients are lower income or have been reduced to a state of poverty because of their health care bills, the facilities which provide care to them are facing growing—and potentially crippling—debts. The title will send urgently needed financial relief to health and service providing agencies and institutions in those areas of the Nation that have been struck most severely by the HIV epidemic.

Title II of the bill provides grants to States to improve care for HIV-infected persons in both urban and rural areas. The grants will be used to develop a more comprehensive continuum of care for HIV-infected persons. The funds can be used for the development, organization, coordination and delivery of health care and support services to individuals and families with HIV disease.

Because the current health care system lacks adequate long-term, home, hospice, and community-based care for AIDS patients, many of those infected are given care in an acute care setting like a hospital. This overly taxes the acute care system and can diminish the quality of life of AIDS patients by keeping them in a dependent state. The Committee on Labor and Human Resources was told that approximately 10 percent of hospitalized AIDS patients could be released if there were community-based care systems in place.

Finally, title III of the bill continues the commitment to research by directing the Agency for Health Care Policy and Research to evaluate the impact and cost effectiveness of various models of AIDS care.

I applaud the work of my colleagues from Massachusetts and Utah for their work on this important bill. I especially want to thank them for agreeing to accept the amendment introduced by Senator MCCAIN regarding the eligibility of Indian reservations to receive some of the funding proposed in this act. This amendment will make clear that those living on Indian reservations will have the same access to the new programs authorized in this act as the rest of the population.

I urge my Senate colleagues to support this legislation and hope it will soon become law.

PARTNER NOTIFICATION

Mr. KENNEDY. Mr. President, before we vote for final passage on this bill, I want to respond to some concerns raised yesterday by Senator CRANSTON. This provision was designed to assure that States collect such information regarding their HIV caseload as necessary for statistical and epidemiological purposes, and that States establish partner-notification programs as appropriate given their demographic and resource concerns. The amendment allows for the reporting of cases of HIV infection to the extent such reporting is determined necessary by the public health officer of the State for purposes of implementing the partner-notification efforts.

In response to the Senator from California's concerns, this provision does not require the reporting of names of people who are HIV-infected. As the Senator knows, the presence of names reporting requirements in certain jurisdictions has in fact discouraged people from coming forward to get testing and the kinds of services this bill will fund. In fact, the State of Colorado, recognizing the problems their own names reporting requirement has created, just passed into law last month an anonymous testing provision. Another startling example of the negative effect names reporting can have on testing decisions was in Oregon. When that State adopted anonymous testing options, testing rose by as much as 125 percent in risk groups.

In contrast, when the State of South Carolina switched from anonymous to confidential testing, the number of individuals coming forward for testing decreased by more than 50 percent.

Clearly, the experience in our States shows the seriously negative effects of requiring names reporting.

Ms. MIKULSKI. Mr. President, will the Senator yield?

Mr. KENNEDY. Yes.

Ms. MIKULSKI. Is there any other disease for which the Federal Govern-

ment requires the reporting of names or identifiers?

Mr. KENNEDY. No; in fact, the Centers for Disease Control, which has jurisdiction over such matters, has not found a need for such a Federal mandate. In addition, the American Medical Association has opposed such a Federal mandate.

Ms. MIKULSKI. Can public health officials achieve partner-notification without identifiers or names?

Mr. KENNEDY. Absolutely. In fact, partner-notification for all sexually transmitted diseases traditionally occurs without acquiring the name of the index case. Indeed, confidence in partner-notification programs may be greater if the public health officials do not know the name of the index case. The Institute of Medicine has said, "Contact notification does not necessarily demand the reporting of seropositive cases with identifiers. Furthermore, for determining seroprevalent rates well designed population studies are more useful than ad hoc collections of cases."

Ms. MIKULSKI. Then, as I understand it, the Senator does intend for State public health officials to exercise their own discretion regarding the information they need to adequately meet their statistical and notification needs.

Mr. KENNEDY. Yes; these decisions must be left in the province of the State public health officials who best know the needs of their jurisdiction.

Mr. CRANSTON. Will the Senator yield?

Mr. KENNEDY. Yes.

Mr. CRANSTON. I appreciate, the colloquy of my colleagues from the States of Massachusetts and Maryland. I am satisfied that the intent of the Kennedy amendment does nothing to require or prompt States to establish procedures for the collection of names or identifiers.

WHAT THE KENNEDY PARTNER NOTIFICATION AMENDMENT DOES

Mr. KENNEDY. Mr. President, as a condition of funding under the AIDS CARE Act, each State must institute a program of tracing and notifying partners of individuals testing positive for HIV.

In unanimously approving the amendment, the Senate has made it clear that we want the public health officers in all States to have this important tool at their disposal.

The amendment also requires that every State receiving funds under the AIDS CARE Act collect the case information that is needed to carry out its program of partner notification.

Our amendment differs only slightly from the proposed amendment that was developed by Senator Armstrong.

It is very important that Senators understand this difference:

The Kennedy amendment leaves to the State public health officer the decision of how to implement the State's partner-notification program. It allows each State to make its own determination about how much of its resources to devote to notification efforts—versus other testing and prevention approaches.

Similarly, the Kennedy amendment leaves to the State the decision on exactly how it will gather the case information that will be needed to carry out its notification program.

We agree with Senator ARMSTRONG that partner notification is an essential tool in the fight against AIDS. The question for the Senate is whether we should micro-manage the details of each States program.

Given the very different situations that exist in the various States, we say let us not take away the ability of State public health officers to design a program that works best for their area.

The Kennedy amendment responds to the recommendations of the American Medical Association, the Association of State and Territorial Health Officers, and the National Governor's Association. In unanimously approving the amendment yesterday, I believe the Senate has done what is responsible and necessary on this important question.

I ask unanimous consent that various letters and reports on this topic be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE NATIONAL HEMOPHILIA FOUNDATION,
*New York, NY, May 2, 1990.*

Hon. HENRY WAXMAN,
*Subcommittee on Health and the Environment, Committee on Energy and Commerce, Washington, DC.*

DEAR MR. CHAIRMAN: The National Hemophilia Foundation (NHF) supports the establishment of a nationwide program of providing preventive health services for persons with AIDS as provided for in H.R. 4470. The bill is comprehensive in scope which NHF believes is critical to achieving effective risk reduction. H.R. 4470 provides for confidentiality and informed consent protections for pre- and post-test counseling services, a prerequisite to encouraging individuals voluntarily to seek preventive health services.

The maintenance of confidentiality is a matter of utmost importance to patients with hemophilia, their families and partners, as well as the hemophilia treatment team. There is no question that inadvertent release of test results increases risk of discrimination, exclusion and expulsion for individuals with hemophilia, their family members and partners. The serious consequences of such disclosure encompass the loss of insurability, housing and employment for people with hemophilia. The most public examples of such acts of discrimination—the senseless expulsion of Ryan White from his school and the burning of the Ray family home—have tragically occurred to families with hemophilia.

For these reasons NHF would oppose any amendments requiring that the names of persons who test positive for HIV be reported to state or federal health officials. The members of the Foundation believe that persons within the hemophilia community at risk of AIDS will not avail themselves of testing and counseling programs, no matter how well conceived and no matter how accessible, if confidentiality is not guaranteed and the likelihood of discrimination eliminated.

We look forward to working with you as H.R. 4470 proceeds through the legislative process to ensure that the HIV/AIDS service needs of the hemophilia population are fully addressed.

Sincerely,

ALAN P. BROWNSTEIN,
*Executive Director.*

THE UNITED STATES CONFERENCE OF MAYORS,
*Washington, DC, May 8, 1990.*

Hon. EDWARD M. KENNEDY,
*U.S. Senate, Washington, DC.*

DEAR SENATOR KENNEDY: The United States Conference of Mayors is a strong supporter of your legislation, the Comprehensive AIDS Resource Emergency Act of 1990, which is well designed to assist cities and states facing the ever increasing burden of AIDS. With its current provisions, the CARE Act recognizes the importance of providing localities the resources necessary to implement their own course of action against HIV infection and its devastating effects on health care.

As the bill now moves toward floor action, it is vitally important that the degree of local flexibility presently contained in S. 2240 be retained. It is my understanding that there exists the possibility of damaging amendments which would restrict or otherwise hamper local decision making on how best to use the funding authorized by the CARE Act. Senator, such limiting amendments strike at the very heart of the CARE Act, which appropriately recognizes that the best solutions to local problems are locally designed. Amendments to S. 2240 which would mandate a federally imposed course of action at the local level are contrary to the spirit of the CARE Act and must be opposed. The Conference of Mayors urges your support in defeating all amendments designed to coerce local governments into a particular course of action against the AIDS epidemic.

The United States Conference of Mayors commends you, Senator Hatch and the 61 cosponsoring Senators for your leadership in developing the concept of the CARE bill. Let us continue to work together to ensure that this vital legislation is enated without amendments which would severely hamper its effectiveness.

Sincerely,

J. THOMAS COCHRAN,
*Executive Director.*

---

NATIONAL GOVERNORS ASSOCIATION,
*Washington, DC, May 2, 1990.*

Hon. EDWARD M. KENNEDY,
*Chairman, Committee on Labor and Human Resources, Washington, DC.*

DEAR MR. CHAIRMAN: On behalf of the National Governors' Association, I am writing to request your assistance in assuring passage of S. 2240, the "Comprehensive AIDS Resources Emergency (CARE) Act" as reported out of the Senate Labor and Human Resources Committee. The nation's Governors would strongly oppose any floor amendment which would deny states the flexibility to administer state programs and interfere with state public health policy.

S. 2240 provides a comprehensive and coordinated national response to the present and future AIDS epidemic under which state and federal governments work in true partnership to channel appropriately scarce public health dollars. This bill recognizes the vital role of state and local governments in designing the most efficient and effective means of delivering AIDS care. Any amendment which inhibits the ability of state or local governments to plan a continuum of care delivery system or allocate resources for AIDS treatment would undermine the intent of this important legislation.

Further, the autonomy of state public health laws should be respected. Since the onset of AIDS, states have enacted laws based on specific need. We strongly oppose any amendment that would place conditions on the receipt of grant funding beyond current grant application requirements.

We ask for your help in opposing possible amendments which would override state law and undermine the very premises of this important legislation. State flexibility to administer HIV-disease programs and establish HIV public health policy should be protected if we are to continue to effectively help individuals and families with HIV-disease.

Sincerely,

GOV. RICHARD F. CELESTE,
*Chairman, Committee on Human Resources.*

---

NATIONAL ASSOCIATION OF COUNTIES,
*Washington, DC, May 3, 1990.*

Hon. EDWARD M. KENNEDY,
*U.S. Senate, Washington, DC.*

DEAR SENATOR KENNEDY: When the Comprehensive AIDS Resources Emergency Act of 1990 (S. 2240) reaches the floor, we urge you and Senator Hatch to reject any amendments restricting state and county flexibility in fighting this public health crisis. In particular, we oppose any amendments requiring states and counties to administer mandatory testing for specific populations or the imposition of mandatory contact tracing. Moreover, we oppose tying the receipt of federal funds to requirements not already in the bill as it passed the Committee. Such amendments would be a poor and inefficient use of scarce federal dollars. State legislatures, governors and local officials should continue to have flexibility in responding to the epidemic.

Thank you for your efforts.

Sincerely,

JOHN P. THOMAS,
*Executive Director.*

---

ASSOCIATION OF STATE AND TERRITORIAL HEALTH OFFICIALS,
*McLean, VA, April 30, 1990.*

Hon. EDWARD M. KENNEDY and ORRIN HATCH,
*Chairman and Ranking Minority Member, Committee on Labor and Human Resources, U.S. Senate, Washington, DC.*

DEAR SENATORS: On behalf of the Association of State and Territorial Health Officials (ASTHO), which represents the chief health officer from each state, I am writing in strong support of S. 2240, the Comprehensive AIDS Resources Emergency (CARE) Act, as a long awaited infusion of desperately needed federal dollars to support the delivery of health and social services to individuals and families with HIV disease. ASTHO applauds the sponsors of this legislation for allowing flexibility for states to fashion care networks responsive to their individual needs. To this end, ASTHO opposes any amendments to this bill that would mandate specific state spending and regulatory activities such as mandatory contact tracing and partner notification, mandatory HIV testing, and criminalization procedings against HIV positive individuals.

Requiring the implementation of specific laws and administrative policies as a precondition of receiving federal funds will defeat the intent of this much-needed legislation. In addition, federal public health requirements are counter to the longstanding tradition that state government is charged with the protection of the public health. States take this responsibility very seriously and have worked diligently, since the onset of the AIDS epidemic, to put in place laws which take action based on specific needs and availability of resources.

For these critical reasons, we urge you to quickly pass the Comprehensive AIDS Resources Emergency Act of 1990 without amendments.

Sincerely,

H. DENMAN SCOTT, M.D.,
*President, Association of State and Territorial Health Officials.*

---

NATIONAL CONFERENCE OF STATE LEGISLATURES,
*Washington, DC, May 4, 1990.*

Hon. EDWARD M. KENNEDY,
*U.S. Senate, Washington, DC.*

DEAR SENATOR KENNEDY: On behalf of the National Conference of State Legislatures, I am writing to reaffirm our support of S. 2240, the Comprehensive AIDS Resources Emergency Act, and to urge prompt consideration of this important legislation. NCSL supports the CARE bill because it provides needed federal resources, and it permits states and localities to design innovative programs and services for members of their communities.

The CARE bill recognizes that states and localities are best equipped to determine the special needs of the citizens in their jurisdictions, the most effective methods for reaching special populations, and the types of services they need. Restrictive amendments, mandating who should be served and the types of services provided, will limit the ability of states and localities to establish effective programs responsive to the special needs of their citizens.

We urge you to support S. 2240 without amendments that would impede the flexibility of states and localities to design and implement programs designed to meet the particular needs of the citizens in their jurisdictions and address the special challenges that AIDS brings to every state and community.

Sincerely,

CARL D. TUBBESING,
*Director, Washington Office.*

THE IMPACT OF MANDATORY REPORTING OF HIV SEROPOSITIVE PERSONS IN SOUTH CAROLINA

(By Wayne D. Johnson, *Francisco S Sy*, KL Jackson University of South Carolina School of Public Health, Columbia SC)

*Objective.* To characterize changes in attendance at an alternate HIV test site in Charleston, SC, after implementation of a statewide policy effective Feb. 17, 1986, which requires that the name and address of persons found seropositive in any public or private setting be reported to the state health department.

*Methods.* Demographics including age, sex, race, and risk behavior were gathered on 990 clients at the alternate test site in the first 24 months of testing from May 1985 to May 1987. Poisson analysis was used to describe changes in the monthly rate of attendance by each demographic and risk behavior group and by HIV antibody status.

*Results.* The rate of monthly attendance by men reporting homosexual activity decreased by 51%. Attendance by persons with HIV antibody positive results decreased by 43%. Blood transfusion recipients and persons reporting no known risk contributed to an overall increase in clinic attendance of 8%.

*Conclusion.* The current policy of mandatory reporting of HIV seropositive persons in South Carolina is associated with a decrease in attendance for testing and counselling by individuals most at risk for exposure to HIV.

SURVEILLANCE OF AIDS AND MARKER INFECTIONS

UNDERREPORTING OF AIDS CASES, SOUTH CAROLINA, 1986–1987

(*Conway, George A.**, and **, Niemeyer BL**, Rion P**, Pursley C**, Cruz C**, Heath CW, Jr.**, et al.)

*Centers for Disease Control, Atlanta, Georgia, USA, **South Carolina Department of Health and Environmental Control, Columbia, SC.

*Objectives:* To assess the completeness and accuracy of AIDS case reporting in South Carolina.

*Methods:* Approximately 600,000 hospital discharge billing records from January 1986 through June 1987 were searched by computer for AIDS-defining conditions. The resulting 1,513 clinical records were manually reviewed.

*Results:* Of these, records for 351 discharges for 163 individuals were classified as being definitely AIDS-related by the 8/87 revised CDC AIDS case definition. 153 of these individuals met the older (pre 8/87) case definition, and should have been reported to the State AIDS case registry. After controlling for reporting lags, 92 of these were indeed reported. Thus, 39.9% of all AIDS cases from the State for the study interval were not reported. Reported versus non-reported groups were not significantly different by age, race, sex, risk behavior, primary clinical diagnosis, or employment status. Individuals receiving AZT were significantly more likely to have been reported ($p < .001$). Percentage reporting by hospital ranged from 18/20 (90%) down to 0/4 (0%). There was also a considerable range in reporting compliance among physicians.

*Conclusions:* There was considerable underreporting of AIDS cases in South Carolina for the study interval. Similar studies should be repeated in other states, and may have important implications for the interpretation of surveillance data and for planning in the epidemic.

---

ANONYMOUS VS CONFIDENTIAL HUMAN IMMUNODEFICIENCY VIRUS (HIV) TESTING: RESULTS OF A TRIAL IN OREGON

(*LJ Fehrs1*, D Fleming2, LR Foster2, RO McAlister2, V Fox3, R Conrad2 1Centers for Disease Control 2Oregon State Health Division 3Multnomah County Health Department.)

*Objective.* From August 1986 to March 1987, a trial was conducted in Oregon to determine whether the availability of anonymous HIV counseling and testing draws clients who would not otherwise seek services.

*Methods.* Before December 2, 1986, all public HIV testing was confidential (named). Demographic and risk factor information for all clients was collected. Beginning in December, clients were offered the option of either anonymous or confidential services. A supplemental questionnaire was administered to all clients. *Results.* Questionnaire responses indicated that the availability of anonymity resulted in an increase in demand for testing of 125% for homosexual men, 56% for female prostitutes, 17% for IV drug users, and 32% for other clients. The number of homosexual clients tested per month increased in a step-wise fashion from a mean of 42 during the 4 months before the trial to 108 during the 4 months after (P=0.003). During the same time, the number of homosexual clients tested did not increase at public sites in Colorado or California or private sites in Oregon. The number of seropositive persons identified during the 3.5 months after anonymity became available doubled from the 3.5 months before. The average time that homosexual men drawn by anonymity reported that they waited between deciding that they wanted testing and being tested dropped from 12 months in December to 5 months in February (P=0.001). *Conclusion.* The availability of anonymous HIV counseling and testing preferentially drew homosexual men, the population currently at highest risk for infection in Oregon.

---

[From the Lancet, Aug. 13, 1988]

TRIAL OF ANONYMOUS VERSUS CONFIDENTIAL HUMAN IMMUNODEFICIENCY VIRUS TESTING

Laura J. Fehis, Division of Field Services assigned to Oregon State Health Division, Epidemeology Program Office, Centers for Disease Control, Atlanta, Georgia, USA; David Fleming, Laurence R. Foster, and Robert O. McAlister, Office of Health Status Monitoring, Oregon State Health Division, Portland Oregon; Victor Fox and Steven Modesitt, Multnomah County Health Department, Portland, Oregon; Robert Conrad, Public Health Laboratory, Oregon State Health Division, Portland, Oregon.

Before December, 1986, all public human immunodeficiency virus (HIV) testing in Oregon was done confidentially (using names). In December, clients were offered the option of either anonymous or confidential services. As judged by questionnaire responses, the availability of anonymity increased overall demend for testing by 50%: 125% for homosexual/bisexual (gay) men, 56% for female prostitutes, 17% for intravenous drug users, and 32% for other clients. The number of gay clients who had tests increased from a mean of 42 per month during the 4 months before anonymity was available to 108 per month during the 4 months after, whereas, at public sites in Colorado or California and private sites in Oregon, the number of gay clients tested did not increase. Twice as many seropositive persons were indentified during the 3½ months after anonymity became available (n=85) as in the 3½ months before (n=36). Thus, availability of anonymous HIV testing and counselling drew gay men who had not sought services under a confidential testing system.

INTRODUCTION

In 1985, state and local health departments in the United States made antibody testing for human immunodeficiency virus (HIV) infection available at public testing sites. These programmes were designed to provide an alternative to blood donation for persons who wanted to know their HIV antibody status, but they now offer comprehensive counselling and testing and are thus a primary means of preventing the spread of HIV infection. However, there has been controversy over whether these programmes should offer annonymous testing. In some states public HIV testing is offered only after clients have been asked for personal identifying information, while in others some or all of public HIV testing is offered anonymously and clients are identified by number only.

Those who favour the latter system claim that the option of anonymity attracts clients who would not otherwise present for counselling and testing. We examined this notion by conducting a trial of offering anonymous testing in Oregon.

METHODS

From August, 1986, to March, 1987, county health departments provided all public HIV counselling and testing in Oregon. Before December, 1986, only confidential HIV counselling and testing were offered. Under confidential testing, clients were asked for their name, birthdate, address, and telephone number, but no attempt was made to verify responses. The information was stored confidentially and was not forwarded to the testing laboratory or to the Oregon State Health Division.

In December, 1986, 25 Oregon counties, including the city of Portland, began offering anonymous as well as confidential HIV counseling and testing. The availability of anonymous testing was first announced to the public through a press release on the day before anonymous testing became available and was widely publicised in the media. Three sites that tested small numbers of clients declined to participate.

From the start of the trial, clients received pre-test counseling without being asked to identify themselves. They were then provided with an information sheet describing the differences between anonymous and confidential testing and were asked to choose one option. Clients who chose anonymous testing were identified by number only. Clients who chose confidential testing were handled as before the trial. Demographic and risk factor data were collected from the serology form submitted by the testing site to the Public Health Laboratory. Men who reported that they had a history of homosexual or bisexual contact were defined as gay. Analysis of demographic, risk factor, questionnaire, and serological data was restricted to clients being tested for HIV antibody for the first time. Additional information was collected from a self-administered client questionnaire. This information included knowledge of the availability of anonymous testing, assessment of whether it was the availability of anonymity that had drawn the client to testing, self-assessed risk of exposure to someone with HIV infection in such a way that client could be infected, and waiting time for client between first deciding that he or she wanted testing and actually coming in for testing. On March 15, 1987, use of the questionnaire was discontinued because of the increase in demand for testing that occurred after the Centers for Disease Control recommendations on testing of multiply-transfused persons.

According to responses to these questions, clients were classified into three groups: those stating that they knew anonymous testing was available and that they would not otherwise have come for counselling; those who either did not know anonymous testing was available, or did know but stated that they would have come anyway; and those who stated that they knew anonymous testing was available, but were not sure whether they would have come if the only option had been confidential testing. We estimated the impact of anonymous testing by calculating the ratio of the number of persons who would not have come in the absence of anonymous testing to the number who would have come if confidential testing had been the only option. This ratio excluded those clients who were undecided.

All blood specimens were tested for HIV antibody by enzyme immunoassay (EIA). Specimens non-reactive by EIA were reported as negative. Repeatedly reactive specimens were tested by immunofluorescent antibody or western blot. A positive specimen was defined as one repeatedly reactive by EIA and either positive or equivocal on confirmatory testing.

RESULTS

From August to November, 1986, 363 first-time clients were tested. From December, 1986, to March 15, 1987 (after the anonymous testing option was available) the number was 1250. Of the 1613 total clients, 63.5% were male and 96.2% were white. Percentages positive for HIV antibody are shown in table I.

TABLE I—SEROPREVALENCE BY RISK FACTOR, FIRST-TIME CLIENTS, AUGUST 1986 TO MARCH 15, 1987

| Risk factor | No. | Percent of all clients | HIV antibody positive | |
|---|---|---|---|---|
| | | | No. | Percent of risk group |
| Gay non-iv drug user | 468 | 29–0 | 88 | 18–8 |
| Gay iv drug user | 70 | 4–3 | 23 | 32–9 |
| Heterosexual IV drug user | 212 | 13–1 | 4 | 1–9 |
| Female prostitute [1] | 51 | 3–2 | 1 | 2–0 |
| Hemophiliac | 2 | 0–1 | 2 | 100–0 |
| High-risk partner only | 627 | 38–9 | 4 | 0–6 |
| Other | 214 | 13–3 | 1 | 0–5 |
| Overall | 1,613 | 100–0 | 122 | 7–6 |

[1] Includes 31 who were also iv drug users.

Of the 1250 clients tested after anonymous testing was available, 1198 provided information on both their awareness of the availability of anonymous testing and whether they would have come for testing if only confidential testing had been offered. 29% stated that they would not have come if the option had been only confidential testing; 58% either did not know that anonymous testing was available (307) or stated that they would have come anyway (388); and 13% were unsure whether the option of anonymity had drawn them to testing. 11% of the clients drawn by anonymity ultimately chose confidential testing. Conversely, 47% of the clients who stated that they would have come under a confidential system chose to be tested anonymously (table II).

TABLE II—CHOICE OF TESTING BY CLIENT GROUP DEC. 2, 1986 TO MAR. 15, 1987 [1]

| Client group | No. | Percent of all clients | Testing option selected No. |
|---|---|---|---|
| Would not have come without anonymity. | 343 | 29 | Anonymous 305 (89%). Confidential 38 (11%). |
| Would have come without anonymity. | 695 | 58 | Anonymous 323 (46%). Confidential 372 (54%). |

TABLE II—CHOICE OF TESTING BY CLIENT GROUP DEC. 2, 1986 TO MAR. 15, 1987 [1]—Continued

| Client group | No. | Percent of all clients | Testing option selected No. |
|---|---|---|---|
| Undecided | 160 | 13 | Anonymous 142 (89%). Confidential 18 (11%). |

[1] Excludes 52 persons for whom complete data were not available.

Risk factor for HIV infection was strongly associated with the likelihood that a client had been drawn to testing by the option of anonymity: 49% of gay men tested after anonymous testing became available said that they would not have come if only confidential testing had been offered, compared with 13% of iv drug users, 30% of female prostitutes, 21% of persons with a heterosexual high-risk partner, and 21% of other clients. Gay men were 2:4 times more likely than non-gay men to say that they would not have been tested had anonymous testing not been offered ($p<0.001$). As judged by these subjective responses, demand for testing among gay men increased 125% as a result of the availability of anonymity, compared with 17% for heterosexual iv drug users, 56% for female prostitutes, 33% for persons with high-risk heterosexual partners only, and 31% for other persons.

The validity of these subjective data was assessed by examining the temporal relation between demand for testing and availability of anonymity. Demand for testing among gay men increased sharply from a median of 42 per month in the 4 months before anonymity was offered to a mean of 108 per month in the 4 months after anonymous testing became available ($p=0.03$, Mann-Whitney-U test). In contrast, the demand for testing in non-gay clients increased steadily throughout this period, and was not similarly affected by the anonymous option.

The conclusion that the sharp increase in demand from gay clients resulted from the anonymous option depends on the assumption that demand among gay clients would have remained constant had anonymous testing not been available. Data on number of clients tested, by risk group, were examined for three settings in the western United States—Colorado, here confidential testing is the only public testing option; California, where state-funded HIV testing is conducted anonymously; and private sites in Oregon that use the state Public Health Laboratory for testing. In all three settings, testing among gay men remained steady from August, 1986, through March, 1987 (Dillion B, AIDS Education and Risk Reduction, Colorado Department of Health, and Ramirez-Rude A, Office of AIDS, Department of Health Services, State of California, personal communications). Demand among non-gay clients in all three settings showed the steady increase seen in Oregon public sites.

The availability of an anonymous testing option in Oregon was also associated with a decrease in the length of time that gay clients reported waiting between deciding that they wanted testing and obtaining counselling and testing. In December, gay clients who would not have come in but for anonymity stated that they had been waiting a mean of 12 months; this waiting period decreased to a mean of 5 months by February. In contrast, the average waiting period for gay clients who stated that they would have come even if only confidential testing had been available remained constant at 4 months from December through February.

Gay men who judged themselves likely to be exposed to someone with HIV infection in such a way that they could be infected were more likely to be antibody positive. 55% (16/29) of those who stated that they were certain that they could have been so exposed were antibody positive compared with 27% (42/154) of those who thought that it was likely, 11% (11/99) of those who thought it was unlikely, and 7% (4/58) of those who thought it was very unlikely. 18% (12/67) of clients who did not know their likelihood of exposure and 25% (1/4) of clients who gave no response were antibody positive. Neither actual nor perceived antibody status was associated with the choice of anonymous or confidential testing.

85 clients tested positive during the 31 months after the trial of anonymous testing began, compared with 36 positive in the 3½ months before the trial—an increase of 136%. 95% (81/85) of the clients who tested positive after the trial began were gay; of these, (39/81) stated that they would not have come in if the only option had been confidential testing, 41% (33/81) said they would have, and 11% (9/81) were undecided.

94% of clients received pre-test counseling and testing returned for test results and post-test counseling, and this proportion was almost identical for the anonymous and confidential groups and for gay and non-gay clients.

DISCUSSION

In this trial, the option of anonymity seems to have increased testing by 50% overall and by 125% among gay men. There was less impact on demand for testing among female prostitutes and still less among IV drug users. The number of seropositive persons identified was twice that before the trial.

As well as drawing clients who were averse to confidential testing, the option of anonymous testing shortened the time that gay clients said they waited before coming for counselling and testing. To the extent that HIV counselling and testing is of value in changing behaviours that lead to the spread of HIV infection, the ability to draw high-risk clients without delay is advantageous.

The effect of an anonymous testing option on demand for HIV counselling and testing may differ in other areas. We tried to limit the ability of individuals to affect the outcome of the study by giving no advance notice to the public of the trial of anonymous testing and by restricting our analyses to clients being tested for the first time. The effect of anonymity on demand for testing may be time-limited; however, demand for testing among Oregon gay men through September, 1987, has continued to be more than double that seen before anonymity became available. Furthermore, some of the clients who stated that they would not have come for testing unless assured of anonymity might eventually have come anyway, but anonymity seems to have drawn them sooner to counselling and testing.

There are potential disadvantages as well as advantages to anonymity. In particular, it prevents a counsellor from contacting clients who do not return for test results from recontacting clients in cases of laboratory error. HIV counselling and testing centres in other areas might evaluate the results in Oregon in the light of the goals of their testing programme. A flexible HIV testing programme should consider offering both confidential and anonymous HIV testing—confidential testing in some settings such as prenatal or sexually transmitted disease clinics, and an option of either anonymous testing or confidential testing in others.

In Oregon, anonymity provided a strategy that preferentially drew gay males, the population in the state currently at highest risk for infection. As groups at risk for HIV infection and public perception of AIDS change over time, it will be necessary to periodically re-evaluate the impact of anonymous testing:

We thank the county health departments of Oregon for their cooperation with this study; the AIDS programmes in Colorado and California for providing data on demand for HIV testing in their states; and Derrick Diggs, Peg Murray, Geri Washington, and Joyce Grant-Worley for their assistance with data management and entry.

Mr. LAUTENBERG. Mr. President, are the chairman and ranking minority member of the Senate Labor and Human Resources Committee aware of the concern I have with title I of this legislation?

Mr. KENNEDY. Yes. I am well aware of the concern the Senator has with the provision under title I that requires a primary metropolitan statistical area to have 2,000 AIDS cases reported to the Centers for Disease Control in order to qualify for emergency relief under title I of the bill. The Senator has made it very clear to me that he is concerned that the bill overlooks the PMSA of Jersey City, NJ, because it considers only numbers of reported AIDS cases and does not take the population of the area into consideration. The Senator has made it clear that he thinks consideration should be given to incidence rates in determining title I eligibility.

The PMSA of Jersey City, which includes all of Hudson County, has the third highest incidence rate in the Nation, according to the Centers For Disease Control. It has more than 1,440 AIDS cases. And it has a population of 543,076. This means that 0.265 percent of the population in the PMSA of Jersey City has AIDS. Clearly, this is one of the most heavily impacted areas in the Nation. I understand the Senator has submitted for the RECORD an analysis prepared by the Centers for Disease Control of the AIDS incidence rates of metropolitan areas with more than 500,000 residents which confirms Jersey City's incidence rate.

Mr. HATCH. The Senator from New Jersey has made a very persuasive case that incidence rates should be considered and that Jersey City should be eligible to receive assistance under title I of the bill of S. 2240.

Mr. LAUTENBERG. Are the chairman and ranking minority member aware that the House version of this bill, H.R. 4785, which was reported by the House Energy and Commerce Committee yesterday, includes language I proposed that would make an area's incidence rate a factor in determining eligibility for emergency relief grants? This was a matter that had

the active and critical support as well as Representative GUARINI and Representative RINALDO. Are they prepared to accept this language in conference?

Mr. KENNEDY. Yes. I am aware that the bill reported by the Energy and Commerce Committee includes language that would enable a PMSA that has an AIDS incidence rate that exceeds 0.25 percent of the population to qualify for emergency relief under title II of the House bill. Title II is very similar to title I of S. 2240.

The Senator urged the Senate Labor and Human Resources Committee to include this language in title I of S. 2240 before the full committee marked up the bill. He wrote me a persuasive letter submitted the amendment to me. He also testified before the House Health and Environment Subcommittee of the Energy and Commerce Committee on this amendment, and asked that the language be included in the House version of the bill.

The Senator has succeeded. The language he proposed is included in the House version of the bill. I am prepared to accept this language that would make Jersey City eligible for emergency relief grants under title I of the Senate bill during the conference on this legislation.

The Senator has been a strong advocate for Jersey City. He has raised Jersey City's case with me at every available opportunity. He has been tireless in his efforts to make a modification to title I of S. 2240 so Jersey City can receive the emergency relief it needs. He has convinced me that incidence rates should be a consideration for determining title I eligibility and that we should not overlook Jersey City in title I of the bill. I will make the necessary modification during the conference to ensure that an area with more than 0.25 percent of its population infected with AIDS will be eligible for relief under title I of the bill.

The Senator has been a strong advocate for this entire bill. He was one of the original cosponsors of this legislation.

Mr. LAUTENBERG. I can assure the chairman that as a member of the Senate Appropriations Committee I plan to work vigorously with my colleagues in an effort to secure adequate funding for this landmark legislation.

Mr. HATCH. I am prepared to accept the House language on incidence rates during the conference on this legislation as well. I think it is good language and that it addresses an area that has been overlooked in the Senate version of the bill.

JERSEY CITY INCLUSION IN TITLE I

Mr. BRADLEY. Mr. President, I join my distinguished colleague from my home State of New Jersey, Senator LAUTENBERG, to urge the distinguished chairman of the Committee on Labor and Human Resources, Mr. KENNEDY to resolve the issue of Jersey City's eligibility for CARE title I funds in conference.

The thrust of this very important bill is to provide emergency funds to health care facilities that are disproportionately serving large numbers of AIDS patients. The definition of eligibility for communities who can apply for emergency relief funds does not fully take into account the impact of the disease on Jersey City, NJ. Jersey City has nearly 1,500 AIDS cases and a per capita incidence that is among the highest in the country. Nearly 0.26 percent of the Jersey City population has AIDS. This enormous incidence of disease places a tremendous burden on the health facilities serving the Jersey City population. The percentage of patients that these facilities see with AIDS is among the highest in the Nation and thus the financial impact to them is considerable. By all counts, Jersey City facilities need emergency relief as much, if not more so, than facilities in larger cities and communities.

Mr. President, I understand that the House bill does accommodate funding for Jersey City. I urge my colleague the distinguished chairman of the Committee on Labor and Human Resources, as part of the conference on the bill, to include Jersey City for eligibility for the emergency relief funds.

Mr. KENNEDY. I have already given that commitment.

Mr. BRADLEY. I wish to thank the distinguished senior Senator from Massachusetts [Mr. KENNEDY] for recognizing the special need of Jersey City for emergency AIDS relief. I thank him for his willingness to support the House provision that allows Jersey City to access these funds.

Mr. LAUTENBERG. Mr. President, I rise in strong support of the Comprehensive AIDS Resources Emergency Act.

I want to congratulate the chairman and ranking minority member of the Senate Labor and Human Resources Committee for the leadership they have demonstrated in putting this legislation together. We need AIDS disaster relief and we need it now. That is why I joined as an original cosponsor of this legislation.

The AIDS epidemic in this Nation has reached crisis proportions. To date, more than 121,000 AIDS cases have been reported to the Centers for Disease Control. Unfortunately, more than 8,000 of those cases have been reported from my own State of New Jersey—one of the five States nationwide that account for 64 percent of all AIDS cases.

In our cities and counties throughout the Nation, hospitals, clinics, and health care providers are struggling to provide services to AIDS victims. But in many areas hardest hit by the AIDS epidemic—particularly our urban areas—it has been an uphill battle.

Public health systems are being pushed to the absolute limits as they struggle to fight the AIDS epidemic. Our urban hospitals—already overcrowded and short of staff—are bursting at the seams trying to serve increasing numbers of AIDS patients. It is hard to find the beds. It is hard to find the money to care for AIDS victims who lack insurance—a job, even a home.

The AIDS epidemic is a national disaster and we need to treat it that way. We must respond quickly.

When Hurricane Hugo struck South Carolina, we responded immediately with assistance to help devastated cities and counties recover from the damage.

When an earthquake rocked northern California, we responded immediately with the assistance needed to rebuild roads and bridges—to help San Francisco pick up the broken pieces.

When a drought threatened our farm States, we responded with assistance to avert a crisis in the agricultural community—to sustain the livelihood of our farmers.

The AIDS disaster is no different. And we must respond in the same way. We must provide relief to the areas that have been hard struck by the AIDS epidemic. We must provide relief to the areas where the epidemic is threatening public health systems and devastating entire communities.

Our hospitals and cities and counties desperately need the help offered by the Comprehensive Aids Resources Emergency Act of 1990. We should give them that help immediately.

Mr. President, one area that is in desperate need of the emergency relief this bill would provide is Newark, NJ. Newark is truly facing a crisis in AIDS care. It houses the only State public hospital in all of New Jersey, which provides more indigent care and services more patients than any other facility in the entire State.

Newark has one of the highest rates of AIDS related to intravenous drug use in the Nation as well as one of the most severe homeless problems. It also has one of the most severe indigent care problems in the country; 80 percent of all Newark cases are directly or indirectly intravenous drug related.

Newark also treats a staggeringly high number of pediatric AIDS babies; 600 babies on average are born annually in New Jersey to HIV-infected mothers and are symptomatically -infected children. The majority of these births are in the Newark area.

A recent survey of babies born at Newark's University Hospital showed that 1 in 22 was born to an AIDS-infected mother. That is 1 in 22 too many for this Senator. Newark's prevalency rate is said to be closer to the terrifying prevalency rates in central Africa.

In 1988, for the AIDS cases served by UMDNJ/University Hospital, 91 percent with a known route of transmission were attributable to intravenous drug abusers, 60 percent were male and 40 percent were female. Nationally 91 percent of cases have occurred in males, and only 9 percent in females, 92 percent were members of minority groups, 49 percent had no insurance, and 60 percent were in tenuous housing or homeless.

Clearly, Newark is facing a range of AIDS-related problems and is in dire need of emergency relief that this bill would provide. An article from the Washington Post from last year highlights the AIDS problems facing Newark and underscores the desperate need for the funds this legislation would provide. A recent article from the New York Times highlights the tremendous need for assistance as well. I ask unanimous consent that copies of these articles be printed in the RECORD.

The PRESIDING OFFICER. Without objection it is so ordered.

(See exhibit 1.)

Mr. LAUTENBERG. Mr. President, while I strongly support this legislation and am convinced that the resources it would provide are sorely needed by cities and counties that are facing an AIDS health care crisis, I do have a serious concern with the bill. I intended to offer an amendment to address my concern. The concern I have with this legislation, and which my amendment would have addressed, is with title I of the bill. Title I is the section of the legislation that would provide grants for emergency assistance to areas with substantial need for services for AIDS.

To qualify for assistance under title I, a metropolitan area must have reported more than 2,000 cases of AIDS to the Centers for Disease Control. Under the bill, 13 areas—including Newark, NJ—would automatically qualify for emergency grants to provide relief for their public health systems, because they have more than 2,000 cases.

This type of assistance is critical. But I am concerned that the bill misses one of the hardest hit areas in the country. It misses that area because it looks at just one factor—total number of cases, 2,600 cases in an area of 5 million people—like Philadelphia—just is not the same as 2,000 cases, or even 1,500 cases in an area of 500,000—like Jersey City—Hudson County, NJ.

Jersey City is reeling under a much bigger burden. And it is our job to help that smaller city. In Philadelphia, those 2,600 cases are spread over 8 counties with almost 5 million people. In Chicago, there are 3,100 cases among over 6 million people. In Washington, DC there area 3,600 cases among nearly 4 million people. It is the same with most of the other areas that qualify for emergency relief under title I of the bill.

The burden of caring for these cases is shared by a broader base of governments and taxpayers. These larger cities need help. But so does Jersey City.

It is a much different story in Jersey City—Hudson County. It is one of the hardest hit areas in the country. The Centers for Disease Control says that it is the third most heavily impacted area in the Nation.

The area has had to cope with over 1,400 AIDS cases. But it is a small area of just over 500,000. This means that 0.26 percent of the population suffers from AIDS. That is five times the incidence rate of Philadelphia or Chicago. It's 2½ times the incidence rate of Washington, DC. In fact, its incidence rate is higher than all but two of the areas that qualify for title I assistance under the bill.

Unlike many of the areas that will receive title I assistance under the legislation, only one county is in the primary metropolitan statistical area [PMSA] that includes Jersey City. For that reason, only AIDS cases in that one county are counted toward the 2,000 threshold.

At the same time, because of the Census Bureau's definition of PMSA's other areas that qualify for title I assistance can count AIDS cases from several counties—including a total population several times the size of Jersey City—to reach the 2,000 threshold. For example, the PMSA in which the city of which Philadelphia is included includes eight counties, three of which are in my State of New Jersey.

Jersey City should not be prevented from qualifying under title I of the bill because the Census Bureau has included only one county in that particular PMSA. If for example, the PMSA in which Jersey City is located included two other counties, neighboring Bergen and Passaic Counties, nearly 2,500 AIDS cases would be attributed to the area, more than the 2,000 needed to qualify for title I funding. The total population for the three counties—roughly 1.3 million—would still be less than the population of other PMSA's that are eligible for title I assistance.

Mr. President, the modification to the bill that I intended to propose would simply have made incidence rates a factor in determining title I eligibility. It would have enabled an area to qualify for title I emergency relief assistance if it has 2,000 cases or if it has an incidence rate of AIDS that exceeds 0.2 percent of the population.

Incidence rates are a better indicator than raw numbers of cases of true burden that is being placed on an area. The whole rationale for title I assistance is to help areas that are disproportionately affected by AIDS. But we cannot really determine which areas are disproportionately affected by AIDS if we do not take the population of AIDS inflicted areas into consideration.

The amendment I intended to offer would have changed the inequity of targeting funds to cities that have the highest numbers of AIDS cases ever reported to the Centers for Disease Control, while failing to provide emergency relief to the area in the Nation with the third highest AIDS incidence rate in the Nation.

It would have enabled the heavily impacted area of Jersey City, Hudson County to qualify for assistance under title I of the bill. No other areas would been added. The only other areas that could possibly meet that standard—San Francisco, New York, Newark, Miami, and San Juan—already qualify under the 2,000 threshold. Making this modification to include Jersey City would certainly be consistent with the goal of providing assistance to the areas in greatest need.

Jersey City—because of its high incidence rate—is truly an AIDS epicenter and we have an obligation to provide it with emergency relief. I ask unanimous consent that a copy of an analysis prepared by the Centers for Disease Control which shows Jersey City's AIDS incidence rate relative to all other areas be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2)

Mr. LAUTENBERG. Mr. President, I urged the Senate Labor and Human Resources Committee to include this language in title I of the bill before full committee markup. I wrote a letter and submitted an amendment to the chairman and ranking minority member of the committee urging that a modification be made to include incidence rates in title I of the bill. I ask unanimous consent that a copy of that letter be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 3.)

Mr. LAUTENBERG. I also testified before the House Health and Environment Subcommittee of the Energy and Commerce Committee on this amendment and asked that the language be included in the House version of the bill, H.R. 4785. I ask unanimous consent that a copy of the letter I submitted to the chairman of the House Health and Environment Subcommittee during my testimony urging the chairman to address this issue be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 4.)

Mr. LAUTENBERG. The House Energy and Commerce Committee re-

ported the House version of this legislation yesterday. I am very pleased that the House bill includes a provision that addresses this concern. The chairman and ranking minority member of the Labor and Human Resources Committee are aware that this provision has been included in the House bill and have given me assurance that they will accept this language during conference. For that reason, I am not going to offer an amendment to title I of this bill.

Mr. President, I am not alone in wanting modify title I to include incidence rates. The Citizens Commission on AIDS for New York City and northern New Jersey strongly supports my effort to have Jersey City included in title I of the bill. Like me, the Citizens Commission supports the CARE bill. But it shares my deep concern about the fact that Jersey City does not qualify for emergency relief under title I of the bill.

In a May 11 letter to the chairman of the Labor and Human Resources Committee in support of the language I am proposing, the Citizens Commission wrote "Jersey City is desperately struggling to meet the health care and social services needs resulting from the epidemics of AIDS and drug use. Its hospitals, clinics, and community-based organizations are as overcrowded and underfunded as those of cities meeting the bill's current eligibility criteria. We strongly recommend that Jersey City be included in title I among the localities in greatest need of Federal assistance."

The letter says "* * * the rationale for targeting emergency assistance to cities under title I—to assist localities disproportionately affected by HIV—applies equally to Jersey City. And because of its extremely high incidence rate, perhaps more so than most of the cities which meet the threshold of 2,000 cases." It goes on to say that the amendment "rectifies the inequity of targeting funds to localities with the highest actual numbers of AIDS cases, while failing to sustain the city with the third highest rate of AIDS in the country."

The New Jersey Hospital Association—a member of the American Hospital Association and a strong supporter of the CARE bill—supports this amendment as well. In a May 9 letter to the chairman, the president of the New Jersey Hospital Association said that "as the bill is currently drafted, hospitals in Jersey City, Hudson County would be excluded from Title I assistance of that Act. If one looks at the per capita rate of AIDS in Jersey City, it becomes apparent that the area is one of the most heavily impacted metropolitan areas in the country * * * I respectfully ask that you support Senator FRANK LAUTENBERG'S amendment which would make hospitals in this heavily impacted area eligible for the resources they need."

Listen to what a constituent of mine who lives in Hoboken, NJ, and who works for the American Foundation for AIDS Research [AmFAR]—another very strong supporter of this legislation—has to say about the AIDS situation in Hudson County and the need for my amendment. In a letter to Senator KENNEDY, this person wrote:

"I'm well versed in the complexities of AIDS and am familiar with the situation in Hudson County. Quite simply, it is the worst-case AIDS scenario. Most of Hudson County's people with AIDS and people who are HIV-positive are IV drug users, yet there is almost no available addiction treatment in the area. There is very little public education about AIDS * * * And because most of these people are poor, the health care they already receive is inadequate to begin with."

The letter goes on to say that "* * * granting funds to Jersey City is not making an exception; it is correcting an error in the process by which cities and areas were chosen to receive title I funds * * * Jersey City has the third highest AIDS incidence rate in the country. That it doesn't qualify for title I funds under the CARE Act is a result of the rather arbitrary way in which the Census Bureau chose to designate PMSA's, and that fact that you chose to use PMSA's as the basis for determining which cities and areas would receive funds. In most cases, your system works. But because Jersey City's PMSA is unusually small, it has a much smaller population than other PMSA's, and so its AIDS caseload doesn't reach the cutoff level * * *"

In closing, the letter says "Please do not let an arbitrary quirk of the Census Bureau keep you from fulfilling the stated goal of the CARE Act: to provide emergency funds to those cities in the United States hardest hit by the AIDS epidemic. By any rational standard, Jersey City qualifies. And if you wait, and deny Jersey City the help it needs, its AIDS caseload will rise above your cutoff line much faster than it needs to.

The modification which I proposed has support from others groups as well. The Jersey City Medical Center, a New Jersey member of the National Federal Club Executive Committee of the Human Rights Campaign Fund, and the Hudson County Executive. I ask unanimous consent that copies of their letters in support of the modification, as well as the letters that I have quoted, be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 5.)

Mr. LAUTENBERG. Mr. President, New Jersey's newspapers are filled with stories about the personal tragedies of AIDS victims in Jersey City and Hudson County. They tell stories about pediatric AIDS victims, about homeless AIDS victims, about the large numbers of women and IV drug users in Hudson County who are being devastated by the epidemic. They tell of hospitals that are knuckling under from the pressure of serving indigent AIDS victims.

People in the county who are on the front lines in the battle against AIDS—the doctors, the social workers, the community organizers, the public health workers—have told me personal stories about how the epidemic is tearing the area apart. They wonder where the money will come from to pervent the impending collapse in the health care system in the county. They wonder where they will find the money to serve the evergrowing numbers of AIDS victims, to keep the disease from spreading, and from taking more lives.

It is these people—the AIDS victims, their families, and those that are trying to help them—whom I want to help. And it is for these people, who are in dire need of emergency relief, that I have been working to modify title I of this bill to include incidence rates.

It is for people like 7-year-old Kalikique from Jersey City who died of AIDS a few years that I have been working to make this modification. Kalikique's father became infected with the AIDS virus when he was a drug user. He passed the disease onto his wife, Diane, who in turn, passed the virus through her womb to Kalikique.

When Diane and her daughter, Kalikique, were diagnosed as having AIDS, the father was near death. He weighed only 95 pounds, had to wear diapers, and gasped for breath. Just before her father died, this 7-year-old girl, knowing she would die herself from AIDS, looked at her mother and said "Mommy, mommy, I don't want to die like my daddy."

In the months leading to her death, Kalikique was in a tremendous amount of pain. She was in and out of the hospital and doctors tried to slow the disease. Obviously terrified of dying, she woke up one night and cried: "Leave me alone, God, leave me alone. I don't want to go to heaven yet."

Weakened by the disease, Kalikique ultimately died of a heart attack. She was only 7 years old.

It is for people who are trying to help and prevent tragedies like another Jersey City case, Gloria and her son, that I have been working to make this modification. Gloria is a heroin addict. She has AIDS. And she passed the disease onto her son before he was even born.

When her son was only 6 months old, he suffered a crippling stroke. Only afterward did the doctors discov-

er the cause: AIDS had ravaged his brain and spinal cord.

After suffering from the stroke, the 3-year-old child could not walk. He had to be held up by the arms because he lost control of his feet. He lost control of his mouth and he could no longer speak.

Because of AIDS, he lived his short life as a cripple. He died when he was 3.

The emergency resources provided in the CARE bill would help Jersey City combat the tragedy of pediatric AIDS. It would get more money to the hospitals and social services agencies that are treating these innocent young victims who suffer because they had the misfortune of being born to an AIDS-inflicted mother. It would provide sorely needed resources to help prevent additional youngsters like Kalikique and the crippled young boy in Jersey City from being inflicted with this deadly disease in the future.

I have been working to make this modification for those who are trying to serve homeless AIDS victims in Jersey City. Many AIDS victims in the area simply do not have anywhere to go. They are forced to live on the streets, in parks. Their families have thrown them out. They are too sick and weak to hold a job.

One former IV drug user in Hudson County summed up the tragedy by saying "If there is anything to break your will to live, it's lying on a concrete floor with no food and no friends, and worried that the one jacket or blanket that's on your back will get ripped off. It's sadder when you've been given a death sentence and you've got no place to go."

Another Jersey City AIDS victim recalled her desperate search for housing. In an interview with a New Jersey newspaper, she said, "I went through living hell. I did more running around begging, pleading, and crying for housing than anyone I know. I dragged myself. You don't even have the strength to drink a can of soda and you're running a 102 temperature. I've passed out on the busses a few times."

Community outreach workers in Hudson County tell stories about homeless AIDS victims in Hudson County who are so desperate for housing that they break the law so they will have a place to sleep. One person threw a brick through a store window so he would be arrested and have a place to sleep. Another robbed a jewelry story for the same reason. These people are so desperate and are in tremendous need of emergency relief.

The emergency resources in the CARE bill will help Jersey City combat the tragedy of homeless AIDS victims that pervades the community. By creating more treatment options for victims, it would take a huge burden off of inner-city hospitals. Hospitals will no longer be forced to choose between hospitalizing AIDS victims that no longer require hospitalization and sending them back to the streets. Emergency relief grants would provide Jersey City with resources to develop long-term care facilities for AIDS victims. It could enable Jersey City AIDS victims to receive services in nursing homes, and hospice care, and subacute facilities, and medically supported residential facilities.

It is for the people in the Hispanic Community in Jersey City who have been hard hit by the AIDS epidemic that I have been working to make this modification.

One of these victims died at Jersey City Medical Center a few years ago. He was a 36-year-old Hispanic male, homosexual, IV drug user. He was diagnosed with AIDS in 1986. For a while, he lived alone in an apartment in Jersey City, and went to the hospital for treatment. Like many AIDS victims, he was poor and was rejected by his family. Although he received Social Security and Disability, he did not have Medicaid or other health coverage to help pay the bills for his treatment.

Several months before he died, he became anemic and was going blind. His AZT therapy was discontinued, and his health continued to deteriorate rapidly. He could no longer live alone at home. But there was nowhere for him to go because there are few housing alternatives and stepdown facilities for AIDS victims in Jersey City. Consequently, he spent most of the remainder of his life in the Jersey City Medical Center until he died in December of 1988.

Brother Bob Reinke, is the director of the Franciscan Aids Initiative to Help in Hoboken, NJ, which provides services to AIDS victims. "Brother Bob" as they call him in Hudson County, says that because so much of the Hispanic community in the area is infected with AIDS, there is a greater need to make agencies more culturally sensitive, to help them overcome language barriers, to get more information about services out. The will is certainly there. Unfortunately the resources are not.

Brother Bob told me that one client had recently come across a desperate infected man who, because he could only speak Spanish, did not understand what was happening to him or where to go for help.

Another one of his clients told a story about a man in his neighborhood who committed suicide after learning he was infected. He did not know where to go for help.

Yet another Hispanic man in Hudson County committed suicide rather than endure the pain of living with AIDS. His wife, knowing that his family would not understand, told the family that their son had died of cancer in the hospital.

The emergency resources in the CARE bill will help Jersey City address these cultural and social issues. It would enable communities to expand social services and get the word out about the kind of services that are available for AIDS victims. It would enable them to provide more education about AIDS and get out more information about ways to prevent and combat the disease. It would enable those on the front lines in the battle against AIDS in Hudson County to reach more people—Hispanic, white, black.

I have been working to make this modification for those who are trying to serve the women and their families in Hudson County that have been hard hit by the AIDS epidemic. Most of these women are IV drug users. New Jersey has a very high number of women, IV drug users that are AIDS victims.

One victim is a 35-year-old white female. She is a widow. Her husband, who was also an IV drug user, died of AIDS. She lives in Hudson County with her father, mother and 14-year-old daughter. Her father has very serious health problems. And her mother is schizophrenic. So it is really the 14-year-old daughter who is taking care of her AIDS inflicted mother as well as her grandparents. It is the 14-year-old daughter who stays home from school to care for her mother who encourages her mother to go to her drug treatment program.

As this woman continues to deteriorate she will need to be moved to a facility where she can receive treatment and care that her 14-year-old daughter will no longer be able to provide. And her daughter, will need help as well. She'll need help with education and social services and mental health services, and possibly foster home placement.

But the current system in Hudson County can't provide these things. It lacks the resources. The emergency resources provided in the CARE bill would provide resources to expand social services and mental health services and support systems for the countless mothers and daughters in Jersey City that are confronting the same problem.

Jersey City Medical Center in Hudson County is also in dire need of emergency relief. The hospital serves a disproportionate share of AIDS victims. It has spent millions because so many of its patients lack health insurance. The hospital is overcrowded with AIDS patients, and it is short on staff. Ever growing numbers of AIDS patients are interfering with its ability to provide quality care for all those in need.

It deserves and needs emergency relief under title I of the bill. The emergency relief provided in the CARE bill would take a tremendous burden off this hospital which serves so many of the county's AIDS victims. It would help expand alternatives to long-term hospitalization for the county's AIDS victims. It would help relieve the hospital from the burden it faces serving countless poor patients who lack insurance.

Mr. President, it simply makes sense to modify title I to include Jersey City. The whole purpose of title I, as the committee's own report states, is to provide emergency relief to areas hardest hit by AIDS. I think the area that the Centers For Disease Control has identified as the third most heavily impacted area in the Nation should be able to qualify for title I emergency relief. That is what the language that has been included in the House bill and which the chairman and ranking minority member of the Labor and Human Resources Committee have agreed to accept in conference would do.

Mr. President, the need for assistance in heavily impacted areas is tremendous. Our cities and counties are struggling to provide sorely needed services to AIDS victims and their families. For all the people who are on the front lines in the battle against the AIDS crisis, we should pass this bill immediately.

EXHIBIT 1

[From the Washington Post, Sept. 5, 1989]

UP AGAINST IT—IN NEWARK, A PUBLIC HOSPITAL FIGHTS THE TWIN PLAGUES OF AIDS AND DRUGS

(By Sandra G. Boodman)

NEWARK.—To Juella, who is 35, AIDS seems to run in the family. Her 42-year-old husband died of the disease. So did her 27-year-old brother and her aunt. Several weeks ago, her terminally ill younger sister was released from New York's Bellevue Hospital after months of treatment for AIDS.

Unlike her relatives, Juella says, she never used intravenous drugs, which can spread the fatal virus. "I was the straight one, the one who did well in school," said Juella, who agreed to be identified only by her commonly used nickname. "I never even smoked [cigarettes] or drank."

Nonetheless she has not escaped: She apparently contracted the AIDS virus through sex with her husband. Several weeks ago, she developed a throat infection, and now she is a patient on the same floor of the same hospital where her husband died on July 6. She spends most of her time thinking about how her death will affect their three healthy children, who range in age from 10 to 19.

"The kids are always on my mind," said Juella, who became a grandmother at 32. "I worry about how they're going to handle this. They lost their father; now they're going to lose their mother. I know it's going to be very hard for them."

FUTURE OF THE EPIDEMIC

In Newark, one of the nation's poorest and most blighted cities, entire families are dying from the twin plagues of poverty: drug abuse and AIDS. Doctors here and in drug-ravaged neighborhoods of nearby New York City say it is not uncommon to see several members of the same family—typically a mother, father and several small children—dead or dying from AIDS. Nearly all are black or, like Juella, Hispanic.

AIDS, public health officials say, is decimating the population of Newark, which is believed to have one of the highest rates of infection in the world. A recent survey of babies born at Newark's University Hospital showed that 1 in 22 was born to a mother infected with the Human Immunodeficiency Virus that causes AIDS. That is similar to reports from some cities in Central Africa, where up to 25 percent of all child-bearing women are believed to be infected.

"What you're seeing here is the future of AIDS," said Eric Munoz, medical director of University Hospital.

Public hospitals like University have always taken care of the poor. But officials at dozens of public hospitals around the country say that the rapidly growing numbers of AIDS patients—many of them uninsured, desperately ill intravenous drug users, their sexual partners and babies—represent an unprecedented strain.

"The magnitude of what's happening now is amazing," said Marc H. Lory, chief executive officer of University Hospital, Newark's only public facility. "It could mean destruction for us."

Lory said his hospital is losing $30 million a year, about one fifth of its annual operating budget, caring for indigent patients, many of whom have AIDS. During one recent week, 43 percent of tested patients at the hospital had HIV and more than 400 others were enrolled in various outpatient AIDS clinics.

The impact of AIDS is not just economic. AIDS is also influencing the kind of care other patients receive, as staff and resources are shifted to the growing epidemic. And that, in turn, alters the training of a new generation of physicians.

"Every part of this hospital has been affected by this disease," Munoz said. "I think AIDS is ultimately going to be the thing that changes the rules about who gets care and what kind of care they get."

That is the conclusion of a study published last month in the Journal of the American Medical Association. That survey showed that 20 percent of urban public hospitals treat nearly 80 percent of all AIDS patients and that 5 percent of hospitals treat more than 50 percent of AIDS patients. The authors say that the demographics of AIDS, combined with the lack of housing and other less expensive alternatives to hospitalization, are precipitating major financial losses and squeezing out patients with other illnesses.

"The great concentration of AIDS patients in a few hospitals is threatening to overwhelm these [hospitals] and limit their ability to treat other patients, bringing many to the brink of rationing," said Dennis P. Andrulis, the study's principal author and president of the National Public Health and Hospital Institute.

Officials at University Hospital, a 501-bed teaching hospital for the University of Medicine and Dentistry of New Jersey, say that the AIDS patients they see tend to be poorer, sicker and harder to manage than patients they have treated in the past.

The spread of AIDS, officials say, is also making it harder to properly train University's 250 residents, who are largely seeing AIDS-related diseases rather than a broad spectrum of illness. AIDS is also complicating the already difficult problem of recruiting nurses, some of whom find caring for drug users physically and emotionally overwhelming.

MEDICAL UNDERCLASS

In New Jersey, and especially Newark—the state's largest city with a population of 312,000—drugs and AIDS are inextricably linked. Unlike most American cities, including Washington, where gay men account for at least two thirds of AIDS cases, more than 75 percent of Newark's 1,409 cases are drug-related and 90 percent are black or Hispanic. By comparison the District, which has more than twice the population of Newark, has reported 1,796 cases, 83 percent among gay men and 14 percent among drug users. Of the District's cases, 41 percent were white and 59 percent were black or Hispanic.

New Jersey also has the largest number of AIDS cases among women and ranks second in the number of pediatric cases. The Newark area ranks fourth in the number of AIDS cases reported nationally.

But unlike Washington, New York and San Francisco, all of which have large, affluent, politically sophisticated communities of gay men who founded pioneering AIDS organizations, AIDS patients in Newark are nearly always politically powerless addicts who typically avoid institutions, however well-meaning they appear to be.

"We didn't have the gay men to balance off the IV drug users," said Patricia C. Kloser, an infectious disease specialist who is clinical director of AIDS services at University, which treats more AIDS patients than any hospital in New Jersey. Because poor people traditionally delay seeking medical treatment largely because they have no money to pay for it, many AIDS patients arrive at University in terrible shape.

"We see a lot of end-stage cases where the first admission is their last," Kloser said. Last year, she said, the average span from diagnosis to death among women with AIDS at University was less than four months, far below the national average of 18 months.

The poverty of the hospital's patients is reflected in the paucity of resources available in Newark. One third of the population lives below the federal poverty line, the infant mortality rate is double the national average, the wait for drug treatment ranges from three to nine months and the percentages of homeless people is three times that of New York City.

There is no housing for AIDS patients, no hospice care and no place other than a nursing home 30 miles away that will accept patients who don't need the expensive technology of a teaching hospital and trauma center. The city's fledgling AIDS organization, the Newark Community Project for People With AIDS, was founded only last year. By contrast, its counterparts in San Francisco and New York began operating in 1981, before AIDS had been named.

Located in a mammoth L-shaped concrete complex that also houses the state's medical and dental schools, University Hospital operates at 100 percent capacity, a rate that far exceeds that of most institutions. Sometimes, the hospital is so swamped with AIDS patients, who stay an average of 19 days, more than double the national average, that they are placed in beds on surgical floors in in the recovery room. Recently, 18 people waited in the emergency room for a bed.

One of the reasons AIDS spread so quickly here, experts say, is the large number of

intravenous drug users, the popularity of shooting galleries where addicts rent or share needles and the proximity to New York City with its 200,000 intravenous drug users. Addicts commonly travel from Newark to New York City, an 18-minute train ride, to buy and use drugs.

The scars of the 1967 race riots that convulsed Newark are still visible in the blocks surrounding University. The hospital is located in the city's central ward, the most impoverished section of Newark, which has been designated by the federal government as medically underserved.

The city's first new supermarket in 20 years is being built opposite the hospital, on a street pockmarked with abandoned buildings sprayed with graffiti, vacant lots choked with weeds and sidewalks strewn with broken glass, discarded tires and stained clothing. Among the few businesses that have not fled to the suburbs are discount furniture stores, bars and "Checks 'R Us," which cashes welfare checks.

"We deal with a lot of problems that you can't fix from the inside of a hospital," said Munoz. "The fact is that you can't make people that much better by treating them in an acute care hospital and sending them back into that horror."

HOSPITAL WAR ZONE

Nowhere is that more apparent than on I-Blue, a 30-bed medical service that treats patients for cancer, heart and liver disease, diabetes, hepatitis, tuberculosis and AIDS.

"In the last two years, the whole complexion of this unit has flip-flopped," said Peggy Moore, the unit's head nurse who has worked at University since 1963. "We now consider it a rarity when a patient doesn't have AIDS."

One day last month, 20 patients on the unit had AIDS or HIV. Some were being treated for AIDS infections, others for problems that were complicated by the virus. About 10 were homeless, and most were ready for discharge but had nowhere to go. The emergency room staff was clamoring to free beds for new patients.

"Recently, I had to tell one man, 'Sir, you're either going to a shelter or you're on the street, but you have to leave," said Moore, shaking her head. "We never used to have to do that."

Because of the nature of HIV—the emaciation, incontinence and dementia that often accompany the later stages of illness—nurses spend more time with AIDS patients. Some nurses say they dislike the fact that they must neglect other patients or must spend their time caring for people whose primary goal may be shooting up, not getting better.

"It's hard on the nurses when they get somebody ambulatory again and their first priority is to get out and get more drugs," said Darlene L. Cox, the hospital's associate nursing administrator. "Nurses are only human, and they resent it."

Doctors, nurses and social workers say University's AIDS patients tend to be young and belligerent. Some attribute it to the proliferation of crack, which often renders its users violent and hypersexual, not at all like the heroin addicts the hospital is used to treating. Frequently, social workers say, addicts try to blunt the stimulating effects of crack with heroin, which acts as a sedative.

Some patients who discover they are infected with HIV increase their use of intravenous drugs. In some instances, patients get better, then disappear for a few hours to buy drugs across the street or meet a friend and shoot up in the stairwell. Some patients deal drugs out of their hospital rooms or inject heroin or cocaine smuggled in by friends directly into their intravenous lines.

A few months ago, hospital security guards broke up a drug ring operating out of one room; three other patients in adjacent rooms immediately checked out. Recently, several members of a drug gang smuggled a rifle hidden in a suitcase onto the ward, then barricaded themselves in the hospital room of a rival gang member and threatened to shoot him over a bad drug deal.

"Sometimes, I feel like I'm in Vietnam," said Moore. "But this hospital is just a microcosm of what's going on out there."

BORN DYING

The chasm between the dazzling sophistication of medical technology and the inability of a health care system to provide basic services to those who most need them is glaringly apparent in the hospital's 28-bed intensive care nursery.

This is the home of the most pitiful victims of drug-related AIDS, newborn infants little larger than squirrels, most of whose mothers are regular cocaine users. Approximately one-third were born to mothers who are also infected with HIV. Among the smallest of the so-called "cocaine babies" is a five-week-old girl who was born weighing 540 grams—1.3 pounds. She has gained 200 grams and looks barely human. Her tiny, scaly body is covered with downy black hair and bristles with needles and tubes and intravenous lines that are keeping her alive.

The only sound in the nursery, which is crammed with sophisticated equipment and an incongruous rocking chair, is the insistent beeping of monitors and the murmured conversation of the staff. Nearly all of the babies are too weak to cry. Some have heads that are flattened on one side, a consequence of the weeks they have spent lying in one position. A few are already orphans or will be soon.

"We're seeing an awful lot of babies born two or three months preterm," said nurse Evelyn J. Russell. "Mothers on the street are told, 'If you want to have an easy time, take cocaine,'" which induces premature labor, Russell added.

"Most of these babies are so sick from their respiratory problems," she continued, peering into an isolette at a baby who breathes unusually rapidly, a ventilator attached to her throat. "They can't suck properly, and they have swallowing problems." Most of these babies will remain in intensive care for at least three months, at a cost of hundreds of thousands of dollars.

The difficulty of caring for infants in such precarious health is further complicated by the chaotic life style of their mothers, some of whom are as young as 11. "Just trying to find a mother who's using drugs for a consent [to perform certain tests] is a major job," Russell said. Few mothers and virtually no fathers, visit regularly. Many are homeless and trying, themselves, to survive.

Some women who know they have AIDS or HIV continue to get pregnant, even though they know their baby has at least a 50 percent chance of contracting the disease.

Kloser treated one such woman, who contracted AIDS from her drug-using husband and proceeded to bear three children, all of whom are now dead. The mother died several months ago, a year after her husband. "She used to carry around the pictures of the kids in her wallet and show them to people," Kloser recalled. "If you didn't know, you'd think they were alive. Even though she knew she was HIV positive, she told me she just wanted a baby who would live."

Treating such patients takes an enormous emotional toll on the staff, particularly nurses, who typically have the most intimate contact with patients. The prevalence of AIDS has made recruiting for its 60 nursing vacancies even more difficult. Several months ago, staff shortages forced the administration to close one 30-bed medical unit, which Lory hopes to reopen later this year as an AIDS ward. Administrators hope that a dedicated unit will attract nurses and other staff who want to specialize in AIDS care and will free beds in other parts of the hospital.

"We do not want to be the dumping ground for the city of Newark," said Lory, who is alarmed by the impact AIDS is having on University Hospital. "If I have 300 AIDS patients in my beds, I am no longer a major trauma center, I'm no longer a teaching hospital, all I am is an AIDS hospital, and that is not the purpose of this hospital."

THE HIGH COST OF AIDS

The average lifetime cost of caring for an AIDS patient—about $200,000—is increasingly being borne by the hospital. Nearly half of University's AIDS patients are uninsured, and Medicaid, which covers many others, does not reimburse for the full cost of caring for AIDS patients.

When it comes to health care financing, New Jersey is far more progressive than most states. Its Medicaid program covers the cost of the drug AZT for most University patients, and an uncompensated care fund reimburses private hospitals that admit uninsured AIDS patients. Medicaid has recently agreed to pay for a new home-care nursing program for AIDS patients, providing the patients have homes. That is a serious problem for 60 percent of University's patients whose living situations are so tenuous that they could be homeless in less than three months.

State health officials and administrators at University Hospital complain that Newark's sensitivity about its image and its eagerness to encourage development have been disastrous for AIDS services. Recently, the mayor's office killed a proposal by the state to open a long-term care facility for AIDS patients in a defunct hospital, down the street from University. Housing for AIDS patients had also met with considerable resistance.

"It's the same argument about providing services for the homeless—you know, 'we don't want to become a magnet,'" said one city health official. "The fact is that people aren't traveling here for AIDS services. Many of them were born and raised here."

Despite the magnitude of the problem, there are some hopeful signs. The hospital recently opened a clinic that provides aerosolized pentamidine, a newly approved treatment that helps prevent a recurrence of the pneumonia that kills most AIDS patients.

Because many patients don't keep follow-up appointments, Kloser recently tried an experiment. "Everyone says, 'Oh, drug addicts won't come, they won't keep appointments,'" she said. "I figured I would try something different. The night before," she said, "the clinic manager called all 15 patients to remind them of their appointments. The next day everyone showed up."

Even for those who faithfully keep appointments, their options outside the hospital remain limited at best.

James Caldwell, Jr., a 41-year-old addict, isn't sure what he will face when he is discharged after his six-week hospitalization. He learned he was infected when he was first hospitalized for treatment of endocarditis, a potentially fatal heart infection related to intravenous drug use. His immediate reaction was to do more drugs.

"I figured I was a walking dead man anyway, so what did it matter," said Caldwell, who has supported his habit by running a shooting gallery out of his basement apartment.

Several weeks ago, Caldwell was readmitted, again for treatment of endocarditis. He says that since he learned he had HIV, he no longer shares needles and he has no plans to continue operating a shooting gallery out of his apartment, less than a mile from the hospital.

In fact, he isn't sure he still has an apartment. His brother told him that while he was in the hospital, junkies broke in and stripped the place clean.

Caldwell, an addict for 26 years, says he hasn't done any drugs since he arrived at University Hospital several weeks ago. "I don't think I'll mess with them when I get out of here," he said.

Caldwell isn't sure how he will survive when he is discharged. He is a high school dropout, he has spent 14 years in prison and he has never held a job. Drugs, he says sadly, have ruined his life. Both his wives left him because of his addiction. He has no contact with his five daughters.

Although he is grateful for the medical attention he received at University Hospital, his biggest fear is dying there. "I'm afraid I will be hospital-bound," he says. "If I get AIDS, I just want someone to take me away from here."

[From the New York Times]

TWO URBAN AIDS TROUBLESPOTS FOUND

(By Bruce Lambert)

A nationwide study of hospital patients suggests that one of every four men 25 to 44 years old in the area served by a northern New Jersey hospital is infected with the AIDS virus.

In the community served by a hospital in the Bronx, the rate was one in five for the same age group of men.

These results come from a survey of 40 hospitals around the nation that are being studied by the Federal Centers for Disease Control to track the prevalence of the AIDS virus.

The survey of these hospitals, which the agency refers to as "sentinel hospitals," analyzes how many patients admitted to the hospitals for illnesses other than AIDS are infected with the AIDS virus and thus likely to come down with the disease eventually. The findings are designed to reflect, as well as possible, the infection rate in the community that the hospital serves, Federal health officials said.

DISTURBING BUT EXPECTED

Dr. James W. Curran, the top AIDS official at the Federal Centers for Disease Control in Atlanta, said the high rates at the two hospitals in the New York-New Jersey area were disturbing but in line with what AIDS experts had expected to find in the communities struck hardest by the disease. He said the study was designed so that the infection rates at the hospitals would offer a rough approximation of the infection rates in the communities they served.

The survey did not find that one in every four New York City men from the ages of 25 and 44 was infected with the AIDS virus, as was widely but erroneously reported yesterday. That rate applied only to the area served by a northern New Jersey hospital. Nationwide, the median infection rate for all patients tested at the hospitals surveyed was 2 percent. Significantly, all hospitals in the study found some patients infected with the virus.

But markedly higher concentrations were found in the regions and the demographic groups where recorded AIDS cases are the highest.

The Federal agency has not released its final report on the study, technically called the sentinel hospital surveillance, and officials have been reluctant to discuss its findings.

But critical details have emerged in data made public by participating hospitals in the Bronx and Newark and by the New York City Department of Health on three unidentified city hospitals.

The blood samples were tested without personal identification of the patients, to avoid issues of consent and confidentiality.

In Newark, the University Hospital of the University of Medicine and Dentistry of New Jersey reported at the international AIDS conference in Montreal last year that its initial testing found an infection rate of 7.9 percent.

A recent issue of the institution's publication Healthstate reported that more than 3,000 specimens had so far been tested. Dr. Joseph M. Lombardo, who is supervising the testing, said the results were running a "consistent" 7 percent to 8 percent.

"This figure is disturbingly high," Dr. Lombardo said, "and this data, in part, has prompted a policy of offering voluntary HIV testing to all patients admitted to University Hospital."

Although University Hospital declined to reveal a detailed breakdown of its infection rates, other researchers said that 24 percent of the male patients aged 25 to 44 who were tested at one unidentified New Jersey hospital were infected with the AIDS virus.

Bronx Lebanon Hospital Center in the Bronx has also identified itself as a sentinel hospital and reported an infection level of about 6 percent over all. But the rate was about 19 percent among men aged 25 to 44, and 8 percent among women in that age group.

FEAR OF IMPENDING DISASTER

"We are rapidly reaching a point where we are going to have a disaster, especially if we do not get more Federal aid," said Dr. Jerome A. Ernst, who runs the AIDS program at Bronx Lebanon.

Both Bronx Lebanon and the University Hospital in Newark serve impoverished inner city neighborhoods with inadequate health services and a high rate of drug abuse, which is strongly linked to AIDS transmission.

New York City's Department of Health reported last week that three unidentified hospitals in the city were part of the survey and were finding infection rates of 1 percent, 3 percent and 6 percent.

Federal health officials sought yesterday to set the record straight on recent reports about the study.

The hospital study is part of the disease-control agency's "family of surveys" to measure the extent of infection with the AIDS virus. Other parts of the project include data on military recruits, prisoners, college students, newborn infants and their mothers and a household survey in Dallas.

U.S. SENATE,
*Washington, DC, April 2, 1990.*

Hon. EDWARD M. KENNEDY,
*Chairman, Senate Labor and Human Resources Committee, U.S. Senate, Washington, DC.*

DEAR TED: When the Labor and Human Resources Committee marks up the Comprehensive AIDS Resources Emergency Act of 1990 this week, we urge you to include a provision that would enable the PMSA of Jersey City in Hudson County, New Jersey to qualify for Title I assistance.

Under the bill as drafted, the area does not qualify for Title I funding because it does not meet the 2,000 AIDS case threshold. However, Jersey City is clearly one of the most heavily impacted metropolitan areas in the country and is deserving of Title I aid. The PMSA of Jersey City currently has 1,428 AIDS cases. Its estimated population is about 550,000. This means that .26% of the population in Jersey City suffers from AIDS.

Jersey City's .26% incidence rate is higher than all but two of the areas that do qualify for Title I assistance under the bill. It is five times the incidence rate in Chicago, four times the incidence rate in Los Angeles, and two and a half times the incidence rate in Washington, D.C. Because of the extremely high numbers of AIDS victims in the area compared to the population, it is undeniable that the area is heavily impacted and in need of the kind of emergency assistance that would be available under Title I of the CARE bill.

Unlike many of the areas that will receive Title I assistance under the legislation, only one county is in the PMSA that includes Jersey City. For that reason, only the AIDS cases in that one county are counted toward the 2,000 threshold. At the same time, because of the Census Bureau's definition of PMSAs, other areas that qualify for Title I assistance can count AIDS cases from several counties—including a total population several times the size of Jersey City—to reach the 2,000 threshold. For example, the PMSA in which the city of Philadelphia is included includes eight counties, three of which are in my state of New Jersey.

We do not believe that Jersey City should be prevented from qualifying under Title I of the bill because the Census Bureau has included only one county in that particular PMSA. If for example, the PMSA in which Jersey City is located included two other counties, neighboring Bergen and Passaic Counties, nearly 2,500 AIDS cases would be attributed to the area, more than the 2,000 needed to qualify for Title I funding. The total population for the three counties—roughly 1.3 million—would still be less than the population of other PMSAs that are eligible for Title I assistance.

We propose that the Committee include language in the bill to provide assistance to any metropolitan area with a population of 500,000 or more with an incidence rate of AIDS that exceeds .2% of the population. This would enable the heavily impacted PMSA of Jersey City to qualify for assistance under Title I of the bill. No other areas would be added under Title I because San Francisco, San Juan, New York, Newark, and Miami—the only other areas that also meet that standard—already qualify under the 2,000 threshold. Making this modification to include Jersey City would certainly be consistent with the goal of providing assistance to the areas in greatest need.

The need for assistance in heavily impacted metropolitan areas like Jersey City is tremendous. Our cities and counties are struggling to provide sorely needed services to AIDS victims and their families. We applaud your initiative in developing the CARE legislation and were pleased to join as original cosponsors of your legislation. We hope you will agree that Jersey City is among those cities that are in greatest need and that we can work together to include the area under Title I of the legislation.

We appreciate your consideration.

Sincerely,

BILL BRADLEY.
FRANK R. LAUTENBERG.

EXHIBIT 4

U.S. SENATE,
*Washington, DC, April 19, 1990.*

Hon. HENRY A. WAXMAN,
*Chairman, Subcommittee on Health and the Environment, House Committee on Energy and Commerce, House of Representatives, Washington, DC.*

DEAR CHAIRMAN WAXMAN: When the Subcommittee on Health and the Environment marks up H.R. 4470, the AIDS Prevention Act of 1990, we urge you to include a provision that would enable the PMSA of Jersey City in Hudson County, New Jersey to qualify for Title III assistance.

Under the bill as drafted, the area does not qualify for Title III funding because it does not meet the 2,000 AIDS case threshold. However, Jersey City is clearly one of the most heavily impacted metropolitan areas in the country and is deserving of Title I aid. The PMSA of Jersey City currently has 1,428 AIDS cases. Its estimated population is about 550,000. This means that .26% of the population in Jersey City suffers from AIDS.

Jersey City's .26% incidence rate is higher than all but two of the areas that do qualify for Title III assistance under the bill. It is five times the incidence rate in Chicago and Philadelphia, three times the incidence rate in Dallas, and two and a half times the incidence rate in Washington, D.C. Because of the extremely high numbers of AIDS victims in the area compared to the population, it is undeniable that the area is heavily impacted and in need of the kind of emergency assistance that would be available under Title III of the bill.

Unlike many of the areas that will receive Title III assistance under the legislation, only one county is in the PMSA that includes Jersey City. For that reason, only the AIDS cases in that one county are counted toward the 2,000 threshold. At the same time, because of the Census Bureau's definition of PMSAs, other areas that qualify for Title III assistance can count AIDS cases from several counties—including a total population several times the size of Jersey City—to reach the 2,000 threshold. For example, the PMSA in which the city of Philadelphia is included includes eight counties, three of which are in my state of New Jersey.

We do not believe that Jersey City should be prevented from qualifying under Title III of the bill because the Census Bureau has included only one county in that particular PMSA. If for example, the PMSA in which Jersey City is located included two other counties, neighboring Bergen and Passaic Counties, nearly 2,500 AIDS cases would be attributed to the area, more than the 2,000 needed to quality for Title II funding. The total population for the three counties—roughly 1.3 million—would still be less than the population of other PMSAs that are eligible for Title III assistance.

We propose that the Committee include the attached language in the bill to provide assistance to any metropolitan area with a population of 500,000 or more with an incidence rate of AIDS that exceeds .2% of the population. This would enable the heavily impacted PMSA of Jersey City to qualify for assistance under Title I of the bill. No other areas would be added under Title III because San Francisco, San Juan, New York, Newark, and Miami—the only other areas that could also meet that standard—already qualify under the 2,000 threshold. Making this modification to include Jersey City would certainly be consistent with the goal of providing assistance to the areas in greatest need.

The need for assistance in heavily impacted metropolitan areas like Jersey City is tremendous. Our cities and counties are struggling to provide sorely needed services to AIDS victims and their families. We applaud your initiative in developing this legislation. We hope you will agree that Jersey City is among those cities that are in greatest need and that we can work together to include the area under Title III of the legislation.

We appreciate your consideration.

Sincerely,

BILL BRADLEY.
FRANK J. GUARINI.
FRANK R. LAUTENBERG.
ROBERT G. TORRICELLI.

EXHIBIT 5

CITIZENS COMMISSION ON AIDS FOR NEW YORK CITY AND NORTHERN NEW JERSEY,
*New York, NY, May 11, 1990.*

Re. The Comprehensive AIDS Resources Emergency Act of 1990, S. 2240.

Hon. EDWARD M. KENNEDY,
*Chairman, Senate Labor and Human Resources Committee, U.S. Senate, Washington, DC.*

DEAR SENATOR KENNEDY: On April 12, 1990, we sent you a letter strongly endorsing your efforts to pass the CARE bill, which will provide critical financial support to areas heardest hit by the HIV/AIDS epidemic. We continue to strongly support these efforts, as well as your attempt to deflect harmful and diverting amendments to this bill.

We have an additional concern about this proposal. Under Title 1, emergency funding is provided to metropolitan areas reporting at least 2,000 AIDS cases to the Centers for Disease Control. However, we urge you to modify this language to enable the PMSA of Jersey City to additionally qualify under this title. Jersey City has the third highest incidence of AIDS in the country; its incidence rate is surpassed only by New York City and San Francisco. With a population of approximately 540,000 and over 1440 re-

ported AIDS cases, the city has a incidence rate of 0.26 percent. While Jersey City would receive funding from the State of New Jersey under Title II, the rationale for targeting emergency assistance to cities under Title I—to assist localities disproportionately affected by HIV—applies equally to Jersey City. And because of its extremely high incidence rate, perhaps more so than most of the cities which meet the threshold of 2,000 cases.

We support the amendment recommended by New Jersey Senators Frank Lautenberg and Bill Bradley as follows:

On page 29, line 19, after the words "Disease Control," insert "or is a metropolitan area with a population of 500,000 or more with an incidence rate of AIDS that exceeds .2 percent of the population.

This lauguage rectifies the inequity of targeting funds to localities with the higest actual numbers of AIDS cases, while failing to sustain the city with the third highest rate of AIDS in the country. Furthermore, with the exception of Jersey City, this language would not result in having to add additional cities to Title 1.

Jersey City is desperately struggling to meet the health care and social service needs resulting from the epidemics of AIDS and drug use. Its hospitals, clinics, and community-based organizations are as overcrowded and underfunded as those of cities meeting the bill's current eligibility criteria. We strongly recommend that Jersey City be included in Title I among the localities in greatest need of federal assistance.

Sincerely,

GARY L. STEIN, Esq.,
*Policy Director.*

---

NEW JERSEY HOSPITAL ASSOCIATION,
*Princeton, NJ, May 9, 1990.*

Hon. EDWARD M. KENNEDY,
*Russell Senate Office Building, Washington, DC.*

DEAR SENATOR KENNEDY: On behalf of our 119 member hospitals thank you for introducing S. 2240, the "Comprehensive AIDS Resources Emergency Act of 1990." Caring for AIDS patients places an extreme burden on hospitals, particularly those in our inner city areas. Your bill would provide the resources hospitals in New Jersey so sorely need.

However, as the bill is currently drafted, hospitals in Jersey City, Hudson County would be excluded from Title I assistance of that Act. If one looks at the per capita rate of AIDS in Jersey City, it becomes apparent that the area is one of the most heavily impacted metropolitan areas in the country.

During our most recent count, Jersey City had approximately 1,428 reported cases of AIDS. The city's population stands at about 550,000, which means 2.6 people of every thousand are infected. This 2.6 incidence rate is higher than all but two of the areas that do quality under the Title I provision.

I respectfully ask that you support Senator Frank Lautenberg's amendment which would make hospitals in this heavily impacted area eligible for the resources they need.

Thank you for your consideration.

Sincerely,

LOUIS P. SCIBETTA, FACHE,
*President.*

HOBOKEN, NJ, *May 9, 1990.*

Hon. EDWARD M. KENNEDY,
*Senate Labor and Human Resources Committee, U.S. Senate, Washington, DC.*

DEAR KENNEDY: I am writing to you regarding the Comprehensive AIDS Resources Emergency Act of 1990, specifically that you include a provision to provide funds to the Jersey City/Hudson County, New Jersey area. I know that Sen. Lautenberg's office has spoken to you about this issue, but has not succeeded in convincing you to make the requested change in the CARE Act. I'd like to add my support to their position.

I have lived in Hudson County, New Jersey for the last four years. I have also worked with ACT UP/New York for the last three years. I currently work for the American Foundation for AIDS Research (AmFAR). In other words, I'm well versed in the complexities of AIDS and am familiar with the situation in Hudson County. Quite simply, it is the worse-case AIDS scenario. Most of Hudson County's people with AIDS and people who are HIV-positive are IV drug users, yet there is almost no available addiction treatment in the area. There is very little public education about AIDS, so that the sex partners of these people do not know how to protect themselves or, in many cases, that they even need to protect themselves. And because most of these people are poor, the health care they already receive is inadequate to begin with.

You may be saying, "We sympathize, but we can't give money to every city in the country. If we make an exception for Jersey City/Hudson County, we'll have to make exceptions for the constituents of every other Senator." The problem with this reasoning is that granting funds to Jersey City is not making an exception; it is correcting an error in the process by which cities and areas were chosen to receive Title I funds. As Senators Lautenberg and Bradley have pointed out to you, Jersey City has the third highest AIDS incidence rate in the country. That it doesn't qualify for Title I funds under the CARE Act is a result of the rather aribitrary way in which the Census Bureau chose to designate PMSAs, and the fact that you chose to use PMSAs as the basis for determining which cities and areas would receive funds. In most cases, your system works. But because Jersey City's PMSA is unusually small, it has a much smaller population then other PMSA's and so it's AIDS caseload doesn't reach the cut-off level of 2,000. However, as has been pointed out to you, if the two neighboring counties of Bergen and Passaic were included, this area of New Jersey would have 2,500 AIDS cases, making it eligible for Title I funds.

Please do not let an arbitrary quirk of the Census Bureau keep you from fulfilling the stated goal of the CARE Act; to provide emergency funds to those cities in the U.S. hardest hit by the AIDS epidemic. By an rational standard, Jersey City qualifies. And if you want, and deny Jersey City the help it needs, its AIDS caseload wil rise above your cut-off line much faster than it has to.

Thank you for your attention.

Sincerely,

DAVID ROBINSON.

---

JERSEY CITY MEDICAL CENTER,
*Jersey City, NJ, April 26, 1990.*

Hon. EDWARD M. KENNEDY,
*Senate Labor and Human Resources Committee, U.S. Senate, Washington, DC.*

DEAR SENATOR KENNEDY: As the CEO of a 450 bed, urban teaching hospital in Hudson County, New Jersey, which serves a large AIDS population, I am acutely aware of the increased need for federal assistance for this epidemic and strongly support your proposed legislation. The Comprehensive AIDS Relief Emergency Act of 1990 (CARE) addresses the most critical needs of many institutions and cities in the nation which are providing the majority of care to patients with Acquired Immune Deficiency Syndrome (AIDS) and AIDS Related Complex (ARC). However, I feel that the methodology utilized to determine the areas which would quality for Title I funding should be amended as was proposed by New Jersey Senators Frank Lautenberg and Bill Bradley.

While all states in the nation have now been affected by the AIDS crisis, New Jersey is one of the five states which comprise 70 percent of all AIDS cases nationally. In addition to the 8,000 AIDS cases reported in New Jersey since 1981, it is estimated that there are another 50,000 to 70,000 persons who have been infected by the virus. Jersey city, a municipality of 204,000 and largely comprised of poor minority groups, has identified over 1,000 AIDS patients. The PMSA which includes Jersey City has a total population of 550,000 and 1,428 reported cases of AIDS. This represents an incidence rate of 0.26 percent of the population. Under the guidelines of your legislation, funding would only be provided to discrete areas with over 2,000 cases of AIDS. This methodology results in funding cities with much lower rates. Out of the thirteen (13) areas designated to receive the proposed funds, only two areas have higher per capita rates of HIV illnesses greater than that found in Jersey City. Only one other area has a more rapid rate of spread of the disease.

As an area so heavily populated with AIDS patients, the financial stress on Jersey City Medical Center is overwhelming. The Medical Center maintains an average AIDS inpatient census of 50 patients. Through 1988 the cost of providing inpatient services to AIDS patients exceeded what the Medical Center was reimbursed by $2 million. It is very difficult for an inner city institution like Jersey City Medical Center to underwrite this much care when our community has a multitude of other, equally threatening health care problems. In addition to providing the majority of inpatient care to AIDS patients in Hudson County, Jersey City Medical Center provides outpatient services to over 600 adult and 100 pediatric patients who are HIV positive. Given the complex medical and social needs of our patients, the need for primary care, case management and drug treatment programs is essential. The majority of the HIV patients managed at our facility are poor, minority and substance abusers. While the need for case management services to facilitate coordination between primary care, drug treatment and home care, when indicated, is clear, it is difficult to afford. Current staffing includes 3 Registered Nurses, 3 physicians and 3 case managers. Not only is there limited funding for staff expansion, but our physical space is inadequate and antiquated. Overcrowding in the Medical Center's Infectious Disease Outpatient Clinic has interfered with the institution's ability to provide quality care to all those in need.

As a recipient of a state and federally funded Treatment Assessment Program (TAP) grant, the number of patients seen in our clinic has increased rapidly. While we

enrolled 450 people in the first three months of operation, and continue to see an average of 5-7 new patients each week, there is almost no funding for capital improvement provided in this grant. Without additional operating and capital funding to expand our current services and allow for the development of others, AIDS care will continue to be compromised. The possibility of having to discontinue some of our AIDS services so that the Medical Center can maintain its fiscal solvency is real, and has been discussed with the State of New Jersey Department of Health. If this occurs, patients will become sicker and will become more frequent utilizers of acute care and emergency services, resulting in a more costly drain on both the State and Federal government. HIV service provision has finally begun to make significant strides in the past few years, in part due to the effects of early intervention and prophylactic treatment. To deny provision of these essential services would mark a return to earlier years, when the most efficient and effective care was unknown and the epidemic seemed uncontrollable.

It is essential that we all work together to provide effective and efficient health services to HIV patients. The State of New Jersey has been very generous in its financial support of AIDS programs and services in an era of tight financial resources. However, New Jersey has other areas which have large AIDS populations, although not as severe as incidence rate as Jersey City. The State should not be the sole provider of funding. Individuals need increased federal assistance in planning and implementing these essential programs. Without federal support, we will continue to "put out fires" but never gain control over the entire epidemic. I appreciate your effort to augment federal support for AIDS care and focus on the epidemic. However, without consideration for area-wide incidence rates, the proposed initial funding distribution is inequitable. Hospitals such as Jersey City Medical Center, serving a large, indigent, medically and socially needy population, cannot continue to meet the needs of its current and anticipated HIV patient population without increased federal involvement.

Consequently, I strongly support your 1990 CARE bill but am concerned that the amendment proposed by Senators Lautenberg and Bradley did not pass in the Senate. I understand that Representative Henry Waxman has introduced a companion bill in the House of Representatives. It is my hope that Chairman Waxman will recognize the needs of smaller Metropolitan Statistical Areas with high AIDS incidence rates (i.e. over 0.20 percent) and that House Resolution 4470 will include a provision to provide funding to regions, such as Jersey City.

I would be honored to visit you in Washington to review in greater detail the status of HIV services and programs at Jersey City Medical Center and the need for increased federal support for this critical problem.

Thank you for focusing attention on the AIDS problem, especially as it relates to the unique demands placed upon urban health care providers.

Sincerely,

JONATHAN M. METSCH, DR.P.H.
*President & Chief Executive Officer.*

---

COUNTY OF HUDSON,
OFFICE OF THE COUNTY EXECUTIVE,
*Jersey City, NJ, April 3, 1990.*

Re: S. 2240

Hon. EDWARD M. KENNEDY,
*Senate Labor and Human Resources Committee, U.S. Senate, Washington, DC.*

DEAR SENATOR KENNEDY: On behalf of the residents of Hudson County and particularly those who suffer from the AIDS virus, I commend your sensitivity and compassion as expressed through your sponsorship of the Comprehensive AIDS Resources Emergency Act of 1990.

The Current draft of the legislation, however, would offer neither assistance nor hope to the thousands of AIDS impacted families in our community. On their behalf, I urgently request that you consider amendment of the bill as suggested by Senators Bradley and Lautenberg via their letters of April 2, 1990, (enclosed).

Hudson County is the most densely populated County in America. Some 540,000 residents occupy 46 square miles producing a density of 12,000 per square mile. As an older urban center, our community is excessively stressed by poverty and a broad variety of related social and health problems. This past year, Hudson County and Jersey City achieved the sad distinction of achieving the rank of second in the nation in per capita incidence of AIDS.

Between 1988 and 1989, the number of AIDS cases increased by 78%. At the present time 1 of 100 infants are born with this deadly disease. Generally, our AIDS population, unlike several other urban centers, is a result of drug abuse.

During the past year my administration, in cooperation with the City of Jersey City and a broad variety of community-based health care agencies, competed successfully for grant dollars to combat the AIDS menace. After several years of frustration, we succeeded in this national competition this year. The Hudson County Aids Consortium became one of seven grants given in 1989 as awarded by the Health Resources Services Administration (HRSA), Bureau of Maternal and Child Health Care.

In addition, Hudson County has become a part of the AZT research project, sponsored by the National Institute of Health (NIH), and has undertaken a Perinatal Aids Project (PAP) in response to our alarming member of infant cases.

We have certainly come a long way in crafting broad-based community involvement and unprecedented cooperation between levels of local government. Still, we have a long road ahead. We desperately need your help.

As outlined by Senators Bradley and Lautenberg, .26% of our population has been affected by AIDS. This per-capita measure of community impact is 5 times that of Chicago, 4 times the incidence rate in Los Angeles, and 2½ times the rate in Washington, D.C. These statistics offer irrefutable proof of the pressing community emergency which exists here. Title I of the bill is our only hope.

The proposed modification would provide much needed relief to Hudson County and I understand that all other areas impacted by the formula change already qualify for support under other provisions of the legislation.

On the eve of the mark-up, this plea and your willingness to assist, is our last hope.

Thank you for all that you have done for urban America in the past. I trust that you will continue to respond in crafting much needed relief and assistance in the future.

Sincerely,

ROBERT C. JANISZEWSKI,
*Hudson County Executive.*

---

H. D. AUERBACH,
*May 11, 1990.*

Hon. EDWARD M. KENNEDY,
*Senate Labor and Human Resources Committee, U.S. Senate, Washington, DC.*

DEAR SENATOR KENNEDY: I want to take this opportunity to thank you for the leadership role you continue to play in the AIDS crisis that our country is currently facing. I am especially appreciative of your sponsorship of the Comprehensive AIDS Resources Emergency Act of 1990 (C.A.R.E.). As a resident of New Jersey and an advocate of human rights issues, there is one area that I feel should be modified. I refer to the provision for qualifying for Title I funding. As presently written, Jersey City fails to qualify under the bill for this assistance.

Statistically, Jersey City's population is 550,000 and reports 1,428 AIDS cases, which under the current draft does not meet the 2,000 case threshold of the bill. These figures, however, equate out to .26% incidence rate which is higher than all but two of the areas qualifying for Title I funds with larger populations. Due to a series of unique circumstances concerning a population of only 550,000 and a census reporting system that has Jersey City as part of only one county, it is left "out in the cold."

A simple modification to the language of the bill to provide assistance to any metropolitan area with a population of 500,000 or more with an incidence rate exceeding .2% of the population would rectify this inequity.

You are well known for your sense of compassion and fairness, and I would ask you to apply those qualities in considering this modest amendment to the bill.

Again, I want to commend and thank you for your long standing work in the area of AIDS. Your championship is appreciated by all Americans who are touched by this epidemic.

Thank you in advance for your consideration.

Sincerely yours,

WARD AUERBACH.

Mr. JOHNSTON. Mr. President, I take this opportunity to clarify an aspect of this legislation that is important to the city of New Orleans and the State of Louisiana. Within title II of this act, up to 10 percent of the funds are reserved for special projects of a national significance. One of the projects delineated concerns the establishment of an incentive system designed to increase the number of health care facilities willing and able to serve low-income individuals and families with HIV disease. Can the Senator explain what the committee had in mind when drafting this provision.

Mr. KENNEDY. Yes. It is the intent of the committee to employ creative techniques for decreasing the burden placed on the small number of institutions currently caring for the bulk of people living with AIDS. A recent study done by the National Public

Health and Hospital Institute found that less than 4 percent of U.S. hospitals were caring for more than 50 percent of the country's people with AIDS. As you have told the committee, this has been a particular problem for institutions such as Charity Hospital in New Orleans. Because of the fine care delivered at Charity and because of its commitment to serving all citizens of Louisiana regardless of their ability to pay—Charity Hospital is currently on the brink of collapse. We have been informed that Charity Hospital is currently exploring innovative approaches to enhance the availability of HIV care services in other urban and rural hospitals, reducing the distances people must travel to obtain needed health care. The committee would find a project that allowed Charity physicians to provide specialized care through a network of local or regional clinics to be an extremely worthwhile use of these funds and in line with the committee's intent.

Mr. JOHNSTON. Does Senator HATCH agree?

Mr. HATCH. I certainly agree with Senator KENNEDY's explanation. The committee wishes to continue to find ways to deliver high quality health care services in both small towns and rural areas. Because the care of AIDS patients often involves highly specialized treatment, people who do not live near major medical institutions often find themselves traveling a considerable distance during an acute episode of illness. To the extent that hospitals, such as Charity Hospital in New Orleans, can use these funds to send a physician on the road who helps enhance the capacity of local hospitals to respond, the pressure on their own institution will be diminished. The committee believes that this is sound policy from both a fiscal and health care delivery perspective.

Mr. JOHNSTON. I thank the managers for their explanation, and I look forward to working closely with them to ensure that New Orleans and all of Louisiana receives the assistance it needs to provide quality care to its citizens with AIDS.

Mr. KENNEDY. I would like to thank Mr. JOHNSTON for his comments. The Senator from Louisiana has also made another valuable contribution in bringing to the attention of this committee the importance of using relative per capita income as a factor in determining programmatic needs at the State and local level.

CARING FOR THE TERMINALLY ILL

Mr. DANFORTH. Mr. President, Walker Percy, the great literary figure whose passing we have mourned this week, pointed out a paradox in our modern world: "that the more science progresses and even as it benefits man, the less is said about what it is like to be a man living in the world."

Walker Percy's wise words can be applied to the way we care for our terminally ill. So often, we do not care for people who are dying, we try to cure them. Advances in medical technology have allowed us to provide hope and life to those who, 50 years ago, would never have been able to survive critical illnesses. And this fact should be celebrated. But our capabilities have also brought us to the absurd point of prolonging life without paying attention to whether that is what is best for or wanted by the patient—without asking what it is to be that person living in the world.

In the year I was born, most people died at home in the company of their families and friends. Now, in this country, 80 percent of people die in hospitals and other medical facilities. AIDS patients are not an exception to this trend. Hospital-based treatment is a primary and often only source of care for people with AIDS. But hospitalization is costly, and more importantly, it is often not what is best for or what is wanted by the patient, especially in the last months of life. I have seen many people at the end of their lives. Often, without asking for it, they have been hooked up to machines, having procedure after procedure done to them. That is the way the system works.

Mr. President, the Comprehensive AIDS Resources Emergency [CARE] Act of 1990 goes a long way in promoting options other than hospitalization: early intervention, case management, community and home-based options for AIDS patients. Although the bill does not specifically mention hospice care in title I, I hope that hospice care will be included in the definition of home care and subacute long-term care facilities eligible to receive funds.

Hospice care, a house of rest, provides a caring and supportive setting, an alternative to intensive and critical care, for dying patients.

There are barriers to receiving hospice care. Twenty-seven State Medicaid programs do not pay for hospice care. Almost half of all AIDS patients—44 percent are Medicaid recipients. We are denying AIDS patients in those States the option of choosing to spend the last months of their lives in a supportive and nontechnological setting.

States should be required to include the hospice benefit in their Medicaid State plan. Congressman PANETTA has a bill in the House—H.R. 3935—that would mandate this benefit, and I think this is a good idea.

Twenty-three States do include hospice in their Medicaid Program. Yet even in States where Medicaid will reimburse for hospice care, hospice are being overwhelmed by the AIDS crisis. They simply cannot serve all those with AIDS who wish to become hospice patients. I want to ensure that hospices in all States will benefit from the emergency funds being provided in this important legislation.

We must do whatever we can to allow people who are terminally ill to decide how much treatment they want and where they want to be. For most AIDS patients, the end of life comes at a tragically young age. From being vital and healthy, people with AIDS move rapidly to being frail and ill. The final tragedy comes when all choice and dignity are wrested from them.

Senator MOYNIHAN and I have legislation in the Finance Committee, on which we will soon hold hearings, that would require many of the facilities receiving money under this legislation—hospitals, nursing homes, clinics, and home health agencies that receive Medicare and Medicaid—to tell patients about how they can ensure that their wishes will be respected. AIDS patients who want to spend their last months outside the hospital without any intrusive medical care should know that they can execute living wills, they can appoint someone close to them to make decisions when they no longer can decide for themselves, and they can choose to be cared for in a hospice setting.

There is a wonderful little book written by the Dominican Nuns of Our Lady of Perpetual Help Home in Atlanta, GA, called "A Memoir of Mary Ann." The Dominician Nuns tell the story of a litle girl in their hospice, who was born with a tumor on the side of her face, "one eye had been removed, but the other eye sparkled, twinkled, danced mischievously, and after one meeting one never was conscious of her physical defect but recognized only the beautiful brave spirit and felt the joy of such contact." At the age of 3, Mary Ann was given 6 months to live. All heroic measures to try to save her life were abandoned, and she then spent the next 9 years in Our Lady of Perpetual Help Home where she died at the age of 12. In her 9 years at this hospice, caring for Mary Ann meant making her happy, not making her well. The sisters who cared for Mary Ann would have thought it a tragedy if her short life were filled with extensive hospital stays and intrusive procedures that would have dimmed her sparkle and would ultimately have proved futile.

Many AIDS patients would echo the sentiment of the Dominican Nuns, and of a character in Alexandr Solzhenitsyn's novel, "Cancer Ward," who said,

> What, after all, is the highest price one should pay for life? How much should one pay, how much is too much? * * * to save one's life at the cost of surrendering everything that gives it color, flavor, and sparkle * * * isn't that an exorbitant price?

AIDS patients, all patients, should be given the opportunity, if they wish, to look at their lives with steady eyes

and to decide what kind of care they do or do not want for themselves. I hope that the CARE legislation before us today will help provide those opportunities to AIDS patients through providing assistance to hospice programs throughout the country.

I would like to thank the managers of the bill for their work in developing this critical and comprehensive AIDS legislation and I would like to ask the managers if they intend for hospice programs to be eligible for funds both in title I and title II of this legislation. Will hospices be eligible under title I to be a part of the HIV Health Services Planning Council and to receive grants to institutions, and under title II, will hospice programs be eligible to be part of the HIV Care Consortia and to receive grants for home and community-based care?

Mr. MACK. Mr. President, I want to first commend the managers of this bill for the leadership they have provided in bringing the plight of health care providers assisting persons with AIDS to the forefront of the Senate's attention. I have received numerous letters from doctors, nurses, hospital administrators, and other health care professionals throughout Florida expressing the critical need for this type of legislation.

Mr. President, I would like to clarify one point regarding this legislation as it applies to an important component of our Nation's health care system. I believe S. 2240 contemplates a comprehensive approach to the HIV epidemic. I want to clarify that, along with inpatient hospitals, alternative health care organizations who are providing comprehensive care management and those organizations which develop and coordinate such comprehensive HIV care systems are to be included within the provisions of this act.

It is vitally important that health care providers and other health care organizations work together to address the unique needs of each individual. As a necessary extension or alternative to the care given at hospitals, there are various health care providers and organizations which are providing comprehensive case management and care delivery. Many such organizations operate their own inpatient facilities and provide home health care through their own employees. These providers employ such professionals as physicians, nurses, social workers, and counselors.

In addition, there are charitable organizations which have demonstrated experience in AIDS counseling and in the research, development and coordination of alternative comprehensive health care systems for HIV patients. My home State of Florida, and specifically the south Florida area, has been particularly hard hit by the AIDS epidemic. One hospice care organization in this area has funded and developed the largest hospice-type inpatient and home care program for persons with AIDS in the United States.

I believe it is critical for hospice programs to be an integral component of this legislation's provisions. For example, the chief elected officials who will be appointing the HIV health services planning councils as outlined in title I should have the option to include hospice care providers, particularly those with experience in caring for persons with AIDS, as well as other organizations, while not necessarily providers per se, that have experience in developing and coordinating alternative comprehensive care systems for AIDS patients.

I want there to be no doubt that these organizations be included for consideration as full participants in the HIV grant programs. The bill uses terms such as "health care service providers," "community-based service organizations," "community health center," "outreach services" and the like. Further, the committee report on S. 2240 highlights, as a committee goal, the participation of hospice care facilities in a multitiered system to be a part of the development and operation of community-based consortia.

Am I correct in concluding that alternative health care providers of comprehensive home and inpatient care such as hospice organizations, visiting nurses associations and home care agencies, as well as nonprovider organizations which develop and coordinate comprehensive care programs for AIDS patients, are intended to be included in this bill as full participants in the HIV planning councils, and the grant programs as well as the other provisions in S. 2240?

Mr. KENNEDY. Mr. President, I thank the Senators from Missouri and Florida for their support for this legislation and for bringing this important aspect of a comprehensive continuum of care to the attention of the full Senate.

It is the committee's intent that hospice programs serving individuals with HIV disease be eligible under the provisions of this act. Further, it is the committee's intent that organizations that have been on the front lines assisting in the development, organization, and coordination of services for individuals and families with HIV disease, be eligible under the provisions of this act.

This legislation is about care, it is about options, and it is about a tradition of caring for those who are sick with dignity.

As the Senators have indicated, hospice programs play an important role in providing humane care to individuals with AIDS in the final stages of the illness. I encourage their participation.

Mr. MURKOWSKI. Mr. President, I had intended to offer an amendment to S. 2240 which would have required the transfer of certain funds authorized under this bill to the Department of Veterans Affairs [VA] for the treatment of veterans with AIDS.

In lieu of offering this amendment, I will speak briefly about VA's role in treatment of AIDS patients and discuss the possibility of VA obtaining funds provided under S. 2240.

Simply put, VA treats about 7 percent of the AIDS patients in our Nation. In fact, the VA's AIDS program is the largest single source of direct health-care services available in the United States. At the end of fiscal year 1989, 7,319 cases of AIDS had been reported by 148 VA medical facilities—2,246 of these cases were reported in 1989 alone. If VA continues to treat 7 percent of the AIDS population, they could treat about 27,000 AIDS patients by 1993.

Thus, the VA is part of our Nation's treatment response and should be considered when funding for AIDS is discussed. AIDS is one of the most serious health threats to or Nation. However, VA's role cannot be considered in isolation but must be part of a national response.

VA spent some $165 million in fiscal year 1990 for AIDS treatment and that will rise to $215 million in fiscal year 1991. This amount is not, however, new moneys. The resources will be shifted from the care of other veteran patients.

In the committee's budget views and estimates, the majority of members of the committee recommended direct funding of the additional AIDS care costs rather than relying on VA facilities producing the necessary resources through cutbacks in care to other veterans. In addition, the independent budget of the major veterans service organizations recommended an additional $60 million for the treatment of veterans with AIDS.

As I previously stated, I will not offer my amendment. However, it is my understanding that under the pending bill, a State could provide moneys to VA medical facilities if they so desired. I want to clarify this issue with Senator KENNEDY.

Mr. President, I ask Senator KENNEDY, if my description of the bill with regards to VA is accurate.

Mr. KENNEDY. Yes.

Mr. MURKOWSKI. I thank the Senator. If this legislation is enacted, I will encourage VA officials to work with the States to see if some money could be utilized in VA hospitals—especially in those geographic regions with the largest percentage of AIDS patients.

THE AIDS EPIDEMIC IN SAN DIEGO

Mr. CRANSTON. Mr. President, I would like to ask the chairman of the Labor Committee, Mr. KENNEDY, for his assistance regarding a certain pro-

vision that concerns eligibility for funding under title I. I recognize the difficult task the chairman was faced with in deciding how to distribute funds under both title I and II to ensure that the needs of various cities and communities are met, so that assistance is targeted to the cities hardest hit by the epidemic as well as to cities where disaster is looming. I believe the committee arrived at a reasonable balance, and I congratulate the chairman.

However, as I know the chairman is aware, San Diego presents a rather unique and difficult situation. San Diego County's case load falls just short of the eligibility requirements for funding under title I. Yet, it is experiencing a rapid increase in AIDS cases. In addition, because San Diego often provides medical and social services to HIV-exposed Mexican nationals and to military personnel who may be temporarily stationed in San Diego, the official numbers may be a serious underestimation of the county's load. Although, I recognize that it was not possible to open up eligibility under title I of the Senate bill for this year, I understand that the House Energy and Commerce Committee adopted an amendment to allow metropolitan areas that have 2,000 reported cases by June 1 of fiscal year 1991 to qualify for assistance. This would permit San Diego to be eligible.

I would like to ask the distinguished chairman of the Labor Committee whether, given the unique circumstances of San Diego and its urgent need for direct assistance, he would agree to the House position in conference.

Mr. KENNEDY. I share the concerns raised by the Senator from California [Mr. CRANSTON] about the special circumstances that confront San Diego and want to assure him that I think the amendment he described would be a constructive addition to the bill and will do everything I can to support that position.

Mr. CRANSTON. I thank the Senator.

Mr. WILSON. Mr. President, I want to associate myself with the remarks of my colleague from California, Mr. CRANSTON. As Senator CRANSTON notes, the area of San Diego presents a unique and difficult situation. Not only does its caseload place it just short of eligibility for title I funds, but it is faced with the daily challenge of providing medical and social services to HIV infected military personnel and Mexican citizens.

I appreciate the recognition of the Senator from Massachusetts, [Mr. KENNEDY], of the special circumstances that face San Diego and his willingness to support in conference the House Energy and Commerce Committee amendment that would permit San Diego to be eligible for direct assistance under title I.

Mr. President, I would also like to ask the chairman of the Labor Committee, Mr. KENNEDY, for his clarification of the committee's intent as it relates to providing assistance to areas with caseloads between 1,000 and 2,000. As the chairman well knows, high incidence areas not eligible for title I funds—such as Oakland, San Bernadino/Riverside and Orange County in California—are challenged daily to meet mounting demands with limited resources.

I would like to ask the distinguished chairman of the Labor Committee the extent to which he believes States should give special consideration to these burdened localities in the distribution of title I.

Mr. KENNEDY. I share the concerns raised by the Senator from California [Mr. WILSON]. The committee recognizes that areas with between 1,000 and 2,000 reported AIDS cases face a disaster that is unfolding daily and thus specifically directs States to give priority to such localities in the distribution of title II funds.

Mr. WILSON. I thank the Senator and congratulate Senator WILSON and our colleague from Utah, Senator HATCH, for their leadership of this important bill.

Mr. BIDEN. Mr. President, I opposed the amendment offered by Senator HELMS which would have made it a Federal crime for an individual to donate blood, semen, organs, tissue, or other bodily fluids, if that individual knew he or she was infected with the human immunodeficiency virus [HIV], or if he or she had used intravenous drugs or had engaged in prostitution on or after January 1, 1977.

Even though I believe that it should be a Federal crime to knowingly and intentionally transmit HIV, the Helms amendment could have subjected to criminal prosecution individuals who were unaware of being infected. This could have had terrible repercussions. For example, a parent, who at one time engaged in prostitution or I.V. drug use, but had stopped, might donate blood or an organ to save his or her child's life. If that individual was unaware of being infected with HIV, I do not believe he or she should be subjected to criminal prosecution.

Mr. SPECTER. Mr. President, the bill before us today is an important first step in assuring that care will be provided to individuals and families with HIV disease. S. 2240, the Comprehensives AIDS Resources Emergency Act of 1990, authorizes $600 million in each of fiscal years 1991 and 1992 to improve the quality and availability of care to individuals and families with HIV disease. This objective is accomplished in two ways.

First, the legislation provides $300 million in emergency assistance grants to cities that have reported 2,000 or more cases of AIDS since 1981. Thirteen cities, including Philadelphia, currently qualify for such grants. Cities must use these funds to assist public or private nonprofit health facilities that serve a disproportionate share of low-income people with HIV disease. Some of these funds may also be used to assist community-based agencies that provide case-managed health and support services, and to renovate residential or long-term care facilities.

Second, the legislation authorizes $300 million primarily for a block grant to States to improve HIV care in rural and urban areas. States may use these funds to establish HIV care consortia, provide home and community-based services, provide HIV therapies to low-income people, integrate diagnosis of HIV disease and early intervention with existing primary care and support services, and develop and support mechanisms to assure continued health insurance coverage for people with HIV disease. Fifteen percent of a State's allocation must be set aside to fund services to infants, children, women, and families.

I am particularly pleased that S. 2240 has retained my provision that "family centered" care be provided to infants, children, women, and families with HIV disease. Data from the Centers for Disease Control show that of the 132,510 cases of AIDS diagnosed in this country, over 36,000 of these cases could necessitate family centered services. A review of the 36,000 cases in question indicate that over 24,000 adult males and over 10,000 women contracted the AIDS virus through intravenous drugs use or heterosexual contact. Children under 13 account for the remaining 2,258 cases.

Individuals engaging in high-risk behaviors such as drug use or having multiple sex partners represent an alarming increase in the number of people with HIV disease. Women who are drug users and who prostitute themselves for a fix, women who are the sexual partners of intravenous drug users [IVDU's], men who are IVDU's who have sexual relations with women, and individuals who have multiple sex partners increase the risk of spreading the AIDS virus and of producing children who may become infected. In some instances these children are abandoned and become "boarder" babies in hospitals until they can be placed in foster care or a group home setting. Sometimes, however, the mother or both parents may want to maintain a family structure and care for the child. The problems faced by these families in their attempt to receive community-based, coordinated, comprehensive services which address the health and social service needs of both adults and chil-

dren are tremendous. Providing care that focuses on the needs of the family—services that help these families stay together as long as possible is vital, as this Nation attempts to cope with the changing demographics of AIDS.

Providing services to infants, children, women, and families with HIV disease is the subject of S. 896, the Pediatric AIDS Resource Centers Act legislation which I introduced on May 2, 1989. S. 896 authorizes $100 million to fund consortia to provide health and social services to children and families with AIDS. The services which I outlined in S. 896 have been incorporated into the mix of services to be provided under S. 2240.

Mr. President, providing services to infants, children, women, and families with HIV disease presents major challenges to local service delivery systems. Traditionally, AIDS related services have been targeted to adult males. Under the leadership of the Office of Maternal and Child Health, however, successful demonstration programs have been funded throughout the country that are providing services targeted to children and families. It is hoped that these service models will be expanded through the resources provided in S. 2240.

Mr. President, I urge my colleagues to vote in favor of this important bill.

Mr. KENNEDY. Mr. President, before that time, I wish to make some final comments about this legislation.

First of all, I want to commend my colleague and friend, the Senator from Utah, for the very substantial contribution he made in the formulation of this legislation and for all the work he has been involved in during the course of the debate during these past few days in helping to bring light to many of these matters which have been in dispute, rather than bring fire. His involvement in the debate and the discussion has, I think, brought a much greater understanding to all of our Members about the various provisions included in this legislation. I acknowledge his very extraordinary contribution to the fashioning and the shaping of what, hopefully, in a few moments will be a successful passage of the legislation.

Mr. President, I commend the Senate for facing up to its responsibility on approving this long overdue legislation. It offers the real possibility that Congress is at last prepared to deal realistically with the worsening crisis in our health care system because of the AIDS epidemic. By providing emergency relief to the cities hardest hit by AIDS, and substantial assistance to all States for more effective and more cost-efficient health care services for infected individuals, we are acting in the best interests of the Nation—by fighting AIDS and not people with AIDS.

The AIDS epidemic is now a disaster as devastating as any natural catastrophe that has ever afflicted the Nation. For nearly a decade, we have debated ideological considerations, and we have ignored the warning signs. Now, at last, the vast majority of the Senate is prepared to put ideology aside, and take the steps needed to deal effectively with this crisis—before it overwhelms our health care system.

I commend the Senate for dealing wisely and sensitively with this issue, and for rejecting extremist proposals that would only make the problem worse. Slowly but surely, all of us are learning what it takes to win the battle against AIDS, and the Senate deserves great credit for the progress we have just made.

Mr. President, I want, at this time, to recognize some of the individuals on the staff. Senator HATCH may comment about his own staff, but I want to state my own personal appreciation to Nancy Taylor, Sue Whitaker, and Judy Lewis. They are find and caring health care staff. It always appears to me when Senator HATCH and I agree to work together, these staff people are virtually interchangeable, in terms of both their working together and being of help and assistance to all the members of our committee. We truly are benefited by some of the really more talented members of the U.S. Senate staff that work on these health issues.

On my own staff, I would like to mention Michael Iskowitz, Terry Beirn, Deborah Von Zinkernagel, Cheron Morris, Nick Littlefield, Joel Ginsberg, Claire Feinson, and Steven Keith, who all have been enormously helpful.

I would like to recognize the major contributions made by Senators CRANSTON and SPECTER who each introduced legislation which has been drawn upon to develop the Ryan White AIDS CARE Act. Staff members Barbara Masters and Eartha May Isaacs worked to help us. Of the many people and organizations who worked so hard to shape the critical legislation, two individuals deserve special recognition: Mrs. Jeannie White worked to build support for this measure named for her son Ryan, and Tom Sheridan of the AIDS Action Council has been tireless in his efforts coordinating the activities of the more than 140 organizations of NORA, the National Organizations Responding to AIDS.

To those, to all the members of our committee, Democrat and Republican, to our majority and minority leaders, we are very much in their debt. We look forward to the House taking action and moving this legislation forward to its next step.

The PRESIDING OFFICER. The Senator from Utah [Mr. HATCH.]

Mr. HATCH. Mr. President, I want to associate myself with the remarks of my colleague from Massachusetts, both with regard to the bill and with regard to staff and fellow Senators.

Mr. President, this is a landmark piece of legislation. This legislation is public health legislation of the highest sort. Its purpose is to alleviate pain and suffering, to find ways of ending this pain and suffering and the difficulties that AIDS has brought throughout this country. It has injured so many people and so many families across this country.

This is a very, very important bill. I think the Senate can take a great deal of pride in it because we have had important debates on this floor. Everybody who has participated in authoring the bill and in the debate have contributed to this success. I believe the bill has been strengthened in many, many ways because of the work of my colleagues; some of them brought amendments to the floor which were agreed to, and others brought amendments that were rejected. They in their own way have helped make this a better bill.

In closing, I would like to thank Senator KENNEDY for the nonpolitical, compassionate approach to this particular health issue which has made it possible for us to be here today. I want to commend his staff for the work they put into this substitute bill. I think it is worth our effort to see this legislation passed, and I want to thank all the Senators for their support, including the majority and minority leaders.

In particular, I would like to mention Senator KENNEDY's staff, or at least a few of them. I hesitate to leave anybody out; there are always so many of them. But in particular, I want to mention Michael Iskowitz, Terry Beirn and Nick Littlefield. And bridging the gap between both staffs, somebody I always enjoy working with, as well as these gentlemen, is Dr. Stephen Keith who has always worked hard on all of these issues with us.

My own staff, Judy Lewis and Sue Whitaker, have done a terrific job. And, above all, Nancy Taylor. I am proud of Nancy. Nancy is expecting twins and yet has sat throughout this whole debate, and worked on this matter as hard or as much as anybody possibly could. She, I think, as much as anybody realizes the compassionate nature of this particular legislation. So I want to thank her for the effort she has put forth and for the sacrifices that she, and her husband, and future family have made.

I also want to thank a number of Senators, in particular Senator D'AMATO, Senator MACK, Senator DOLE, Senator WILSON, Senator COATS, and others. The Senators have been very cooperative working on this bill and it is a difficult one. It is always difficult when there are differing be-

liefs with regard to these matters. I think we have had the cooperation of a wonderful group of Senators who have played an exceedingly difficult role in finalizing and passing this bill.

Finally, this bill is dedicated to Ryan White because of the courage that he displayed and because of the life that he lived. And because of the influence that he has had upon all of us because of being infected with AIDS. I want to pay a particular tribute to him and to his mother and family for the example that they have set for all of us.

I think this bill is a fitting tribute to Ryan White, although it is not nearly what he deserves. But it is one of the finest pieces of legislation to come out of this body. I think it is something that hopefully will bring some peace and some solace and some happiness to his family, knowing that it will do good.

Mr. President, I am very proud of this bill. I am proud of all who have worked on it. We are prepared to go to final passage.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Pennsylvania [Mr. HEINZ] is necessarily absent.

I further announce that, if present and voting, the Senator from Pennsylvania [Mr. HEINZ] would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 95, nays 4, as follows:

[Rollcall Vote No. 97 Leg.]

So the bill (S. 2240) as amended was passed.

S. 2240

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Ryan White Comprehensive AIDS Resources Emergency Act of 1990".

SEC. 2. PURPOSE.

It is the purpose of this Act to provide emergency assistance to localities that are disproportionately affected by the Human Immunodeficiency Virus epidemic and to make direct financiali assistance available to States to provide for the development, organization, coordination and operation of more effective and cost efficient systems for the delivery of essential services to individuals and families with HIV disease in urban and rural areas.

TITLE I—HIV EMERGENCY RELIEF GRANT PROGRAM

SEC. 101. HIV EMERGENCY RELIEF GRANT PROGRAM.

Title XXV of the Public Health Service Act (42 U.S.C. 300ee et seq.) is amended by adding at the end thereof the following new part:

"PART C—EMERGENCY RELIEF AND CARE ACCESS GRANTS

"Subpart 1—Emergency Relief Program

"SEC. 2531. GRANTS TO ELIGIBLE METROPOLITAN STATISTICAL AREAS.

"The Secretary shall award emergency relief grants to any metropolitan area as reported in the HIV/AIDS Surveillance Report of the Centers for Disease Control, that, as of March 31, 1990, 1991, 1992, 1993 or 1994, has reported more than 2,000 AIDS cases (hereinafter referred to in this subpart as the "eligible area"), and that otherwise meets the requirements of this subpart.

"SEC. 2532. ADMINISTRATION AND PLANNING COUNCIL.

"(a) ADMINISTRATION.—

"(1) IN GENERAL.—Assistance made available under grants awarded under this subpart shall be directed to the chief elected official of the city or urban county that administers the public health agency serving the greatest number of individuals with AIDS, as reported to the Centers for Disease Control, in the eligible area that is awarded such a grant.

"(2) REQUIREMENTS.—To receive assistance under paragraph (1), the administering local political subdivision shall—

"(A) establish, through intergovernmental agreement with the chief elected officials of all local political subdivisions that have in excess of 10 percent of all individuals with AIDS, as reported to the Centers for Disease Control, in such subdivision within the eligible area, an administrative mechanism to allocate funds based on the number of AIDS cases and severity of need of such subdivisions; and

"(B) establish an HIV health services planning council.

"(b) HIV HEALTH SERVICES PLANNING COUNCIL.—

"(1) ESTABLISHMENT—To be eligible for assistance under this subpart, the chief elected offical described in subsection (a)(1) shall establish or designate an HIV health services planning council that shall include representatives of—

"(A) health care providers;

"(B) community based and AIDS service organizations;

"(C) social service providers;

"(D) mental health providers;

"(E) local public health agencies;

"(F) hospital or health care planning agencies;

"(G) affected communities;

"(H) non-elected community leaders; and

"(I) State government.

"(2) PRIORITY.—In designating a planning council under paragraph (1), priority shall be provided to any existing entity that has demonstrated experience in assessing and planning for HIV health care service needs within the eligible area, except that such existing entity shall include representatives of the full range of service providing agencies and institutions within such eligible area.

"(3) DUTIES.—The planning council established or designated under paragraph (1) shall—

"(A) establish priorities for the allocation of funds within the eligible area; and

"(B) assess the efficiency of the administrative mechanism in rapidly allocating funds to the areas of greatest need within the eligible area.

"SEC. 2533. TYPE AND DISTRIBUTION OF GRANTS.

"(a) GRANTS BASED ON RELATIVE NEED OF AREA.—

"(1) IN GENERAL.—Not later than 60 days after an appropriation becomes available to carry out this subpart, the Secretary, acting through the Health Resources and Services Administration, shall use 50 percent of the amount appropriated under section 2536 for such fiscal year, to make grants to eligible areas under section 2531.

"(2) AMOUNT OF GRANT.—

"(A) GENERAL RULE.—The Secretary shall make a grant to each eligible area under paragraph (1) in an amount that bears the same ratio to the amount available under paragraph (1) as the sum of—

"(i) the relative cases per area factor for such area as multiplied by three; and

"(ii) the relative cases per area factor for such area as multiplied by the relative per capita factor for such area; divided by

"(iii) four;

bears to 100.

"(B) RELATIVE CASES PER AREA FACTOR.—As used in this paragraph, the term 'relative cases per area factor' means the ratio of the number of individuals with AIDS in an eligible area, as reported to the Centers for Disease Control, to the number of such individuals in all eligible areas.

"(C) RELATIVE PER CAPITA FACTOR.—As used in this paragraph, the term 'relative per capita factor' means the ratio of the per capita incidence of individuals with AIDS in

an eligible area, as reported to the Centers for Disease Control, to the per capita incidence of such individuals in all eligible areas.

"(D) ADJUSTMENTS.—The Secretary shall make such proportionate adjustments in amounts allocated for grants to eligible areas as shall be necessary to ensure that total amount of such grants are neither more or less than the amount available for grants under this subsection.

"(b) SUPPLEMENTAL GRANTS.—

"(1) IN GENERAL.—Not later than 150 days after the first day of each fiscal year, the Secretary shall use the remainder of the amounts made available under section 2536 for such fiscal year, to make grants under section 2531 to eligible areas that submit an application to the Secretary that—

"(A) contains a report concerning the dissemination of emergency relief funds under section 2533(a) and the plan for utilization of such funds;

"(B) demonstrates the severe need in such area for supplemental financial assistance to combat the HIV epidemic;

"(C) demonstrates the commitment of the local resources of the area, both financial and in-kind, to combatting the HIV epidemic;

"(D) demonstrates the ability to the area to utilize such supplemental financial resources in a way that is immediately responsive and cost effective; and

"(E) demonstrates that resources will be allocated in accordance with the local demographic incidence of AIDS including funds for services for infants, children, women, and families with HIV disease.

"(2) AMOUNT OF GRANT.—The amount of each grant made by the Secretary based on the application submitted by the eligible area.

"SEC. 2534. USE OF AMOUNTS.

"(a) GRANT TO INSTITUTIONS.—

"(1) IN GENERAL.—Amounts received under a grant awarded under this subpart may be used by the grantee to provide direct financial assistance to any public or not-for-profit private hospital, clinic, nursing home, subacute care facility, or community health center, that demonstrates that such entity—

"(A) is providing care or services to a disproportionate share of low income individuals and families with HIV disease; and

"(B) is expending resources in the provision of services to such low income individuals and families which exceed reimbursement;

"(2) USE OF FUNDS BY INSTITUTIONS.—An institution that receives assistance under paragraph (1) shall use such amounts to—

"(A) enhance the quality of services, care, and treatment of low-income individuals and families with HIV disease; and

"(B) deliver outpatient and ambulatory care services including case management to such individuals and families, including comprehensive treatment and support services.

"(3) PRIORITY.—In allocating assistance received under a grant awarded under section 2531, the grantee shall give priority to those eligible institutions under paragraph (1) that—

"(A) have established a plan to evaluate the utilization of services provided in the care of individuals and families with HIV disease; and

"(B) have established a system designed to ensure that such individuals and families are referred or discharged to the most medically appropriate level of care as soon as such referral or discharge is medically indicated.

"(b) GRANT TO AGENCIES.—Amounts received under a grant awarded under this subpart may be used by the grantee to provide direct financial assistance to any public or non-profit agency, clinic, community based organization, or community health center that has the capacity to provide case managed outpatient health and support services to individuals and families with HIV disease that are critical to—

"(1) prevent unnecessary in-patient hospitalization; and

"(2) expedite the discharge of the individual to the most medically appropriate level of service.

"(c) ADDITIONAL USES.—

"(1) RENOVATION OF REHABILITATION.—In addition to the use specified in subsection (a), amounts received under a grant awarded under this subpart may be used by the grantee to renovate or rehabilitate congregate care housing units, long-term care facilities, transitional care facilitieacute care facilities for the treatment of individuals with HIV disease, if the grantee demonstrates that—

"(A) an adequate number of—

"(i) congregate care residential units; or

"(ii) long term care or sub acute care nursing beds

are not available within the grantee eligible area for occupancy by individuals with HIV disease;

"(B) it has made a good faith effort to identify and eliminate local regulatory barriers that have impeded the creation, and utilization by individuals with HIV disease, or such facilities; and

"(C) it has exercised its authority to insure that individuals with HIV disease have access to such facilities.

"(2) MATCHING REQUIREMENT.—The Secretary shall not permit a grantee to use amounts received under a grant awarded under section 2531 for renovation or rehabilitation under paragraph (1) unless the local political subdivision with jurisdiction over the grantee area provides the grantee with local or State funds in an amount equal to the amount of the grant that is used under paragraph (1). Such local or State contribution to such renovation or rehabilitation program may be in the form of in kind services, goods or real property.

"(3) ADMINISTRATION AND PLANNING.—Not more than 5 percent of amounts received under a grant awarded under this subpart shall be utilized to carry out the administrative and planning activities described under section 2532.

"SEC. 2535. APPLICATION.

"(a) IN GENERAL.—To be eligible to receive a grant under this subpart, an eligible area shall prepare and submit, to the Secretary, an application at such time, in such form, and containing such information as the Secretary shall require, including assurances adequate to ensure—

"(1) that funds received under a grant awarded under this subpart will be used to supplement not supplant State and local funds currently utilized to provide health and support services to individuals with HIV disease;

"(2) that the eligible area has an HIV planning council, pursuant to section 2532, and has developed or will develop a comprehensive plan for the organization and delivery of HIV services that is compatible with any existing State or local HIV care plans; and

"(3) that agencies and institutions within the eligible area that will receive funds under a grant provided under this subpart shall participate in any established HIV community based continuum of care.

"(b) ADDITIONAL APPLICATION.—An eligible area that desires to receive a grant under section 2533(b) shall prepare and submit, to the Secretary, an additional application at such time, in such form, and containing such information as the Secretary shall require, including the information required under such subsection.

"SEC. 2536. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated to make grants under this subpart, $300,000,000 in each of the fiscal years 1991 and 1992, and such sums as may be necessary in each of the fiscal years 1993 through 1995.".

## TITLE II—HIV CARE GRANTS

SEC. 201. HIV CARE GRANTS.

Part C of title XXV of the Public Health Service Act (as added by section 101) is amended by adding at the end thereof the following new subpart:

"Subpart 2—Care Grant Program

"SEC. 2540. GRANTS.

"The Secretary shall make grants to States to enable such States to improve the quality, availability and organization of care, treatment and support services for individuals and families with HIV disease in urban and rural areas.

"SEC. 2541. GENERAL USE OF GRANTS.

"(a) IN GENERAL.—A State shall use amounts provided under grants made under this subpart—

"(1) to establish and operate HIV care consortia within areas most affected by HIV disease that shall be designed to provide a comprehensive continuum of care to individuals and families with HIV disease in accordance with section 2542;

"(2) to provide home- and community-based care services for individuals with HIV disease in accordance with section 2543;

"(3) to develop and provide assistance to mechanisms that assure the continuity of health insurance coverage for individuals with HIV disease in accordance with section 2544;

"(4) to provide therapeutic treatments, that have been determined to prolong life or prevent serious deterioration of health, to low-income individuals with HIV disease in accordance with section 2545; or

"(5) to integrate early diagnosis and early intervention services for individuals with HIV disease with primary health care and support services provided in existing health care settings, in accordance with section 2564.

"(b) INFANTS AND WOMEN, ETC.—A State shall use not less than 15 percent of funds allocated under this subpart to provide health and support services to infants, children, women, and families with HIV disease.

"SEC. 2542. GRANTS TO ESTABLISH HIV CARE CONSORTIA.

"(a) CONSORTIA.—To be eligible to receive a grant under section 2541(1), an application shall—

"(1) be a consortia of public and nonprofit private health care and support service providers and community based organizations; and

"(2) agree to use funds received under such a grant for the planning, development and delivery of comprehensive outpatient and support services for individuals with HIV disease, including—

"(A) essential health services such as case management services, medical, nursing, and dental care, diagnostics, monitoring, and medical follow-up services, mental health, developmental, and rehabilitation services, home health and hospice care; and

"(B) essential support services such as transportation services, attendant care, homemaker services, day or respite care, nutrition services, child welfare and family services (including foster care and adoption services), housing services, benefits advocacy, and legal services.

"(b) ASSURANCES.—

"(1) REQUIREMENT.—To receive a grant under section 2541(1), an applicant consortium shall provide assurances that—

"(A) within any locality in which such applicant consortium is to operate, the specific populations and subpopulations of individuals and families with HIV disease have been identified;

"(B) the services plan developed by such applicant consortium addresses the special care and service needs of the populations and subpopulations identified under subparagraph (A); and

"(C) when practicable, within each locality served by such applicant consortium, a single coordinating entity will be established that shall be capable of integrating the delivery of services to the populations and subpopulations identified under subparagraph (A).

"(2) EXCEPTION.—Subparagraph (C) of paragraph (1) shall not apply to any applicant consortium that will operate in a community or locality in which it has been demonstrated by the State, by the locality, or by the applicant consortium that—

"(A) subpopulations exist within the community to be served that have unique service requirements; and

"(B) such unique service requirements cannot be adequately and efficiently addressed by a single consortium serving the entire community or locality.

"(c) APPLICATION.—To receive a grant from the State under section 2542(1), a consortium shall prepare and submit, to the State, an application that—

"(1) demonstrates that the consortium includes those agencies and community-based organizations—

"(A) with a record of service to populations and subpopulations with HIV disease requiring care within the community to be served; and

"(B) located in and representation of populations and subpopulations reflecting the local incidence of HIV;

"(2) demonstrates that the consortium has carried out an assessment of service needs within the geographic area to be served and has established a plan to insure the delivery of services to meet such identified needs, including—

"(A) assurances that service needs will be addressed through the coordination and expansion of existing services before new services are created;

"(B) assurances that, in metropolitan areas, the geographic area to be served by the consortium corresponds to the geographic boundaries of local health and support services delivery systems to the extent practicable;

"(C) assurances that, in the case of service for individuals residing in rural areas, the applicant consortium shall be capable of delivery case management services that link available community support services to specialized regional medical services; and

"(D) assurances that the assessment of service needs and the delivery of services will include participation by affected populations.

"(3) demonstrates that adequate planning has occurred to meet the special needs of families with AIDS, including family centered care for infants, children, women, and families;

"(4) demonstrates that the consortium has created a mechanism to periodically evaluate—

"(A) the success of the consortium in responding to such identified needs; and

"(B) the cost-effectiveness of the mechanisms employed by the consortium to deliver comprehensive care; and

"(5) demonstrates that the consortium will report to the state the results of the evaluations described in subsection (d).

"(d) DEFINITION.—As used in this subpart, the term 'family centered care' means the system of services described in section 2542 that is targeted specifically to the special needs of infants, children, women, and families. Family centered care shall be based on a partnership between parents, professionals, and the community designed to ensure an integrated, coordinated, culturally sensitive, and community-based continuum of care for children, women, and families with HIV diseases.

"(e) PRIORITY.—In awarding grants under section 2541(1), the State shall give priority to existing HIV care consortia so that such consortia may build on existing systems and experience and avoid duplication of efforts.

"SEC. 2543. GRANTS FOR HOME- AND COMMUNITY-BASED CARE.

"(a) USES.—A State may use amounts provided under a grant awarded under this subpart to make grants under section 2541(2) to entities to—

"(1) provide home and community-based health services for individuals with HIV disease pursuant to written plans of care prepared by health care professionals in such State for providing such services to such individuals;

"(2) provide for the identification, location, and provision of outreach services to individuals with HIV disease, including those in rural areas;

"(3) provide for the coordination of the provision of services under this subpart with the provision of similar or related services provided by public and private entities; and

"(4) give priority to the provision of outreach and home and community-based services to individuals with HIV disease who are low-income individuals.

"(b) DEFINITION.—As used in this subpart, the term "home and community-based health services"—

"(1) means, with respect to an individual with HIV disease, skilled health services furnished to the individual in the individual's home pursuant to a written plan of care established by a health care professional for the provision of such services and items described in paragraph (2);

"(2) includes—

"(A) durable medical equipment;

"(B) homemaker or home health aide services and personal care services furnished in the home of the individual;

"(C) day treatment or other partial hospitalization services;

"(D) home intravenous and aerosolized drug therapy (including prescription drugs administered intravenously as part of such therapy);

"(E) routine diagnostic testing administered in the home of the individual; and

"(F) mental health, developmental, and rehabilitation services; and

"(3) does not include—

"(A) inpatient hospital services; and

"(B) nursing home and other long term care facilities.

"SEC. 2544. CONTINUUM OF HEALTH INSURANCE COVERAGE.

"(A) State may use amounts received under a grant awarded under this subpart to establish a program of financial assistance under section 2541(3) to assist eligible low income individuals with HIV disease in—

"(1) maintaining a continuing of private health insurance; or

"(2) receiving medical benefits under a health insurance program established by the State.

"SEC. 2545. PROVISION OF THERAPEUTICS.

"(a) IN GENERAL.—A State may use amounts provided under a grant awarded under this subpart to establish a program under section 2541(4) to provide therapeutic care that has been determined to prolong life or prevent the serious deterioration of health arising from AIDS or HIV disease in eligible individuals.

"(b) ELIGIBLE INDIVIDUAL.—To be eligible to receive assistance from a State under this section an individual shall—

"(1) have a medical diagnosis of AIDS or HIV disease; and

"(2) be a low income individual, as defined by the State.

"(c) STATE DUTIES.—In providing assistance under this section the State shall—

"(1) determines, in accordance with guidelines issued by the Secretary, which therapies are eligible to be included under the program established under this section;

"(2) permit assistance to be made available under the program established under this section to purchase the therapies determined to be eligible under paragraph (1), and provide such ancillary devices that are essential to administer such therapies; and

"(3) provide outreach to individuals and families with HIV disease in rural areas and establish a distribution system that facilitates access to therapeutics for such individuals.

"SEC. 2546. PROGRAMS FOR EARLY INTERVENTION.

"A State may use amounts provided under a grant awarded under this subpart to establish a program under section 2541(5) to integrate early diagnosis and early intervention services with primary health care and support services, including drug treatment services, that are delivered in existing public health an medical care facilities for the purpose of—

"(1) providing outreach services to individuals with HIV disease and health care professionals who are unaware of the availability and potential benefits of early treatment of HIV infection, including those in rural areas;

"(2) offering clinical, diagnostic, and periodic medical monitoring services to such individuals; and

"(3) providing appropriate therapeutics that have been determined to prolong life or prevent serious deterioration of health in individuals with HIV disease.

"SEC. 2547. STATE APPLICATION.

"(a) IN GENERAL.—The Secretary shall not make a grant to a State under this subpart for a fiscal year unless the State prepares and submits, to the Secretary, an application at such time, in such form, and containing such agreements, assurances, and information as the Secretary determines to be necessary to carry out this subpart.

"(b) DESCRIPTION OF INTENDED USES AND AGREEMENTS.—The application submitted under subsection (a) shall contain—

"(1) a description of the purposes for which the State intends to use the assistance provided to the State under this subpart, including—

"(A) information relating to the services and activities to be provided;

"(B) a description of the manner in which such services and activites will be coordinated with other services and activities of public and private entities to provide a comprehensive continuum of care; and

"(C) information relating to the process for coordinating the various program options provided for in this subpart to maximize the effectiveness of the services provided; and

"(2) an assurance by the State that—

"(A) the legislature of the State will conduct public hearings concerning the proposed use and distribution of the assistance to be received under this subpart;

"(B) the State will, to the maximum extent practicable, ensure that services provided to an individual pursuant to a program established with assistance provided under this subpart will be provided without regard to the ability of the individual to pay for such services and without regard to the current or past health condition of the individual;

"(C) if any charges are imposed for the provision of services for which assistance is provided under this subpart, such charges—

"(i) will be pursuant to a public schedule of charges;

"(ii) will not be imposed on any eligible individual with an income that does not exceed 200 percent of the official poverty line as determined by the Secretary; and

"(iii) for an eligible individual with an income that exceeds 200 percent of the official poverty line, will be adjusted to reflect the income of such individual;

"(D) the State will provide for periodic independent peer review to assess the quality and appropriateness of health and support services provided by entities that receive funds from the State under this subpart;

"(E) the State will permit and cooperate with any Federal investigations undertaken under this subpart;

"(F) the State will maintain State expenditures for health and support services for individuals with AIDS or HIV disease at a level that is equal to not less than the average level of such expenditures maintained by the State for the 2-year period preceding the fiscal year for which the State is applying to receive a grant under this part;

"(G) the State will not make payments from assistance provided under this subpart for any item or service to the extent that payment has been made, or can reasonably be expected to be made, with respect to that item or service—

"(i) under any State compensation program, under an insurance policy, or under any Federal or State health benefits program; or

"(ii) by an entity that provides health services on a prepaid basis; and

"(H) the State shall establish a comprehensive plan for the organization and delivery of HIV health care and support services, in urban and rural areas, including provisions for the delivery of services to populations and subpopulations identified through the needs assessment required by section 2542.

"SEC. 2548. DISTRIBUTION OF FUNDS.

"(a) SPECIAL PROJECTS OF A NATIONAL SIGNIFICANCE.—

"(1) IN GENERAL.—Of the amount appropriated under section 2549, the Secretary shall use not to exceed 10 percent of such amount to—

"(A) provide technical assistance in administering and coordinating the activities authorized under section 2541; and

"(B) establish and administer a Special Projects of National Significance Program to award direct grants to States, localities, or community-based organizations to fund special programs for the care and treatment of individuals with HIV disease.

"(2) GRANTS.—The Secretary shall award grants under subsection (a) based on—

"(A) the need of the applicant to establish a demonstration project to assess the effectiveness of a particular model for the care and treatment of individuals with HIV disease;

"(B) the innovative nature of the proposed activity of the applicant; and

"(C) the potential replicability of the proposed activity in other similar localities or nationally.

"(3) SPECIAL PROGRAMS.—Special programs of a national significance may include those that are designed to—

"(A) deliver drug abuse treatment and HIV health care services at a single location, through either an outpatient or residential facility;

"(B) establish an incentive system designed to increase the number of health care facilities willing and able to serve low-income individuals and families with HIV diseases;

"(C) create a structure for the support and respite of informal and family-based care networks in the minority community critical to the delivery of comprehensive care;

"(D) create the capacity to deliver health and support services to individuals and families with HIV disease located in rural areas, and Indians (both Reservation and non-Reservation based), and/or deliver;

"(E) deliver health care and support services to homeless individuals and families with HIV diseases; and

"(F) deliver health and support care services to individuals with HIV disease who are incarcerated.

"(b) AMOUNT OF GRANT TO STATE.—

"(1) MINIMUM ALLOTMENT.—Subject to the extent of amounts made available under section 2549, the amount of a grant to be made under this subpart for—

"(A) each of the several States and the District of Columbia for a fiscal year shall be the greater of—

"(i) $100,000, and

"(ii) an amount determined under paragraph (2); and

"(B) each territory of the United States, as defined in paragraph 3, shall be an amount determined under paragraph (2).

"(2) DETERMINATION.—

"(A) FORMULA.—The amount referred to in paragraph (1)(A)(ii) for a State and paragraph (1)(B) for a territory of the United States shall be the product of—

"(i) an amount equal to the amount appropriated under section 2549 for the fiscal year involved; and

"(ii) the ratio of the distribution factor for the State or territory to the sum of the distribution factors for all the States or territories.

"(B) DISTRIBUTION FACTOR.—As used in subparagraph (A)(ii), the term 'distribution factor' means)—

"(i) in the case of a State, the product of—

"(I) the number of additional cases of AIDS in the State, as indicated by the number of cases reported to and confirmed by the Secretary for the 2 most recent fiscal years for which such data is available; and

"(II) the cube root of the ratio (based on the most recent available data) of—

"(aa) the average per capita income of individuals in the United States (including the territories); to

"(bb) the average per capita income of individuals in the State; and

"(i) in the case of a territory of the United States the number of additional cases of AIDS in the specific territory, as indicated by the number of cases reported to and confirmed by the Secretary for the 2 most recent fiscal years for which such data is available.

"(3) DEFINITIONS.—As used in this subsection, the term 'territory of the United States' means the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands and Puerto Rico.

"(c) ALLOCATION OF ASSISTANCE BY STATES.—

"(1) CONSORTIA.—In a State that has reported 1 percent or more of all AIDS cases reported to the Centers for Disease Control in all States, not less than 50 percent of the amount received by the State under a grant awarded under this subpart shall be utilized for the creation and operation of community-based comprehensive care consortia under section 2542, in those areas, including rural areas, within the State in which the largest number of individuals with HIV disease reside.

"(2) ALLOWANCES.—In allocating assistance under this subsection, a State shall take into account which areas received financial assistance under subpart 1.

"(3) PLANNING AND EVALUATIONS.—A State shall not use in excess of 5 percent of amounts received under a grant awarded under this subpart for planning and evaluation activities.

"(4) ADMINISTRATION.—A State shall not use in excess of 5 percent of amounts received under a grant awarded under this subpart for administration, accounting, reporting, and program oversight functions.

"(d) EXPEDITED DISTRIBUTION.—Not less than 75 percent of the amounts received under a grant awarded to a State under this subpart shall be obligated to specific programs and projects and made available for expenditure not later than 120 days after the receipt of such amounts by the State. Within such 120 day period, the State shall invite and receive public comment concerning methods for utilizing such amounts.

"(e) REALLOCATION.—Any amounts appropriated in any fiscal year and made available to a State under this subpart that have not been obligated as described in section 2548(d) shall be recaptured by the Secretary and reallotted to other States in proportion to the original grants made to such States.

"SEC. 2549. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated to make grants under this subpart, $300,000,000 in each of the fiscal years 1991 and 1992, and such sums as may be necessary in each of the fiscal years 1993 through 1995.

"SEC. 2550. DEFINITION.

"As used in this subpart except as otherwise specifically provided, the term 'State' means each of the 50 States, the District of Columbia, the Virgin Islands, Guam, American Samoa, the Commonwealth of the

Northern Mariana Islands and Puerto Rico.".

## TITLE III—TREATMENT AND NOTIFICATION OF INDIVIDUALS WITH HIV DISEASE AND THEIR FAMILIES

SEC. 301. REQUIREMENT OF REPORTING AND PARTNER NOTIFICATION WITH RESPECT TO CASES OF INFECTION.

(a) REPORTING.—

(1) IN GENERAL.—The Secretary may not make a grant under title II of this Act unless, with respect to testing for infection with the etiologic agent for acquired immune deficiency syndrome, the State involved requires that—

(A) any entity carrying out such testing confidentially report to the State public health officer information sufficient—

(i) to perform statistical and epidemiological analyses of the incidence in the State of cases of such infection; and

(ii) to perform. statistical and epidemiological analyses of the demographic characteristics of the population of individuals in the State with such infections:

(B) the public health officer of such State establishes a system of reporting cases of individuals infected with the etiologic agent for acquired immune deficiency syndrome that is necessary to the extent appropriate in the determination of such officer, for the State to carry out the notification of unsuspecting persons at risk for exposure to the etiologic agent for acquired immune deficiency syndrome.

(2) PROVISION OF CERTAIN INFORMATION TO CENTERS FOR DISEASE CONTROL.—The Secretary may not take a grant under Title II of this Act unless the State involved agrees to provide to the Director of the Centers for Disease Control all information received by the State pursuant to the requirement described in clauses (i) and (ii) of paragraph (1)(A).

(b) PARTNER NOTIFICATION.—

(1) IN GENERAL.—The Secretary may not make a grant under title II of this Act unless—

(A) the State involved requires that the appropriate state or local public health officer (as determined by the State) carry out, to the extent appropriate in the determination of such officer, a program of partner notification with respect to cases of exposure to the etiologic agent acquired immune deficiency syndrome; and

(i) advises all such individuals, regarding the benefits to undergo testing for such infection; and

(ii) provides to all such individuals information on the medical benefits of diagnosing such infection in the early stages of infection and of the availability of treatment and support services for individuals and families with HIV disease.

(2) RULE OF CONSTRUCTION WITH RESPECT TO RESPONSIBILITY FOR MAKING NOTIFICATIONS.—With respect to compliance with paragraph (1) as a condition of receiving a grant under title II of this Act, such paragraph may not be construed to require that a State establish a requirement that any entity, other than the public health official referred to in such paragraph, make the notifications required under such system.

SEC. 302. EFFECTIVE DATE.

This title shall be effective for all fiscal years beginning after September 30, 1992.

## TITLE IV—HIV DISEASE HEALTH SERVICES RESEARCH, EVALUATION, AND ASSESSMENT

SEC. 401. PURPOSE.

It is the purpose of this section to develop, as rapidly as practicable, information concerning the organization, impact, efficacy, and cost effectiveness of various health care service delivery and financing systems for the care of individuals with HIV disease.

SEC. 402. RESEARCH, EVALUATION, AND ASSESSMENT PROGRAM.

(a) ESTABLISHMENT.—The Secretary of Health and Human Services, acting through the Agency for Health Care Policy and Research, shall establish a program to enable independent research to be conducted by individuals and organizations with appropriate expertise in the fields of health, health policy, and economics (particularly health care economics) to develop—

(1) a comparative assessment of the impact and cost-effectiveness of major models for organizing and delivering AIDS and HIV health care, mental health, early intervention, and support services, that shall include a report concerning patient outcomes, satisfaction, perceived quality of care, and total cumulative cost;

(2) a review of major health services financing mechanisms, including private health insurance policies, self pay options, health maintenance organization plans financed under the Social Security Act, and State and local government funding options, and the relative contribution of each of such payment options;

(3) an assessment of how point-of-entry procedures for obtaining HIV health care treatment and support services impacts the cost, quality, and outcome of the care and treatment of HIV individuals and families and the extent to which the overall quality, cost, and outcome of such care can be related to the source of payment for treatment;

(4) a comprehensive report of the significant financial, regulatory, organizational, and social barriers that serve to limit the delivery of high quality care services to individuals and families with HIV disease, with special emphasis being placed on the extent to which disadvantaged status impacts such service delivery; and

(5) a summary report concerning the major and continuing unmet needs in health care, mental health, early intervention, and support services for individuals and families with HIV disease in urban and rural areas.

(6) a review and assessment of models for the delivery of health and support services to infants, children, women, and families with HIV disease.

(b) REPORT.—Not later than 2 years after the date of enactment of this Act, the Secretary of Health and Human Services shall prepare and submit, to the Committee on Energy and Commerce, and Ways and Means of the House of Representatives and the Committee on Labor and Human Resources, and Finance of the Senate, a report that contains the reports, evaluations and assessments required under subsection (a).

## TITLE V—MISCELLANEOUS PROVISIONS

SEC. 501. ADAMHA IV DRUG ABUSE WAIVER.

(a) INTRAVENOUS DRUG USER.—Section 1916(c)(7) of the Public Health Serivces Act (42 U.S.C. 300x-4(a)(7)) is amended by adding at the end thereof the following new sentence; "The Secretary shall waive the provisions of the preceding sentence for any State which has submitted application for such a wavier to the Secretary prior to September 30, 1989.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall be effective as of October 1, 1989.".

SEC. 502. PROHIBITION ON USE OF FUNDS.

None of the funds made available under this Act, or an amendment made by this Act, shall be used to provide individuals with hypodermic needles or syringes so that such individuals may use illegal drugs.

SEC. 503. REQUIREMENT OF STATE LAWS PROTECTING DONATIONS OF BLOOD.

The Secretary of Health and Human Services shall not make a grant to a State under this Act, or an amendment made by this Act, unless the Secretary determines that the criminal laws of the State are adequate to prosecute any individual who knowingly and intentionally donates, or knowingly and intentionally attempts to donate, blood, blood products, semen, tissue, organs, or other bodily fluids if such individual—

(1) has been diagnosed on the basis of laboratory evidence as infected with the human immunodeficiency virus; and

(2) has been informed that he or she is infected with the human immunodeficiency virus and has knowledge of the risk of transmission of such virus, through donated blood, blood products, semen, tissues, organs, or other bodily fluids.

Nothing in this Act shall preclude any State from making it a crime to donate knowingly and intentionally, or knowingly and intentionally attempt to donate, blood, blood products, semen, tissues, organs, or other bodily fluids by (1) an individual who, on or after January 1, 1977, is or has been a user of any intravenous drug, the sale, distribution, or use of which is prohibited under Federal or State law after the time the individual injected the drug or; (2) an individual who has engaged in prostitution on or after January 1, 1977.

SEC. 504. INSPECTION OF BLOOD BANKS AND PRODUCERS OF BLOOD PRODUCTS.

(a) There is authorized an additional 150 full time equivalent positions to the Food and Drug Administration. The positions established by this authority are to be used for the inspection of blood banks and producers of blood products.

(h) There is also authorized an appropriation of $1,500,000 to carry out this activity in fiscal year 1991 and such sums as may be necessary through fiscal year 1995.

SEC. 505. TECHNICAL CORRECTIONS TO THE PRISON TESTING ACT OF 1988.

Section 902 of the Prison Testing Act of 1988 (42 U.S.C. 300ee-6) is amended—

(1) in subsection (b)(2)—

(A) by striking out "may" in subparagraph (A) and inserting in lieu thereof "will"; and

(B) by striking out subparagraph (B) and inserting in lieu thereof the following new subparagraph:

"(B) victims of aggravated sexual abuse, as described in subsection (c)(2), will be informed of the results of the test, if the person convicted of the aggravated sexual assault tests positive for exposure to the human immunodeficiency virus and if the victim requests to be so informed after the victim is notified of the right of the victim to be informed under this subparagraph.";

(2) in subsection (c)(2)—

(A) by striking out "99" and inserting in lieu thereof "109A"; and

(B) by striking out "rape" and inserting in lieu thereof "aggravated sexual abuse"; and

(3) in subsection (g), by striking out "1990" and inserting in lieu thereof "1995".

Mr. MITCHELL. I move to reconsider the vote.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## CHEMICAL AND BIOLOGICAL WEAPONS CONTROL ACT OF 1989

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to Calendar No. 296, S. 195, the chemical and biological weapons control bill.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

The clerk will report the bill.

The legislative clerk read as follows:

A bill (S. 195) entitled the "Chemical and Biological Weapons Control Act of 1989."

The Senate proceeded to consider the bill which had been reported from the Committee on Foreign Relations, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

*SECTION 1. SHORT TITLE.*

*This Act may be cited as the "Chemical and Biological Weapons Control Act of 1989".*

*SEC. 2. FINDINGS.*

*The Congress finds that—*

*(1) chemical weapons were employed in the recent Iran-Iraq war and by Iraq in attacks against its Kurdish minority;*

*(2) the use of chemical and biological weapons in violation of international law is abhorrent and requires immediate and effective sanctions;*

*(3) United Nations Security Council Resolution 620, adopted on August 26, 1988, states the intention of the Security Council to consider immediately "appropriate and effective" sanctions against any country using chemical and biological weapons in violation of international law;*

*(4) the Declaration of the Paris Conference on the Prohibition of Chemical Weapons demonstrates the resolve of most countries to reaffirm support for the 1925 protocol banning the use of chemical and bacteriological weapons and to press for attainment of a ban on the production and possession of chemical weapons;*

*(5) as many as 20 countries, including Iran, Iraq, Syria, and Libya have or are seeking the capability to produce chemical weapons;*

*(6) as many as 10 countries are working to produce biological weapons;*

*(7) by the year 2000, at least 15 developing countries will have the ability to produce ballistic missiles capable of carrying chemical or biological warheads;*

*(8) the further spread of chemical or biological weapons capabilities would pose a threat of incalculable proportions to friends and allies of the United States and undermine the national security of the United States;*

*(9) the United Nations should create an effective means of monitoring and reporting regularly on commerce in equipment, materials, and technology applicable to the attainment of a chemical or biological weapons capability; and*

*(10) every effort should be made to conclude an early agreement banning the production and stockpiling of chemical or biological weapons.*

*SEC. 3. PURPOSE.*

*It is the purpose of this Act—*

*(1) to mandate United States sanctions and to encourage international sanctions against countries that use chemical or biological weapons in violation of international law or use lethal chemical or biological weapons against their own nationals;*

*(2) to require presidential reports on efforts that threaten United States interests or regional stability by Iran, Iraq, Syria, Libya, and others to acquire the materials and technology to develop, produce, stockpile, and deliver chemical and biological weapons;*

*(3) to urge cooperation with other supplier nations to devise effective controls on the transfer of materials, equipment, and technology applicable to chemical or biological weapons production;*

*(4) to promote agreements banning the transfer of missiles suitable for armament with chemical or biological warheads;*

*(5) to encourage an early agreement banning the development, production, and stockpiling of chemical weapons; and*

*(6) to seek effective international means of monitoring and reporting regularly on commerce in equipment, materials, and technology applicable to the attainment of a chemical or biological weapons capability.*

*TITLE I—SANCTIONS AGAINST THE USE OF CHEMICAL AND BIOLOGICAL WEAPONS*

*SEC. 101. SANCTIONS FOR THE USE OF CHEMICAL WEAPONS.*

*(a) DETERMINATION BY THE PRESIDENT.—(1) Whenever information becomes available to the United States Government indicating the substantial possibility that, on or after the date of enactment of this Act, a foreign country has used chemical or biological weapons, the President shall, within 60 days of the receipt of such information by the United States Government, make a determination as to whether that foreign country, on or after such date, has used chemical or biological weapons in violation of international law or has used lethal chemical or biological weapons against its own nationals.*

*(2) Not later than 60 days after the chairman of the Committee on Foreign Relations of the Senate, upon consultation with the ranking minority member of such Committee, or the chairman of the Committee on Foreign Affairs of the House of Representatives, upon consultation with the ranking minority member of such Committee, request the President to make a determination as to whether or not a foreign country, on or after the date of enactment of this Act, has used chemical or biological weapons in violation of international law or has used lethal chemical or biological weapons against its own nationals, the President shall make such determination and so report in writing to the chairmen of such Committees.*

*(3) In making the determination under paragraph (1) or (2), the President shall consider the following:*

*(A) All physical and circumstantial evidence available bearing on the possible use of such weapons.*

*(B) All information provided by alleged victims, witnesses, and independent observers.*

*(C) The extent of the availability of the weapons in question to the purported user.*

*(D) All official and unofficial statements bearing on the possible use of such weapons.*

*(E) Whether, and to what extent, the country in question is willing to honor a request from the Secretary General of the United Nations to grant timely access to a United Nations fact-finding team to investigate the possibility of chemical or biological weapons use or to grant such access to other legitimate outside parties.*

*(b) SANCTIONS.—In the event of a Presidential determination under subsection (a) that, on or after the date of enactment of this Act, a foreign country has used chemical or biological weapons in violation of international law or has used lethal chemical or biological weapons against its own nationals, then the President shall—*

*(1) terminate assistance to that country under the Foreign Assistance Act of 1961, except for urgent humanitarian assistance, or for the purpose of purchasing food or other agricultural products;*

*(2) terminate all foreign military sales financing under the Arms Export Control Act with respect to that country;*

*(3) terminate United States Government sales to that country of any defense articles or defense services;*

*(4) prohibit the issuance of any licenses for the export to that country of any item on the United States Munitions List;*

*(5) prohibit, under the authorities of section 6 of the Export Administration Act of 1979, the export to that country of any goods or technology on the control list established pursuant to section 5(c)(1) of that Act;*

*(6) oppose, in accordance with section 701 of the International Financial Institutions Act, the extension of any loan or financial or technical assistance to that country by international financial institutions;*

*(7) prohibit the import of any good, commodity, or service from that country;*

*(8) deny that country any credit or credit guarantees through the Export-Import Bank of the United States;*

*(9) prohibit, under the authorities of the International Emergency Economic Powers Act, any United States bank from making any loan or providing any credit to that country, except for loans or credits for the purpose of purchasing food or other agricultural products; and*

*(10) terminate, consistent with international law, the landing rights in the United States of any airline owned by the government of that country at the earliest practicable date.*

*SEC. 102. WAIVER.*

*The President may waive the applicability of some or all of the sanctions listed in section 101 with respect to a specific country for a period of not to exceed nine months beginning on the date of the determination by the President of use by that country of chemical or biological weapons in violation of international law, or the use of lethal chemical or biological weapons against its own nationals, if he determines that such waiver is in the national interest of the United States and so certifies to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate. Together with such certification, the President shall submit in writing a statement containing a detailed explanation of the national interest requiring a waiver, which may include a classified addendum if necessary.*

*SEC. 103. NOTIFICATION.*

*Not later than five days after he imposes any sanction described in section 101 against a country or waives under section 102 the applicability of any such sanction, the President shall so notify in writing the Speaker of the House of Representatives and*

the chairman of the Committee on Foreign Relations of the Senate.

SEC. 104. CONTRACT SANCTITY.

(a) SANCTIONS NOT APPLIED TO EXISTING CONTRACTS.—No sanction described in paragraphs (5) through (10) of section 101 shall apply to any activity pursuant to any contract or international agreement entered into before the date of the appropriate presidential determination under section 101(a) unless the President determines, on a case-by-case basis, that to so apply such sanction would prevent the performance of a contract or agreement that would have the effect of assisting a country in using chemical or biological weapons in violation of international law or in using lethal chemical or biological weapons against its own nationals.

(b) SANCTIONS APPLIED TO EXISTING CONTRACTS.—The sanctions described in paragraphs (1), (2), (3), and (4) of section 101 shall apply to contracts and agreements, without regard to the date such contracts or agreements were entered into, except that such sanctions shall not apply to any contract or agreement entered into before the date of the appropriate presidential determination under section 101(a) if the President determines that the application of such sanction would be detrimental to the national security interests of the United States.

SEC. 105. REMOVAL OF SANCTIONS.

The President may remove the sanctions imposed pursuant to section 101 of this Act if the President determines and so certifies to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate that the country under sanction—

(1) has renounced any use of chemical or biological weapons in violation of international law, or any use of lethal chemical or biological weapons against its own nationals, and has provided reliable assurances to that effect; and

(2) has made satisfactory restitution to those affected in its earlier use of chemical or biological weapons in violation of international law or in its earlier use of lethal chemical or biological weapons against its own nationals.

SEC. 106. PRESIDENTIAL REPORTS.

Not later than 90 days after the date of enactment of this Act, and every 12 months thereafter, the President shall submit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate, a report—

(1) detailing efforts by countries or subnational groups that threaten United States security interests or regional stability (including efforts by Iran, Iraq, Libya, and Syria and other developing countries or subnational groups) to acquire the materials and technology to develop, produce, stockpile, and deliver chemical and biological weapons, together with an assessment of the present and future capabilities of such countries or subnational groups to develop, produce, stockpile, and deliver chemical and biological weapons; and

(2) describing the degree to which any country or foreign person has aided or abetted the government of any country or a subnational group to engage in any activity in connection with the acquisition of any such chemical or biological weapon.

To the extent practicable, reports submitted pursuant to this section should be based on unclassified information. Portions of each such report may be classified.

SEC. 107. MULTILATERAL EFFORTS.

The President is urged—

(1) to continue close cooperation with others in the Australia Group in support of its current efforts and in devising additional means to monitor and control the supply of chemicals applicable to weapons production to Iraq, Iran, Syria, and Libya—countries that currently support or have recently supported acts of international terrorism;

(2) to work closely with other countries also capable of supplying equipment, materials, and technology with particular applicability to chemical or biological weapons production to devise the most effective controls possible on the transfer of such materials, equipment, and technology;

(3) to seek agreements with countries that produce ballistic missiles suitable for carrying chemical or biological warheads that would prevent the transfer of such missiles; and

(4) to take the initiative in pressing for early conclusion of an international agreement banning the development, production, and stockpiling of chemical weapons.

SEC. 108. UNITED NATIONS INVOLVEMENT.

The President is urged to give full support to—

(1) the United Nations Security Council, in furtherance of Security Council Resolution 620, adopted August 26, 1988, in developing sanctions comparable to those enumerated in section 101 of this Act, to be imposed in the event that any country uses chemical or biological weapons in violation of international law; and

(2) the creation of an effective multilateral means of monitoring and reporting regularly on commerce in chemical equipment, materials, and technology applicable to the attainment of a chemical or biological weapons capability.

## TITLE II—MEASURES TO PREVENT THE PROLIFERATION OF CHEMICAL AND BIOLOGICAL WEAPONS

SEC. 201. MULTILATERAL EFFORTS.

It is the policy of the United States to seek multilaterally coordinated efforts with other countries to control the proliferation of chemical and biological weapons.

SEC. 202. EXPORT CONTROLS.

(a) IN GENERAL.—The President shall—

(1) use the authorities of the Arms Export Control Act to control the export of those defense articles and defense services, and

(2) use the authorities of the Export Administration Act of 1979 to control the export of those goods and technologies,

that the President determines would assist a country in acquiring the capability to develop, produce, stockpile, deliver, or use chemical or biological weapons.

(b) EXPORT ADMINISTRATION ACT.—Section 6 of the Export Administration Act of 1979 (50 U.S.C. App. 2405) is amended by adding at the end the following:

"(q) CHEMICAL AND BIOLOGICAL WEAPONS.—A validated license shall be required under this section for the export of any goods or technology that the President determines would assist a country in acquiring the capability to develop, produce, stockpile, deliver, or use chemical or biological weapons, unless the destination of such export is a country with whose government the United States has entered into bilateral or multilateral arrangements for the control of chemical or biological weapons related goods or technology.".

SEC. 203. SANCTIONS AGAINST CERTAIN FOREIGN PERSONS.

(a) DETERMINATION BY THE PRESIDENT.—

(1) IMPOSITION OF SANCTIONS.—The President, subject to subsection (d), shall impose on a foreign person the sanctions under subsection (b) if the President determines that the foreign person, on or after the date of the enactment of this Act, has knowingly and substantially contributed to the efforts to use, develop, produce, stockpile, otherwise acquire chemical or biological weapons by any country that the President has determined has at any time after January 1, 1980—

(A) used chemical or biological weapons in violation of international law;

(B) used lethal chemical or biological weapons against its own nationals;

(C) made substantial preparations to do the activities described in clause (A) or (B); or

(D) been designated pursuant to section 6(j) of the Export Administration Act of 1979 as a country which supports international terrorism.

(2) CONSULTATIONS WITH AND ACTIONS BY GOVERNMENT OF JURISDICTION.—In the event the President has consulted with the government with primary jurisdiction over that foreign person involved in the activities cited in paragraph (1), the President may decide not to impose sanctions if he has determined and certified to the Congress that such government has taken specific and effective actions, including appropriate penalties, to terminate the involvement of the foreign person in such activities.

(3) REPORT TO CONGRESS.—The President shall report to the Congress, not later than 30 days after making a determination under paragraph (1), on the status of consultations with the appropriate government under paragraph (2), and the basis for any determination under paragraph (2) that such government has taken specific corrective actions.

(b) SANCTIONS.—The sanctions to be imposed on a foreign person under subsection (a) are the following:

(1) PROCUREMENT SANCTION.—The United States Government shall not procure, or enter into any contract for the procurement of, any goods or services from that foreign person.

(2) IMPORT SANCTION.—The importation into the United States of products produced by that foreign person is prohibited.

(c) TERMINATION OF SANCTIONS.—A sanction imposed on a foreign person under this section shall cease to apply to that foreign person after two years if the President determines and certifies to the Congress that the foreign person has ceased all activities described in subsection (a)(1).

(d) EXCEPTIONS.—The President shall not be required under this section to apply sanctions—

(1) in the case of procurement of defense articles or defense services—

(A) under existing contracts or subcontracts, including the exercise of options for production quantities to satisfy United States operational military requirements;

(B) if the President determines that the person or other entity to which the sanctions would otherwise be applied is a sole source supplier of the defense articles or services, that the defense articles or services are essential, and that alternative sources are not readily or reasonably available; or

(C) if the President determines that such articles or services are essential to the national security under defense coproduction agreements;

(2) to products or services provided under contracts entered into before the date on which the President publishes his intention to impose sanctions;

*(3) to—*

*(A) spare parts,*

*(B) component parts, but not finished products, essential to United States products or production, or*

*(C) routine servicing and maintenance of products, to the extent that alternative sources are not readily or reasonably available;*

*(4) to information and technology not directly useful for the development, production, or stockpiling of chemical or biological weapons; or*

*(5) to medical or other humanitarian items.*

*SEC. 204. DEFINITIONS.*

*For the purposes of this Act—*

*(1) the term "foreign person" means—*

*(A) an individual who is not a citizen of the United States or an alien admitted for permanent residence to the United States; or*

*(B) a corporation, partnership, or other entity, including any parent or subsidiary entity thereof, which is created or organized under the laws of a foreign country or which has its principal place of business outside the United States; and*

*(2) the terms "defense article" and "defense service" have the same meanings as are given to such terms by paragraphs (3) and (4), respectively, of section 47 of the Arms Export Control Act.*

Mr. KERRY. Mr. President, I ask unanimous consent that I be permitted to proceed as in morning business.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

## TRIBUTE TO JOSEPH CAMPBELL

Mr. KERRY. Mr. President, yesterday after battling for 2 years against central nervous system lumphoma, a Hingham, MA, native and Vietnam veteran by the name of Joseph Campbell died at the Spalding Rehabilitation Hospital in Boston. I want to share with the Senate the obituary, which was distributed by his brother, which I received today.

It says that Mr. Campbell gained notoriety in the last years of his life campaigning with Senator JOHN KERRY and fellow Hingham veteran, Jim Kilroy, on behalf of a bill that would extend veterans benefits to victims of relatively rare forms of soft tissue cancers, who were exposed to the defoliant agent orange during service in Vietnam.

Mr. Campbell, in his last appearance at a news conference, shortly after undergoing extensive radiation and chemotherapy, told the assembled reporters in halting speech that Vietnam veterans should not be denied benefits because scientists held differing opinions on the relationship between exposure to agent organge and such rare cancers. Mr. Campbell believed that any doubt on the issue should be resolved in favor of the veterans who, he believed, lived dramatically altered lives, as a result of their service to their country.

Mr. Campbell was raised in Medford and graduated from Malden Catholic High School and Salem State College. He enlisted in the U.S. Army in 1968, graduated from officer candidate school at Fort Benning, GA, and was commissioned in 1969. He served as an infantry officer and adviser to the South Vietnamese army in Vietnam's delta region in 1970 and 1971, where he was exposed to agent orange.

On his discharge form the army, Mr. Campbell founded CAMCO, Inc., a janitorial supply sales and distribution company located in Norwalk.

Mr. Campbell was a communicant of the Church of the Resurrection in Hingham, a member of the Knights of Columbus and the Hingham Post of Veterans of Foreign Wars, Vietnam Veterans of America, and formerly the Irish-American Club of Malden.

He was 44 years old at his death; never received any veterans benefits, despite his efforts, and he is survived by his wife, Mary, and four children, Jay 19; Karen, 16; Allison, 13 and Megan, 9.

Mr. President, Joe's brother, Richard, was kind enough to write me a personal letter of gratitude. I will not share the personal parts of it, but he said that Joe died on May 15, 1990, yesterday, from central nervous system lymphoma.

To my knowledge, he is the only member of our family ever to develop any form of cancer, let alone this relatively rare lumphoma, and like Joe before his death, I am convinced to a moral certitude that resulted from his exposure to Agent Orange.

While the ideology of Joe's disease is of no consequence to him now, he would certainly want you to continue your efforts for other veterans, because he believed passionately in the righteousness of the cause. His intense feelings on the issue were exemplified by his willingness to appear with you and Jim Kilroy before the news media to advance the bill you proposed, even though the disease wracked him physically and intellectually. He did not allow humiliation, attendant to his altered appearance and his difficulty in expressing his thoughts, to interfere with his obligation to assist you and Mr. Kilroy.

Indeed, Mr. President, he assisted. He was brave and courageous to the last, believing that it was his role to try to guarantee that other veterans did not have to suffer as he did, and that other families did not have to be left without a Government that was willing to respond to their needs.

I think what Joe said is so important for people to think about. There may be some scientific controversy and some scientists may differ. But what we are talking about is an issue of a relationship between this Government, our Government, and people who were willing to resolve their doubts in favor of service to that Government. There are not that many veterans who are subject to these very rare diseases. Very few veterans are claiming the right to benefits for anything except these very rare diseases.

It seems to me fundamental to the nature of the relationship between a Government which is willing to send people thousands of miles away to fight and die in jungles of other countries that when they return to this country they ought to have those doubts resolved in their favor. It is now 20 years since the first defoliant was sprayed in Vietnam and too many veterans have been allowed to die with the belief, deep rooted total belief in their mind, that they were dying because of an injury that was done to them in the course of the service to their country.

This country is not so poor either in spirit or in monetary terms that we cannot afford to uphold the nature of that relationship between those who serve and the Nation that they serve.

This Senate has twice passed overwhelmingly legislation that would recognize the nature of that relationship and do it appropriate honor, and that has been held up now in the House of Representatives for too long.

So I come to the floor today to say that in the memory of Joseph Campbell that fight is going to go on, that his fight is going to go on, and that ultimately we are going to do justice to that relationship.

Mr. President, it is long time overdue. I think that the family of Joseph Campbell could still do well to know that his efforts were not in vain.

The PRESIDING OFFICER. Who seeks recognition?

The Chair recognizes the distinguished Senator from Rhode Island [Mr. PELL].

## CHEMICAL AND BIOLOGICAL WEAPONS CONTROL ACT OF 1989

The Senate continued with the consideration of the bill.

Mr. PELL. What is the pending business?

The PRESIDING OFFICER. The pending question is the committee substitute to the bill S. 195.

Mr. PELL. I thank the Chair.

Mr. President, I am very pleased that the Senate has today for its consideration S. 195, the Chemical and Biological Weapons Control Act of 1989.

This bill will put the United States clearly in the lead of those nations willing to take strong action to prevent ever again the illegal use of deadly chemical weapons. S. 195 was approved unanimously by the Committee on Foreign Relations on October 6, 1989.

Subsequently, the Committee on Banking, Housing and Urban Affairs suggested certain changes. The Senator from North Carolina [Mr. HELMS] and I are prepared to accept 14 of those suggested changes which we believe are consistent with the intent and purpose of the bill. We have incorporated these changes in a text we will offer shortly.

The resulting bill is a strong piece of legislation. Although it has not been marked by the sound and fury surrounding recent legislation, it is no less important. Indeed, time may prove this legislation one of the most significant achievements of this session. It enjoys support across a broad political spectrum by Senators on both sides of the aisle who have chosen to stand for high principle.

I am pleased that this vital legislation is cosponsored by Senators HELMS, KERRY, MCCAIN, GORE, SIMON, BOSCHWITZ, DODD, KASSEBAUM, BURDICK, HUMPHREY, SANFORD, BIDEN, COHEN, HARKIN, DOLE, STEVENS, MURKOWSKI, LUGAR, LEAHY, BINGAMAN, BOREN, BREAUX, DASCHLE, FORD, LEVIN, WIRTH, LOTT, GORTON, LIEBERMAN, MACK, ROBB, CONRAD, KERREY, and AKAKA.

I am delighted that our new colleague from Hawaii [Mr. AKAKA] has become a cosponsor of S. 195 as one of his first acts today. We are all pleased to welcome him to this body and in particular to congratulate him for his wisdom in joining us in this endeavor. His predecessor, our beloved former colleague, the late Senator Matsunaga, was a cosponsor of this legislation.

The underlying and simple message of this bill is: the United States, which has forsworn the use of chemical and biological weapons, will do its utmost to erect effective barriers against the illegal use of chemical and biological weapons by one nation against another.

The bill has two major purposes:

To establish sanctions against countries that use chemical or biological weapons in violation of international law or use lethal chemical or biological weapons against their own citizens.

To establish sanctions against foreign countries that assist certain countries in acquiring a chemical or biological weapons capability.

These are the principal provisions of the bill:

TITLE ONE

Whenever information becomes available that a country may have used chemical or biological weapons, the President shall, within 60 days, make a determination as to whether such weapons have been used by a nation in violation of international law or against its own citizens.

Not later than 60 days after receipt of a request by the chairman of the Senate Foreign Relations Committee or the House Foreign Affairs Committee, acting after consultation with the ranking minority members, the President must determine whether a country has used such weapons and report back to the committees.

The President must consider certain criteria in making a determination to ensure that the determination is judicious and well-grounded.

If the President determines that a country has used chemical or biological weapons in violation of international law or has used lethal chemical weapons or biological weapons against its own citizens, the President shall impose specific sanctions.

A country sanctioned for chemical or biological weapons use would automatically face:

The termination of U.S. economic and military assistance;

The termination of U.S. Government or commercial arms sales;

The initiation of export controls and an import prohibition;

U.S. opposition to loans by international financial institutions;

Denial of credit through the U.S. Eximbank and the prohibition of loans or credit from U.S. banks; and

The termination of landing rights in the United States.

There are appropriate exceptions for humanitarian assistance, food, and agricultural products. Provision is made for contract sanctity.

The President can waive imposition of sanctions for 9 months and can remove the sanctions only after the offending country renounces the use of chemical and biological weapons and provides restitution to those affected by such use.

TITLE TWO

Sanctions would be imposed on foreign companies which knowingly and materially contribute to efforts to use, develop, produce, stockpile or otherwise acquire chemical weapons by any country that the President has determined has since January 1, 1980—

Used chemical or biological weapons in violation of international law;

Used lethal chemical or biological weapons against its own nationals;

Made substantial preparations to do the described activities; and

Been designated pursuant to section 6(j) of the Export Administration Act of 1979 as a country which supports international terrorism.

Sanctions would include:

A prohibition on procurement of goods and services from sanctioned company; and

A prohibition on imports of that company's products.

The President may waive these sanctions if he determines that the government with jurisdiction over the company involved has taken specific and effective actions, including appropriate penalties, to terminate involvement.

The sanctions would be lifted after 2 years if all proscribed activities have ceased.

The President may take several exceptions to applying sanctions in the cases where there are existing contracts to procure defense articles or services, or, if the company is the sole source supplier of defense articles or services, or of other essential products.

Mr. President, including myself, this bill has 32 cosponsors and many more supporters. I know that most Senators will gladly support this legislation.

The text under consideration was carefully negotiated and changed to meet suggestions within the Committee on Foreign Relations, requests by the executive branch, and suggestions made by the Senate Committee on Banking, Housing, and Urban Affairs. Executive branch representatives had requested that the bill be modified to allow an administration the freedom to decide whether or not sanctions would be appropriate. This leeway would save the President the embarrassment of seeking a waiver of sanctions when a country has aroused public ire by using poison gas to kill people. Mr. President, the illegal use of poison gas is not an activity for which there should be any doubt about where the United States stands. Since the President already has the authority to impose the provisions of this bill, eliminating the requirement that sanctions be imposed under certain specified circumstance would eviscerate the bill and constitute an act of bad faith to all those who stand with us on this bill.

It is with some regret that I must remind my fellow Members that, when Iraq repeatedly used lethal chemicals on the battlefield and tried to resolve political grievances with its own citizens by gassing them to death, the United States stood idle and countenanced the heinous outrage, despite the expressed desire of the Congress that the United States take a firm stand and impose sanctions. There is, perhaps, cause for hope—but no reason to expect—that an administration would act differently than the last administration if there was another such outrage. Against that background, it is imperative that the United States erect barriers against the use of chemical and biological weapons now and make it clear that those barriers will stand in place. I would remind my fellow Senators that in the past few weeks Iraq's President, Saddam Hussein, has been boasting about his ability to attack our ally, Israel, with chemical weapons. The legislation before us now sends a clear message that he should not stoop to such vile threats and deeds.

Mr. President, some years ago the Congress of the United States decided that it would erect strong, immovable barriers against the use of nuclear weapons. We have learned anew in recent years of the ghastly and indisputable horror of the use of chemical weapons in violation of international law. We must not apply a lesser standard against chemical weapons use than the use of nuclear weapons. Both can be used for the indiscriminate oblitera-

tion of towns, villages, cities, and whole groups of people.

If we stand for anything, we must stand for a uniting of the world against those who would give themselves the right to use chemical weapons against any other people.

Mr. HELMS. Mr. President, today the Senate begins consideration of legislation to stem the proliferation of chemical weapons.

The bill before us is bipartisan. It combines S. 195 as introduced by Senator PELL and 18 cosponsors and S. 238 as introduced by me with 3 cosponsors.

The Foreign Relations Committee spent a lot of time developing this legislation now before the Senate. The bills upon which this legislation is based were introduced in January 1989 It took 9 months of hearings and staff discussions for the committee to report legislation.

The legislation we reported—the bill before us today—was voted out of our committee unanimously. The Foreign Relations Committee, to say the least, is a diverse committee. Anyone who has observed us knows how difficult it must have been to produce legislation of this magnitude capable of passing unanimously.

Senate consideration of this issue is occurring not a moment too soon. The proliferation of chemical and biological weapons in the Middle East poses a serious and immediate threat to America's interests in that vital region. Today the Senate has the chance to do something about this threat.

In 1988 the world became aware of Iraq's use of chemical weapons against its own civilians. On three occasions, the Senate passed Pell-Helms legislation placing sanctions on Iraq in response. Unfortunately, State Department efforts torpedoed this legislation in the House.

The failure of the United States—or any other country—to place sanctions on Iraq sent a clear signal to the Middle East: "you can use chemical weapons and get away with it."

Congress must take action during this session to make it clear to countries that future use of chemical weapons will be met with stiff penalties. The bipartisan legislation before the Senate today aims to do just that.

Shortly after Iraq's use of chemical weapons was exposed, the world became aware of an international conspiracy of supposedly legitimate foreign industrial concerns who have reaped handsome profits by providing the capability to produce chemical weapons to such radical regimes as Iraq, Libya, Syria, and Iran.

The discovery of this international conspiracy of industrial firms, and the possible complicity of foreign government officials in this conspiracy sends a clear message to Americans: The United States cannot rely solely on the assurances of foreign governments if we are to be serious about stopping trade in chemical and biological weapons.

For this reason, this legislation would place tough sanctions on those foreign companies which insist upon assisting the chemical weapons programs of radical regimes.

It is vital that the Congress enact legislation to place sanctions on countries which use chemical weapons, or upon the foreign companies which help certain countries obtain such weapons. The longer we delay, the greater the likelihood that some of the most brutal regimes of the Middle East will successfully obtain the knowledge and personnel necessary to produce such weapons without Western assistance—and this is something we must not permit to occur if we can at all help it.

Countries such as Libya, Iraq, Syria, and Iran are reportedly all working on chemical weapons programs. Ironically, all four of these countries are up to their necks supporting terrorism. Is it conceivable that any of these countries will give chemical weapons to terrorists for their use? This is something the United States cannot risk.

In addition, Israel is particularly vulnerable to a chemical weapons attack. Israel's defense forces are made up mostly of reservists. A chemical attack against mobilization centers, or key population centers, would be disastrous.

A chemical or biological weapons attack on Israel could cost Israel the time and human resources which mean the difference between successful defense and shattering defeat. A shattering defeat of Israel would set the stage for Soviet domination of the Middle East and its oil supplies.

That is the bottom line: the proliferation of missiles, and chemical and biological weapons in the Middle East poses a direct threat to America's long-term access to the vital oil resources of that region.

The legislation before the Senate is bipartisan. It represents compromises made by all sides in our committee. And it includes two, complementary and integral approaches to stem the proliferation of chemical weapons. Title I provides for sanctions against countries which use chemical weapons and title II provides for sanctions against companies which would assist them.

Together, the two approaches send a clear signal to countries which may contemplate using chemical weapons and to the companies which may want to help them: There will be a steep price to pay from the United States.

Mr. President, if the interests of the United States in the Middle East is to be preserved and protected, it is clear that Congress must act quickly against those countries which would use chemical weapons, and those companies which would help them along the way. Congress can do so by enacting S. 195.

In order that Senators may be made fully aware of how S. 195 would undertake such action, I will now summarize S. 195, based on the committee report.

SUMMARY OF S. 195

In recognition of the nature and extent of the threat posed by the proliferation of chemical and biological weapons, S. 195 takes a two-tiered approach to halt the use of and prevent the spread of chemical and biological weapons.

SANCTIONS AGAINST USE

First, the bill requires the President to impose sanctions against countries that use chemical or biological weapons in violation of international law, or use lethal chemical weapons against their own nationals. Second, the committee bill provides for sanctions to be imposed against foreign companies that aid or abet countries in the pursuit of a chemical or biological weapons capability.

The use of chemical weapons in violation of international law, and the use of lethal chemical or biological weapons against a nation's own citizens is morally repugnant and indefensible. Accordingly, the bill provides for a number of significant sanctions against use to be specified in law. These sanctions would provide a strong deterrent to use and make it abundantly clear that the United States is unalterably opposed to the illegal use of chemical and biological weapons.

Iraq's heinous use of lethal agents against its own citizens and its earlier use of chemical agents in the Iran-Iraq war was met by no formal penalties from the United States or other nations, despite the fact the Senate on three occasions passed legislation providing that sanctions be imposed. It is imperative that barriers to use be erected now, lest the clear message remain that chemical warfare can be used without penalty.

William Webster, Director of the Central Intelligence Agency, confirmed the value of sanctions when he told the Foreign Relations Committee last year that sanctions "bring home the official position of the country with respect to the production and use of chemical warfare, and that provides an opportunity for sustained moral suasion, putting the spotlight on these activities."

In crafting this bill, the committee was mindful of the importance of ensuring that a Presidential determination of use would be made when the facts warranted, but also wanted to ensure that no bureacracy would be able to succeed in pressing a President to make an erroneous or capricious determination. Accordingly, the bill spells out the standards to be met in

determining use. The executive branch and the Congress may not be in agreement over the possibility of chemical or biological weapons use. In recognition of that, this bill provides the Congress, through the chairmen of the Senate Foreign Relations Committee and the House Foreign Affairs Committee, in consultation with the respective ranking minority members, with the means to initiate the process for a Presidential determination on such use.

In order to ensure the availability of information on dangerous activities and potential problems, S. 195 provides for annual Presidential reports on efforts by countries to develop, produce, stockpile, and deliver chemical and biological weapons. The reports shall detail the extent to which such countries were aided or abetted by foreign governments, suppliers, or companies.

SANCTIONS TO PREVENT PRODUCTION

The proliferation of chemical and biological weapons among developing countries poses a serious threat to the national security interests of the United States. This is especially the case where efforts by anti-Western regimes such Libya, Iran, Iraq, and Syria reportedly have obtained or are rushing to obtain a chemical weapons capability.

Chemical weapons such as mustard gas, nerve gases, and phosgene are relatively easy to produce, hence their nickname, "the poor man's nuclear bomb." However, developing countries often need the assistance of Western industrial firms to obtain the capability to produce chemical weapons.

S. 195 reinforces these existing authorities for the President to control the export of chemical and biological weapons technologies from the United States. In addition, the committee bill creates a new authority under the Export Administration Act, whereby the President can require a validated license for the export of any good or technology that he deems would assist a country in the development, production, stockpiling, or delivery of chemical or biological weapons.

While export controls are a useful deterrent to the further spread of chemical and biological weapons, such controls in and of themselves are only partially effective in that they do not cover foreign firms.

Foreign suppliers—which operate outside the purview of domestic export controls—have contributed significantly to the proliferation of chemical and biological weapons among developing nations, particularly in the Middle East. In his testimony before the Foreign Relations Committee, Judge Webster reported that:

* * * assistance provided by foreign suppliers, many of whom were fully witting of the intentions of the Middle East countries to produce chemical weapons, has been the key element that has enabled these nations to develop a capability to produce chemical weapons within only a few years.

Mr. President, I ask unanimous consent that a list of 68 companies implicated in press reports be inserted in the RECORD at the conclusion of my remarks.

(See exhibit 1.)

While the list placed in the RECORD is only a compilation of news reports, combined with Judge Webster's testimony, it does suggest that the participation of foreign corporations in the chemical weapons program of Iran, Iraq, Syria, and Libya is quite extensive. But possibly the most serious implications of this scandal are the allegations of knowledge and involvement by government officials of West Germany. According to Der Stern magazine, the Libyan gas plant was actually designed by a German state-owned engineering firm. And New York Times columnist William Safire wrote on January 16, 1989:

Certainly for months and probably for years, the Kohl-Genscher-Stoltenberg Government had evidence that the German merchants of death were illegally supplying the technical know-how and materials for the production of poison gas in Iraq, Syria and Libya, as well as missile technology that could help Third World dictators hold the world's cities hostage to the poor man's atomic bomb.

The discovery of this international conspiracy of industrial firms and the possible complicity of foreign government officials in this conspiracy sends a clear message to Americans: The United States cannot rely solely on the assurances of foreign governments if we to be serious about stopping trade in chemical and biological weapons.

Rather, the United States must itself take actions against the companies involved if we are to expect action to stem trade in these weapons of mass destruction. Title II of this act provides for such action by informing the American people of, and placing sanctions upon, those companies which aid, assist, or abet the chemical or biological warfare programs of countries which have used chemical weapons in violation of international law or have been involved in state-supported terrorism.

If invoked, the sanctions would prohibit the procurement by the U.S. Government of any goods or services produced by the offending party, and would bar the import of such goods and services into the United States. Appropriate exceptions are available to the President in cases where the producer is the sole source supplier of military goods and services deemed essential to U.S. security interests.

The legislation before the Senate recognizes that the host government of the offending company may have taken appropriate steps, including penalties, to terminate the involvement of the company in the activities covered by S. 195. If, in consultation with the host government, the President makes such a determination, the bill gives him the authority not to impose sanctions.

U.S. policy on the use and proliferation of chemical and biological weapons should be clearly stated and consistently applied. Unilateral U.S. sanctions against the use and production of chemical and biological weapons are widely accepted as an effective policy instrument by the administration, the Congress, and the private industrial sector. This broad coalition of support was evident throughout the course of the Foreign Relations Committee's hearings and consideration of S. 195, where all of the witnesses expressed support for the idea of U.S. sanctions against use and production of chemcial and biological weapons.

The sanctions in this bill create a clear and serious deterrent against countries which would use chemical weapons, and the companies that would help them along the way. But more is needed above and beyond these sanctions.

The challenge posed by the proliferation of chemical and biological weapons among radical regimes in the Middle East is grave. If America's vital interests in the Middle East and elsewhere in the world are to be preserved, it will take concerted action on the part of Congress to inhibit the trade of chemical and biological weapons. S. 195 represents such concerted action.

EXHIBIT 1

The list of foreign corporations implicated in press reports as assisting the chemical weapons programs of Middle Eastern countries includes:

Siemens, W. Germany (Libya—telecommunications equipment, der Spiegel, Jan. 23, 1989).

Deustche Bank, W. Germany (Libya—banking services, Stern, Jan. 12, 1989).

E. Merck, W. Germany (Libya—Precursor chemicals, Wall Street Journal, Jan. 18, 1989).

Imhausen-Chemie, W. Germany (Libya—chemical warfare plant, N.Y. Times, Jan. 1, 1989).

Alfred Teves GmbH, W. Germany (Libya—industrial cooling equipment, Wall Street Journal, Jan. 18, 1989).

Pawling and Harnishchfeger,, W. Germany (Libya—mobile cranes, Washington, Times, Jan. 16, 1989).

Kone, W. Germany (Libya—overhead cranes, Washington Times, Jan. 16, 1989).

Karl Kolb, W. Germany (Iraq—chemical warfare plant, Christian Science Monitor, Dec. 13, 1988).

Pilot Plant, W. Germany (Iraq—chemical warfare plant, Christian Science Monitor, Dec. 13, 1988).

Hebenger Bau, W. Germany (Libya—The Times, London, Jan. 7, 1989).

Krauss Kopf, W. Germany (Iraq—International Herald Tribune, Jan. 7-8, 1989).

Ludwig Hammer, W. Germany (Iraq—International Herald Tribune, Jan. 7-8, 1989).

Quast, W. Germany (Iraq—corrosion-resistant alloy parts, Christian Science Monitor, Dec. 13, 1988).

Salzgitter Industriebau GmbH, W. Germany (Libya—industrial planning, Washington Post, Jan. 17, 1989).

OSTRAG, W. Germany (Libya—ballistic missiles, Stern, Jan. 12, 1989).

Zink, W. Germany (Libya—gas burning equipment, Stern, Jan. 12, 1989).

Gesellschaft fur Automation, W. Germany (Libya—computers, Stern, Jan. 12, 1989).

Krebs und Kiefer, W. Germany (Libya—stress engineering, Stern, Jan. 12, 1989).

J. Sartorius, W. Germany (Libya—construction materials, Stern, Jan. 12, 1989).

Bischoff, W. Germany (Libya—tools and machinery, Stern, Jan. 12, 1989).

Hunnebeck, W. Germany (Libya—building materials, Stern, Jan. 12, 1989).

INTEC Technical Treading Logistik, W. Germany (Libya—air-to-air refueling, Stern, Jan. 12, 1989).

Raab Karcher, W. Germany (Libya—building materials, Der Speigel, Jan. 15, 1989).

Schott Glasswerke, W. Germany (Syria—corrosion-resistant glass pipes, Wall Street Journal, Sept. 16, 1988).

Rhema-Labortechnik, W. Germany (Libya—laboratory equipment, der Spiegel, Jan. 23, 1989).

Stietzel and Diedrich, W. Germany (Libya—flight technology, CBSN, Bonn, W. Germany, Jan. 23, 1989).

Joseph Mulbauer Machine, W. Germany (Libya—precision technology, CBSN, Bonn, W. Germany, Jan. 23, 1989).

Becker Kabel und Lamper, W. Germany (Libya—surveillance cameras, Stern, Jan. 19, 1989).

Rhenus, W. Germany (Libya—transport firm, Stern, Jan. 19, 1989).

Chemco GmbH, W. Germany (Iran—chemical precursors, NYT, Jan. 29, 1989).

Sigma Chemie, W. Germany (Iraq—chemical precursors-biological, Washington Times, Jan. 31, 1989).

Messerschmitt Bolkow-Blohm (MBB), W. Germany (Iraq—lab equipment, Stern Magazine, Jan. 26, 1989).

Gildemeister Projecta, W. Germany (Iraq—computer programs, Stern, Jan. 26, 1989).

Integral/Sauerinformatic/CME, W. Germany (Iraq—computer programs, Stern, Jan. 26, 1989).

WTB Walter Thosti Boswau, W. Germany (Iraq—construction of four nerve gas plants, Der Spiegel, Jan. 23, 1989).

Anton Eyerle, W. Germany (Iraq—mobile toxicological labs, Der Spiegel, Jan. 23, 1989).

Magirus Deutz, W. Germany (Iraq—vehicles for mobile toxicological labs, Der Spiegel, Jan. 23, 1989).

Eshborn Chemical Marketing and Machinery Agency, W. Germany (Libya—precursor chemicals, Der Spiegel, Jan. 23, 1989).

Plato-Kuehn, W. Germany (Iraq—toxins, Der Spiegel, Jan. 30, 1989).

Linde, W. Germany (Libya—oxygen unit, Washington Times, Jan. 16, 1989).

Preussag, W. Germany (Libya—water purification system, Stern, Jan. 12, 1989).

Globsat, W. Germany (Libya—missile parts, DPA, Jan. 31, 1989).

VEB Stahlbau, E. Germany (Libya—steel fabrication, Stern, Jan. 12, 1989).

New Berger, Austria (Iraq—precursor chemicals, Austria State Radio, Jan. 4, 1989).

Consultatio, Austria (Iraq—buildings, Stern, Jan. 26, 1989).

Schweizerischen Kreditanstalt, Switzerland (Libya—banking services in Zurich, Der Spiegel, Jan. 23, 1989).

Companies Inc., Switzerland (Iraq—chemical precursors, NYT, Jan. 31, 1989).

FCA Contractor, Switzerland (Iran-chemical precursors, Neue Zuercher Zeitung, Feb. 2, 1989).

Krebs A.G., Switzerland (Egypt—chemical plant, NYT, March 10, 1989).

Japan Steel Works, Japan (Libya—bombs, Mainichi, Sept. 15, 1988).

Toshiba, Japan (Libya—power plant, NYT, Feb. 17, 1989).

Marubeni, Japan (Libya—Christian Science Monitor, Dec. 13, 1988).

Mitsuibishi, Japan (Libya—metallurgical plant, Kyodo News Service, Feb. 28, 1989).

C. Itoh, Japan (Libya—metallurgical plant, Kyodo News Service, Feb. 28, 1989).

Melchemie, Holland (Iraq—chemical precursors, Christian Science Monitor, Dec. 13, 1988).

De Dietrich, France (Libya—supplied glass-lined caldrons, N.Y. Times, Jan. 1, 1989).

Flaekt, Belgium (Libya—cooling tower, Washington Times, Jan. 16, 1989).

Cross Link, Belgium (Libya—freight forwarding, Stern, Jan. 12, 1989).

J.G. Trading, Britain (Libya—freight forwarding, Stern, Jan. 12, 1989).

Ihsan Barbouti International, Britain (Libya—general contractor, Washington Times, Jan. 16, 1989).

RTZ Ltd., Britain (Iran—precursor chemicals, Baltimore Sun, Jan. 31, 1989).

DISA, Denmark (Libya—foundry equipment, Washington Times, Jan. 16, 1989).

Cy Savas Oikonomidis E.E., Greece (Iran—shipping company, NYT, Jan. 29, 1989).

Energoinvest, Yugoslavia (Libya—power substation, Washington Times, Jan. 16, 1989).

Pen Tsao, Hong Kong (Libya—document handling, Stern, Jan. 12, 1989).

Alcolac International, United States (Iran—chemical precursors, NYT, Jan. 29, 1989).

Nu Kraft Mercantile Corp., United States (Iran—precursor chemicals, NYT, Jan. 31, 1989).

United Steel and Strip Corporation, United States (Iraq—chemical precursors, NYT, Jan. 31, 1989).

Interchem Inc., United States (Iran—precursor chemicals, NYT, Jan. 31, 1989).

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1631

(Purpose: To provide substitute language)

Mr. PELL. Mr. President, I send an amendment to the desk and ask for its immediate consideration in lieu of the one that is already there.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Rhode Island [Mr. PELL], for himself and Mr. HELMS, proposes an amendment numbered 1631.

Mr. PELL. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of the amendment (No. 1613) is printed in today's RECORD under "Amendments Submitted.")

PRIVILEGES OF THE FLOOR

The PRESIDING OFFICER. The Senator from Utah.

Mr. GARN. Mr. President, I ask unanimous consent that Mark Menefee be allowed privileges of the floor during debate on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arizona is recognized.

Mr. DECONCINI. I thank the Chair.

(The remarks of Mr. DECONCINI pertaining to the introduction of S. 2639 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. DECONCINI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SARBANES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CONRAD). Without objection, it is so ordered.

Mr. SARBANES. Mr. President, I rise in support of S. 195, the Chemical and Biological Weapons Control Act of 1990.

I would like at the very outset to commend the distinguished chairman of the Foreign Relations Committee, Senator PELL, for the outstanding leadership he has provided the Senate on this very important, indeed some would say critical, issue. He, in fact, has had a longstanding interest in controlling the proliferation of chemical and biological weapons, an interest extending over a very sustained period of time. It is a matter which again and again he has brought to our attention and on which he has sought to move legislation through the Senate to address the issue. He deserves much credit for bringing this bill to the Senate floor.

This is a particularly opportune time for the Congress to be acting on this legislation. The United States and the Soviet Union are in the process of ne-

gotiating an agreement to end the production of chemical weapons by the two countries and to reduce drastically their stockpiles of chemical weapons. In addition, and most importantly, negotiations are going forward in Geneva on a comprehensive ban on the production and use of chemical weapons. As we know, there have been extended discussions there amongst a large number of nations trying to bring this scourge under control.

Yet, despite all of these efforts, the possible use of chemical weapons by irresponsible governments and the sale of chemicals used in the production of chemical weapons to such governments by foreign companies remain a source of concern. The bill which is before the Senate today, S. 195, the Chemical and Biological Weapons Control Act of 1990, responds directly to these concerns.

The first title of the bill would require the President, if he determines that a foreign country has used chemical or biological weapons in violation of international law or against its own citizens, to impose an extensive set of sanctions against the country. The sanctions would include the termination of all foreign aid and military sales to the country, the prohibition of the export to that country of any goods or technology, as well as the prohibition of the import into the United States of any goods or services from that country. It includes the denial of credit to that country from the Export-Import Bank of the United States and a prohibition on all lending by U.S. banks to that country.

So, as one can see, these are far-reaching sanctions which would come into effect against a foreign country that used chemical or biological weapons in violation of international law or used them against its own citizens. The bill would give the President discretion to waive the applicability of some or all of the sanctions with respect to a specific country for a period not to exceed 9 months from the date of the determination of chemical or biological weapons use if the President found such a waiver to be in the national interest of the United States.

The President would also have authority to remove sanctions if he determines that the country has renounced use of chemical or biological weapons and has provided reliable assurance to that effect and that the country has made satisfactory restitution to those affected by earlier use of chemical or biological weapons.

This first title of the bill also urges the President to continue close cooperation with the Australian group to monitor and control the supply of chemicals applicable to weapons production to countries that support international terrorism and to work closely with other countries capable of supplying equipment or technology applicable to chemical or biological weapons production to devise the most effective controls possible on the transfer of such equipment or technology.

Mr. President, title II of the bill would require the President to impose sanctions on a foreign company if the President determines that the company has knowingly and materially contributed to the efforts to use, develop, produce, stockpile, or otherwise acquire chemical or biological weapons by any country that the President determines has used such weapons in violation of international law or against its own nationals or has been designated as a country which supports international terrorists.

In other words, title I addresses the country sanctions. Title II addresses the company sanctions to get at those companies that, in effect, are engaged in trade knowingly and materially contributing to the development of such weapons with respect to countries that have violated international law or to a country that has been designated as supporting international terrorism.

Again, the President would have authority under the legislation to delay sanctions against the foreign company for up to 90 days in order to pursue consultation with the government of the country with primary jurisdiction over the foreign company. Following such consultation the bill requires the President to impose sanctions on that company unless he determines and certifies to the Congress that the government with primary jurisdiction has taken specific and effective actions to end the involvement of the company in the activities under question.

The sanctions required by the bill with respect to such companies would be a ban on U.S. Government procurement by the foreign company and on imports into the United States of products produced by the company. The sanctions would apply for a period of at least 24 months.

This bill was, of course, reported out by the Senate Foreign Relations Committee. The Banking Committee also has a strong interest in the issue of chemical and biological weapons proliferation, in part because the bill amends statutes, including the Export Administration Act, under the jurisdiction of the Banking Committee.

So there is a jurisdictional issue here, although I am quick to point out that the substance of this legislation with which we are dealing, in my judgment, is critical at this time, particularly since we now are both dealing in a bilateral way with the Soviet Union on chemical weapons production and stockpiling. And we hope to use that agreement, which we hope will be forthcoming, as an impetus to give momentum to the broader talks which are taking place in Geneva.

Last June I chaired a hearing within the Banking Committee, an oversight hearing on chemical and biological weapons proliferation. Testimony was taken from administration witnesses as well as outside experts and industry representatives. Sequential referral was sought by some on the Banking Committee. Agreement could not be reached, as my distinguished colleague from Utah knows. That required, in effect, a unanimous consent. That was not forthcoming.

In order to continue to try to move this matter forward, given its importance—indeed I would say its urgency—the Banking Committee developed a package of 17 amendments to this bill which reflect the changes that the committee thought ought to take place.

A series of discussions then took place at the staff level over a lengthy period of time with respect to these amendments. In fact, the substitute offered by the able and distinguished chairman of the Foreign Relations Committee here today incorporates all of those amendments with the exception of the few dealing with the jurisdictional issue. That revolves around the question of whether the company sanctions contained in this bill should be a freestanding provision, or whether it should be included as amendments to the Export Administration Act and the Arms Export Control Act.

The original bill reported out by the Senate Foreign Relations Committee would have made the company sanctions new freestanding provisions of the law. That, of course, raised, as was indicated in the package the Banking Committee came forward with, some very serious jurisdictional questions.

One alternative approach that was suggested—in fact in the amendments of the Banking Committee—would have provided that sanctions on foreign companies which sold dual use commerical goods would be placed in the Export Administration Act, which falls under the jurisdiction of the Banking Committee. Sanctions on sales of goods which are munitions list items would be made part of the Arms Export Control Act which falls under the Foreign Relations Committee jurisdiction.

That encountered difficulties. So you had a proposal by the Foreign Relations Committee contained in the legislation which came out of that committee which encountered difficulties. You had a proposal by the Banking Committee which encountered difficulties. The difficulties in each instance came from the other committee.

What is now contained in the substitute which the chairman of the Foreign Relations Commmittee has put forward is that the compromise in the substitute replaced identical language

on company sanctions in both the Export Administration Act and the Arms Export Control Act, thereby protecting, in effect, the jurisdiction of both committees, leaving that jurisdictional issue perhaps to be fully resolved on some other occasion in a different context. But at least this legislation would not become the vehicle for a major determination on jurisdiction either as reported out, or as contained in the amendments which came from the Banking Committee.

I have to say, it seems to me this represents a good-faith effort to try to resolve this situation, particularly to resolve it in a way that we could move the legislation forward. I appreciate the jurisdictional issues. I am in the position of serving on both committees, which is either a blessing or a curse depending on how one looks at this matter. It seems to me what we have here in the substitute—and I think under the circumstance, because I feel strongly we need to move with the substance of this legislation, and that it no longer should be delayed or impeded or hindered by the jurisdictional question—is an approach which, in effect, preserves that issue for both committees. It can be, as I said, resolved on some other occasion and in a different context.

I want to point out that the substitute offered by the chairman of the Senate Foreign Relations Commimttee encompasses all of the substantive amendments which the Banking Committee put forward for inclusion in this legislation.

So, the substantive position of the Senate Banking Committee with respect to this legislation in terms of changes they wish to see made in the substance of the bill have been included in the substitute, and it, therefore, fully reflects the judgment of the Banking Committee on those substantive matters.

I very much hope that the concern of some over the jurisdictional question would not preclude us from moving forward on legislation, whose substance I think is very important, and which, I think, is extremely timely at this juncture given what has taken place, not only at the bilateral level between the United States and the Soviet Union over chemical weapons, but also with the very important and very sensitive negotiations that are taking place in Geneva.

Mr. President, I close again by expressing my appreciation and respect to the chairman of the committee, Senator PELL, for his determination and commitment on this very, very important issue over the years, and for crafting what I think substantively is a very positive and constructive contribution to addressing this very critical issue of chemical and biological weapons proliferation.

Mr. President, I yield the floor.

Mr. GARN. Mr. President, I would like to rise at this point to join my colleagues in support of adopting S. 195, the Chemical and Biological Weapons Control Act of 1989. I would like to be, but I cannot without further modification of the bill. I will speak further on these points later in this debate.

I hope that the bill can be perfected, because I believe that well-crafted legislation will put both countries that consider using chemical weapons, and companies who would help them develop such weapons, on notice that they face international isolation and stern economic penalties. My work on this legislation represents the continuation of a 15-year personal effort in the Senate to stop the transfer of sophisticated Western technology into the arsenals of our enemies. More specifically, it is an extension of my efforts to stop such transfers by punishing the companies that profit from them. Those efforts began with my 1987 Toshiba amendment on which the company sanctions title of this bill is closely modeled.

The effort to apply sanctions to chemical weapons proliferation originated with the Republican leader with whom I worked in crafting this original sanction bill, S. 8. The bill we are considering today, S. 195, combines company sanctions which I believe are necessary with a country sanctions title that, though flawed, includes a series of amendments I proposed and which were adopted by the Banking Committee.

I believe that country and company sanctions approaches are a logical combination. Taken together, they represent the basis for legislation that attempts to ensure that we not arm terrorists, trade with murderers, or condone the spread of horrendous weapons that civilized nations have agreed for 60 years should be banned.

The legislation would do this by placing sanctions on countries that use chemical weapons and the same type of economic penalties in my Toshiba amendment on companies that assist the spread of chemical and biological weapons capabilities to terrorist states. The major problem with the bill is that, unlike my Toshiba amendment, the company sanctions title establishes confusing and duplicative authority to sanction foreign persons that assist proliferation and places authority in both the Export Administration Act and the Arms Export Control Act. But does not differentiate between sales of so-called dual use technology and munitions that form the line of demarcation between the two laws. The second flaw in the bill is that the sanctions provisions are substantially weaker than the sanctions I put forward in the Toshiba provision.

The task of stemming chemical proliferation is very difficult. We are attempting, in the case of chemical production technologies, to control the spread of technology that is in many cases relatively unsophisticated. The task of doing so has been made much more complicated by providing weak and confusing legislative authority for the principal mechanism, the threat of sanctions, that has a real chance of making a difference, as it did in the Toshiba case.

Based on my 15 years on this issue, the greatest criticism of our export control system is that it simply does not produce sensible, timely, or consistent policy that protects our security while permitting legitimate trade. We will do a disservice to America unless we produce legislation that is clear, free of confusion and overlap, and strong enough to work. Because sanctions against companies do work; they worked with Toshiba and the Governments of Japan and Norway; they worked with Cocom; and the threat of sanctions worked with the Germans. If we put the world on notice that there are some crimes we will not tolerate, that we stand ready to take unilateral action, we can affect the spread of this deadly technology. I will speak to specific changes I believe are needed in the bill as the debate proceeds.

I certainly would not like to end my opening statement without conceding that the Foreign Relations Committee, as Senator SARBANES of Maryland mentioned, was cooperative in adopting many of the amendments that I suggested and that were unanimously adopted by the Banking Committee.

However, I do believe that there is still one major flaw, and that is in the issue of jurisdiction. It could be converted very easily if the Foreign Relations Committee would be willing to separate company and country sanctions. It is clear that the country sanctions section of the bill is within the jurisdiction of the Senate Foreign Relations Committee. There is no doubt about that. Certainly, as a member of the Senate Banking Committee, I would not be trying to encroach on their jurisdiction. However, it is also clear that the Senate Banking Committee has jurisdiction over the Export Administration Act and wrote the company sanctions of the bill. We are in fact currently engaged in the process of renewing authorization for the Export Administration Act this year. And it is clear that sanctions on companies such as Toshiba are within the jurisdiction of the Senate Banking Committee.

It is rare that I attempt to stall a bill. I have not, as I mentioned to the majority leader, done so since October 1975. So I suppose once every 15 years a Senator is entitled to his rights. I am not promising, Mr. Majority Leader, not to do it for another 15 years, but I do not look for opportunities to stall.

I sincerely feel that this jurisdictional issue gives rise to an important policy issue, am also not one who cares very much about turf battles. We have enough of them around here without me adding to that burden. However, in this case the distinction between country and company sanctions is definite, and certainly no one would doubt either the ability of the Senate Banking Committee or the jurisdiction of the Senate Banking Committee over the Export Administration Act.

Because I feel very strongly, I must persist. I certainly do not intend to have this bill stalled in the traditional way. As I told the majority leader, I could have objected to proceeding to the bill and we could have debated that motion rather than the substance of the bill. I certainly had no intention of delaying Senate proceedings with that method, taking up the time, or taking two bites out of the apple. I do not intend to stand up here at length and talk just to stall.

I hope that tomorrow we can proceed with amendments and continue to work in processing the bill. But I simply do not want anybody to mistake my intentions. I feel overall, this bill is a good bill, there is no doubt about that. I commend the chairman of the Senate Foreign Relations Committee for his work on this and the recommendations of the Senate Foreign Relations Committee.

As two or three speakers mentioned, the Foreign Relations Committee has adopted 16 out of the 17 amendments that the Banking Committee proposed. Certainly on the surface, at least in numbers that seems very generous, and it has been. But the jurisdictional issue is very important to this Senator, and I believe, beyond the jurisdictional issue, we must tighten up and make the company sanctions area stronger, at least as strong as the Toshiba amendment. Otherwise this bill simply will not have the effect that both the Senate Banking Committee and the Senate Foreign Relations Committee hope for in controlling the proliferation of these types of weapons.

With that, Mr. President, I yield the floor.

Mr. SARBANES. Mr. President, I ask unanimous consent that privileges of the floor be granted to David Loevinger, a member of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that we proceed as in morning business for something less than 10 minutes.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered. The Senator from New Jersey.

## VLADIMIR TSIVKIN

Mr. LAUTENBERG. Mr. President, I rise to draw my colleagues' attention to the case of Vladimir Tsivkin, a Soviet refusenik from Leningrad who has repeatedly been denied permission to emigrate but has already been granted status as a refugee. I urge the Soviet Union to resolve this case and grant Vladimir permission to leave the Soviet Union. Frankly I will not rest until he does get permission.

Mr. President, this case is one of the few sour notes in an otherwise harmonious attitude about emigration. Soviet Jews have been granted permission to leave the Soviet Union in record numbers over the last year, and we are grateful to see them adhere to that fundamental right among human rights we insist upon as the Helsinki accords dictate.

Thousands upon thousands make the pilgrimage to either the promised land or to a country of their choice every month.

Most favored nation status looms on the horizon, as a trade agreement with Moscow is signed in preparation for the upcoming summit. The era of good feelings between the Soviet Union and America albeit with some exceptions, is upon us. In this heady rush to freedom, it is easy, even tempting, to forget about those who have been refused emigration rights and who are left behind.

But we cannot forget. The cases of hardcore refuseniks who continue to be denied permission to emigrate must be resolved. We must make sure that every Soviet citizen who wants to leave is granted permission to do so. For if even one person is arbitrarily denied permission to leave, there is no true freedom of emigration. A life is a terrible thing to waste.

This is even truer today than before as storm clouds gather over the remaining shreds of the Jewish population left in the Soviet Union.

Anti-Semitic hate groups like Pamyat gain strength and grow bolder in their willingness and ability to terrorize the remaining Jewish population. Anti-Semitic violence and harassment grow more menacing each day. Rumors of programs continue to circulate. In this atmosphere, it is imperative that those Jews who seek to leave are free to go.

In this vein, I make a special plea to the Soviet Union to grant Vladimir Tsivkin permission to emigrate. I met Vladimir when I was in Moscow just this past March. Although he lives in Leningrad, he traveled to Moscow in the hope that I could help him. I was impressed by his keen intelligence and by the desperation of his plight. As more and more of his friends were granted permission to leave, his hope began to ebb.

Vladimir Tsivkin is a case of special humanitarian interest. Not only has he been in refusal for more than 10 years, making him one of the longest remaining Soviet Jews denied, he has a special claim to emigrate because his family aleady lives in the United States.

Vladimir's wife and daughter left the Soviet Union on a tourist visa and now live in this country. It is very hard on him to be separated from his family, especially since his health is not good. He suffers from an endocrine disorder and needs surgery.

Vladimir has been repeatedly refused permission to emigrate since 1979 on the grounds of state secrets although he has not worked at the Defense Ministry since 1978. Now Vladimir has no military card, and therefore he has no way to earn a living. This situation makes him liable to criminal prosecution.

Despite repeated refusal, the Tsivkin family received official permission to emigrate on March 14, 1989, more than 1 year ago. Based on this permission, they relinquished their jobs, sold almost all their belongings and returned their official documents. Eight days later the Soviet Visa Department called to inform the family that the permission had been granted "by mistake." No additional information was given.

Although when I was in the Soviet Union I gave Mr. Tsivkin an invitation to visit me in the United States, I learned that my invitation was rejected because it was not in the proper form. Then, the authorities told Mr. Tsivkin his case would not be reconsidered for at least 6 months.

There is no purpose served by keeping Vladimir Tsivkin in the Soviet Union against his will. He cannot work. His family is gone. Through no fault of his own, he is not a productive member of Soviet society any longer. As for State secrets, I spent a day with him and I can testify that he has no secrets to tell. I spent time with him, as did a member of my staff, 2 days in Leningrad. He disclosed no State secrets to us or no knowledge of State secrets, and he is holding none back.

Quite simply, the Soviets have nothing to lose and everything to gain by resolving this case—the goodwill of Americans, the gratitude of the Tsivkin family and those who care about his fate all over the world. If there is some bureaucratic snag somewhere in the vast Soviet bureaucracy that is holding Vladimir Tsivkin back from emigrating, I am sure that a little creativity and just plain effort on the Soviets part can resolve that problem quickly. If there is someone who has a grudge against Tsivkin and just does not want to see him go, it is time that person was overrulled.

As a matter of fact, there is legislation pending before the Soviet body of deputies that says that anyone who

has been away from a significant state job for more than 5 years is no longer expected to have any kind of secrets and further that if there is anyone who has a grudge, be it financial or otherwise, that it will be subject to an impartial arbitration group and a decision made.

As we say here in America, and I am sure it applies to this problem, where there is a will, there is a way.

I have raised this case repeatedly with various Soviet officials, including former Soviet Ambassador to the United States, Yuri Dubinin, and have also urged the President to add Vladimir Tsivkin to his personal list of refuseniks. I know that if the Soviets make the determination to release him, it will happen very quickly.

As we move toward the summit, it becomes even more critical to resolve cases such as Mr. Tsivkin's and others unfairly denied permission to leave.

Mr. President, it is the kind of thing that will continue to improve our image of the Soviet Union's determination to have a human rights agenda that compares with other free and democratic societies and I think it would do them well to take this step.

I hope that every effort will be made to resolve this case before the summit.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. I thank the Chair.

(The remarks of Mr. EXON pertaining to the introduction of S. 2642 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. EXON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MORNING BUSINESS

Mr. PELL. Mr. President, I ask unanimous consent that there be a period for morning business with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## ANNUAL REPORT OF THE DEPARTMENT OF TRANSPORTATION—MESSAGE FROM THE PRESIDENT—PM 119

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Commerce, Science, and Transportation:

*To the Congress of the United States:*

In accordance with section 308 of Public Law 97-449 (49 U.S.C. 308(a)), I transmit herewith the 22d annual report of the Department of Transportation, which covers fiscal year 1988.

GEORGE BUSH.

THE WHITE HOUSE, *May 16, 1990.*

## REPORT ON ACTIONS TAKEN IN RESPONSE TO THE MILITARY CRACKDOWN IN CHINA—MESSAGE FROM THE PRESIDENT—PM 120

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Foreign Relations:

*To the Congress of the United States:*

I am transmitting herewith the report on bilateral and multilateral measures taken in response to the military crackdown in China in June 1989, pursuant to Title IX, subsection 902(c), of the Foreign Relations Authorization Act, Fiscal Years 1990 and 1991 (P.L. 101-246).

GEORGE BUSH.

THE WHITE HOUSE, *May 16, 1990.*

## MESSAGES FROM THE HOUSE

### ENROLLED BILLS SIGNED

At 11:13 a.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

H.R. 1805. An act to amend title, 5, United States Code, to allow Federal annuitants to make contributions for health benefits through direct payments rather than through annuity withholdings if the annuity is insufficient to cover the required withholdings, and for other purposes; and

H.R. 3961. An act to redesignate the Federal building at 1800 5th Avenue, North in Birmingham, Alabama, as the "Robert S. Vance Federal Building and United States Courthouse."

The enrolled bills were subsequently signed by the President pro tempore [Mr. BYRD].

At 2:42 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 117. A concurrent resolution expressing the appreciation of Congress for the contributions of the Friends of the National Arboretum in providing for the preservation and public display of 22 of the original columns of the East Front Portico of the United States Capitol Building.

## EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2981. A communication from the Administrator of the Environmental Protection Agency, transmitting pursuant to law, the annual report on the total number of applications for conditional registration of certain products under the Federal Insecticide, Fungicide, and Rodenticide Act for fiscal year 1989; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2982. A communication from the Acting Administrator of General Services, transmitting pursuant to law, the eleventh quarterly report on Federal actions taken to assist the homeless; to the Committee on Banking, Housing, and Urban Affairs.

EC-2983. A communication from the Assistant Administrator of the Environmental Protection Agency, transmitting pursuant to law, a report entitled "Progress in the National Estuary Program"; to the Committee on Environment and Public Works.

EC-2984. A communication from the Secretary of Health and Human Services, transmitting pursuant to law, a report entitled "Administratively Necessary Days"; to the Committee on Finance.

EC-2985. A communication from the Assistant Secretary of State (Legislative Affairs), transmitting pursuant to law, the semi-annual reports for the period April 1989-September 1989 listing voluntary contributions made by the United States Government to International Organizations; to the Committee on Foreign Relations.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. INOUYE, from the Select Committee on Indian Affairs, without amendment:

S. 2354. A bill to amend the Housing and Community Development Act of 1974 to make technical corrections for grants to Indian tribes, and for other purposes (Rept. No. 101-293).

By Mr. KENNEDY, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute and an amendment to the title:

S. 685. A bill to amend title I of the Employee Retirement Income Security Act of 1974 to clarify the applicability of rules re-

lating to fiduciary duties in relation to plan assets of terminated pensions plans and to provide for an explicit exception to such rules for employer reversions meeting certain requirements (Rept. No. 101-294).

By Mr. INOUYE, from the Select Committee on Indian Affairs, with amendments:

S. 2075. A bill to authorize grants to improve the capability of Indian tribal governments to regulate environmental quality (Rept. No. 101-295).

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. KENNEDY, from the Committee on Labor and Human Resources:

Velma Montoya, of California, to be a Member of the Occupational Safety and Health Review Commission for the remainder of the term expiring April 27, 1991; and

Donald G. Wiseman, of North Carolina, to be a Member of the Occupational Safety and Health Commission for the remainder of the term expiring April 27, 1993.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GARN (for himself, Mr. MOYNIHAN, Mr. WARNER, and Mr. ROBB):

S. 2636. A bill to authorize the Board of Regents of the Smithsonian Institution to plan and design an extension of the National Air and Space Museum at Washington Dulles International Airport, and for other purposes; to the Committee on Rules and Administration.

By Mr. REID (for himself, Mr. LIEBERMAN, Mr. BRADLEY, and Mr. MOYNIHAN):

S. 2637. A bill to amend the Toxic Substances Act to reduce the levels of lead in the environment, and for other purposes; to the Committee on Environment and Public Works.

By Mr. GRASSLEY:

S. 2638. A bill to authorize the Secretary of the Army to provide shoreline projects to maintain certain flood control projects on the Mississippi and Iowa Rivers; to the Committee on Environment and Public Works.

By Mr. DECONCINI (for himself, Mr. KENNEDY, Mr. HARKIN, Mr. METZENBAUM, Mr. KOHL, and Mr. SIMON):

S. 2639. A bill to enhance the ability of law enforcement officers to combat violent crime in America by providing criminal and civil enforcement of standards established by the National Institute of Justice for body armor; to the Committee on the Judiciary.

By Mr. DASCHLE (for himself, Mr. HEINZ, Mr. RIEGLE, Mr. PRYOR, Mr. DURENBERGER, and Mr. ROCKEFELLER):

S. 2640. A bill to amend title XVIII of the Social Security Act to prevent fraud and abuse and encourage competition in the sale of Medicare supplemental insurance; to the Committee on Finance.

By Mr. RIEGLE (for himself, Mr. PRYOR, Mr. DASCHLE, and Mr. ROCKEFELLER):

S. 2641. A bill to amend title XVIII of the Social Security Act to provide for simplification in the purchase of Medicare supplemental insurance; to the Committee on Finance.

By Mr. EXON (for himself and Mr. DASCHLE):

S. 2642. A bill entitled "The Grown in the United States Food Labeling Act of 1990"; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. BRYAN (for himself and Mr. REID):

S. 2643. A bill to improve source separation and recycling of paper products by Federal agencies and the Congress, and for other purposes; to the Committee on Environment and Public Works.

By Mr. LUGAR (for himself and Mr. COATS):

S. 2644. A bill to amend the Food Stamp Act of 1977 to make clarifications in provisions relating to general assistance vendor payments, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. INOUYE:

S. 2645. A bill to improve the health status of the urban Indian population and to enhance the quality and scope of health care services, disease prevention activities, and health promotion initiatives targeted at the urban American Indian population; to the Select Committee on Indian Affairs.

By Mr. HATFIELD (for himself and Mr. BRADLEY):

S.J. Res. 316. Joint resolution to designate the second Sunday in October of 1990 as "National Children's Day"; to the Committee on the Judiciary.

By Mr. LAUTENBERG (for himself, Mr. WARNER, Mr. BURDICK, Mr. CHAFEE, Mr. BAUCUS, Mr. BRADLEY, Mr. CONRAD, Mr. CRANSTON, Mr. D'AMATO, Mr. DODD, Mr. GORE, Mr. GORTON, Mr. HEFLIN, Mr. JOHNSTON, Mr. KENNEDY, Mr. LIEBERMAN, Mr. MCCLURE, Mr. MOYNIHAN, Mr. PELL, Mr. ROCKEFELLER, Mr. SPECTER, Mr. STEVENS, and Mr. WILSON):

S.J. Res. 317. Joint resolution to designate the week of October 14, 1990, through October 20, 1990, as "National Radon Action Week"; to the Committee on the Judiciary.

## SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MITCHELL:

S. Res. 285. Resolution making appointments to the Committee on Energy and Natural Resources, the Committee on Governmental Affairs, and the Committee on Veterans' Affairs; considered and agreed to.

By Mr. MITCHELL:

S. Res. 286. Resolution making additional majority appointments to the Committee on Environment and Public Works, the Committee on Finance, and the Committee on Labor and Human Resources; considered and agreed to.

By Mr. DOLE:

S. Con. Res. 130. Concurrent resolution to express the sense of the Congress that the States should make every effort to adopt a Victims of Crime Bill of Rights; to the Committee on the Judiciary.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GARN (for himself, Mr. MOYNIHAN, Mr. WARNER, and Mr. ROBB):

S. 2636. A bill to authorize the Board of Regents of the Smithsonian Institution to plan and design an extension of the National Air and Space Museum at Washington Dulles International Airport, and for other purposes; to the Committee on Rules and Administration.

### EXTENSION OF NATIONAL AIR AND SPACE MUSEUM

Mr. GARN. Mr. President, I think everyone in the country is aware that the National Air and Space Museum is the most successful museum not only in the United States but in the world, and has more visitors come to it. It has been successful for a long number of years, but as successful as it is, remarkable a museum as it is, nevertheless, it is inadequate.

Silver Hill's National Air and Space Museum stores far more exhibits than perhaps we possibly have space for on The Mall. Therefore it has been in planning stages in all the years I have been a Regent at the Smithsonian and most of the years that I have been a Senator. It has had difficulties over the years.

The Board of Regents most recently has once again reaffirmed unanimously their desire to extend the Air and Space Museum at Dulles International Airport.

I personally feel that this is the best and most useful place to have the extension of the museum. It will allow many more of the exhibits that have been stored and not available to the public, such as the *Enola Gay*, the space shuttle *Enterprise*, which I was able to get delivered to Dulles several years ago, as well as the most recent exhibit, the SR-71 that has been donated to the Smithsonian.

So I am very pleased that we have reached this point where we can once again submit a bill to authorize the Air and Space Museum to proceed with the planning for this much-needed facility.

Mr. President, Senator MOYNIHAN, Senator WARNER, and Senator ROBB have joined with me today as original cosponsors to legislation authorizing the Board of Regents of the Smithsonian Institution to plan and design an extension of the National Air and Space Museum at Washington Dulles International Airport.

I am pleased that we are once again taking a positive step toward the completion of the Air and Space Museum extension and, particularly, that we are authorizing the planning and

design of this facility at Dulles International Airport. This project has been in the works since 1983, when discussions about a Dulles extension began.

On three occasions over the past 7 years, the Board of Regents of the Smithsonian Institution has recommended that an extension of the National Air and Space Museum be constructed at Washington Dulles International Airport so that the museum may continue to fulfill its historic mandate to "memorialize the national development of aviation and space flight * * *" I was involved with NASA in their donation of the space shuttle *Enterprise* to the Smithsonian. *Enterprise* was delivered to Dulles in December 1985, in anticipation of the museum's extension being located at that site. The Senate passed legislation in 1986, authorizing the planning, design, and construction of this facility at Dulles and the Rules Committee reported similar legislation in the 100th Congress.

In reaffirming the preference for the Dulles location at their meeting on January 29 of this year, the Regents also asked Smithsonian Secretary Robert McC. Adams to negotiate further with representatives of the Commonwealth of Virginia regarding its commitment of financial assistance and to develop a legislative proposal in order to carry the project forward.

On April 13, Secretary Adams met with Gov. Lawrence Douglas Wilder of Virginia to discuss issues and strategies associated with the contribution of the Commonwealth to the extension. The outlines of that contribution are embodied in a letter from the Governor dated April 20, 1990, which I shall include following my remarks. In essence, Virginia will perform necessary sitework improvements; coordinate development of the shuttle and rail passenger service to the extension with appropriate local authorities; continue progress on highway improvements; and provide $6 million in construction funding that would be matched by contributions from private sources and units of local government. Legislative approval of these contributions by the Virginia General Assembly will be requested by the Governor in 1991.

The 1990 session of the Virginia General Assembly provided authority for an interest-free loan for extension planning purposes that could be accessed by the Smithsonian after July 1. It also provided bonding authority for construction.

Inasmuch as the Smithsonian has not identified any means of repaying the loan and the costs entailed in bonding are likely to be substantial, the Institution's Board of Regents at their meeting on May 7, approved introduction of the legislation we are presenting today providing Federal authority for planning and design and for the appropriation of $9,000,000 in fiscal year 1992. In the processes of planning and design, current estimates are likely to be refined, while parallel processes will be developed to identify various means for completing construction financing of the extension.

Funds amounting to $300,000 in the Institution's fiscal year 1990 appropriation will be applied to master planning of the Dulles site. In fiscal year 1991, the sum of $375,000 is expected to be available to continue that planning and to undertake necessary environmental analyses. Thus, with approval and funding of the legislation recommended by the Board of Regents, planning for realization of the extension can move forward in a prudent and timely manner.

Mr. President, it is an unusual and fortunate circumstance when the public need for a facility and a public desire to support its creation coincide. Such is the case with the extension of the Air and Space Museum at Dulles.

The existing National Air and Space Museum on the Mall is the most popular museum in the world. Its approval stems from the manner in which its artifacts, from the Wright Flyer to the Pioneer 10 spacecraft, are exhibited to the public, as well as from the fact that the American people are caught up with the idea of flights and space exploration.

The crucial matter of preserving a collection is the heart of any museum's function. In spite of the wonderful job that is currently being done, one can tell by inspection that the present site of the museum's restoration and preservation activities, the Paul E. Garber facility at Silver Hill, is totally inadequate for the existing collection, and absolutely unsuitable for the collection in the future.

It is a fact of life that the very subject matter of the museum, the artifacts of air and space, are by their nature large. The prototype Boeing 707 which introduced the jet age, generated billions of dollars for the United States and revolutionized man's travel by making it possible for the average citizen to trade in his shopping bags for luggage, should be available for viewing as an example of our aviation heritage. The space shuttle, as the symbol of the conversion of space from experimental to business status, should be there, too. Unfortunately, both of these—and many other similar inspirational craft—are not only too large to be exhibited in the museum on the Mall, they cannot be disassembled for transportation to the Mall. They, and others in the collection, must be exhibited at a location where there is a runway; the perfect location, one that has been advocated by the public, by business, by State and local authorities, and by the Smithsonian, itself, is Dulles Airport.

Let's get on with this exciting project and allow the American public to be able to personally view their heritage of flight. I appreciate the gentlemen who have joined me today as cosponsors and I ask the Senate for its early and positive consideration of this bill. In addition, I ask unanimous consent that a copy of the letter from the Governor of Virginia, as well as a copy of the bill be included in the RECORD following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2636

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Board of Regents of the Smithsonian Institution is authorized to plan and design an extension of the National Air and Space Museum at Washington Dulles International Airport.

SEC. 2. Effective October 1 1991 there is authorized to be appropriated to the Board of Regents of the Smithsonian Institution $9,000,000 to carry out the purposes of this Act.

---

COMMONWEALTH OF VIRGINIA,
OFFICE OF THE GOVERNOR,
*Richmond, VA, April 20, 1990.*

Hon. ROBERT MCC. ADAMS,
*Secretary, Smithsonian Institution, Washington, DC.*

DEAR SECRETARY ADAMS: Over the last two months, members of my Administration have met with Dr. Harwit and Smithsonian staff to discuss Virginia's contribution to the construction of the National Air and Space Museum Extension to be located at Washington Dulles International Airport. These frank and cordial discussions have enabled us to make considerable progress in our respective positions and laying the groundwork for future negotiations.

I want to reiterate my support for the Regents' decision to locate this national treasure at Washington Dulles Airport. I am gratified by the selection of Dulles and pledge to exercise my authority as Governor of Virginia to do everything I can to make the Extension a reality.

I write now to elaborate on all components of the Commonwealth's offer, as requested by Dr. Harwit. I will begin with a discussion of actions taken by the 1990 General Assembly; details of the more recent issues under discussion below.

ACTIONS OF 1990 GENERAL ASSEMBLY

Interest Free Loan. Governor Baliles' initial offer on August 28, 1989 included a $3 million interest free loan for planning and design in the introduced version of the 1990-92 budget (Attachment A). The loan can be accessed any time after July 1 1990. The loan would be made from the aviation trust fund and is to be repaid by the Smithsonian no later than June 30, 1996.

The General Assembly accepted the language pertaining to the loan. I expect to sign the 1990-92 budget shortly after the April 18, 1990 Reconvened Session of the 1990 General Assembly.

Bonding Authority. At the suggestion of the Smithsonian, legislation (Attachment B—SB 323) was passed by the 1990 General Assembly to enable the Virginia Public Building Authority to issue up to $100 million in bonds toward construction of the Ex-

tension. If this approach were utilized, the Commonwealth would hold title to the Extension and lease it to the Smithsonian until the bonds were retired. Lease payments made by the Smithsonian would cover all of the Commonwealth's debt service. Title would be transferred to the Smithsonian once the bonds were retired.

Closing expenses on a $141 million issue, the example discussed with Dr. Harwit, are shown to range from $1.7 to $2.3 million (Attachment C); expenses on a $100 million issue would be somewhat less.

PENDING ISSUES

Before specifying the content of Virginia's offer, it is necessary to review the status of two pending issues: Virginia's position on sitework improvements; and, anticipated transportation improvements required by the Smithsonian.

Sitework. Former Governor Baliles' August and December 1989 offers included a commitment to pay for all necessary site improvements identified in a letter from NASM Director, Dr. Harwit. At that time, the cost of sitework was preliminarily estimated to be $15.9 million.

As a result of further detailed review, the preliminary cost estimates are estimated to cost $26.2 million over a period of years, once Congress has approved the project. The table on Attachment D compares these three estimates for sitework.

Required Transportation Improvements. The Commonwealth agrees completely that the new Museum must be readily accessible to all people, and my administration will work closely with the Smithsonian toward that end.

I have instructed the Virginia Department of Transportation, in cooperation with appropriate local and regional entities, to develop a proposal for shuttle bus service between the West Falls Church Metro station and the Museum site and between the Dulles Airport terminal and the Museum site. The proposal is to be completed in draft form by July 1, 1990.

We will also work with local governments, the Washington Metropolitan Area Transit Authority and others interested in developing rail passenger service in the Dulles Access Road corridor, and I believe it is reasonable to anticipate such service to be operating by the year 2000.

Major highway improvements in the area are progressing well. The 14-mile segment of Route 28 between I-66 and Route 7 is being widened to six lanes at a cost of $117 million, and is on schedule for completion in the summer of 1991. The Dulles Toll Road is also being widened to six lanes, at a cost of $43 million, and is scheduled for completion in the fall of next year.

These two improvements, as well as others underway and planned, will greatly enhance access to the Museum.

I am aware of the Smithsonian's particular interest in the Route 28/Barnsfield Road interchange. This project, which is estimated to cost $15 million, has been planned for construction at some point after 1995. I have asked the Department of Transportation for its recommendations as to whether the interchange might be expedited to more nearly correspond with the opening of the Museum.

COMMONWEALTH'S OFFER

In the financial arena, the Commonwealth's offer consists of sitework and general purpose construction. Beyond these discrete issues, the Smithsonian has requested information on the ability of one General Assembly to preserve a commitment made by a previous General Assembly. Each of these issues is taken up in the order mentioned here.

Sitework. In view of the increased estimate for sitework, and without assurances on the extent of private donations, I intend to explore a range of financing options with members of the Virginia Congressional Delegation and our General Assembly in the coming months. Each option will include revenues derived from within the Commonwealth and several will also include additional federal aid for transportation which might be appropriated to Virginia by Congress. Clearly, Virginia's ability to finance sitework and transportation improvements in and around the Extension would be enhanced by additional federal appropriations for transportation.

Construction Match. In recent years, the policy of the Commonwealth (as specified in the Appropriation Act) has required an equal match from non-state sources, whether private donations, localities, or a combination of the two. Moreover, as indicated in Attachment E, the maximum general fund contribution donated by the Commonwealth to any single non-state museum has been $6 million.

Based on this precedent, I am prepared to propose to the 1991 Session of the General Assembly that Virginia appropriate up to $6 million in general funds, to be matched by an equal amount from local government and/or private sector donations. This contribution for construction, when added to estimated sitework costs of $26.2 million, could take state government's contribution to as much as $32.2 million and the total of public and private contributions from Virginia to as much as $38.2 million.

Timing. In view of our intent to work with Virginia's General Assembly to identify acceptable financing options, as well as our interest in pursuing additional federal appropriations for transportation purposes, I suggest your enabling legislation provide maximum flexibility in establishing requirements for the timing of the Commonwealth's contributions.

General Assembly's Commitment. The key to ensuring that commitments are maintained by future Governors and General Assemblies is the development of a sound and equitable plan for financing the Extension. There is ample precedent for multi-year financial commitments to capital projects. For example, over a six-year period (three biennial budgets), successive sessions of the General Assembly appropriated a multi-million dollar contribution toward construction of a replacement hospital at the University of Virginia.

Once the Assembly decided that it was in the best interests of the Commonwealth to help fund the hospital, there was no resistance to any of the three biennial appropriations.

SUMMARY

From the Commonwealth's perspective, the offer for Phase I of the Extension is truly ambitious. Including the value of the interest-free loan for planning, our offer to the Smithsonian would match the entire value of all money Virginia now intends to spend in fiscal 1991 and 1992 for state museums, non-state museums and historic landmarks. I hope you will concur in the generosity of this offer and be assured of our interest in developing additional ones for later phases.

Sincerely,

LAWRENCE DOUGLAS WILDER.

ATTACHMENT A

| Item | | Item detailed | | Appropriations | |
|---|---|---|---|---|---|
| | | First year | Second year | First year | Second year |
| | Authority: Title 5.1, Chapter 1, Code of Virginia. | | | | |
| | Out of the amounts included in Air Transportation Environmental and Community Affairs shall be paid to the Washington Airports Task Force from the special funds in this appropriation $375,000 the first year and $375,000 the second year. | | | | |
| 733. | Airport Assistance (6540000) | | | $12,832,410 | $12,882,390 |
| | Financial Assistance to Airports (6540100) | $12,479,900 | $12,479,909 | | |
| | Navigational Aid Services (6540300) | 352,510 | 402,495 | | |
| | Fund Sources: | | | | |

| | Commonwealth Transportation | 12,104,900 | 12,104,900 | | |
| | Authority: Title 5.1, Chapters 3 and 5, and Title 58.1, Chapter 24, Code of Virginia. | | | | |
| | A. It is declared to be legislative intent that the Department of Aviation match federal funds for Airport Assistance to the maximum extent possible. Provided, however, that the legislative intent expressed herein shall not be construed to prohibit the Virginia Aviation Board from allocating funds for promotional activities in the event that federal matching funds are unadvisable. | | | | |
| | B. Out of the amounts of Financial Assistance to Airports, the Department of Aviation is authorized to transfer from the Commonwealth Transportation Fund an amount not to exceed $3 million in the first year to the Smithsonian Institution to assist in planning and design of the expansion of the National Air and Space Museum at Washington Dulles International Airport. | | | | |
| | The transfer shall be made only under the following conditions: | | | | |
| | 1. The Department of Aviation shall have received certification from the Smithsonian Institution that Washington Dulles International Airport has been selected as the site for the expanded Museum. Any funds not required from the appropriation for planning and design shall be spent for no other purposes and shall revert to the Commonwealth Transportation Fund on June 30, 1992. | | | | |
| | 2. The Department of Aviation and the Smithsonian Institution shall have executed an agreement providing for the repayment of the state funds expended under the provisions of this item, from bond proceeds, Congressional appropriations or any other source of funds, the repayment to be accomplished not later than June 30, 1994. | | | | |
| | 3. The Governor shall have given his prior written approval, which shall be granted only after consultation with the Chairman of the House Appropriations and Senate Finance Committees, and only after the two preceding requirements shall have been satisfied. | | | | |

| | Authority: Discretionary Inclusion. | | | | |
| | This appropriation is subject to § 4-1.00 of this act. | | | | |

ATTACHMENT B

VIRGINIA SENATE BILL NO. 323

*Be it enacted by the General Assembly of Virginia:*

1. That §§ 2.1-234.13 and 2.1-234.21 of the Code of Virginia are amended and reenacted as follows:

§ 2.1-234.13. Purposes and general powers and duties of Authority.—The Authority is created for the purpose of constructing, improving, furnishing, maintaining, acquiring, and operating public buildings for the use of the Commonwealth (heretofore or hereafter constructed), state arsenals, armories, and military reserves, state institutions of every kind and character (heretofore and hereafter constructed), additions and improvements to land grant colleges, state colleges, universities and medical colleges, and the purchase of lands for rehabilitation purposes in connection with state institutions for the use of state colleges *and museum facilities for a trust instrumentality of the United States* (any and all the foregoing being herein called "projects"), the purpose and intent of this article being to benefit the people of the Commonwealth by, among things, increasing their commerce and prosperity. The Authority shall not undertake any project or projects which are not specifically included in a bill or resolution passed by a majority of those elected to each house of the General Assembly, authorizing such project or projects and as to any project relating to a state institution of higher education, not specifically designated by the board of visitors of that institution as a project to be undertaken by the Authority. The Authority is hereby granted and shall have and may exercise all powers necessary or convenient for the carrying out of the aforesaid purposes, including, but without limiting the generality of the foregoing, the following rights and powers:

1. To have perpetual existence as a corporation.

2. To sue and be sued, implead and be impleaded, complain and defend in all courts.

3. To adopt, use, and alter at will a corporate seal.

4. To acquire, purchase, hold and use any property, real, personal or mixed, tangible or intangible, or any interest therein necessary or desirable for carrying out the purposes of the Authority, and (without limitation of the foregoing) to lease as lessee, with the approval of the Governor, any property, real, personal or mixed, or any interest therein for a term not exceeding ninety-nine years at a nominal rental or at such annual rental as may be determined and, with the approval of the Governor, to lease as lessor to the Commonwealth of Virginia and any city, county, town or other political subdivision, or any agency, department, or public body of the Commonwealth, or land grant college, any project at any time constructed by the Authority, and any property, real, personal or mixed, tangible or intangible, or any interest therein, at any time acquired by the Authority, whether wholly or partially completed, and with the approval of the Governor, to sell, transfer and convey to the Commonwealth of Virginia, any project at any time constructed by the Authority, and with the approval of the Governor, to sell, transfer and convey any property, real, personal or mixed, tangible or intangible, or any interest therein, at any time acquired by the Authority.

5. To acquire by purchase, lease, or otherwise, and to construct, improve, furnish, maintain, repair, and operate projects.

6. To make bylaws for the management and regulation of its affairs.

To fix, alter, charge, and collect rates, rentals, and other charges for the use of the facilities of, or for the services rendered by, the Authority, or projects thereof, at reasonable rates, to be determined by it for the purpose of providing for the payment of the expenses of the Authority, the construction, improvement, repair, furnishing, maintenance, and operation of its facilities and properties, the payment of the principal of and interest on its obligations, and to fulfill the terms and provisions of any agreements made with the purchaser or holders of any such obligations.

8. To borrow money, make and issue negotiable notes, bonds, and other evidences of indebtedness or obligations therein called "bonds") of the Authority, and in addition thereto. Such bonds as the Authority may, from time to time, determine to issue for the purpose of refunding bonds previously issued by the Authority, and to secure the payment of all bonds, or any part thereof, by pledge or deed of trust of all or any of its revenues, rentals, and receipts, and to make such agreements with the purchasers or holders of such bonds or with others in connection with any such bonds, whether issued or to be issued, as the Authority shall deem advisable, and in general to provide for the security for said bonds and the rights of holders thereof; provided, that the total principal amount of such bonds outstanding at any time shall not exceed $335 million.

The Authority shall, on or before January 1 in each odd-numbered year, submit to the General Assembly its construction report and estimate of cost thereof for the coming biennium. The Authority shall also submit an annual report to the Governor and General Assembly on or before November 1 of each year, such report to contain, at a minimum, the annual financial statements of the Authority for the year ending the preceding June 30. The annual report shall be distributed in accordance with the provisions of § 2.1-467.

9. To make contracts of every name and nature, and to execute all instruments necessary or convenient for the carrying of its business.

10. Without limitation of the foregoing, to borrow money and accept grants from, and to enter into contracts, leases or other transactions with, any federal agency.

11. To have the power of eminent domain.

12. To pledge or otherwise encumber all or any of the revenues or receipts of the Authority as security for all or any of the obligations of the Authority.

13. To do all acts and things necessary or convenient to carry out the powers granted to it by this act or any other acts.

14. To acquire, by assignment from the Commonwealth or the Virginia Supplemental Retirement System, all contracts, including those which are not completed, and which involve constructing, improving, furnishing, maintaining, and operating the structures, facilities, or undertakings similar to those designated herein as projects.

Except as otherwise provided by law, when projects are to be constructed, improved, furnished, maintained, repaired or operated for the use of any department of the Commonwealth, as hereinbefore listed in this section, no plans or specifications therefor shall be presented for quotations or bids until such plans and specifications shall have been submitted to and approved by the Department of General Services and any other department of the Commonwealth having any jurisdiction over the projects, so that the project will conform to standards established by such departments.

§ 2.1-234.21. Contracts, leases and other arrangements.—A. In connection with the operation of a facility owned or controlled by the Authority, the Authority may enter into contracts, leases, and other arrangements with any person or persons (i) granting the privilege of using or improving the facility or any portion or facility thereof or space therein consistent with the purposes of this article; (ii) conferring the privilege of supplying goods, commodities, things, services, or facilities at the facility; and (iii) making available services to be furnished by the Authority or its agents at the facility.

In each case the Authority may establish the terms and conditions and fix the charges, rentals, or fee for the privilege or service, which shall be reasonable and uniform for the same class of privilege or service at each facility and shall be established with due regard to the property and improvements used and the expenses of operation to the Authority.

B. Except as may be limited by the terms and conditions of any grant, loan or agreement authorized by § 2.1-234.23, the Authority may by contract, lease, or other arrangements, upon a consideration fixed by it, grant to any qualified person, for a term not to exceed thirty years, the privilege of operating, as agent of the Authority or otherwise, any facility owned or controlled by the Authority; provided that no person shall be granted any authority to operate a facility other than a public facility or to enter into any contracts, leases, or other arrangements in connection with the operation of the facility which the Authority might not have undertaken under subsection A of this section.

C. In connection with a project leased to a trust instrumentality of the United States where such trust instrumentality has agreed with the Authority to pay rent which together with payments or contributions by the Commonwealth and any political subdivision are sufficient to pay the principal of and interest on the Authority's bonds issued to finance such project, the Authority may agree that such trust instrumentality shall assume a responsibility for the acquisition, construction, operation, maintenance, and repair of the project and may further agree that when the principal of all such bonds of the Authority and the interest thereon have been paid in full or provision made therefor satisfactory to the Authority, the trust instrumentality may acquire the Authority's interest in such project without payment of additional consideration.

Mr. WARNER. Mr. President, I thank my distinguished colleague, the Senator from Utah, together with the Senator from New York, Mr. MOYNIHAN. They, as members by law of the Board of Regents, have worked very carefully, fairly, and objectively on behalf of the U.S. Senate; and now the Board of Regents has reached its decision to locate this adjunct museum de-

scribed by my distinguished colleague at a site in the vicinity of the Dulles International Airport, Virginia.

It is most appropriate that Senator GARN be associated with this legislation, for he is a pioneer in his own right in aviation, having started as a young naval aviator, flying in the old SNJ's, transitioning from propellers to jets, and eventually becoming the only Member of Congress to have flown in space. That span of activities, I think, qualifies him in every respect to participate in this momentous decision to provide America, and indeed the millions of foreign visitors who join us each year, with an opportunity to study firsthand the history of aviation in the United States.

We should also respectfully cite Senator Barry Goldwater, for he was, from the very beginning, a sponsor of the concept to have an adjunct museum erected, and indeed worked to have the decision expedited for a location at Dulles. The museum now in Washington, DC, was also the beneficiary of his foresight. I hope that at some future date the Board of Regents will consider the incorporation of his name at some appropriate position in this new building.

Mr. President, I should also acknowledge that the Presiding Officer today, in his capacity as former Governor of Virginia, together with his predecessor, Governor Dalton, successor Governor Baliles, and the current Governor Wilder, of Virginia, have consistently been strong backers of the concept of this museum and to have it located in the Commonwealth of Virginia.

Mr. President, special recognition should also be given to the Secretary of the museum, Robert Adams. I have worked with him, as have other Members of the Senate, and throughout these deliberations I can say without reservation that he has been fair, objective, thorough, and firm with the leadership in the decision process. Now the implementation of this decision, subject to the passage of this bill, and such appropriations as are appropriate, will be implemented by Mr. Harwit the distinguished Director of the Air and Space Museum.

Last, I wish to recognize the leadership provided at the local level since this effort began. Carrington Williams, who is chairman of the Washington Airports Task Force and a member of the Metropolitan Washington Airports Authority Board of Directors, has been a driving force among those local officials who have emphasized the advantages of locating the museum expansion at Washington-Dulles. He has served honorably in this capacity, just as he did during his five terms in the Virginia State House of Delegates.

The president of the Airports Task Force, Leo Schefer, has worked with Carrington Williams at the grassroots level to solidify community and private sector support. From what I've seen and heard in the community, the support is overwhelming and the citizens are excited.

In September 1983 the Smithsonian Board of Regents first approved the National Air and Space Museum plan to expand at the Washington-Dulles International Airport. Since then the Board's commitment to the project and location has been confirmed repeatedly. Likewise the commitment by the Commonwealth of Virginia under the distinguished Governors that I have mentioned has been consistent. That commitment by Virginia is just not encouragement and sentiment, but a commitment to help finance this Federal museum.

Yesterday representatives of the Governor of Virginia, headed by the Secretary of Education, who has a specific responsibility for the museum, met with Members of the Congress, the Virginia delegation, together with their staffs, and at that time the announcement was made that there has been a complete understanding and agreement with respect to the specific details of the obligations, financial and otherwise, of the Commonwealth of Virginia. Those agreements are reflected in correspondence which I now ask unanimous consent to have printed at the conclusion of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. WARNER. Mention should also be made of the very fair and objective approach taken by our colleagues from the State of Maryland. They, very vigorously and fairly, participated in the site selection, and now it is my understanding—and we have talked with several of them—that they accept this decision of the Board and will hopefully be supportive, as this legislation and the appropriation move through the Congress.

Back in 1826 James Smithson of England bequeathed his property to the U.S. Government, "To found at Washington, under the name of the Smithsonian Institution, an Establishment for the increase and diffusion of knowledge among men."

I am certain that when the ribbon is cut and the doors of this new facility are opened, the American public will be treated to one of the most fascinating, inspirational, educational museums to be found anywhere in the world, the type of museum James Smithson would have respected and admired.

EXHIBIT 1

COMMONWEALTH OF VIRGINIA,
OFFICE OF THE GOVERNOR,
*Richmond VA, April 20, 1990.*

Hon. ROBERT MCC. ADAMS,
*Secretary, Smithsonian Institution, Washington, DC.*

DEAR SECRETARY ADAMS: Over the last two months, members of my Administration have met with Dr. Harwit and Smithsonia staff to discuss Virginia's contribution to the construction of the National Air and Space Museum Extension to be located at Washington-Dulles International Airport. These frank and cordial discussions have enabled us to make considerable progress in clarifying our respective positions and laying the groundwork for future negotiations.

I want to reiterate my support for the Regents' decision to locate this national treasure at Washington-Dulles Airport. I am gratified by the selection of Dulles and pledge to exercise my authority as Governor of Virginia to do everything I can to make the Extension a reality.

I write now to elaborate on all components of the Commonwealth's offer, as requested by Dr. Harwit. It will begin with a discussion of actions taken by the 1990 General Assembly; details of the more recent issues under discussion follow.

ACTIONS OF 1990 GENERAL ASSEMBLY

Interest Free Loan. Governor Baliles' initial offer on August 28, 1989, included a $3 million interest free loan for planning and design in the introduced version of the 1990-92 budget (Attachment A). The loan can be accessed any time after July 1, 1990. The loan would be made from the aviation trust fund and is to be repaid by the Smithsonian no later than June 30, 1996.

The General Assembly accepted the language pertaining to the loan. I expect to sign the 1990-92 budget shortly after the April 18, 1990 Reconvened Session of the 1990 General Assembly.

Bonding Authority. At the suggestion of the Smithsonian, legislation (Attachment B-SB 323) as passed by the 1990 General Assembly to enable the Virginia Public Building Authority to issue up to $100 million in bonds toward construction of the Extension. If this approach were utilized, the Commonwealth would hold title to the Extension and lease it to the Smithsonian until the bonds were retired. Lease payments made by the Smithsonian would cover all of the Commonwealth's debt service. Title would be transferred to the Smithsonian once the bonds were retired.

Closing expenses on a $141 million issue, the example discussed with Dr. Harwit, are shown to range from $1.7 million to $2.3 million (Attachment C); expenses on a $100 million issue would be somewhat less.

PENDING ISSUES

Before specifying the content of Virginia's offer, it is necessary to review the status of two pending issues: Virginia's position on sitework improvements; and, anticipated transportation improvements required by the Smithsonian.

Sitework. Former Governor Baliles' August and December 1989 offers included a commitment to pay for all necessary site improvements identified in a letter from NASM Director, Dr. Harwit. At that time, the cost of sitework was preliminarily estimated to be $15.9 million.

As a result of further detailed review, the preliminary cost estimates are estimated to

cost $26.2 million over a period of years, once Congress has approved the project. The table on attachment D compares these three estmates for sitework.

Required Transportation Improvements. The Commonwealth agrees completely that the new Museum must be readily accessible to all people, and my administration will work closely with the Smithsonian toward that end.

I have instructed the Virginia Department of Transportation, in cooperation with appropriate local and regional entities, to develop a proposal for shuttle bus service between the West Falls Church Metro station and the Museum site and between the Dulles Airport terminal and the museum site. The proposal is to be completed in draft form by July 1, 1990.

We will also work with local governments, the Washington Metropolitan Area Transit Authority and others interested in developing rail passenger service in the Dulles Access Road corridor, and I believe it is reasonable to anticipate such service to be operating by the year 2000.

Major highway improvements in the area are progressing well. The 14-mile segment of Route 28 between I-66 and Route 7 is being widened to six lanes at a cost of $117 million, and is on schedule for completion in the summer of 1991. The Dulles toll road is also being widened to six lanes, at a cost of $43 million, and is scheduled for completion in the fall of next year.

These two improvements, as well as others underway and planned, will greatly enhance access to the Museum.

I am aware of the Smithsonian's particular interest in the Route 28-Barnsfield Road interchange. This project, which is estimated to cost $15 million, has been planned for construction at some point after 1995. I have asked the Department of Transportation for its recommendations as to whether the interchange might be expedited to more nearly correspond with the opening of the Museum.

COMMONWEALTH'S OFFER

In the financial arena, the Commonwealth's offer consists of sitework and general purpose construction. Beyond these discrete issues, the Smithsonian has requested information on the ability of one General Assembly to preserve a commitment made by a previous General Assembly. Each of these issues is taken up in the order mentioned here.

Sitework. In view of the increased estimate for sitework, and without assurances on the extent of private donations, I intend to explore a range of financing options with members of the Virginia Congressional Delegation and our General Assembly in the coming months. Each option will include revenues derived from within the Commonwealth and several will also include additional federal aid for transportation which might be appropriated to Virginia by Congress. Clearly, Virginia's ability to finance sitework and transportation improvements in and around the Extension would be enhanced by additional federal appropriations for transportation.

Construction Match. In recent years, the policy of the Commonwealth (as specified in the Appropriate Act) has required an equal match from nonstate sources, whether private donations, localities, or a combination of the two. Moreover, as indicated in Attachment E, the maximum general fund contribution donated by the Commonwealth to any single nonstate museum has been $6 million.

Based on this precedent, I am prepared to propose to the 1991 Session of the General Assembly that Virginia appropriate up to $6 million in general funds, to be matched by an equal amount from local government and/or private sector donations. This contribution for construction, when added to estimated sitework costs of $26.2 million, could take state government's contribution to as much as $32.2 million and the total of public and private contributions from Virginia to as much as $38.2 million.

Timing. In view of our intent to work with Virginia's General Assembly to identify acceptable financing options, as well as our interest in pursuing additional federal appropriations for transportation purposes, I suggest your enabling legislation provide maximum flexibility in establishing requirements for the timing of the Commonwealth's contributions.

General Assembly's Commitment. The key to ensuring that commitments are maintained by future Governors and General Assemblies is the development of a sound and equitable plan for financing the Extension. There is ample precedent for multi-year financial commitments to capital projects. For example, over a six-year period (three biennial budgets), successive sessions of the General Assembly appropriated a multi-million dollar contribution toward construction of a replacement hospital at the University of Virginia.

Once the Assembly decided that it was in the best interests of the Commonwealth to help fund the hospital, there was no resistance to any of the three biennial appropriations.

SUMMARY

From the Commonwealth's perspective, the offer for Phase I of the Extension is truly ambitious. Including the value of the interest-free loan for planning, our offer to the Smithsonian would match the entire value of all money Virginia now intends to spend in fiscal 1991 and 1992 for state museums, non-state museums and historic landmarks. I hope you will concur in the generosity of this offer and be assured of our interest in developing additional ones for later phases.

Sincerely,

LAWRENCE DOUGLAS WILDER.

| Item | | Item detailed | | Appropriations | |
|---|---|---|---|---|---|
| | | First year | Second year | First year | Second year |
| | Authority: Title 5.1, Chapter 1, Code of Virginia. | | | | |
| | Out of the amounts included in Air Transportation Environmental and Community Affairs shall be paid to the Washington Airports Task Force from the special funds in this appropriation $375,000 the first year and $375,000 the second year. | | | | |
| 733. | Airport Assistance (6540000) | | | $12,832,410 | $12,882,390 |
| | Financial Assistance to Airports (6540100) | $12,479,900 | $12,479,909 | | |
| | Navigational Aid Services (6540300) | 352,510 | 402,495 | | |
| | Fund Sources: | | | | |
| | Special | 727,510 | 777,495 | | |
| | Commonwealth Transportation | 12,104,900 | 12,104,900 | | |
| | Authority: Title 5.1, Chapters 3 and 5, and Title 58.1, Chapter 24, Code of Virginia. | | | | |
| | A. It is declared to be legislative intent that the Department of Aviation match federal funds for Airport Assistance to the maximum extent possible. Provided, however, that the legislative intent expressed herein shall not be construed to prohibit the Virginia Aviation Board from allocating funds for promotional activities in the event that federal matching funds are unadvisable. | | | | |
| | B. Out of the amounts for Financial Assistance to Airports, the Department of Aviation is authorized to transfer from the Commonwealth Transportation Fund an amount not to exceed $3 million in the first year to the Smithsonian Institution to assist in planning and design of the expansion of the National Air and Space Museum at Washington Dulles International Airport. | | | | |
| | The transfer shall be made only under the following conditions: | | | | |
| | 1. The Department of Aviation shall have received certification from the Smithsonian Institution that Washington Dulles International Airport has been selected as the site for the expanded Museum. Any funds not required from the appropriation for planning and design shall be spent for no other purpose and shall revert to the Commonwealth Transportation Fund on June 30, 1992. | | | | |
| | 2. The Department of Aviation and the Smithsonian Institution shall have executed an agreement providing for the repayment of the state funds expended under the provisions of this Item, from bond proceeds, Congressional appropriations or any other source of funds, the repayment to be accomplished not later than June 30, 1996. | | | | |
| | 3. The Governor shall have given his prior written approval, which shall be granted only after consultation with the Chairman of the House Appropriations and Senate Finance Committees, and only after the two preceding requirements shall have been satisfied. | | | | |
| 734. | Executive Management (7130000) | | | (1,080) | (1,080) |
| | Savings from Management Actions (7130100) | (1,080) | (1,080) | | |
| | Fund Sources: General | (1,080) | (1,080) | | |
| | Authority: Discretionary Inclusion. | | | | |
| | This appropriation is subject to § 4-1.00 of this act. | | | | |

VIRGINIA SENATE BILL NO. 323

*Be it enacted by the General Assembly of Virginia:*

1. That §§ 2.1-234.13 and 2.1-234.21 of the Code of Virginia are amended and reenacted as follows:

§ 2.1-234.13. Purpose and general powers and duties of Authority.—The Authority is created for the purpose of constructing, improving, furnishing, maintaining, acquiring, and operating public buildings for the use of the Commonwealth (heretofore or hereafter constructed), state arsenals, armories, and military reserves, state institutions or every kind and character (heretofore and hereafter constructed), additions and improvements to land grant colleges, state colleges, universities and medical colleges, and the purchase of lands for rehabilitation purposes in connection with state institutions and for use of state colleges, *and museum facilities for a trust instrumentality of the United States* (any and all the foregoing being herein called "projects"), the purpose

and intent of this article being to benefit the people of the Commonwealth by, among other things, increasing their commerce and prosperity. The Authority shall not undertake any project or projects which are not specifically included in a bill or resolution passed by a majority of those elected to each house of the General Assembly, authorizing such project or projects and as to any project relating to a state institution of higher education, not specifically designated by the board of visitors of that institution as a project to be undertaken by the Authority. The Authority is hereby granted and shall have and may exercise all powers necessary or convenient for the carrying out of the aforesaid purposes, including, but without limiting the generality of the foregoing, the following rights and powers:

1. To have perpetual existence as a corporation.

2. To sue and be sued, implead and be impleaded, complain and defend in all courts.

3. To adopt, use, and alter at will a corporate seal.

4. To acquire, purchase, hold and use any property, real, personal or mixed, tangible or intangible, or any interest therein necessary or desirable for carrying out the purposes of the Authority, and (without limitation of the foregoing) to lease as lessee, with the approval of the Governor, any property, real, personal or mixed, or any interest therein for a term not exceeding ninety-nine years at a nominal rental or at such annual rental as may be determined and, with the approval of the Governor, to lease as lessor to the Commonwealth of Virginia and any city, county, town or other political subdivision, or any agency, department, or public body of the Commonwealth, or land grant college, any project at any time constructed by the Authority, and any property, real, personal or mixed, tangible or intangible, or any interest therein, at any time acquired by the Authority, whether wholly or partially completed, and with the approval of the Governor, to sell, transfer and convey to the Commonwealth of Virginia, any project at any time constructed by the Authority, and with the approval of the Governor, to sell, transfer and convey any property, real, personal or mixed, tangible or intangible, or any interest therein, at any time acquired by the Authority.

5. To acquire by purchase, lease, or otherwise, and to construct, improve, furnish, maintain, repair, and operate projects.

6. To make bylaws for the management and regulation of its affairs.

7. To fix, alter, charge, and collect rates, rentals, and other charges for the use of the facilities of, or for the services rendered by, the Authority, or projects thereof, at reasonable rates, to be determined by it for the purpose of providing for the payment of the expenses of the Authority, the construction, improvement, repair, furnishing, maintenance, and operation of its facilities and properties, the payment of the principal of and interest on its obligations, and to fulfill the terms and provisions of any agreements made with the purchasers or holders of any such obligations.

8. To borrow money, make and issue negotiable notes, bonds, and other evidences of indebtedness or obligations (herein called "bonds") of the Authority, and in addition thereto, such bonds as the Authority may, from time to time, determine to issue for the purpose of refunding bonds previously issued by the Authority, and to secure the payment of all bonds, or any part thereof, by pledge or deed of trust of all or any of its revenues, rentals, and receipts, and to make such agreements with the purchasers or holders of such bonds or with others in connection with any such bonds, whether issued or to be issued, as the Authority shall deem advisable, and in general to provide for the security for said bonds and the rights of holders thereof; provided, that the total principal amount of such bonds outstanding at any time shall not exceed $335 million.

The Authority shall, on or before January 1 in each odd-numbered year, submit to the General Assembly its construction report and estimate of cost thereof for the coming biennium. The Authority shall also submit an annual report to the Governor and General Assembly on or before November 1 of each year, such report to contain, at a minimum, the annual financial statements of the Authority for the year ending the preceding June 30. The annual report shall be distributed in accordance with the provisions of § 2.1-467.

9. To make contracts of every name and nature, and to execute all instruments necessary or convenient for the carrying on of its business.

10. Without limitation of the foregoing, to borrow money and accept grants from, and to enter into contracts, leases or other transactions with, any federal agency.

11. To have the power of eminent domain.

12. To pledge or otherwise encumber all or any of the revenues or receipts of the Authority as security for all or any of the obligations of the Authority.

13. To do all acts and things necessary or convenient to carry out the powers granted to it by this act or any other acts.

14. To acquire, by assignment from the Commonwealth or the Virginia Supplemental Retirement System, all contracts, including those which are not completed, and which involve constructing, improving, furnishing, maintaining, and operating the structures, facilities, or undertakings similar to those designated herein as projects.

Except as otherwise provided by law, when projects are to be constructed, improved, furnished, maintained, repaired or operated for the use of any department of the Commonwealth, as hereinbefore listed in this section, no plans or specifications therefor shall be presented for quotations or bids until such plans and specifications shall have been submitted to and approved by the Department of General Services and any other department of the Commonwealth having any jurisdiction over the projects, so that the project will conform to standards established by such departments.

§ 2.1-234.21. Contracts, leases and other arrangements.—A. In connection with the operation of a facility owned or controlled by the Authority, the Authority may enter into contracts, leases, and other arrangements with any person or persons (i) granting the privilege of using or improving the facility or any portion or facility thereof or space therein consistent with the purposes of this article; (ii) conferring the privilege or supplying goods, commodities, things, services, or facilities at the facility; and (iii) making available services to be furnished by the Authority or its agents at the facility.

In each case the Authority may establish the terms and conditions and fix the charges, rentals, or fee for the privilege or service, which shall be reasonable and uniform for the same class of privilege or service at each facility and shall be established with due regard to the property and improvements used and the expenses of operation to the Authority.

B. Except as may be limited by the terms and conditions of any grant, loan or agreement authorized by § 2.1-234.23, the Authority may be contract, lease, or other arrangements, upon a consideration fixed by it, grant to any qualified person, for a term not to exceed thirty years, the privilege of operating, as agent of the Authority or otherwise, any facility owned or controlled by the Authority; provided that no person shall be granted any authority to operate a facility other than as a public facility or to enter into any contracts, leases, or other arrangements in connection with the operation of the facility which the Authority might not have undertaken under subsection A of this section.

C. In connection with a project leased to a trust instrumentality of the United States where such trust instrumentality has agreed with the Authority to pay rent which together with payments or contributions by the Commonwealth and any political subdivision are sufficient to pay the principal of and interest on the Authority's bonds issued to finance such project, the Authority may agree that such trust instrumentality shall assume all responsibility for the acquisition, construction, operation, maintenance, and repair of the project and may further agree that when the principal of all such bonds of the Authority and the interest thereon have been paid in full or provision made therefor satisfactory to the Authority, the trust instrumentality may acquire the Authority's interest in such project without payment of additional consideration.

[1] Now a State agency.

SMITHSONIAN INSTITUTION,
*Washington, DC, May 9, 1990.*

Hon. LAWRENCE DOUGLAS WILDER,
*Governor, Commonwealth of Virginia, Richmond, VA.*

DEAR GOVERNOR WILDER: Thank you very much for your letter of April 20 outlining Virginia's proposed contribution to construction of the extension of the Smithsonian's National Air and Space Museum that we are planning for Washington Dulles International Airport. Your letter has been shared with the Institution's Board of Regents which met on Monday, May 7th, and approved introduction of legislation to authorize further planning and design of the extension, as well as $9,000,000 in Fiscal Year 1992 to carry that work forward.

In the current fiscal year the Smithsonian expects to apply $300,000 from available funds to development of a master plan for the Dulles site. In Fiscal Year 1991 we would hope to complete that plan and the environmental analyses that must of necessity precede construction.

As these activities proceed, the Institution also will develop a financing plan for construction. We expect that, in addition to the Virginia contribution, the plan will include a combination of Federal appropriations, donations, and other forms of private sector support that have yet to be identified and explored.

I shall, of course, keep you informed of these matters, and look forward to working with you and your colleagues in bringing the extension at Dulles to its full realization.

Sincerely,

ROBERT MCC. ADAMS,
*Secretary.*

Mr. ROBB. Mr. President, I am pleased today to join the Senate Regents for the Smithsonian and my colleague, the senior Senator from Virginia, in introducing legislation to begin the process of constructing an extension to the National Air and Space Museum at Washington-Dulles International Airport.

The Commonwealth of Virginia and I have been avid supporters of this project since the Smithsonian first broached the idea in 1983, while I was Governor. My successors in that office have maintained the Commonwealth's commitment to the project.

Mr. President, this legislation represents the first critical step toward making this expansion of the Smithsonian's most popular museum a reality. From the *Enola Gay* to the SR–71 to the shuttle *Enterprise*, there are simply too many dreams, too many adventures that we don't get to share, because these planes and rockets and satellites simply don't fit into the Air and Space Museum down the street.

I am confident that the American people will flock to this extension, as they have to the main facility on the Mall, and that the bill we introduce today, will inspire a whole new generation of kids—and parents—with the wonders of flight. Echoing the title of one of the popular IMAX Movies at the Air and Space Museum, "the dream is alive," and this extension will help to keep it so.

I urge my colleagues to support this measure, and hope that the Senate can act upon it quickly.

---

By Mr. REID (for himself, Mr. LIEBERMAN, Mr. BRADLEY, and Mr. MOYNIHAN):

S. 2637. A bill to amend the Toxic Substances Control Act to reduce the levels of lead in the environment, and for other purposes; to the Committee on Environment and Public Works.

LEAD EXPOSURE REDUCTION ACT OF 1990

Mr. REID. Mr. President, on behalf of myself, Mr. LIEBERMAN, Mr. BRADLEY, and Mr. MOYNIHAN, I rise today to introduce the Lead Exposure Reduction Act of 1990.

Lead poisoning is something which many people believe belongs to the past. Unfortunately, this is not the case. Despite some reduction in the amount of lead in our environment, lead poisoning remains a major public health problem.

On March 8, 1990, the Subcommittee on Toxic Substances, Environmental Oversight, Research and Development, which I chair, held a hearing on the long-term health effects of lead exposure. The testimony presented at this hearing was truly disturbing.

Far from being a disease of the past, the testimony revealed that lead poisoning is widespread. Particularly at risk are children under 7 years of age. Some 3 to 4 million of our children have levels of lead in their blood that may adversely affect their health.

At exposure levels that are commonly experienced, the effects of lead on young children include permanent, significant neurologic impairment. Translated, this means lower IQ levels

and behavioral problems for many of our children. As a recent article in the Washington Post stated, what we have is "a national recipe for stupidity."

Although lead's adverse health effects are abundantly documented, the United States continues to use over 1.4 million tons of lead each year. While three-quarters of that lead is used in large storage batteries, the remainder is used in a large variety of products.

The manufacture, use, and disposal of these products means that more and more lead is being released into the environment. For most of these products, nonleaded substitutes are already available. In addition, Government agencies are seriously behind in revising standards for occupational and environmental lead exposure. More resources are also needed to improve abatement methods and technologies to minimize exposure to lead.

The Lead Exposure Reduction Act of 1990 addresses these problems in turn.

Title II of the act is designed to reduce the use of lead products where substitutes are available. For lead-containing products that are extremely likely to contaminate the environment as a result of their use, or misuse, legislative bans are included.

In order to identify the complete range of products in which lead is currently used, manufacturers and importers are directed to notify the Administrator of the EPA of the lead content of their products. Thereafter, new lead-containing products could only be marketed if the Administrator concluded they were not dispersive, and that no comparable product was already available.

Title II also mandates that lead-acid batteries be recycled, that leaded gasoline be sold only at a price equal to or greater than unleaded gasoline, and that all products containing lead bear a label indicating the presence and percentage of lead.

Title III requires the EPA to promulgate revised ambient air and drinking water standards for lead. If the EPA fails to meet specified deadlines, legislative standards will take effect.

In addition, title III requires the Director of the Centers for Disease Control to encourage State public health officials to report blood-lead levels. The Agency for Toxic Substances and Disease Registry is also directed to update its report to Congress on childhood lead poisoning every 2 years.

The purpose of these last two provisions is to obtain and publicize statistics on the extent of lead poisoning in the United States. The public must be made aware of the dangers of lead.

Finally, title IV addresses the critical need for identifying and removing the technological constraints to safe, effective, and affordable abatement of lead-based paint. By promoting research, the provisions of title IV will help lower the costs of safe and effective abatement by promoting the development and testing of more cost-effective abatement methods and strategies.

The Lead Exposure Reduction Act of 1990 authorizes a total of $95 million over 4 years for the purpose of carrying out the provisions of the act. In light of the stakes involved—the health and intelligence of our children—I believe this to be a small price to pay, and I urge my colleagues to support this measure.

Mr. President, I ask unanimous consent that the bill and an accompanying editorial from the Reno Gazette-Journal be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2637

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION. 1. SHORT TITLE.

This Act may be cited as the "Lead Exposure Reduction Act of 1990".

SEC. 2. AMENDMENT OF THE TOXIC SUBSTANCES CONTROL ACT.

(a) AMENDMENT OF THE TOXIC SUBSTANCES CONTROL ACT.—The Toxic Substances Control Act (15 U.S.C. 2601 et seq.) is amended by adding after title III the following new title:

"TITLE IV—LEAD EXPOSURE REDUCTION

"SEC. 401. FINDINGS AND POLICY.

"(a) FINDINGS.—The Congress finds that—

"(1) lead poisoning is the most prevalent disease of environmental origin among American children today, and children under 7 years of age are at special risk because of their susceptibility to the potency of lead as a neurologic toxin;

"(2) at exposure levels that are commonly experienced, the effects of lead on children include permanent, significant neurologic impairment, and additional health effects occur in adults exposed to similar exposure levels;

"(3) because of the practical difficulties of removing lead already dispersed into the environment, children and adults will continue to be exposed to such lead for years;

"(4) as a result of decades of highly dispersive uses of lead in a variety of products, contamination of the environment with unacceptable levels of lead is widespread;

"(5) the continued manufacture, import, processing, use, and disposal of lead-containing products causes further releases of lead to the environment, and such releases contribute to further environmental contamination and resultant exposure to lead; and

"(6) methods to reduce existing lead exposure levels must be improved, especially through the development of more effective and affordable methods for abating lead-based paint, which continues to be a major cause of childhood lead poisoning.

"(b) POLICY.—It is the policy of the United States that further releases of lead to the environment should be minimized, and means should be developed and implemented to reduce exposures to existing sources of environmentally dispersed lead.

"SEC. 402. RESTRICTIONS ON CONTINUING USES OF CERTAIN LEAD-CONTAINING PRODUCTS.

"(a) GENERAL RESTRICTIONS.—Except as provided under subsections (b), (c), and (d) of this section, beginning on the date that is 1 year after the date of the enactment of the Lead Exposure Reduction Act of 1990, no person may manufacture, process, or distribute in commerce any of the following product categories:

"(1) Paint containing more than 0.06 percent lead by dry weight.

"(2) Solder containing more than 0.1 percent lead by dry weight.

"(3) Plastic additives, printing inks, or pigments containing more than 0.06 percent lead by dry weight.

"(4) Plumbing fittings containing more than 2 percent lead by dry weight.

"(5) Pesticides (as defined in section 2(u) of the Federal Insecticide, Rodenticide, and Fungicide Act (7 U.S.C. 136(u)) containing more than 0.1 percent lead by dry weight.

"(6) Construction materials (including roofing, siding, and soundproofing materials) containing more than 0.1 percent lead by dry weight.

"(7) Fertilizers containing more than 0.1 percent lead by dry weight.

"(8) Glazes, enamels, and frits containing more than 0.06 percent lead by dry weight.

"(9) Toy and recreational game pieces containing more than 0.1 percent lead by dry weight.

"(10) Curtain weights containing more than 0.1 percent lead by dry weight.

"(11) Fishing weights containing more than 0.1 percent lead by dry weight.

"(12) Stained-glass came containing more than 0.1 percent lead by dry weight.

"(13) Foils for wine bottles containing more than 0.1 percent lead by dry weight.

"(b) MODIFICATION OF RESTRICTIONS.—(1) The Administrator may, after public notice and opportunity for comment, promulgate regulations to modify, pursuant to paragraphs (2) and (3) of this subsection, the percentage of the allowable lead content for a product category described in paragraphs (1) through (13) of subsection (a).

"(2) The Administrator may, pursuant to paragraph (1), establish by regulation a percentage of the allowable lead content that is less than the percentage specified under subsection (a) for any product category described in paragraphs (1) through (13) of such subsection if the Administrator determines that a reduction in the percentage of allowable lead content is necessary to protect human health or the environment.

"(3)(A) The Administrator may, pursuant to paragraph (1), establish by regulation a percentage by dry weight of the allowable lead content for a product category described in paragraphs (1) through (13) of subsection (a) that is greater than the percentage specified for the product category under such subsection if the Administrator determines that—

"(i) increasing the percentage of the allowable lead content for the product category will promote the protection of human health and the environment; and

"(ii) no comparable substitute is available at the time of the promulgation of such regulation.

"(B) If the Administrator establishes by regulation an increased percentage of the allowable lead content for a product category pursuant to this paragraph, the regulation establishing such percentage shall terminate on the date that is 3 years after the date such regulation becomes final.

"(c) STATEMENTS BY ADMINISTRATOR RELATING TO MODIFICATIONS OF RESTRICTIONS.—In promulgating any regulation under subsection (b) or (d) of this section with respect to the allowable lead content under a product category, the Administrator shall, prior to the promulgation of a final regulation, consider and publish a statement with respect to—

"(1) the effects of the proposed allowable lead content level for the product category on human health and the magnitude of the exposure of human beings to such lead content; and

"(2) the effects of the proposed allowable lead content level for the product category and the magnitude of the exposure of the environment to such proposed allowable lead content level for the product category.

"(d) REVIEW OF INVENTORIED PRODUCTS.—(1) Not later than 18 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall review the products identified in the compilation of inventory information described in section 403(b), and identify the percentages of lead used in such products.

"(2) Upon completion of the review under paragraph (1), if the Administrator determines that a reduction in the percentage of the allowable lead content for a product category is necessary to protect human health or the environment, or that a comparable substitute product for a product category is available at the time of completion of the review, the Administrator shall promulgate a regulation to reduce the percentage of the allowable lead content for such category, or to prohibit any lead content in the product category.

"(e) CANS FOR FOOD.—(1) Beginning on the date that is 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, no person may manufacture or import any can containing food for human consumption (or intended for such use) containing solder that has a lead content greater than 0.1 percent by dry weight.

"(2) Beginning on the date that is 18 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, no person may distribute in commerce any can containing food for human consumption (or intended for such use) containing solder that has a lead content greater than 0.1 percent by dry weight.

"SEC. 403. INVENTORY OF LEAD-CONTAINING PRODUCTS; EMISSIONS REPORTING REQUIREMENTS.

"(a) INVENTORY OF LEAD-CONTAINING PRODUCTS.—(1) Not later than 12 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, each person who manufactures, processes, or imports any product that contains more than 0.1 percent lead by dry weight shall notify the Administrator of such manufacture, processing, or importing. Such notification shall be in writing and shall specify the following inventory information:

"(A) the type of product manufactured, processed, or imported;

"(B) the quantity of such product manufactured, processed, or imported;

"(C) the amount of lead used in the manufacturing or processing of the product, or the amount of lead contained in the imported product; and

"(D) such other information as the Administrator may, by regulation, require.

"(2) Not later than 3 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall publish in the Federal Register notice of the requirements under paragraph (1) of this subsection and other related information that the Administrator determines to be appropriate.

"(b) COMPILIATION OF INVENTORY INFORMATION.—Not than later 15 months after the date of enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall publish a compilation of the inventory information reported under paragraph (1) of subsection (a). In compiling such information the Administrator may, to the extent consistent with the purpose of this section, in lieu of listing a product individually, list a category of products in which such product is included. The Administrator shall list such inventory information in such a manner as to ensure the protection of classified information and trade secrets and privileged or confidential commercial or financial information described in paragraphs (1) and (4), respectively, of section 552(b) of title 5, United States Code.

"(c) LEAD EMISSION REPORTS FROM CERTAIN FACILITIES.—(1) Beginning on the date that is 12 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, and annually thereafter, the owner or operator of any—

"(A) primary lead smelter or primary lead refiner (as defined by the Administrator);

"(B) secondary lead smelter (as defined in section 6(i)(2)) or secondary lead refiner; and

"(C) battery manufacturing operation (as defined by the Administrator),

shall report to the Administrator concerning emissions of lead to air, water, and land from each such facility.

"(2) The reports described in paragraph (1) shall—

"(A) be in such form as the Administrator shall require by regulation; and

"(B) be based on monitoring of point-source emissions and estimates of fugitive emissions.

"(3) Each smelter, refinery, or facility described in subparagraphs (A) through (C) shall, not later than 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, be equipped with emissions monitoring devices that meet requirements that the Administrator shall require by regulation.

"(4) Not more than 6 months after receiving the reports required under paragraph (1), the Administrator shall publish the emissions data in such reports.

"(5) Not later than 3 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall publish in the Federal Register notice of the requirements of this subsection and other related information that the Administrator determines to be appropriate.

"(d) DEFINITIONS.—For the purposes of this section, the terms 'manufacture' and 'process' mean manufacture or process for commercial purposes (as defined in section 8(f)).

"SEC. 404 PRODUCT LABELING.

"(a) IN GENERAL.—(1) Not later than 12 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, each person who manufactures or imports any product that contains more than 0.1 percent lead by dry weight shall indicate on the product label the percentage of lead content in the product.

"(2) Not later than 3 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall publish in the Federal Register notice of the requirements under paragraph (1) and other related information that the Administrator determines to be appropriate.

"(b) LABELING REGULATIONS.—Not later than 9 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall promulgate regulations with respect to the wording, type size, and placement of the labels described in subsection (a).

"(c) INTERIM REQUIREMENTS.—If the promulgation of a final regulation with respect to a product described in subsection (a) is delayed beyond the date specified under subsection (b), then until such time as a final regulation is promulgated, a label shall be affixed to the product and shall contain the words 'Warning; Contains Lead' in letters the same size as the largest letter otherwise affixed to the label or packaging of the product.

"SEC. 405. MANUFACTURING OR PROCESSING NOTICES FOR NEW LEAD-CONTAINING PRODUCTS.

"(a) IN GENERAL.—(1) Beginning on the date that is 30 days after the date of the publication of the compilation of inventory information described in section 403(b), no person may manufacture or process a product that has a lead content of greater than 0.1 percent unless such product is described in the compilation of inventory information, or unless—

"(A) such person submits to the Administrator, not later than 120 days before commencing such manufacture or processing, a notice in the same manner as described in the requirements for a notice under section 5(d);

"(B) such person complies with any applicable requirements for the submission of test data described in section 5(b); and

"(C) the Administrator has determined that—

"(i) the manufacture, processing, use, and disposal of the product is not likely to contribute to the dispersion of lead into the environment; and

"(ii) no comparable product is available in commerce.

"(2) Not later than 15 days after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall publish in the Federal Register notice of the requirements of this subsection and other related information that the Administrator determines to be appropriate.

"(b) EFFECT OF FAILURE OF THE ADMINISTRATOR TO ISSUE A DETERMINATION.—The failure of the Administrator to issue a determination under paragraph (3) of subsection (a) within 60 days after receiving of the notice described in paragraph (1) of such subsection shall be deemed a denial of such a determination.

"SEC. 406. RECYCLING OF LEAD-ACID BATTERIES.

"(a) PROHIBITIONS.—(1) Beginning on the date that is 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the placement of lead-acid batteries in any landfill and the incineration of such batteries are prohibited.

"(2) No person shall discard or otherwise dispose of a lead-acid battery in mixed municipal solid waste or discard or otherwise dispose any such battery in a manner other than by recycling in accordance with this subsection.

"(b) GENERAL DISCARD OR DISPOSAL REQUIREMENTS.—Beginning on the date that is 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, a person (except a person described in subsection (c), (d), or (e)) shall discard or other-

wise dispose of used lead-acid batteries only by delivery to one of the following:

"(1) A person who sells lead-acid batteries at retail or wholesale.

"(2) A secondary lead smelter permitted by a State or the Administrator under the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.).

"(3) A collection or recycling facility permitted by a State or by the Administrator.

"(c) DISCARD OR DISPOSAL REQUIREMENTS FOR RETAILERS.— Beginning on the date that is 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, a person who sells lead-acid batteries at retail shall discard or otherwise dispose of used lead-acid batteries only by delivery to one of the following:

"(1) A person who sells lead-acid batteries at wholesale.

"(2) A secondary lead smelter permitted by a State or the Administrator under the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.).

"(3) A battery manufacturer.

"(4) A collection or recycling facility permitted by a State or by the Administrator.

"(d) DISCARD OR DISPOSAL REQUIREMENTS FOR WHOLESALERS.—Beginning on the date that is 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, a person who sells lead-acid batteries at wholesale shall discard or otherwise dispose of used lead-acid batteries only by delivery to one of the following:

"(1) A secondary lead smelter permitted by a State or the Administrator under the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.).

"(2) A battery manufacturer.

"(3) A collection or recycling facility permitted by a State or by the Administrator.

"(e) DISCARD OR DISPOSAL REQUIREMENTS FOR MANUFACTURERS.—Beginning on the date that is 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, a person who manufactures lead-acid batteries shall discard or otherwise dispose of used lead-acid batteries only by delivery to one of the following:

"(1) A secondary lead smelter permitted by a State or the Administrator under the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.).

"(2) A collection or recycling facility permitted by a State or by the Administrator.

"(f) COLLECTION REQUIREMENTS FOR RETAILERS.—Beginning on the date that is 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, a person who sells, or offers for sale, lead-acid batteries at retail shall accept from customers, if offered by customers, used lead-acid batteries of the same type as the batteries sold and in a quantity approximately equal to the number of batteries sold. The used lead-acid batteries shall be accepted at the place where lead-acid batteries are offered for sale.

"(g) COLLECTION REQUIREMENTS FOR WHOLESALERS.—(1) Beginning on the date that is 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, a person who sells, or offers for sale, lead-acid batteries at wholesale (hereinafter referred to as a 'wholesaler') shall accept from customers, if offered by customers, used lead-acid batteries of the same type as the batteries sold.

"(2) In the case of a wholesaler who sells, or offers for sale, lead-acid batteries to a retailer, such wholesaler shall also provide for removing used lead-acid batteries at the place of business of the retailer. Such removal shall occur not later than 90 days after the retailer notifies the wholesaler of the existence of such used lead-acid batteries for such removal.

"(h) COLLECTION REQUIREMENTS FOR MANUFACTURERS.—Beginning on the date that is 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, a person who manufactures lead-acid batteries shall accept from customers, if offered by customers, used lead-acid batteries of the same type as the batteries sold.

"(i) WRITTEN NOTICE REQUIREMENTS FOR RETAILERS.—(1) Beginning on the date that is 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, a person who sells, or offers for sale, lead acid-batteries at retail shall post written notice that—

"(A) is clearly visible in a public area of the establishment in which such lead-acid batteries are sold or offered for sale;

"(B) is at least 8½ inches by 11 inches in size; and

"(C) contains the following language:

"(i) 'It is illegal to throw away a motor vehicle battery or other lead-acid battery.'.

"(ii) 'Recycle your used batteries.'.

"(iii) 'Federal law requires battery retailers to accept used lead-acid batteries for recycling in exchange for new batteries purchased.'.

"(2) Any person who, after receiving a warning by the Administrator, fails to post a notice required under paragraph (1) shall be subject to a civil penalty of not more than $1,000 per day.

"(j) LEAD-ACID BATTERY LABELING REQUIREMENTS.—(1) Beginning on the date that is 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, it shall be unlawful to sell a lead-acid battery that does not bear a permanent label that states the following:

"(A) 'It is illegal to throw away a motor vehicle battery or other lead-acid battery.'.

"(B) 'Federal law requires battery retailers to accept used lead-acid batteries for recycling in exchange for new batteries purchased.'.

"(2) Not later than 3 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall publish in the Federal Register notice of the requirements of this section and other related information that the Administrator determines to be appropriate.

"(k) PUBLICATION OF NOTICE.—Not later than 3 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall publish in the Federal Register notice of the requirements of this section and other related information that the Administrator determines to be appropriate.

"(l) DEPOSITS.—Nothing in this Act shall be construed to prohibit a government of a State or a political subdivision of a State from requiring the payment of a deposit upon the sale of a lead-acid battery.

"(m) INSPECTION.—The Administrator may inspect any establishment subject to this section and may issue warnings and citations to any person who fails to comply with any provision of this section.

"(n) DEFINITIONS.—For the purposes of this section:

"(1) The term 'lead-acid battery' means a battery that—

"(A) consists of lead and sulfuric acid;

"(B) is used as a power source; and

"(C) has a capacity of 6 volts or more.

"(2) The term 'secondary lead smelter' means a facility which produces metallic lead from various forms of lead scrip, including used lead-acid batteries. Such a facility also may produce plastic chips that are sent for reprocessing.

"SEC. 407. PROHIBITED ACTS, PENALTIES.

"(a) IN GENERAL.—It shall be unlawful for any person to fail or refuse to comply with a provision of sections 402 through 406.

"(b) CIVIL PENALTIES.—(1) A person who violates a provision of section or shall be liable to the United States for a civil penalty in an amount not to exceed $1,000 for each such violation. Each instance of violation shall constitute a separate violation, and each day a violation continues shall, for the purposes of this section, constitute a separate violation.

"(2) A civil penalty for a violation of this section shall be assessed, and an order assessing a civil penalty shall be issued according to the procedure described in section 16(a)(2) of this Act. A person assessed such a penalty may file a petition for judicial review in accordance with the procedures described in section 16(a)(3). If a person fails to pay an assessment of a civil penalty the Attorney General may recover the amount assessed under the procedures described in section 16(a)(4).

"(c) CRIMINAL PENALTIES.—Any person who knowingly or wilfully violates any provision of this section, shall, in addition to or in lieu of any civil penalty which may be imposed under subsection (b) for such violation, be subject, upon conviction, to a fine of not more than $25,000 for each such violation, or to imprisonment for not more than one year, or both.

"SEC. 408. LEAD ABATEMENT AND MEASUREMENT.

"(a) PROGRAM TO PROMOTE LEAD EXPOSURE ABATEMENT.—The Administrator, in cooperation with the Secretary of Housing and Urban Development, the Secretary of Commerce, and the Secretary of Health and Human Services, shall undertake a comprehensive program to promote safe, effective, and affordable monitoring, detection and abatement of lead-based paint and other lead exposure hazards. Such program shall, at a minimum, include the components described in subsections (b) through (k) of this section.

"(b) STANDARDS FOR ENVIRONMENTAL SAMPLING LABORATORIES.—In consultation with the Secretary of Commerce (acting through the Director of the National Institute of Standards and Technology), the Administrator shall establish protocols, criteria and minimum performance standards for laboratory analysis of lead in paint films, soil and dust. Not more than 18 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall establish certification programs to assure the quality and consistency of laboratory analyses, unless the Administrator determines, by the date specified in this subsection, that effective voluntary accreditation programs are in place and operating on a nationwide basis at the time of such determination.

"(c) STANDARDS FOR BLOOD ANALYSIS LABORATORIES.—(1) In consultation with the Secretary of Health and Human Services, acting through the Director of the Centers for Disease Control, the Administrator shall establish protocols, criteria and minimum performance standards for laboratory analysis of lead in blood. Not later than 18 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall establish certification programs to assure the quality and con-

sistency of laboratory analyses, unless the Administrator determines, by the date specified in this subsection, that effective voluntary accreditation programs are in place and operating on a nationwide basis at the time of such determination.

"(2) An accreditation or certification program under this subsection shall include provisions for reporting results of blood-lead analyses to the Administrator and to the Director of the Centers for Disease Control on an ongoing basis, in such form as the Administrator shall require by regulation.

"(d) CONTRACTOR TRAINING AND CERTIFICATION.—(1) Not later than 12 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator in consultation with the Secretary of Housing and Urban Development and the Secretary of Health and Human Services (acting through the Director of National Institute for Occupational Safety and Health), shall develop minimum core curricula for technical training courses for lead-based paint abatement workers, supervisors, designers, inspectors and building owners.

"(2) The courses described in paragraph (1) shall address generic factors associated with lead testing and abatement in various types of housing units, including public and private single and multi-family, housing units (as determined by the Administrator, in consultation with the individuals described in paragraph (1)).

"(3) The Administrator shall assure the quality and comprehensiveness, and effectiveness of the training courses described in paragraph (2) by evaluating training programs, and shall encourage State certification programs, or the development of national proficiency tests.

"(4) Not later than April 1, 1992, the Administrator and the Secretary of Housing and Urban Development shall jointly report to the Congress their assessment of abatement training capacity and the quality of ongoing abatement work.

"(e) DETECTION TECHNOLOGIES.—(1) In consultation with the Secretary of Housing and Urban Development and the Secretary of Commerce (acting through the Director of the National Institute of Standards and Technology), the Administrator shall evaluate emerging products and emerging techniques (as defined by the Administrator) for detecting lead in paint films and dust, including x-ray fluorescence devices, on-site chemical spot testers, and laboratory methods.

"(2) In consultation with the Secretary of Housing and Urban Development and the Secretary of Commerce (acting through the Director of the National Institute of Standards and Technology), the Administrator shall develop criteria, standards, and testing protocol to assure reliable, accurate and effective detection technologies.

"(f) EVALUATION OF ABATEMENT AND IN-PLACE MANAGEMENT TECHNIQUES TO REDUCE LEAD DUST LEVELS.—(1) Not later than 36 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator, in consultation with the Secretary of the Department of Housing and Urban Development, shall submit a report to the Congress concerning the short-term and long-term efficacy and effectiveness of various abatement and in-place management techniques in reducing lead dust levels. The assessment of such in-place management techniques shall be based on resultant and subsequent levels of lead dust.

"(2) The report described in paragraph (1) shall review the cost effectiveness and reasonableness of State standards for post-abatement lead dust levels in effect immediately preceding the date of the issuance of such report.

"(g) EVALUATION OF EMERGING ABATEMENT TECHNOLOGIES.—(1) In consultation with the Secretary of Housing and Urban Development and the Secretary of Commerce (acting through the Director of the National Institute of Standards and Technology), the Administrator shall establish a program for the evaluation of existing and new products and procedures for encapsulating or removing lead-based paint.

"(2) The products and procedures described in paragraph (1) shall be evaluated for safety, effectiveness, durability, and other relevant performance characteristics (as determined by the Administrator, in consultation with the individuals described in paragraph (1)) and based on written performance criteria and standards that the Administrator shall develop (in consultation with the individuals described in paragraph (1)).

"(3) Not later than 18 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall publish in the Federal Register a list of the products and procedures that the Administrator has determined to meet the performance standards and criteria developed by the Administrator.

"(4) The Administrator shall update and publish the list described in paragraph (3)—

"(A) on the date that is 30 months after the date of the enactment of the Lead Exposure Reduction Act of 1990;

"(B) on the date that is 42 months after the date of the enactment of such Act; and

"(C) at any time subsequent to the date under subparagraph (B), as the Administrator determines to be appropriate.

"(h) CLASSIFICATION OF ABATEMENT WASTES.—(1) Not later than 6 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall issue guidelines for the management of lead-based paint abatement debris. Such guidelines shall describe steps for segregating wastes from lead-based paint abatement projects in order to minimize the volume of material qualifying as hazardous solid waste.

"(2) Beginning on the date that is 7 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, if the requirements of paragraph (1) have not been met, no appropriated monies may be expended by the Environmental Protection Agency for the purpose of funding travel for employees to engage in official business of the Environmental Protection Agency outside of the United States and the Territories of the United States. The prohibition under this paragraph shall terminate on the date that the requirements of paragraph (1) are met.

"(i) EXPOSURE STUDY.—(1) In consultation with the Secretary of Health and Human Services (acting through the Director of the Centers for Disease Control), the Administrator shall undertake a long-term research project to study the sources of lead exposure in children who have elevated blood lead levels (or other indicators of elevated lead body burden), as defined by the Centers for Disease Control.

"(2) The research project described in paragraph (1) shall examine the relative contributions to lead body burden from the following:

"(A) Drinking water.

"(B) Food.

"(C) Lead-based paint and dust from lead-based paint.

"(D) Exterior sources such as ambient air and lead in soil.

"(3) Not later than 18 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, and every 12 months thereafter, the Administrator shall submit a report to the Congress concerning the research project described in paragraph (1).

"(j) PUBLIC EDUCATION.—(1) The Administrator, in consultation with the Secretary of Housing and Urban Development and the Secretary of Health and Human Services, shall sponsor public education and outreach activities to increase public awareness of—

"(A) the scope and severity of lead poisoning from household sources;

"(B) the need for careful, quality, abatement and management actions.

"(2) The activities described in paragraph (1) shall be designed to provide educational services and information to—

"(A) health professionals;

"(B) other groups that the Administrator, in consultation with the individuals described in paragraph (1) determines to be appropriate; and

"(C) the general public.

"(k) SOIL LEAD GUIDELINES.—Not later than 18 months after the date of the enactment of the Lead Exposure Reduction Act of 1990, the Administrator shall issue guidelines concerning the action levels for lead in soil, at which appropriate action (as required by regulations that the Administrator shall promulgate) must be taken.

"SEC. 409. ESTABLISHMENT OF NATIONAL CENTERS FOR THE PREVENTION OF LEAD POISONING.

"(a) ESTABLISHMENT AND RESPONSIBILITIES.—(1) There is established a grant program to establish one or more Centers for the Prevention of Lead Poisoning (hereinafter referred to as a "Center".

"(2) The Administrator shall award grants to one or more institutions of higher education in the United States for the purpose of establishing and funding a Center. Each such Center shall assist the Administrator in carrying out the functions of this title.

"(b) APPLICATIONS.—The head of any institution of higher education in the United States may submit to the Administrator an application to be designated as a site of a Center. The application shall be in such form and containing such information as the Administrator may require by regulation.

"(c) SELECTION CRITERIA.—The Administrator shall select grant recipients from the applicants in accordance with the following criteria:

"(1) The capability of the applicant institution to provide leadership in making national contributions to the prevention of lead poisoning.

"(2) The demonstrated capacity of applicant institution to conduct relevant research.

"(3) The appropriateness of the projects proposed to be carried out by the applicant institution.

"(4) The assurance of the applicant institution of a commitment of at least $100,000 in budgeted institutional funds to relevant research upon receipt of such grant.

"(5) The presence at the applicant institution of an interdisciplinary staff with demonstrated expertise in lead poisoning prevention.

"(6) The demonstrated ability of the applicant institution to disseminate results of relevant research and educational programs

through an interdisciplinary continuing education program.

"(d) FEDERAL SHARE.—The Federal share of a grant under this section shall not exceed 80 percent of the costs of establishing and operating a Center and related research activities carried out by the Center.".

(b) TECHNICAL AMENDMENTS.—The Toxic Substances Control Act (15 U.S.C. 2601 et seq.) is amended by adding at the end of the table of contents in section 1 the following:

"TITLE IV—LEAD EXPOSURE REDUCTION

"Sec. 401. Findings and policy.
"Sec. 402. Restrictions on continuing uses of certain lead-containing products.
"Sec. 403. Inventory of lead-containing products.
"Sec. 404. Product liability.
"Sec. 405. Manufacturing or processing notices for new lead-containing products.
"Sec. 406. Recycling of lead-acid batteries.
"Sec. 407. Prohibited acts; penalties.
"Sec. 408. Lead abatement and measurement.
"Sec. 409. Establishment of national centers for the prevention of lead poisoning.".

SEC. 3. REPORTING OF BLOOD-LEAD LEVELS; BLOOD LEAD LABORATORY REFERENCE PROJECT.

(a) REPORTING OF BLOOD-LEAD LEVELS.—(1) The Secretary of Health and Human Services (hereafter in this section referred to as the "Secretary"), acting through the Director of the Centers for Disease Control (hereafter in this section referred to as the "Director"), shall encourage State public health officials to report blood-lead measurements to the Director.

(2) Not later than 18 months after the date of the enactment of this Act, the Secretary shall submit a report to the Congress that—

(A) describes the status of blood-lead reporting; and

(B) evaluates the feasibility and desirability of instituting a national requirement for mandatory preschool blood-lead screening.

(3) Not later than 24 months after the date of the enactment of this Act, the Secretary, in consultation with the Administrator of the Environmental Protection Agency, shall submit a report to the Congress that assesses the effectiveness of the blood-lead reporting provisions under regulations establishing the accreditation and certification programs for blood analysis laboratories described in section 408(c) of the Toxic Substances Control Act, as added by this Act.

(c) ESTABLISHMENT OF BLOOD-LEAD LABORATORY REFERENCE PROJECT.—Subpart 2 of part C of title IV the Public Health Service Act (42 U.S.C. 258b et seq.), is amended by adding at the end thereof the following new section:

"SEC. 424. BLOOD-LEAD LABORATORY REFERENCE PROJECT.

"The Secretary of Health and Human Services acting through the Director of the Centers for Disease Control, shall establish a blood-lead laboratory reference project to assist States and local governments to establish, maintain, improve, and assure the quality of laboratory measurements performed for childhood lead poisoning prevention programs. Such project shall include—

"(1) collaboration with manufacturers of analytical instruments to develop blood lead measurement devices that are accurate, portable, precise, rugged, reliable, safe, and of reasonable cost;

"(2) the development of improved techniques for safe, contamination-free blood sample collection; and

"(3) assistance to State and local laboratories in the form of reference materials, equipment, supplies, training, consultation, and technology development for quality assurance, capacity expansion, and technology transfer.".

SEC. 4. REVISED NATIONAL AMBIENT AIR QUALITY STANDARD FOR LEAD.

Section 109 of the Clean Air Act (42 U.S.C. 7409), is amended by adding at the end thereof the following new subsection:

"(e) REVISED NATIONAL AMBIENT AIR QUALITY STANDARD FOR LEAD.—If the Administrator does not promulgate a revised national ambient air quality standard for lead pursuant to subsection (d) of this section on or before the date that is 12 months after the date of enactment of the Lead Exposure Reduction Act of 1990, the revised national ambient air quality standard for lead shall be 0.5 micrograms per cubic meter over a quarterly averaging period. Such standard may subsequently be revised by the Administrator by regulation.".

SEC. 5. REVISED NATIONAL PRIMARY DRINKING WATER REGULATION FOR LEAD.

Section 1412 of the Safe Drinking Water Act, (42 U.S.C. 300g-1) is amended by adding at the end thereof the following new subsection:

"(f) REVISED NATIONAL PRIMARY DRINKING WATER REGULATION FOR LEAD.— If, on or before the date that is 12 months after the date of the promulgation of the Lead Exposure Reduction Act of 1990, the Administrator does not promulgate under this section a revised national primary drinking water regulation for lead that includes a maximum contaminant levels measured at the end-user's tap, a revised national primary drinking water regulation for lead shall be promulgated to—

"(1) include a maximum contaminant level of 5 micrograms per liter measured at the end-user's tap; and

"(2) require quarterly monitoring of lead at end-users' taps pursuant to guidelines issued by the Administrator. Such standard may subsequently be revised by the Administrator by regulation.".

SEC. 6. UPDATE OF 1988 REPORT TO CONGRESS ON CHILDHOOD LEAD POISONING.

(a) IN GENERAL.—Not later than 12 months after the date of the enactment of this Act, and every 24 month thereafter, the Administrator of the Agency for Toxic Substances and Disease Registry shall submit to Congress a report updating the report submitted pursuant to subsection (f)(1) of section 118 of the Superfund Amendments and Reauthorization Act of 1986. Such updated report shall include, at a minimum, revised estimates of the prevalence of elevated lead levels among children in the population of the United States.

(b) FUNDING.—The costs of preparing and submitting such updates shall be borne by the Hazardous Substance Superfund established under subchapter A of chapter 98 of the Internal Revenue Code of 1986.

SEC. 7. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out the purposes of this Act—

(1) $25,000,000 for fiscal year 1991;
(2) $24,000,000 for fiscal year 1992;
(3) $24,000,000 for fiscal year 1993, and
(4) $22,000,000 for fiscal year 1994.

[From the Reno Gazette-Journal, May 15, 1990]

FEDERAL LIMITS ON USE OF LEAD LONG OVERDUE

With compelling evidence of the health threat posed by lead in recent years—especially to children—legislation proposed by Sen. Harry Reid of Nevada and two colleagues is certainly welcome.

The legislation would ban the use of lead in many commonly used products, such as paint and plumbing fixtures and even gasoline. It would also mandate that lead batteries be recycled and would require labeling for all products containing lead. Stricter federal standards for the use of lead would be imposed.

Health officials estimate that more than 4 million U.S. children are suffering from the subtle but debilitating effects of lead poisoning. This is known to cause brain damage, lower intelligence scores and cause comas, convulsions and even death among children.

Legislation such as the bill proposed by key members of the Senate Environment Subcommittee on Toxic Substances is long overdue.

Mr. LIEBERMAN. Mr. President, the legislation being introduced today by Senator REID, Senator BRADLEY, Senator MOYNIHAN, and myself is designed to get as much lead as possible out of paint, solder, plumbing, construction materials, packaging, and pesticides. By doing this, we can get the lead out of the ground, air, water, and we can get the lead out of the bodies of our children.

In addition to getting the lead out, this legislation is designed to get the Government more involved in fighting the national lead poisoning crisis. Our bill requires that the Environmental Protection Agency place someone in the administrator's office in charge of all lead-related activities. This individual will ensure that the EPA has a comprehensive, consistent lead program, will oversee efforts to keep new lead out of consumer products, and research ways to get old lead out of buildings and other places where it threatens our children.

In a hearing held by the Toxic Substances, Environmental Oversight, Research and Development Subcommittee of the Environment and Public Works Committee, chaired by Senator HARRY REID, we learned that lead poisoning is the most common environmental disease afflicting the children of America today. And it is totally preventable. Lead poisoning is an insidious disease, slow acting, invisible, and tragic in its consequences. We cannot look at some of the serious problems affecting our society today—high dropout rates, reduced educational preformance in our schools, and increased drug abuse—without looking at lead poisoning as one of the causes of these societal ills.

Lead gets into the blood, bones, and minds of young people and it stays there for life. The more lead that gets

into the body, the lower the quality of that life. Our Government has failed to act quickly enough, or effectively enough, to counter the threat of lead poisoning. The legislation we are introducing today seeks to get Government moving again, actively working to reduce the amount of lead we put into the environment, and working on ways to remove the lead that is already in our environment.

The bill presents new solutions to an old problem by limiting new uses of lead to those cases where there is no comparable product made without lead, reducing the new lead introduced into our environment, and developing new technologies for testing and abatement. I am proud to be associated with Senator REID, Senator BRADLEY, and Senator MOYNIHAN in working on putting these solutions into law.

---

By Mr. DECONCINI (for himself, Mr. KENNEDY, Mr. HARKIN, Mr. METZENBAUM, Mr. KOHL, and Mr. SIMON):

S. 2639. A bill to enhance the ability of law enforcement officers to combat violent crime in America by providing criminal and civil enforcement of standards established by the National Institute of Justice for body armor; to the Committee on the Judiciary.

POLICE PROTECTION ACT

Mr. DECONCINI. Mr. President, the statistics speak for themselves. Violent and drug-related crimes have soared 30 percent in the last decade. Every 20 seconds a violent crime is committed in America. Our children are scared to play in neighborhood streets.

Police officers are the blue line of courage that stands between us and violence. As President Bush says, our police officers are "the foot soldiers in the battle against lawlessness."

According to FBI figures, police officers are 5.4 times more likely to suffer injuries as a result of criminal behavior than the average citizen. Every day police officers put their lives on the line for us.

This week is National Police Officers' Week. We are taking the time to recognize the fine service these courageous individuals provide for all Americans. The least we can do in return is to provide them with the best protection.

It is for this reason that I rise today with my colleagues, Senator KENNEDY, as well as Senators HARKIN, METZENBAUM, and KOHL to introduce the Police Protection Act of 1990. This bill has received endorsements from several of the leading police organizations, including the International Brotherhood of Police Officers, the Fraternal Order of Police, and the National Association of Police Organizations. They are all concerned about the lack of Federal regulation in the protection of our law enforcement.

The bill will establish Federal regulations for the sale of body armor to the general public, and most importantly, to police departments and other law enforcement agencies. Through this legislation, police officers and their departments will be able to purchase protective vests with the assurance that the product has been tested and approved by a Government agency. No longer will police departments and officers purchase body armor without certification of Government testing.

Presently, no enforceable Federal regulations exist for the sale of body armor. I say enforceable, Mr. President, because the National Institute of Justice does issue standards for body armor performance through its technology assessment program. However, NIJ's standards are voluntary; thus manufacturers are not required to comply with NIJ's standards.

Over the years, the selection of protective vests has become increasingly complex. With the escalation of firearm violence in this country, police officers are facing greater danger and increased chances of a lethal gun attack. As the protection requirements of police officers rise, so do the number and variety of models and designs of body armor. These developments have necessitated changes in the NIJ body armor standard. The most current standard, which is commonly referred to as the .03 standard, was issued in April 1987.

In the past, NIJ and the body armor manufacturers have agreed upon the voluntary standards for protective vests. Indeed, the body armor manufacturers, through their association, the Personal Protective Armor Association [PPAA], unanimously approved NIJ's .03 standard when it was initially issued 3 years ago. It was then discovered that almost two-thirds of the body armor tested by NIJ failed to meet the .03 standard. At that point, PPAA turned around and announced an industry-devised standard. They decided they wanted to regulate themselves.

This action by the body armor industry resulted in the existence of two different standards for determining the adequacy and protective capability of body armor. As I have said, with the various levels of ballistic protection that are offered, choosing the proper jacket can be a complex and confusing choice for an officer or department. You can imagine what purchasing agents for police departments are going through having to decide between the two standards. This cannot compare to the confusion of the individual beat cop, who is searching for the jacket that may save his life.

Mr. President, I think that the body armor industry was wrong in setting its own performance standard for this lifesaving product. I hope that industry will come forward and work with us to pass this needed legislation. Law enforcement needs its assistance. We cannot allow the confusion they have created to continue. This bill will establish one safety standard. It will thereby restore the confidence of the law enforcement community. It would assure them that the lifesaving device they are buying will do just that: save their lives.

The Police Protection Act of 1990 would give NIJ the authority to set performance standards for the sale of protective vests as well as the power to enforce those standards. The safety standards for body armor would be expressed in terms of performance standards. The bill also directs NIJ to establish requirements for the labeling of the vests regarding the level of ballistic protection. Civil penalties can be sought for the knowing violation of noncompliance; if violations continue after notification of noncompliance from NIJ, then criminal penalties are applicable.

The legislation mandates the Government Accounting Office to conduct a study of any standards for body armor that have been developed in the past and gives the GAO 6 months to report back to Congress and NIJ. NIJ will then be required to review the study to determine whether changes should be made in the standards. The bill sets NIJ's present .03 standard as the interim standard until the GAO reports back its findings.

Mr. President, Government regulation is not always the answer to a problem. There are so many areas in which Government intervention is unnecessary and counterproductive. But here we are talking about a lifesaving product; there is no room for error or confusion. This is a situation where enforceable Federal guidelines are necessary. It is essential that we ensure that our officers are provided the safest and most wearable body armor that technology can provide. The continued existence of alternative standards for body armor is detrimental to the safety of law enforcement. We can no longer afford to place police officers' lives needlessly at risk.

I want to thank Karen Robb, Dennis Burke, and members of the Judiciary staff who have helped us in this legislation.

Mr. President, I ask unanimous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2639

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Police Protection Act of 1990".

SEC. 2. FINDINGS.

The Congress finds that—

(1) violence in this country continues to escalate,

(2) law enforcement officers put their lives on the line every day to protect the public from violent crime,

(3) law enforcement officers should have effective body armor which protects them from firearm violence,

(4) the complexities of body armor and the diverse nature and abilities of law enforcement officials to purchase and test it result in unnecessary risk, and

(5) Congress has a responsibility to ensure that our Nation's law enforcement officers have available to them the best protection that current technology allows.

SEC. 3. NATIONAL INSTITUTE OF JUSTICE ISSUANCE OF STANDARDS.

Part B of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3721 et seq.) is amended by adding at the end the following:

BODY ARMOR SAFETY STANDARDS

"SEC. 204. (a) STANDARDS AND TEST PROTOCOLS.—

"(1) IN GENERAL.—The National Institute of Justice shall by regulation establish performance standards and test protocols—

"(A) for the capability of body armor to withstand bullets fired from firearms and for other matters relating to the effectiveness of body armor to protect law enforcement officers, and

"(B) for labels to be affixed by body armor manufacturers to armor which is manufactured in compliance with the standards described in paragraph (1).

"(2) TYPES OF STANDARDS.—A performance standard established under paragraph (1)(A) shall consist of the following types of requirements—

"(A) standards expressed in terms of performance requirements, and

"(B) requirements that vests be labeled with the noted level of ballistic protection and other appropriate warnings and instructions, including the manufacturing date.

"(b) REVIEW.—The Director shall review the study of standards and test protocols by the General Accounting Office under subsection (j) in determining appropriate standards and test protocols.

"(c) REGULATIONS AND PROCEDURES.—The Director is authorized to establish such regulations and procedures as may be necessary to carry out this section, including procedures for certification and, when necessary, decertification of body armor models.

"(d) SAFETY OF OFFICERS STANDARD.—In developing standards for body armor under subsection (a), the Director shall rely upon the needs of the criminal justice agencies and the safety and welfare of both male and female officers wearing body armor.

"(e) CONSULTATIONS.—In developing standards and test protocols under subsection (a) for body armor, the National Institute of Justice shall consult with—

"(1) the Law Enforcement Standards Laboratory of the National Institute of Standards and Technology of the Department of Commerce,

"(2) the Department of Defense,

"(3) the Federal Bureau of Investigation,

"(4) the Bureau of Alcohol, Tobacco, and Firearms,

"(5) the Secret Service and the United States Marshal's Service,

"(6) any other Federal agency which purchases body armor for its employees,

"(7) representatives from labor organizations representing law enforcement personel, law enforcement management organizations, and law enforcement fraternal and professional associations,

"(8) State and local law enforcement officers from police departments in the United States, and

"(9) representatives of the major manufacturers of body armor.

"(f) INTERIM STANDARD.—Beginning on the date of the enactment of this Act and ending on the date standards take effect under subsection (a), the National Institute of Justice standard number 0101.03 entitled 'Ballistic Resistance of Police Body Armor' shall apply to the manufacture, sale, or distribution in commerce of body armor.

"(g) TESTING.—The manufacturers of body armor subject to the performance standards established under subsection (a) shall submit to the National Institute of Justice on a periodic basis (established by the National Institute of Justice) representative samples of armor to be tested for compliance with such standards. The National Institute of Justice may take such other action as may be appropriate to determine if such armor is in compliance with such standards.

"(h) SANCTION.—

"(1) IN GENERAL.—No person may manufacture for sale, offer for sale, or distribute in commerce any body armor which is not in compliance with the interim standards in effect under subsection (f) or the standards established under subsection (a).

"(2) CIVIL PENALTIES.—Any person who knowingly violates paragraph (1) shall be subject to a civil penalty not to exceed $2,000 for each such violation.

"(3) CRIMINAL PENALTIES.—

"(A) PENALTY.—Any person who knowingly and willfully violates paragraph (1) after receiving notice of noncompliance from the National Institute of Justice shall be fined not more than $45,000 or be imprisoned not more than one year, or both.

"(B) OFFICER OR DIRECTOR OF A CORPORATION.—Any individual director, officer, or agent of a corporation who knowingly and willfully authorizes orders, or performs any of the acts or practices constituting in whole or in part a violation of paragraph (1) and who has knowledge of a notice of noncompliance received by the corporation from the National Institute of Justice shall be subject to penalty under this subsection without regard to any penalties to which that corporation may be subject under this subsection.

"(j) REPORT.—

"(1) STUDY.—The General Accounting Office shall compile, review, and compare any standards and test protocols for body armor issued by the National Institute of Justice, manufacturers, and any other standards and test protocols issued by law enforcement and military entities.

"(2) SUBMISSION OF STUDY.—Not later than 6 months after the date of enactment of this section, the General Accounting Office shall complete the study required in subsection (a) and submit the study to the National Institute of Justice and the Judiciary Committees of Congress.

"(k) DEFINITION OF BODY ARMOR.—For purposes of this section, the term 'body armor' means any product sold or offered for sale as personal protective body armor whether the product is to be worn alone or is sold as a complement to other products or garments.".

Mr. HARKIN. Mr. President, I join my colleagues from Arizona [Mr. DECONCINI], Massachusetts [Mr. KENNEDY], in introducing the Police Protection Act of 1990. I am proud to announce that a number of leading police organizations have already endorsed this bill. Included on the list are the International Brotherhood of Police Officers, the Fraternal Order of Police, and the National Association of Police Organizations.

The Police Protection Act would give the National Institute of Justice authority to set performance standards for the manufacture of protective vests as well as the power to enforce those standards.

The bill requires the Director of NIJ to produce law enforcement safety standards for body armor expressed in terms of performance standards. The bill also establishes civil penalties for knowing violations of noncompliance, and if violations continue, then criminal penalties can be applied.

To date, no Federal regulations exist for the manufacture of body armor for police departments or other law enforcement agencies. The National Institute of Justice has issued standards for body armor performance. However, those standards are voluntary and no Federal law exists for manufacturers to comply.

In the absence of a Federal standard, the vest industry has developed its own, significantly weaker, standard. Obviously, this makes purchasing high-quality vests even more difficult and confusing than ever before.

Our police deserve better than that. Police officers risk their lives every day making our streets safe, keeping drugs out of our schools and communities, and helping put criminals in jail.

I've learned first hand the problems and personal risks faced by Iowa's police officials. Last year, in Bettendorf, IA, I spent a day with the local police force. At one point, I accompanied officers who charged into the home of a suspected drug dealer—not knowing if the person on the other side of the door was pointing a loaded gun.

That day brought home to me the debt Iowans—indeed all Americans—owe the men and women who serve us in our local law enforcement agencies.

We owe it to our police officers to give them the tools they need to feel more secure while doing their job.

For this reason, I am sponsoring the Police Protection Act, which would establish the necessary minimum level of protection for all protective vests sold in this country, and would establish penalties for the knowing violation of noncompliance.

We can no longer permit the safety or effectiveness of protection vests to be compromised under the guise of an industry-devised standard.

Nor can we afford to place police officers' lives needlessly at risk.

I ask my colleagues to join us in sponsoring the Police Protection Act of 1990.

---

By Mr. DASCHLE (for himself, Mr. HEINZ, Mr. RIEGLE, Mr. PRYOR, Mr. DURENBERGER, and Mr. ROCKEFELLER):

S. 2640. A bill to amend title XVIII of the Social Security Act to prevent fraud and abuse and encourage competition in the sale of Medicare supplemental insurance; to the Committee on Finance.

MEDIGAP FRAUD AND ABUSE PREVENTION ACT

● Mr. DASCHLE. Mr. President, I rise today to introduce with Senators HEINZ, RIEGLE, PRYOR, DURENBERGER, and ROCKEFELLER the Medigap Fraud and Abuse Prevention Act of 1990, a companion measure to a bill that Congressmen WYDEN and DINGELL are introducing in the House of Representatives. In doing so, I would like to commend my colleagues in the House for their history of leadership on this issue. Our common goal in introducing this legislation is to rid the Medigap market of the fraud and abuse that has plagued this industry since the inception of the Medicare program.

I would also like to recognize Senator RIEGLE for the prominent role he played in devising a method for simplifying the Medigap market—arguably one of the most important aspects of addressing problems in this complicated and fragmented industry. Senator RIEGLE's leadership in this matter was essential to our efforts.

The performance of the Medigap industry is of interest to the majority of Medicare beneficiaries. About three-quarters of our Nation's senior citizens purchase supplemental insurance—commonly called Medigap—to fill in the gaps in Medicare. Medigap has grown into a $15 billion industry that provides coverage to senior citizens across the country. My State of South Dakota alone has over 50 Medigap plans from which seniors can choose.

The majority of insurance companies and their agents strive to provide high value insurance policies to their customers. However, a growing body of evidence suggests that millions of seniors every year are victimized by marketing and sales abuses from a minority of companies who take advantage of the fragmented and poorly regulated nature of this industry.

For example, Ruth Hotchkiss, an elderly woman from the town of Humboldt, SD, was pressured into buying 45 Medigap and life insurance policies over a 10-year period. She spent over half of her income on this coverage, even though she only needed one of each policy. And this example is not unique. Across the country seniors are buying overlapping policies that provide unnecessary coverage. At an average cost of about $800 per policy, with many plans costing as much as $1,200 per year, this is a serious concern for many senior citizens, especially those who live on fixed incomes.

Equally disturbing are the results of an AARP study revealing that 50 percent of low-income seniors who qualify for Medicaid purchase Medigap insurance, despite the fact that Medigap coverage duplicates benefits they are offered under Medicaid.

Though evidence of abuses in the marketing and sale of Medigap policies has existed for years, recent Medigap premium increases have focused attention on the need to explore ways to control spiraling costs and ensure that seniors are able to purchase high value policies that best suit their needs and resources. I believe the Federal Government has a special obligation to monitor the performance of this market, since the design of the Medicare program has created the need for this insurance.

State regulation of the Medigap industry is governed by guidelines set out in section 1882 of the Social Security Act, now referred to as the "Baucus amendments." Enactment of these amendments 10 years ago was greeted with relief and hope by both consumers and legislators. But a decade and dozens of investigations later, it is clear that this legislation is not enough to stem the abuses characterizing this market.

Studies of the Medigap industry reveal a pattern of high pressure marketing techniques, agents who sell unnecessary and duplicative policies, frivolous variation between policies, and a market characterized by confusion rather than clarity. For a product that is supposed to provide peace of mind, Medigap is clearly making too many seniors far too anxious.

The industry continues to assert that Medigap is the most highly regulated industry. They claim Congress and the media have "blown a fringe problem out of proportion." A recent edition of Consumer Reports, however, paints a very different picture. That report tells us that abuses abound and States are regulating this market with a velvet glove. Indeed, the cost of Medigap policies is projected to soar 20 to 30 percent this year, even as a third of the companies which sell that coverage stand accused of failing to meet minimum Federal pricing standards.

I believe it's time to take the velvet gloves off and crack down once and for all on the perpetrators of this fraud.

The bill I am introducing today strengthens and builds on the Baucus amendments by closing some of the gigantic loopholes that have prevented one single Federal prosecution of Medigap fraud and abuse in 10 years. The bill also provides new and stronger beneficiary protections, especially in the area of preventing the sale of duplicative policies, raises loss ratios and establishes a system for ensuring they are met, limits incentives for agents to "churn" customers, and sets criminal and civil penalties for violations of these new standards.

In sum, this is a comprehensive piece of legislation designed to attack the major problems plaguing this industry. The ultimate goal of this bill is to ensure that Medigap policies are of high value, that a meaningful range of choices is available, and that seniors have the information they need to buy the policy that best suits their needs and resources.

Congress can no longer sit back complacently while senior citizens are left vulnerable to the abuses of this industry. What better way to celebrate the 25th anniversary of the Medigap program, than with true reform of the Medigap market?

I hope my colleagues in the Senate will join me in cosponsoring this legislation to assure that Medigap provides the peace of mind for seniors that they need and deserve. I ask unanimous consent that the full text and summary of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2640

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Medigap Fraud and Abuse Prevention Act of 1990".

SEC. 2. SIMPLIFICATION OF POLICIES.

(a) IN GENERAL.—Section 1882 of the Social Security Act (42 U.S.C. 1395ss), as amended by section 203(a)(1) of the Medicare Catastrophic Coverage Repeal Act of 1989, is amended—

(1) in subsection (b)(1)(B), by striking "through (4)" and inserting "through (5)";

(2) in subsection (c)—

(A) by striking "and" at the end of paragraph (3),

(B) by striking the period at the end of paragraph (4) and inserting "; and", and

(C) by inserting after paragraph (4) the following new paragraph:

"(5) meets the requirements of subsection (o)."; and

(3) by adding at the end the following new subsections:

"(o) The requirements of this subsection are as follows:

"(1)(A) Each medicare supplemental policy shall provide for coverage of a group of benefits consistent with subsection (p)(1).

"(B) If the medicare supplemental policy provides for coverage of a group of benefits other than the core group of basic benefits described in subsection (p)(2)(B), the issuer of the policy must make available to the individual a medicare supplemental policy with only such core group of basic benefits.

"(C) The issuer of the policy has provided, before the sale of the policy, a summary information sheet which describes—

"(i) the benefits (including any optional benefits) under the policy and which specifies the amount of any premiums attributable to any such optional benefits, and

"(ii) the average ratio of benefits provided to premiums collected for the most recent 3-year period in which the policy is in effect (or, for a policy that has not been in effect for 3 years, the average ratio of benefits provided to premiums collected that is expected during the 3rd year of the policy).

Such summary information shall be on a standard form approved by the State (in consultation with the Secretary) consistent with the subsection (d)(3)(D).

"(2)(A) Each medicare supplemental policy shall be guaranteed renewable.

"(B) If the medicare supplemental policy is terminated by the group policyholder and is not replaced as provided under subparagraph (D), the issuer shall offer certificateholders an individual medicare supplemental policy which (at the option of the certificateholder)—

"(i) provides for continuation of the benefits contained in the group policy, or

"(ii) provides for such benefits as otherwise meets the requirements of this section.

"(C) If an individual is a certificateholder in a group medicare supplemental policy and the individual terminates membership in the group, the issuer shall—

"(i) offer the certificateholder the conversion opportunity described in subparagraph (B), or

"(ii) at the option of the group policyholder, offer the certificateholder continuation of coverage under the group policy.

"(D) If a group medicare supplemental policy is replaced by another group medicare supplemental policy purchased by the same policyholder, the succeeding issuer shall offer coverage to all persons covered under the old group policy on its date of termination. Coverage under the new group policy shall not result in any exclusion for preexisting conditions that would have been covered under the group policy being replaced.

"(3) Each medicare supplemental policy shall provide that benefits and premiums under the policy shall be suspended for any period in which the policyholder indicates that the policyholder was entitled to medical assistance under title XIX. If such suspension occurs and if the policyholder loses entitlement to such medical assistance, such policy shall be automatically reinstated as of the termination of such entitlement if the policyholder provides notice of loss of such entitlement within 90 days after the date of such loss.

"(p)(1)(A) If, within 9 months after the date of the enactment of this subsection, the National Association of Insurance Commissioners (in this subsection referred to as the 'Association') promulgates—

"(i) limitations on the benefits that may be offered under a medicare supplemental policy consistent with paragraphs (2) and (3) of this subsection,

"(ii) uniform language and format to be used with respect to such benefits, and

"(iii) transitional requirements consistent with paragraph (4),

(such limitations, language, format, and requirements referred to collectively in this subsection as 'NAIC simplification standards'), subsection (g)(2)(A) shall be applied in each State, effective for policies issued to policyholders on and after the date specified in subparagraph (C), as if the reference to the Model Regulation adopted on June 6, 1979, included a reference to the NAIC simplification standards. The Association shall report to the Committees on Ways and Means and Energy and Commerce of the House of Representatives and the Committee on Finance of the Senate, not later than 6 months after the date of the enactment of this subsection, on its progress in developing such standards and, not later than 9 months after such date, on its promulgation of such standards.

"(B) If the Association does not promulgate NAIC simplification standards within the 9-month period specified in subparagraph (A), the Secretary shall promulgate, not later than 9 months after the end of such period, limitations, language, format, and requirements described in clauses (i) through (iii) of such subparagraph (in this subsection referred to collectively as 'Federal simplification standards') and subsection (g)(2)(A) shall be applied in each State, effective for policies issued to policyholders on and after the date specified in subparagraph (C), as if the reference to the Model Regulation adopted on June 6, 1979, included a reference to the Federal simplification standards.

"(C)(i) Subject to clause (ii), the date specified in this subparagraph for a State is the date the State adopts the NAIC simplification standards or the Federal simplification standards or 1 year after the date the Association or the Secretary first adopts such standards, whichever is earlier.

"(ii) In the case of a State which the Secretary identifies, in consultation with the Association, as—

"(I) requiring State legislation (other than legislation appropriating funds) in order for medicare supplemental policies to meet the NAIC or Federal simplification standards, but

"(II) having a legislature which is not scheduled to meet in 1991 in a legislative session in which such legislation may be considered,

the date specified in this subparagraph is the first day of the first calendar quarter beginning after the close of the first legislative session of the State legislature that begins on or after January 1, 1991. For purposes of the previous sentence, in the case of a State that has a 2-year legislative session, each year of such session shall be deemed to be a separate regular session of the State legislature.

"(D) Notwithstanding any other provision of this section, no medicare supplemental policy may be sold or issued in a State unless—

"(i) the State's regulatory program under subsection (b)(1)(A) provides for the application of the NAIC simplification standards or the Federal simplification standards (as the case may be) by the date specified in subparagraph (C); or

"(ii) if the State's program does not provide for the application of such standards, the Panel has determined that the policy meets the applicable simplification standards by such date.

The Panel periodically shall review each State regulatory program's application of the NAIC or Federal simplification standards. Any person who issues or sells a medicare supplemental policy, after the effective date of the NAIC or Federal simplification standards with respect to the policy, in violation of this subparagraph is subject to a civil money penalty of not to exceed $25,000 for each such violation. The provisions of section 1128A (other than the first sentence of subsection (a) and other than subsection (b)) shall apply to a civil money penalty under the previous sentence in the same manner as such provisions apply to a penalty or proceeding under section 1128A(a).

"(E) In promulgating simplification standards under this paragraph, the Association or Secretary shall consult with a working group composed of representatives of issuers of medicare supplemental policies, consumer groups, medicare beneficiaries, and other qualified individuals. Such representatives shall be selected in a manner so as to assure balanced representation among the interested groups.

"(F) If benefits under this title are changed and the Secretary determines, in consultation with the Association, that changes in the NAIC or Federal simplification standards are needed to reflect such changes, the preceding provisions of this paragraph shall apply to the modification of simplification standards previously established in the same manner as they applied to the original establishment of such standards.

"(2) The benefits under the NAIC or Federal simplification standards shall provide—

"(A) for such groups of basic benefits, and such riders or additional, optional groups of benefits, as may be appropriate taking into account the considerations specified in paragraph (3) and the requirements of the succeeding subparagraphs;

"(B) for identification of a core group of basic benefits, common to all policies, which includes only the minimum benefits required of a medicare supplemental policy (as of the date of the enactment of this subsection and not including payment of any deductibles);

"(C) that, in the case of any policy in which benefits are provided in addition to the core group of basic benefits identified under subparagraph (B), the portion of the premium related to such additional benefits is separately stated; and

"(D) that, subject to paragraph (5), the total number of different benefit packages (counting the core group of basic benefits and counting each combination of benefits that may be offered as a separate benefit package) that may be established shall not exceed 10.

"(3) The benefits under paragraph (2) shall, to the extent possible—

"(A) provide for benefits that offer consumers the ability to purchase the benefits that are available in the market as of the date of the enactment of this subsection; and

"(B) balance the objectives of (i) simplifying the market to facilitate comparisons among policies, (ii) avoiding adverse selection, (iii) providing consumer choice, and (iv) promoting market stability.

"(4) The transitional requirements of this paragraph are that, in the case of a medicare supplemental policy which was issued to a policyholder before the effective date of the NAIC or Federal simplification standards and which do not meet such standards, any renewal of such policy shall be deemed to be the issuance of a policy in violation of this subsection unless the issuer offers to the policyholder, not later than 60 days before the effective date of the renewal, a medicare supplemental policy that—

"(A) complies with such standards, and

"(B) does not provide for any waiting period with respect to treatment of pre-existing conditions.

"(5)(A) Except as provided in subparagraph (B), a State may not provide for or permit the grouping of benefits (or language or format with respect to such benefits) under a medicare supplemental policy unless such grouping meets the applicable NAIC or Federal simplification standards.

"(B)(i) The Association or the Secretary, respectively, may, upon application by a State, waive the requirements of this subsection to permit the issuance and sale of a medicare supplemental policy which does not comply with the respective NAIC or Federal simplification standards for a period of up to 3 years in order to demonstrate the offering of new or innovative benefits as part of the policy. Such new or innovative benefits may include cost-control or managed care features.

"(ii) In the case of any such waiver by the Association or Secretary, the Association or Secretary, respectively, shall evaluate the appropriateness of the new or innovative benefits offered and determine if the addition of a new group of such benefits to the NAIC or Federal simplification standards previously established would further the purposes of this subsection. If such determination is made, subject to clause (iii), the Association or Secretary shall modify the NAIC or Federal simplification standards to include such an additional group of benefits (and accompanying language and format with respect to such benefits) as may be appropriate.

"(iii) Not more than 3 additional groups of benefits may be added under clause (ii).

"(6)(A) Except as provided in subparagraph (B), this subsection shall not be construed as preventing a State from restricting the groups of benefits that may be offered in medicare supplemental policies in the State.

"(B) A State may not restrict under subparagraph (A) the offering of a medicare supplemental policy consisting only of the core group of benefits described in paragraph (2)(B).

"(7) The Association shall establish an educational program and an ongoing evaluation process for medicare beneficiaries in order to educate them on the simplification standards developed and applied under this subsection.

"(8) The Comptroller General shall examine the effectiveness of the medicare supplemental policy simplification program established under this subsection and the impact of the program on consumer protection, health benefit innovation, consumer choice, and health care costs. By not later than 4 years after the date of the enactment of this subsection, the Comptroller General shall submit to Congress a report on such examination and shall include in the report such recommendations on the appropriate roles of the Association, States, and the Secretary in carrying out such a program as he deems appropriate.".

SEC. 3. REQUIRING APPROVAL OF STATE FOR SALE IN THE STATE.

(a) IN GENERAL.—Section 1882(d)(4)(B) of the Social Security Act (42 U.S.C. 1395ss(d)(4)(B)) is amended by striking the second sentence.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to policies mailed, or caused to be mailed, on and after July 1, 1991.

SEC. 4. PREVENTING DUPLICATION.

(a) IN GENERAL.—Subsection (d)(3) of section 1882 of the Social Security Act (42 U.S.C. 1395ss) is amended—

(1) in subparagraph (A)—

(A) by striking "Whoever knowingly sells" and inserting "It is unlawful for a person to sell or issue",

(B) by striking "substantially",

(C) by striking ", shall be fined" and inserting ". Whoever violates the previous sentence shall be fined",

(D) in subparagraph (A), by inserting "or title XIX" after "other than this title", and

(E) in subparagraph (A), by striking "$5,000" and inserting "$25,000";

(2) by amending subparagraph (B) to read as follows:

"(B)(i) It is unlawful for a person to issue or sell a medicare supplemental policy to an individual entitled to benefits under part A or enrolled under part B, whether directly, through the mail, or otherwise, unless—

"(I) the person obtains from the individual, as part of the application for the issuance or purchase and on a form described in subclause (II), a written statement signed by the individual stating, to the best of the individual's knowledge, what medicare supplemental policies the individual has, from what source, and whether the individual is entitled to any medical assistance under title XIX, whether as a qualified medicare beneficiary or otherwise, and

"(II) the written statement is accompanied by a written acknowledgment, signed by the seller of the policy, of the request for and receipt of such statement.

"(ii) The statement required by clause (i) shall be made on a form that—

"(I) states that a medicare-eligible individual does not need more than one medicare supplemental policy,

"(II) states that individuals 65 years of age or older may be eligible for benefits under the State medicaid program under title XIX and that such individuals who are entitled to benefits under that program do not need a medicare supplemental policy and that benefits and premiums under any such policy shall be suspended during the period of entitlement to benefits under such title, and

"(III) includes the address and local telephone number of any counseling program offered by (or with the assistance of) the State under title XIX, under its State insurance department, or under a State agency on aging for individuals considering purchase of a medicare supplemental policy and the address and local telephone number of the State medicaid office.

"(iii)(I) Except as provided in subclause (II), if the statement required by clause (i) is not obtained or indicates that the individual has another medicare supplemental policy or indicates that the individual is entitled to any medical assistance under title XIX, the sale of such a policy shall be considered to be a violation of subparagraph (A).

"(II) Subclause (I) shall not apply in the case of an individual who has another policy, if the individual indicates in writing, as part of the application for purchase, that the policy being purchased replaces such other policy and indicates an intent to terminate the policy being replaced when the new policy becomes effective and the issuer or seller certifies in writing that such policy will not, to the best of the issuer or seller's knowledge, duplicate coverage (taking into account any such replacement).

"(iv) Whoever issues or sells a medicare supplemental policy in violation of this subparagraph shall be fined under title 18, United States Code, or imprisoned not more than 5 years, or both, and, in addition to or in lieu of such a criminal penalty, is subject to a civil money penalty of not to exceed $25,000 for each such failure."; and

(5) by adding at the end the following:

"(D)(i) It is unlawful for an issuer or seller of a medicare supplemental policy to distribute information describing the benefits in such a policy unless such information is specified in a uniform language and format approved by the State (in consultation with the National Association of Insurance Commissioners) that facilitates comparison among medicare supplemental policies and comparison with benefits under this title.

"(ii) Any issuer or seller that distributes information in violation of clause (i) is subject to a civil money penalty of not to exceed $25,000 for each such failure.".

(b) CONFORMING AMENDMENT.—Section 1882(d)(5) of such Act is amended by inserting "(3)(B), (3)(D)," after "(3)(A),".

(c) INCREASE IN OTHER CIVIL MONEY PENALTIES.—Paragraphs (1) and (4)(A) of section 1882(d) of such Act are amended by striking "$5,000" and inserting "$25,000".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to policies issued or sold more than 1 year after the date of the enactment of this Act.

SEC. 5. LOSS RATIOS.

(a) IN GENERAL.—Section 1882 of the Social Security Act (42 U.S.C. 1395ss) is amended—

(1) in subsection (c), by amending paragraph (2) to read as follows:

"(2) meets the requirements of subsection (q);";

(2) by striking the last sentence of subsection (c); and

(3) by adding at the end the following new subsection:

"(q)(1) A medicare supplemental policy or health insurance policy that is an indemnity policy or a dread disease policy (as defined by the Secretary in consultation with the National Association of Insurance Commissioners) may not be issued or sold in any State unless—

"(A) the policy can be expected (as estimated for the entire period for which rates are computed to provide coverage, on the basis of incurred claims experience and earned premiums for such periods and in accordance with accepted actuarial principles and practices and standards developed by the National Association of Insurance Commissioners) to return to policyholders in the form of aggregate benefits provided under the policy, at least 80 percent of the aggregate amount of premiums collected in the case of group policies and at least 70 percent in the case of individual policies;

"(B) any premium increase (or the initial establishment of the premium) is made in a manner consistent with paragraph (2); and

"(C) the issuer of the policy provides for the issuance of a proportional refund, based on the premium paid and in accordance with paragraph (3), of the amount of premiums received necessary to assure that the ratio of aggregate benefits provided to the aggregate premiums collected (net of such refunds) complies with the expectation required under subparagraph (A).

For purposes of applying subparagraph (A) only, policies issued as a result of solicitations of individuals through the mails or by mass media advertising (including both print and broadcast advertising) shall be deemed to be individual policies.

"(2)(A) It is unlawful for an insurer to increase the premiums charged for a medicare supplemental policy (or to issue a policy and charge premiums) unless the increase or premium amount, respectively, has received prior approval by the State in which the policy is issued in accordance with subparagraph (B).

"(B) In order to comply with this subparagraph, with respect to the prior approval of a premium increase or premium—

"(i) the issuer shall submit to the State (at such time as the State may specify, but not earlier than 90 days in advance of such proposed effective date) the proposed premium amounts in advance of the proposed effective date of the premiums;

"(ii) the issuer shall include, as part of the submission under clause (i), information, certified as accurate by an actuary, that establishes that the premium amounts are reasonable in relation to the benefits and that the resulting ratio of benefits to premiums will meet the expectations specified in paragraph (1)(A); and

"(iii) in the case of a premium increase that is significant (as determined under subparagraph (C)), there has been public notice and the holding of a public hearing before the proposed increase may take effect.

In applying this subparagraph, a proposed premium amount submitted may be treated as approved by a State, unless disapproved by the State.

"(C) For purposes of subparagraph (B)(iii), a premium increase is considered significant if the proposed percentage increase exceeds twice the percentage increase in the medical care component of the consumer price index for all urban consumers (U.S. city average, as published by the Bureau of Labor Statistics) for the period (i) that ends with the month before the month of the submission of the proposed increase and (ii) that is a number of months equal to the number of months during which the most recent previous increase (or establishment) will have been effective before the month of the proposed increase.

"(3)(A) Paragraph (1)(C) shall be applied with respect to each type of policy by policy number. Paragraph (1)(C) shall not apply to a policy with respect to the first 2 years in which it is in effect. The National Association of Insurance Commissioners is requested to submit to Congress a report containing recommendations on adjustments in the percentages under paragraph (1)(A) that may be appropriate in order to apply paragraph (1)(C) to the first 2 years in which policies are effective.

"(B) A refund required under paragraph (1)(C) shall be made to each policyholder insured under the applicable policy as of the last day of the year involved.

"(C) Such a refund shall include interest from the end of the policy year involved until the date of the refund at a rate as specified by the Secretary for this purpose from time to time which is not less than the average rate of interest for 13-week Treasury notes.

"(D) For purposes of this paragraph and paragraph (1)(C), refunds may be in the form of a credit against premiums due in the case of an individual who continues to be a policyholder and shall be made, with respect to a policy year, not later than the third quarter of the succeeding policy year.

"(4) The provisions of this subsection do not preempt a State from—

"(A) requiring a higher percentage than that specified in paragraph (1)(A), or

"(B) requiring the review or approval of premiums not otherwise required to be reviewed or approved under paragraph (2) or providing additional requirements for the approval of premiums.

"(5)(A) The Comptroller General shall periodically, not less often than once every 3 years, perform audits with respect to the compliance of medicare supplemental policies with the requirements of paragraph (1) and shall report the results of such audits to the State involved and to the Secretary.

"(B) The Secretary may independently perform such compliance audits.

"(6)(A) A person who issues or sells a policy in violation of paragraph (1) is subject to a civil money penalty of not to exceed $25,000 for each such violation. The provisions of section 1128A (other than the first sentence of subsection (a) and other than subsection (b)) shall apply to a civil money penalty under the previous sentence in the same manner as such provisions apply to a penalty or proceeding under section 1128A(a).

"(B) Each issuer of a policy subject to the requirements of paragraph (1)(C) shall be liable to policyholders for refunds required under such paragraph.".

(b) ASSURING ACCESS TO LOSS RATIO INFORMATION.—Section 1882(b)(1)(C) of such Act (42 U.S.C. 1395ss(b)(1)(C)) is amended by striking the semicolon at the end and inserting a comma and the following:

"and that a copy of each such policy, the most recent premium for each such policy, and a listing of the ratio of benefits provided to premiums collected for the most recent 3-year period for each such policy issued or sold in the State is maintained and made available to interested persons;".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to policies sold or issued more than 1 year after the date of the enactment of this Act.

SEC. 6. LIMITATIONS ON CERTAIN SALES COMMISSIONS.

(a) IN GENERAL.—Section 1882(d) of the Social Security Act is amended—

(1) in paragraph (5)—

(A) by striking "and (4)(A)" and inserting "(4)(A), and (5)(A)", and

(B) by redesignating such paragraph as paragraph (6); and

(2) by inserting after paragraph (4) the following new paragraph:

"(5)(A) It is unlawful for a person who provides for a commission or other compensation to an agent or other representative with respect to the sale of a medicare supplemental policy (or certificate)—

"(i) to provide for a first year commission or other first year compensation that exceeds 150 percent of the commission or other compensation for the selling or servicing of the policy or certificate in a second or subsequent year, or

"(ii) to provide for compensation with respect to replacement of such a policy or certificate that is greater than the compensation that would apply to the renewal of the policy or certificate.

Whoever violates the previous sentence shall be fined under title 18, United States Code, or imprisoned not more than 5 years, or both, and, in addition to or in lieu of such a criminal penalty, is subject to a civil money penalty of not to exceed $25,000 for each such prohibited act.

"(B) In this paragraph the term 'compensation' includes pecuniary and nonpecuniary compensation of any kind relating to the sale or renewal of a policy or certificate and specifically includes bonuses, gifts, prizes, awards, and finders' fees.".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to compensation provided on or after 1 year after the date of the enactment of this Act.

SEC. 7. CONSUMER EDUCATION.

(a) GRANT PROGRAM.—The Secretary of Health and Human Services shall establish a program of grants to States to assist States in establishing counseling programs (including toll-free consumer hotlines) to aid medicare-eligible individuals in choosing and comparing medical supplemental policies.

(b) MATCHING OF FUNDS REQUIRED.—Funds shall not be made available to a State under this section for a counseling program unless the Secretary has received satisfactory assurances that the State will make available from non-Federal funds for such program amounts at least equal to the amount of funds provided under this section to the State for the program.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated, in equal proportions from the Federal Hospital Insurance Trust Fund and from the Federal Supplementary Medical Insurance Trust Fund, $20,000,000 in each of fiscal years 1991, 1992, and 1993 to carry out this section.

SEC. 8. CLARIFICATION OF TREATMENT OF PLANS OFFERED BY HEALTH MAINTENANCE ORGANIZATIONS.

(a) IN GENERAL.—The first sentence of section 1882(g)(1) of the Social Security Act is amended by inserting before the period at the end the following: "and does not include a policy or plan of a health maintenance organization or other direct service organization which offers benefits under this title, including such services under a contract under section 1833 or 1876".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on the date of the enactment of this Act.

SEC. 9. PREEXISTING CONDITION LIMITATIONS.

(a) IN GENERAL.—Section 1882(o) of the Social Security Act, as added by section 2(a)(2) of this Act, is amended by inserting after paragraph (4) the following new paragraph:

"(5)(A) A medicare supplemental policy may not deny a claim for losses incurred more than 6 months from the effective date of coverage for a preexisting condition and may not define a preexisting condition more restrictively than a condition for which medical advice was given or treatment was recommended by or received from a physician within 6 months before the effective date of coverage.

"(B) If a medicare supplemental policy or certificate replaces another such policy or certificate which was in effect for 6 months or longer, the replacing policy may not provide any time period applicable to preexisting conditions, waiting periods, elimination periods, and probationary periods in the new policy or certificate for similar benefits.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect 1 year after the date of the enactment of this Act.

---

MEDIGAP FRAUD AND ABUSE PREVENTION ACT

SUMMARY

(1) SIMPLICATION

Incorporates Senator Riegle's language which requires the National Association of Insurance Commissioners [NAIC], in consultation with representatives of consumers, insurers, and Medicare beneficiaries, to amend its model regulation and law within nine months to provide simplified Medigap benefit packages and establish uniform format and standard terminology for Medigap policies. In the absence of NAIC action, the Secretary of Health and Human Services would develop the simplification model.

In developing the regulation, NAIC would have to balance the objectives of simplifying the Medigap market to facilitate comparisons between policies, avoiding adverse se-

lection, and providing consumer choice. Either a limited number of benefit packages or one or more core packages with a limited number of optional riders would be developed.

In addition, NAIC would develop an amendment process to permit modifications such as new, innovative benefits or cost control features. In the absence of NAIC action to amend the model regulation and law, the Secretary of Health and Human Services would develop the simplification model.

(2) GUARANTEED RENEWABILITY

This section codifies a number of NAIC consumer protection standards. First, it requires that all policies be guaranteed renewable. Second, it ensures continuation of Medigap coverage when group coverage is terminated.

Specifically, each member of a group must be given the right to convert to an individual policy if a group policy is terminated. If a group policy is terminated and replaced by another group policy, the new insurer must offer coverage to all persons covered under the old group policy, without new waiting periods for pre-existing conditions.

(3) MEDICAID ELIGIBILITY

Gives policyholders the right to suspend their Medigap benefits and premiums for any period during which they are entitled to Medicaid benefits. If the policyholder subsequently loses Medicaid eligibility, benefits and premiums must be automatically reinstated if the policyholder notifies the insurer.

(4) EXTRATERRITORIALITY

Empowers State Insurance Commissioners with the right to approve policies mailed into their state from another jurisdiction. Removes the loophole in current law which deems a policy to have met a state standard if the state in which it originates has passed the NAIC model standard.

(5) DUPLICATION

Before selling a policy, insurers would be required to ask the beneficiary in writing two questions:

Do you currently own another Medicare supplemental policy? and

Are you currently receiving Medicaid benefits?

If the beneficiary indicates that he/she has another Medicare supplemental policy, then the insurer would be prohibited from selling the beneficiary an additional policy unless the beneficiary indicated the new policy replaced the old policy. If the beneficiary indicates that he/she is receiving Medicaid benefits, the insurer could not sell them a Medigap policy.

In addition, insurers would be required to prominently display the following advisory statements on the application for a Medigap policy:

No one needs more than one Medicare supplemental policy;

Individuals entitled to Medicaid do not need to purchase a Medigap policy and benefits and premiums may be suspended during the period of entitlement;

The address and local phone numbers of the state Medicaid office and any counseling program offered in the state.

(6) LOSS RATIOS

For mature policies (defined as policies which have been in effect for at least three years), loss ratios would be increased from 60 percent to 70 percent for individual policies and from 75 percent to 80 percent for group policies. The NAIC would be required to make recommendations to Congress within nine months on a method for ensuring the value of policies in effect for fewer than three years. Hospital indemnity and disease-specific policies would be required to comply with these standards.

States would be required to publish and make available information to consumers about 3-year average loss ratios, and insurers would be required at the time of solicitation to provide 3-year average loss ratios for their policies.

If a policy's loss ratio falls below the minimum standard in a given year, all policyholders would be issued a refund in the amount necessary to bring the policy into compliance.

(7) PRIOR APPROVAL

States would be required to review and approve all rate increase requests to ensure annual compliance with minimum loss ratios. All premium increase requests would have to be accompanied by loss-ratio information, certified as accurate by an independent actuary, demonstrating that the premium would result in compliance with minimum loss ratio standards. Public hearings would be required for any premium request exceeding twice the Medical Care Component of the Consumer Price Index (MCCPI).

(8) SALES COMMISSIONS

Strengthens the NAIC consumer protection standard and discourages policy churning by limiting sales commissions on new policies to no greater than 150 percent of the commission provided for renewals.

(9) CONSUMER COUNSELING

Authorizes $20 million for grants to states who wish to establish counseling programs for Medicare beneficiaries. States would be required to match federal dollars 1:1.

(10) LIMIT ON WAITING PERIODS

Codifies the NAIC standard which establishes a maximum six-month waiting period for pre-existing conditions, even if a policy is replaced by different company.●

● Mr. PRYOR. Mr. President, as chairman of the Senate Special Committee on Aging, I am pleased to join my colleagues Senators DASCHLE, RIEGLE, HEINZ, and DURENBERGER in introducing legislation that will make important improvements to the Medigap market. All have played leadership roles on this issue and I look forward to working with them on this greatly needed legislation. I would also like to take this opportunity to applaud Congressman WYDEN's ongoing efforts and commitment to address the complexities of the Medigap market.

We are all deeply concerned about the understandable confusion many older persons have about their health insurance needs and coverage, as well as their vulnerability to high pressure, and sometimes unscrupulous, sales practices. At a March 1990 Aging Committee hearing, we heard about how some of the most vulnerable of our society—the elderly—are victimized by insurance marketing abuses.

During the hearing, Charlene Blackburn, an 80-year-old resident of Santa Cruz, CA, told us she was sold over 13 Medigap policies in the course of less than 4 years. We also received testimony from an incarcerated insurance agent in Florida. This agent, due to extraordinarily high commission structures, made more than $245,000 in 1 year. At this same hearing, we also heard about the use of slick, misleading come-ons that are used to scare or trick vulnerable consumers into buying something of questionable value that they don't need and can't afford.

The use of these misleading come-ons has no bounds. For example, we have seen the establishment of questionable senior citizens' organizations whose main purpose is to develop mailing lists to target insurance leads. Just last week, a confused constituent who had seen a television commercial selling Medigap by the "Association of Retired Americans" called to ask if this organization is affiliated with the American Association of Retired Persons. This is one of the many tactics used to confuse consumers buying Medigap.

The legislation being introduced today represents a bipartisan, cooperative effort on the part of Congress, the health insurance industry, and consumer groups to craft a reasonable, effective approach to remedying the ills of the Medigap market. The bills address crucial areas for reform: simplification, duplication, loss ratios, agent commission structures, counseling programs, and premium increases. By focusing on these areas, the legislation will bring effective, comprehensive reform to this market.

I am particularly appreciative that Senator DASCHLE's bill incorporates my proposed legislation, S. 2189, which gives States the ability to establish health insurance counseling and assistance programs. Today, in the House, Representative JIM MOODY will introduce a companion bill. I commend him for taking a leadership role in this area.

A counseling and assistance program provides the opportunity for a senior to seek objective advice about the adequacy of their current coverage. Counseling programs can be an effective remedy, coupled with today's proposed Medigap market reform, to some of these marketing and sales abuses we hear about.

Mr. President, in spite of over a decade of State and Federal regulatory efforts, we continue to face severe problems surrounding the affordability and marketing of Medigap insurance policies. We will not be satisfied until these large premium increases and continued marketing abuses are alleviated. If the measures introduced today do not go far enough, you can rest assured that we will be back here again with even stronger measures to protect older Americans.●

By Mr. RIEGLE (for himself, Mr. PRYOR, Mr. DASCHLE, and Mr. ROCKEFELLER):

S. 2641. A bill to amend title XVIII of the Social Security Act to provide for simplification in the purchase of Medicare supplemental insurance; to the Committee on Finance.

MEDIGAP SIMPLIFICATION ACT OF 1990

● Mr. RIEGLE. Mr. President, I rise today to introduce the Medigap Simplification Act of 1990. This bill was developed to assist senior citizens in the purchase of Medigap supplemental health insurance coverage consistent with individual needs and resources. I am pleased to acknowledge Senators PRYOR, DASCHLE, and ROCKEFELLER who join me today in introducing this important piece of legislation.

The current Medigap market is confusing to seniors. It is not easy to make comparisons in benefits and price among different policies; and materials explaining benefits use different terminology and formats that add to confusion. Under these circumstances, no wonder some seniors buy more policies than they need or ones that don't meet their needs.

Rate increases, after repeal of catastrophic, have generated more confusion and anger among some senior citizens. In Michigan, rates have increased for some Medigap policies by as much as 45 percent. Of over 1 million Michigan seniors, it is estimated that close to 350,000 seniors have Medigap policies that would be helped by this bill. But close to 240,000 have no Medigap or Medicaid. So it's important that Medigap policies are appropriate and affordable and that information on benefits and price are clear.

A Michigan caseworker for the insurance commissioner told us that in 1989 he saw over 1,300 seniors. Problems include buying too many policies, a lack of understanding of Medigap and Medicare benefits. Seniors also feel that available benefits are inadequate, for example, currently drug benefits are not available.

Mr. President, the Medigap Simplification Act was developed to eliminate confusion about available Medicare supplemental insurance coverage. It provides uniformity across all States in the types of benefits provided, and uniformity in the language and format used to inform seniors about their choices, so that older Americans can feel confident when they choose their medical coverage. This simplification will facilitate meaningful comparisons of competing benefit packages.

Specifically, this legislation provides a mechanism for developing a national model benefits package for Medigap insurers. The model benefits package will be developed through the cooperative efforts of State insurance commissioners, consumer groups, Medicare beneficiaries, insurers and others. We rely on these experts to come up with the best structure. Massachusetts, Wisconsin, and Minnesota have already moved forward on this and would serve as excellent models. In absence of such action within 9 months, the Department of Health and Human Services would develop the simplification regulation.

In addition, an amendment process is outlined that would permit future modification of established simplified Medigap benefit packages and allow for innovation, including managed care programs and cost control features. Current Medigap policy owners would have the option of keeping old policies, or switching to one of the new simplified benefit packages.

This legislation would also provide grants for State toll-free hotlines to provide information about State Medigap policies, Medicare, and Medicaid benefits. These hotlines would complement counseling programs. I would like to commend Senator PRYOR on his leadership role in developing a counseling program proposal of which I am also a cosponsor.

In addition, Medicaid is intended to fill in the gaps in Medicare coverage for low-income senior. Some States, however, do not pay the physician deductible and coinsurance and the bad debt that may result creates problems in terms of access to providers.

To protect low-income seniors, under this bill, the sale of Medigap policies to Medicaid beneficiaries that duplicate entitled benefits would be prohibited. Also, a warning on the face page of Medigap policies would be displayed stating that individuals on Medicaid do not usually need Medigap benefits. The Congress will instruct HCFA to do a study of Medigap use by Medicaid beneficiaries.

In developing the bill, we worked with consumer groups, including Consumer Union and Families U.S.A.; the National Association of Insurance Commissioners; Blue Cross/Blue Shield; and the Health Insurance Association of America. We also had valuable input from the Michigan Blue Cross/Blue Shield.

I would like to commend Senator DASCHLE and Congressmen WYDEN and DINGELL for their significant leadership roles in developing bills to rid the Medigap market of fraud and abuse. Their bills provide additional protection for seniors including preventing unnecessary rate increases, duplicative policies, and abuses in the sale of policies. I am also a cosponsor of Senator DASCHLE's bill, the Medigap Fraud and Abuse Prevention Act and am pleased that they have incorporated the simplification bill in their comprehensive legislation. These bills together are part of an effort in Congress to ensure high quality health care to seniors in this country.

I would like to note that I do take exception to one provision in the Medigap Fraud and Abuse Prevention Act. This bill imposes financial penalties on insurers selling nonapproved policies in States that do not adopt the model simplification regulation. Based no past experience, States have adopted the model regulation on a voluntary basis. In fact, the record shows that 46 States have passed the current model regulation and in the case of the 4 States that have not, their policies are generally more restrictive. So, as long as this remains the case, I do not believe financial penalties are necessary.

I am deeply concerned about the confusion many seniors have about their health insurance needs and available insurance coverage. I believe this and other Medigap proposals represent a mechanism for significantly reducing the potential for abusive sales practices in the Medigap market and ensure that reasonably priced and quality insurance products are sold.

I hope that my colleagues in the Senate will join me in cosponsoring this important piece of legislation to ensure affordable high quality health care for our senior citizens. I ask unanimous consent that a summary of the bill and the full text of the bill be printed in the RECORD.

There being no objection, the material was orderd to be printed in the RECORD, as follows:

S. 2641

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Medigap Simplification Act of 1990".

SEC. 2. REQUIRING SIMPLIFICATION OF MEDIGAP POLICIES.

(a) IN GENERAL.—Section 1882 of the Social Security Act (42 U.S.C. 1395ss), as amended by section 203(a)(1) of the Medicare Catastrophic Coverage Repeal Act of 1989, is amended—

(1) in subsection (b)(1)(B), by striking "through (4)" and inserting "through (5)";

(2) in subsection (c)—

(A) by striking "and" at the end of paragraph (3),

(B) by striking the period at the end of paragraph (4) and inserting "; and", and

(C) by inserting after paragraph (4) the following new paragraph:

"(5) meets the requirements of subsection (o)."; and

(3) by adding at the end the following new subsections:

"(o) The requirements of this subsection are as follows:

"(1) Each medicare supplemental policy shall provide for coverage of a group of benefits consistent with subsection (p)(1).

"(2) If the medicare supplemental policy provides for coverage of a group of benefits other than the core group of basic benefits described in subsection (p)(2)(B), the issuer of the policy must make available to the individual a medicare supplemental policy with only such core group of basic benefits.

"(3) The issuer of the policy has provided, before the sale of the policy, a summary information sheet which describes the bene-

fits (including any optional benefits) under the policy and which specifies the amount of any premiums attributable to any such optional benefits.

"(p)(1)(A) If, within 9 months after the date of the enactment of this subsection, the National Association of Insurance Commissioners (in this subsection referred to as the 'Association') promulgates—

"(i) limitations on the benefits that may be offered under a medicare supplemental policy consistent with paragraphs (2) and (3) of this subsection,

"(ii) uniform language and format to be used with respect to such benefits, and

"(iii) transitional requirements consistent with paragraph (4),

(such limitations, language, format, and requirements referred to collectively in this subsection as 'NAIC simplification standards'), subsection (g)(2)(A) shall be applied in each State, effective for policies issued to policyholders on and after the date specified in subparagraph (C), as if the reference to the Model Regulation adopted on June 6, 1979, included a reference to the NAIC simplification standards. The Association shall report to the Committees on Ways and Means and Energy and Commerce of the House of Representatives and the Committee on Finance of the Senate, not later than 6 months after the date of the enactment of this subsection, on its progress in developing such standards and, not later than 9 months after such date, on its promulgation of such standards.

"(B) If the Association does not promulgate NAIC simplification standards within the 9-month period specified in subparagraph (A), the Secretary shall promulgate, not later than 9 months after the end of such period, limitations, language, format, and requirements described in clauses (i) through (iii) of such subparagraph (in this subsection referred to collectively as 'Federal simplification standards'), and subsection (g)(2)(A) shall be applied in each State, effective for policies issued to policyholders on and after the date specified in subparagraph (C), as if the reference to the Model Regulation adopted on June 6, 1979, included a reference to the Federal simplification standards.

"(C)(i) Subject to clause (ii), the date specified in this subparagraph for a State is the date the State adopts the NAIC simplification standards or the Federal simplification standards or 1 year after the date the Association or the Secretary first adopts such standards, whichever is earlier.

"(ii) In the case of a State which the Secretary identifies, in consultation with the Association, as—

"(I) requiring State legislation (other than legislation appropriating funds) in order for medicare supplemental policies to meet the NAIC or Federal simplification standards, but

"(II) having a legislature which is not scheduled to meet in 1991 in a legislative session in which such legislation may be considered,

the date specified in this subparagraph is the first day of the first calendar quarter beginning after the close of the first legislative session of the State legislature that begins on or after January 1, 1991. For purposes of the previous sentence, in the case of a State that has a 2-year legislative session, each year of such session shall be deemed to be a separate regular session of the State legislature.

"(D) The Panel periodically shall review each State regulatory program's application of the NAIC or Federal simplification standards.

"(E) In promulgating simplification standards under this paragraph, the Association or Secretary shall consult with a working group composed of representatives of issuers of medicare supplemental policies, consumer groups, medicare beneficiaries, and other qualified individuals. Such representatives shall be selected in a manner so as to assure balanced representation among the interested groups.

"(F) If benefits under this title are changed and the Secretary determines, in consultation with the Association, that changes in the NAIC or Federal simplification standards are needed to reflect such changes, the preceding provisions of this paragraph shall apply to the modification of simplification standards previously established in the same manner as they applied to the original establishment of such standards.

"(2) The benefits under the NAIC or Federal simplification standards shall provide—

"(A) for such groups of basic benefits, and such riders or additional, optional groups of benefits, as may be appropriate taking into account the considerations specified in paragraph (3) and the requirements of the succeeding subparagraphs;

"(B) for identification of a core group of basic benefits, common to all groups of benefits, which includes only the minimum benefits required of a medicare supplemental policy (as of the date of the enactment of this subsection and not including payment of any deductibles);

"(C) that, in the case of any policy in which benefits are provided in addition to the core group of basic benefits identified under subparagraph (B), the portion of the premium related to such additional benefits is separately stated; and

"(D) that, subject to paragraph (5), the total number of different benefit packages (counting the core group of basic benefits and counting each combination of benefits that may be offered as a separate benefit package) that may be established shall not exceed 10.

"(3) The benefits under paragraph (2) shall, to the extent possible—

"(A) provide for benefits that offer consumers the ability to purchase the benefits that are available in the market as of the date of the enactment of this subsection; and

"(B) balance the objectives of (i) simplifying the market to facilitate comparisons among policies, (ii) avoiding adverse selection, (iii) providing consumer choice, and (iv) promoting market stability.

"(4) The transitional requirements of this paragraph are that, in the case of a medicare supplemental policy which was issued to a policyholder before the effective date of the NAIC or Federal simplification standards and which do not meet such standards, any renewal of such policy shall be deemed to be the issuance of a policy in violation of this subsection unless the issuer offers to the policyholder, not later than 60 days before the effective date of the renewal, a medicare supplemental policy that—

"(A) complies with such standards, and

"(B) does not provide for any waiting period with respect to treatment of pre-existing conditions.

"(5)(A) Except as provided in subparagraph (B), a State may not provide for or permit the grouping of benefits (or language or format with respect to such benefits) under a medicare supplemental policy unless such grouping meets the applicable NAIC or Federal simplification standards.

"(B)(i) The Association or the Secretary, respectively, may, upon application by a State, waive the requirements of this subsection to permit the issuance and sale of a medicare supplemental policy which does not comply with the respective NAIC or Federal simplification standards for a period of up to 3 years in order to demonstrate the offering of new or innovative benefits as part of the policy. Such new or innovative benefits may include cost-control or managed care features.

"(ii) In the case of any such waiver by the Association or Secretary, the Association or Secretary, respectively, shall evaluate the appropriateness of the new or innovative benefits offered and determine if the addition of a new group of such benefits to the NAIC or Federal simplification standards previously established would further the purposes of this subsection. If such determination is made, subject to clause (iii), the Association or Secretary shall modify the NAIC or Federal simplification standards to include such an additional group of benefits (and accompanying language and format with respect to such benefits) as may be appropriate.

"(iii) Not more than 3 additional groups of benefits may be added under clause (ii).

"(6)(A) Except as provided in subparagraph (B), this subsection shall not be construed as preventing a State from restricting the groups of benefits that may be offered in medicare supplemental policies in the State.

"(B) A State may not restrict under subparagraph (A) the offering of a medicare supplemental policy consisting only of the core group of benefits described in paragraph (2)(B).

"(7) The Association shall establish an educational program and an ongoing evaluation process for medicare beneficiaries in order to educate them on the simplification standards developed and applied under this subsection and an ongoing evaluation process to ensure compliance with the model regulation and effectiveness of its policies.

"(8) The Comptroller General shall examine the effectiveness of the medicare supplemental policy simplification program established under this subsection, shall identify those States which have (or have not) established regulatory programs which include such simplification program and the reasons for any failure to include such simplification program, and shall examine the impact of the program on consumer protection, health benefit innovation, consumer choice, and health care costs. By not later than 2 years after the date of the enactment of this subsection, the Comptroller General shall submit to Congress a report on the effectiveness of the simplification program including an identification of those States which have or have not established regulatory programs which include such simplification program. By not later than 4 years after the date of enactment of this subsection, the Comptroller General shall submit to Congress a report describing the impact of the program on consumer protection, health benefit innovation, consumer choice, and health care costs and shall include in the report such recommendations on the appropriate roles of the Association, States, and the Secretary in carrying out such a program as he deems appropriate.".

SEC. 3. PREVENTING DUPLICATION WITH MEDICAID BENEFITS.

(a) IN GENERAL.—Subsection (d)(3) of section 1882 of the Social Security Act (42 U.S.C. 1395ss) is amended—

(1) in subparagraph (A), by inserting "or title XIX" after "other than this title", and

(2) by adding at the end the following new subparagraph:

"(D)(i) It is unlawful for a person to issue or sell a medicare supplemental policy to an individual entitled to benefits under part A or enrolled under part B, whether directly, through the mail, or otherwise, unless—

"(I) the person obtains from the individual, as part of the application for the issuance or purchase and on a form described in subclause (II), a written statement signed by the individual stating whether, to the best of the individual's knowledge, whether the individual is entitled to any medical assistance under title XIX, whether as a qualified medicare beneficiary or otherwise, and

"(II) the written statement is accompanied by a written acknowledgment, signed by the seller of the policy, of the request for and receipt of such statement.

The written acknowledgment under subclause (II) does not constitute a written verification or affirmation of the truth of any facts stated in the written statement described in subclause (I).

"(ii) The statement required by clause (i) shall be made on a form that—

"(I) states that individuals 65 years of age or older may be eligible for benefits under the State medicaid program under title XIX and that such individuals who are entitled to benefits under that program may not need a medicare supplemental policy, and

"(II) includes the address and local telephone number of any counseling program offered by (or with the assistance of) the State under title XIX, under its State insurance department, or under a State agency on aging for individuals considering purchase of a medicare supplemental policy and the address and local telephone number of the State medicaid office.

"(iii) If the statement required by clause (i) is not obtained or indicates that the individual is eligible for medical assistance under a State plan under title XIX which which would duplicate those in the policy proposed to be issued or sold, the sale of such a policy shall be considered to be a violation of subparagraph (A).

"(iv) Whoever issues or sells a health insurance policy in violation of this subparagraph shall be fined under title 18, United States Code, or imprisoned not more than 5 years, or both, and, in addition to or in lieu of such a criminal penalty, is subject to a civil money penalty of not to exceed $25,000 for each such failure.".

(b) CONFORMING AMENDMENT.—Section 1882(d)(5) of such Act is amended by inserting "(3)(D)," after "(3)(A),".

(c) STUDY ON MEDIGAP USE BY MEDICAID BENEFICIARIES.—

(1) IN GENERAL.—The Administrator of the Health Care Financing Administration shall conduct a study of the use of medicare supplemental policies (in this subsection referred to as "medigap policies") by individuals entitled to medical assistance, whether as a qualified medicare beneficiary or otherwise, under a State plan under title XIX of the Social Security Act. In conducting the study, the Administrator shall—

(A) determine, by State, (i) the number of medicare beneficiaries who are entitled to such assistance and who also own medigap policies (such individuals in this subsection referred to as "medicaid-medigap beneficiaries") and (ii) the number of medicare beneficiaries who are eligible (but have not enrolled) for such assistance and who own medigap policies;

(B) determine the types of coverage under medigap policies that are most important to medicaid-medigap beneficiaries;

(C) determine each State's policies regarding coverage of medicare cost-sharing under its medicaid program and the percentage of physicians in each State who participate in the State's medicaid program;

(D) assess the relationship between medicaid-medigap beneficiaries' ownership of medigap policies and the policies and percentage described in subparagraph (C);

(E) determine the amount medicaid-medigap beneficiaries pay for medigap policies, both in the aggregate and as a percent of income;

(F) determine what the difference in impact on health care service is between State medicaid programs that cover the cost of premiums for medigap policies for individuals entitled to both medicare and medicaid benefits and State medicaid programs that pay directly for medicare cost-sharing; and

(G) determine the use and cost of health care services by medicaid-medigap beneficiaries and by medicare beneficiaries who are entitled to medicaid assistance but do not own medigap policies.

(2) REPORT.—By not later than 1 year after the date of the enactment of this Act, the Administrator shall report to Congress on the study conducted under paragraph (1) and shall include in the report such recommendations for changes in the regulation of the sale of medigap policies to medicaid beneficiaries and in medicaid program requirements (including the coverage of medicare cost-sharing) as the Administrator deems appropriate.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to policies issued or sold more than 6 months after the date of the enactment of this Act.

SEC. 4. TOLL-FREE CONSUMER HOT-LINE GRANT PROGRAM.

(a) GRANT PROGRAM.—The Secretary of Health and Human Services shall establish a program of grants to States to assist States in establishing toll-free consumer hotlines to provide information on medical supplemental policies issued in States and benefits available under the medicare program and under the medicaid program to medicare-eligible individuals.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated, in equal proportions from the Federal Hospital Insurance Trust Fund and from the Federal Supplementary Medical Insurance Trust Fund, $5,000,000 in each of fiscal years 1991, 1992, and 1993 to carry out this section.

---

THE MEDIGAP SIMPLIFICATION ACT OF 1990—SUMMARY

This bill provides a process for simplifying the Medicare Supplemental Insurance market (Medigap) for senior citizens. The goal of simplification is to permit meaningful comparisons of Medigap insurance policies and enhance consumer choice, and help ensure that purchases of policies are consistent with individual health needs and resources.

Specifically, the National Association of Insurance Commissioners (NAIC), in consultation with a working group (of beneficiaries, insurers, consumer groups, others) would develop simplified Medigap benefit packages and establish uniform format and standard terminology for Medigap policies across states. In absence of NAIC action within 9 months, the Department of Health and Human Services would develop the simplification regulation.

In developing the simplification regulation and law, the NAIC and the working group would be required to address the following:

1. Balance the objectives of simplifying the Medigap market, avoiding adverse selection, providing consumer choice and promoting market stability.

2. Establish benefit packages with maximum flexibility. As an upper limit, the combination of benefit choices would be limited to 10 and would include making available a low benefit package covering all of the Baucus minimum benefits except the Part A and B deductibles.

3. Include an educational program to assure a smooth transition to a simplified market and establish on-going evaluation.

The bill includes an amendment process to permit future modification of established simplified Medigap benefit packages and allow for innovation, including cost-control features and managed care programs. Current Medigap policy owners would have the choice of keeping old policies, or switching to one of the new simplified benefit packages.

The General Accounting Office would report to the Congress on the effect of Medigap simplification within 4 years of enactment of this section. The study would assess this law's impact on providing consumer protection, health benefit innovation, consumer choice, and health care costs.

STATE TOLL-FREE HOTLINE TO PROVIDE COMPARISON INFORMATION

For 3 years, grants ($5 million/yr) would be made available to states to establish toll-free hotlines to provide information about state Medigap policies, Medicaid and Medicare benefits.

PROTECTING MEDICAID RECIPIENTS

The sale of Medigap policies to Medicaid beneficiaries that duplicates entitled benefits would be banned. Also, a warning on the face page of Medigap policies and application for coverage would state that individuals on Medicaid do not usually need Medigap benefits. The Health Care Financing Administration would be required to do a study of Medigap use by Medicaid recipients.●

---

By Mr. EXON (for himself and Mr. DASCHLE):

S. 2642. A bill entitled the "Grown in the United States Food Labeling Act of 1990"; to the Committee on Agriculture, Nutrition, and Forestry.

GROWN IN THE UNITED STATES FOOD LABELING ACT

Mr. EXON. Mr. President, I rise to introduce legislation which will initiate a Grown in the United States Food Labeling Program. This legislation instructs the Secretary of Agriculture and the Commissioner of the Food and Drug Administration to establish the Grown in the United States Food Labeling Program.

The program will define conditions under which food producers, processors, and sellers may label food products as grown in the United States or

as made of ingredients grown in the United States. Any food product which contains a significant amount of imported ingredients would not be permitted to participate in the grown in the United States Program.

The legislation also instructs the Secretary of Agriculture and the Commissioner of the Food and Drug Administration to conduct a comprehensive review of all existing Federal country of origin food labeling requirements and issue a report which analyses the adequacy of current Federal country of origin food labeling requirements and make recommendations to the Congress to improve country of origin information available to American consumers.

Mr. President, this compromise legislation creates a voluntary program to highlight the wholesomeness of home grown American products. Imported food ingredients are increasingly found in American-branded food products. Americans are generally unaware when they purchase products with significant amounts of imported ingredients. If consumers were fully informed, I believe that they would actively seek products containing home grown American food products.

Mr. President, agriculture practices in many foreign lands do not meet the top quality and safety standards of American farm and ranch operations. Americans are very health conscious. They want wholesome American products. Under present circumstances, consumers are not given sufficient information to be able to choose American products. This legislation will help American food producers make their products stand out in the marketplace. I expect consumers to respond favorably.

I ask my colleagues to review the Grown in the United States Food Labeling Act. It will give the American consumer an opportunity to chose home grown American products.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2642

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION. 1. That this Act may be cited as the "Grown in the United States Food Labeling Act of 1990."

SEC. 2. The Secretary of Agriculture and the Commissioner of the Food and Drug Administration shall within six months of the date of enactment of this act issue regulations which will establish a program known as the "Grown in the United States Food Labeling Program." The regulations shall define conditions under which food producers, processors and sellers may label food products as "Grown in the United States" or label food products as "Made of Ingredients Grown in the United States." Any food product which contains a significant amount of imported ingredients shall not be permitted to participate in the Grown in the United States Food Labeling Program.

SEC. 3. The Secretary of Agriculture and the Commissioner of the Food and Drug Administration shall conduct a comprehensive review of all existing federal country of origin food labeling requirements and within six months of the date of enactment of this act shall issue a report which analyses the adequacy of current federal country of origin food labeling requirements and makes recommendations to the Congress to improve country of origin information available to American consumers.

---

By Mr. BRYAN (for himself and Mr. REID):

S. 2643. A bill to improve source separation and recycling of paper products by Federal agencies and the Congress, and for other purposes; to the Committee on Environment and Public Works.

FEDERAL PAPER SEPARATION, RECYCLING, AND WASTE SOURCE REDUCTION ACT

Mr. BRYAN. Mr. President, I rise today to address a growing concern for all Americans. Landfills all across our country are being filled to capacity by the 3.6 pounds of garbage produced daily by each American. It is estimated that within the next 4 years, one-third of all landfills, the final destination for 80 percent of our garbage, will close. Not surprisingly, few of us look forward to the opening of new landfills in our neighborhoods. We must find a better way to manage solid waste disposal.

Recycling and source reduction, the reuse of our waste and the elimination of unnecessary packaging, has become a theme for many in this environmentally aware year. In Congress, countless bills have been introduced to encourage recycling by private industry, and to mandate it by State governments. I support many of these efforts. However, I believe that the Federal Government must provide leadership by example.

It is easy to direct others to do what we would rather not do ourselves. However, as the Nation's largest consumer of paper, it is up to the Federal Government to show leadership in solving what has become a national municipal waste crisis. Today, I am introducing the Federal Paper Separation, Recycling, and Waste Source Reduction Act of 1990, a bill requiring Congress and Federal agencies to separate and recycle wastepaper, and to encourage them to purchase recycled paper products.

Paper alone accounts for more than 45 percent of our landfill space. In Federal office buildings, up to 85 percent of all garbage is wastepaper. This alone shows the importance of a successful Government recycling program.

However, there are other reasons. The paper industry has declared its intention to increase paper recycling capacity through the 1990's. What is needed is a dependable supply of reusable paper, and a sustainable demand for recycled products. Given its enormous consumption of paper, the Federal Government must set the standard for creating both supply and demand.

Recycling makes good sense. Trash disposal costs will continue to increase as old landfills shut down, but a properly run separation and recycling program is a moneymaker. In one agency here in Washington, employees bring reusable items to an office recycling bin, and the proceeds funds an office day care center. Under my bill, agencies will be able to use proceeds from their recycling program to fund further recycling activities, making the program self-sustaining and decreasing trash disposal costs.

Buying recycled paper is equally important to any recycling effort, because paper will only be reused when there is demand for the recycled product. EPA has already laid the groundwork for purchasing recycled paper by issuing recycled content guidelines for paper products. My bill will build on that by allowing agencies to spend up to 5 percent more for recycled paper, a price preference that the experience of several States shows to be an inexpensive way to promote recycling.

Recycling alone cannot solve our solid waste problems. Most of us are already familiar with oversized and often redundant packaging of products, most of which takes up valuable landfill space. Disposables have replaced longer lived product, and have also added to the growing amount of trash generated per person in this country. My bill begins the overdue process of finding ways to reduce the amount of garbage produced at its source. By purchasing appropriately packaged and more durable goods, we can lead the Nation to better waste management.

Managing our resources in an ecologically responsible and cost-effective way is a goal I know I share with most Americans. Passage of this bill shows our determination to conserve our precious timber resources. It demonstrates our resolve to meet the challenges of solid waste management in the 1990's. And, most importantly, it puts our National Government out front as the leader in a crucial environmental effort.

---

By Mr. LUGAR (for himself and Mr. COATS):

S. 2644. A bill to amend the Food Stamp Act of 1977 to make clarifications in provisions relating to general assistance vendor payments, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

AMENDING THE FOOD STAMP ACT OF 1977

● Mr. LUGAR. Mr. President, I rise today, along with my colleague from

Indiana, Senator COATS, to introduce a bill to correct an inequity in the operation of the Food Stamp Program. This inequity hits hardest in my home State of Indiana. However, portions of other States are affected as well.

Under the Food Stamp Program, the benefit level is decided in large part on the basis of family income where benefits are reduced as income increases. Under current food stamp rules, certain payments made to third parties on behalf of the poor are counted as income. Other such payments are not counted. The treatment of these so-called vendor payments is the source of my concern.

Indiana does not have a general assistance program that provides for direct cash transfers to needy, low-income households. Rather, Indiana dispenses aid in these circumstances through its township by way of a program known as poor relief assistance. There are 1,008 township trustees in Indiana, each operating an autonomous poor relief program, funded by tax assessments on the township's property tax base.

Poor relief is provided for many purposes, including housing, utilities, food, medical care, household goods and furnishings, clothing, and school textbooks. While the details of poor relief assistance vary from township to township, one characteristic is universal—poor relief is never paid in the form of a cash grant directly to the poor household. Assistance is occasionally given in the form of in-kind donation of goods. More often, assistance is provided by way of vendor or third-party payments. When a poor family qualifies for a specific type of assistance, the trustee issues a voucher made out to the vendor of the needed goods or services. The vendor provides the goods or services to the eligible family and turns in the voucher for reimbursement from township funds.

Effective in 1985, due to a policy change, Indiana began counting the value of poor relief assistance as income under the Food Stamp Program.

The nutritional well-being of poor families in Indiana is in jeopardy as a result of this policy. The key point here is that assistance in the form of a voucher or vendor payment is assistance that is targeted for a specific purpose whether that be school textbooks, clothing, heating oil, or shelter. A voucher or vendor payment is just like in-kind assistance. The use of the voucher is simply a convenience for the township trustee that eliminates the need for the trustee to directly distribute the range of goods and services that the Poor Relief Act calls upon him to supply to eligible families. The poor family's food purchasing power is not enhanced by the assistance when it is paid in this form. When food stamp benefits are reduced due to the receipt of the assistance, the family is without additional cash resources to make up the shortfall in food purchasing power.

Under current food stamp rules, many types of vendor payments are excluded from income. For example, vendor payments for medical assistance, child care assistance, energy assistance, certain housing assistance, farmworker assistance, and emergency and special assistance are now excluded. In my view, the vendor payments in Indiana are analogous to emergency and special assistance.

My bill would return Indiana to its treatment prior to 1985. But it would also do more. Some jurisdictions in other States also use vendor payments. In those situations, the bill would exclude the value of the vendor payments to the extent they were not for housing assistance, excluding energy assistance.

Mr. President, I ask that the text of the bill be printed in the RECORD and I encourage my colleagues to support this bill.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2644

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. GENERAL ASSISTANCE VENDOR PAYMENTS.

(a) IN GENERAL.—Paragraph (1) of section 5(k) of the Food Stamp Act of 1977 (7 U.S.C. 2014(k)(1) is amended to read as follows:

"(1) For purposes of subsection (d)(1), assistance provided to a third party on behalf of a household by a State or local government shall be considered money payable directly to the household if assistance is provided in lieu of a regular benefit payable to the household for living expenses under a State plan for aid to families with dependent children approved under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.)."

(b) CLARIFICATION.—Section 5(k) of such Act (7 U.S.C. 2014(k)) is amended by adding at the end thereof the following new paragraph:

"(4) For purposes of subsection (d)(1)—

"(A) except as provided in subparagraph (B), assistance provided to a third party on behalf of a household by a State or local government shall be considered money payable directly to the household if such assistance is provided as part of a benefit to the household for housing expenses, not including energy or utility-cost assistance, under a State or local general assistance program or another basic assistance program comparable to general assistance (as determined by the Secretary); and

"(B) assistance provided to a third party on behalf of a household under a State or local general assistance program, or another local basic assistance program comparable to general assistance (as determined by the Secretary), shall not be considered money payable to a household if, under State law, no assistance under such program may be provided directly to the household in the form of cash payment.".●

By Mr. INOUYE:

S. 2645. A bill to improve the health status of the urban Indian population and to enhance the quality and scope of health care services, disease prevention activities, and health promotion initiatives targeted at the urban American Indian population; to the Select Committee on Indian Affairs.

URBAN INDIAN HEALTH EQUITY ACT

● Mr. INOUYE. Mr. President, I am today introducing a bill that I hope will begin to lay the foundation of our efforts to address the health care needs of American Indians residing in urban areas. While there are extensive programs administered by the Indian Health Service to provide for the health care of those Indian people residing on reservations, relatively little has been done to extend these same services to the over 50 percent of the Indian population that resides in urban settings.

Statistics indicate that urban Indians suffer an equally poor health status as their reservation-based brothers and sisters, but their access to health care services is in many cases much more difficult. The transition from reservation to urban life is difficult—cut off from their families, their culture, and their reservations, urban Indians find themselves isolated and alienated, without resources to adapt and cope with the dramatic changes in their environment. There is a high incidence of child abuse and spousal abuse, alcohol and drug abuse amongst urban Indian populations, and few if any services available to address these needs.

If enacted, this bill would provide health promotion and disease prevention services, much-needed mental health services, and child sexual abuse prevention services. Additionally, it will authorize support for urban health care facilities that are in a serious state of disrepair. Finally, the bill will provide for an assessment of child welfare services available to the urban Indian population.

Mr. President, I ask unanimous consent that a section-by-section analysis be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS

PURPOSE

To improve the health status of the urban Indian population and to enhance the quality and scope of health care services, disease prevention activities and health promotion initiatives targeted at the urban American Indian population.

SECTION 1. SHORT TITLE

This Act may be cited as the "Urban Indian Health Equity Act".

SECTION 2. FINDINGS

1. The urban Indian population as a result of Federal relocation initiatives represent up to 50 percent of the total American

Indian population and receives comparatively minimal assistance through the Indian Health Service (IHS).

2. The American Indian Policy Review Commission reported to the Congress that up to 160,000 Indian people were relocated under the Bureau of Indian Affairs (BIA) relocation program.

3. That one-half of the 1.7 million Indian people in the United States reside in urban areas.

4. Less than one percent of the IHS annual budget provides for health services to urban Indians.

5. Annual funding for urban Indian health programs has not been comparatively consistent with other IHS programs.

6. The purchasing power of annual appropriations for urban Indian health care has decreased by 70 percent from 1978 to 1988.

7. Urban Indian people suffer from the same low health status which affects Indian people on reservations caused primarily from lifestyle factors, including alcoholism, substance abuse, poor diet, family instability and mental health problems.

## TITLE I.—HEALTH PROMOTION AND DISEASE PREVENTION

### SECTION 101. SERVICES

(a) CONTRACTS. THE SECRETARY, ACTING THROUGH THE IHS, SHALL PROVIDE HEALTH PROMOTION AND DISEASE PREVENTION SERVICES TO URBAN INDIANS THROUGH CONTRACTS WITH THE URBAN INDIAN HEALTH ORGANIZATIONS FUNDED UNDER SECTION 503(A) OF THE INDIAN HEALTH CARE AMENDMENTS ACT OF 1988, FOR THE PROVISION OF HEALTH PROMOTION AND DISEASE PREVENTION ACTIVITIES.

(b) Health promotion and disease prevention is defined as: (1) Services that improve the health and well being of Indians, and (2) Services that reduce the expenses for medical care.

(c) Health Promotion includes:

1. Cessation to tobacco smoking and chewing,
2. Reduction in the misuse of alcohol and drugs,
3. Improvement in nutrition,
4. Improvement in physical fitness,
5. Family planning,
6. Control of stress, and
7. Pregnancy and infant care (including prevention of Fetal Alcohol Syndrome).

(d) Disease Prevention includes:

1. Immunizations,
2. Control of high blood pressure,
3. Control of sexually transmittable diseases,
4. Prevention and control of diabetes,
5. Control of toxic agents,
6. Occupational safety and health,
7. Accident prevention,
8. Control of infectious agents, and
9. AIDS Prevention and Education.

(e) Authorization Levels. There are authorized to be appropriated such sums as may be necessary for each fiscal year 1991, 1992, and 1993 for the purpose of carrying out this section. Sums appropriated pursuant to this authorization shall remain available without fiscal year limitation.

## TITLE II.—IMMUNIZATION INITIATIVE

### SECTION 201. FUNDING

(a) Contracts. The Secretary, acting through the IHS, shall provide funding for immunization services and immunization initiatives to urban Indians through contracts with the Urban Indian Health organizations funded under section 503 (a) of the Indian Health Care Amendments Act of 1988.

(b) Criteria. In entering into contracts pursuant to subsection (a), the Secretary of Health and Human Services shall take into consideration, the:

1. Size of the Urban Indian population,
2. Immunization levels of patient population,
3. Available alternate resources, and
4. Capability of the organization.

(c) Services. Immunization services for which funding will be provide shall include:

1. Purchase of vaccines and other supplies needed to provide immunization services for infants and children,
2. Staffing to deliver immunization services,
3. Printing and dissemination of educational materials.

(d) Authorization Levels. There are authorized to be appropriated such sums as may be necessary for each fiscal year 1991, 1992, and 1993 for the purpose of carrying out this section.

## TITLE III.—MENTAL HEALTH SERVICES

### SECTION 301. GRANTS

(a) Contracts. The Secretary, acting through the IHS, shall make grants available to urban Indians organizations contracted under section 503(a) of the Indian Health Care Amendments Act of 1988, for the provision of mental health services to urban Indian populations.

(b) Services. Such grants shall be available, among other mental health needs, for the following:

1. To conduct mental health need assessments of urban Indian communities, to assess the mental health needs in the community, the available resources, discrepancies in health services, and to develop and implement plans to improve health delivery;
2. To provide outreach, education, and referral services to urban Indian populations providing a linkage to available direct services, educating the community about mental health issues and services, and networking to improve health delivery;
3. Provide outpatient mental health services including identification, assessment, therapeutic treatment, case management, supports groups, family treatment, and other services; and
4. To develop innovative mental health service delivery models which incorporate cultural support systems and resources.

(c) Authorization Levels. There are authorized to be appropriated such sums as may be necessary for each fiscal year 1991, 1992, and 1993 for the purpose of carrying out this section.

## TITLE IV.—SPECIAL INITIATIVE TO TREAT AND PREVENT INDIAN CHILD SEXUAL ABUSE IN URBAN INDIAN COMMUNITIES.

### SECTION 401. CHILD SEXUAL ABUSE

(a) Contracts. The Secretary, acting through the IHS, shall provide contracts to urban organizations contracting under section 503(a) of the urban Indian Health Care Amendments Act of 1988, for the provision of services to prevent or treat child sexual abuse in urban Indian communities.

(b) Services. Services eligible to funded under this section include:

1. Services involving needs assessments to assess the prevalence of child sexual abuse; and to determine resources available to treat child victims, families, and perpetrators of child sexual abuse; to determine barriers to access of these services; and the development and implementation of plans to prevent and treat child sexual abuse in urban Indian communities.
3. Services to develop prevention, training, and education programs targeted at urban Indian communities, to include:
   a. Child education,
   b. Parent education,
   c. Provider training on identification,
   d. Education on reporting requirements, and
   e. Prevention campaigns.
3. Services to provide direct outpatient treatment services to child victims of sexual abuse, adult survivors of child sexual abuse, families of child victims, and perpetrators of child sexual abuse in urban Indian communities, to include:
   a. Individual mental health treatment,
   b. Family mental health treatment,
   c. Group Therapy, and
   d. Support groups.

(c) Criteria. The Secretary of Health and Human Services, in making contracts with urban Indian organizations for the provision of services, shall take the following criteria into consideration:

1. The urban Indian organization must demonstrate support from the child protection authorities in the area, including committees or other services funded under the Indian Child Welfare Act
2. The urban Indian organization must demonstrate the capability and expertise to address the complex problem of child sexual abuse in their community;
3. Before being considered for funding under this section, the urban Indian organization must have completed a needs assessment which meets the approval of the IHS.

(d) Authorization Levels. There are authorized to be appropriated such sums as may be necessary for each fiscal year 1991, 1992, and 1993 for the purpose of carrying out this section.

## TITLE V—FACILITIES IMPROVEMENT FUND

### SECTION 501. FACILITIES

(a) Contracts. The Secretary, acting through the IHS, shall provide contracts to urban Indian organizations contracting under section 503(a) of the Indian Health Care Amendments Act of 1988, for the purposes of renovating, expanding, or relocating facilities for the delivery of health services and for the purposes of purchasing equipment.

(b) Criteria. The Secretary shall establish criteria for the contracting of services under this title, which shall include:

1. A needs assessment which documents the need, cost effectiveness, capability of the organization, and acceptability of the development plans for the capital project;
2. Assurances that the urban Indian organization meets acceptable standards of performance, evaluations and fiscal responsibility; and
3. Assurances that alternate resources have been examined and have been factored into the capital project or have been shown to be available.

(c) Authorization Levels. There are authorized to be appropriated such sums as may be necessary for each fiscal year 1991, 1992, and 1993 for the purpose of carrying out this section.

## TITLE VI.—EQUITY FUNDING

### SECTION 601. FUNDING INCREASES

The Congress finds and declares that funding for urban Indian health programs should increase, on the annual basis, at least

at the same rate as the overall Indian Health Service.

TITLE VII.—REPORTS

SECTION 701. REPORTS TO THE CONGRESS

(a) The Secretary, acting through the IHS, shall report to Congress no later than March 1992 an assessment of the health status of the urban Indian population, the utilization of health services by urban Indians and legislative recommendations for improving the health status of urban Indians.

(b) The Secretary of Health and Human Services and the Secretary of Interior shall report to Congress no later than March 1992 their assessment of the status of Indian child welfare in urban Indian communities, including informaiton on the volume of child protection cases, the prevalence of child sexual abuse, the extent of urban coordination with tribal authorities, and their legislative recommendations to imporove Indian child protection in urban communities.●

---

By Mr. HATFIELD (for himself and Mr. BRADLEY):

S.J. Res. 316. Joint resolution to designate the second Sunday in October 1990 as "National Children's Day"; to the Committee on the Judiciary.

NATIONAL CHILDREN'S DAY

● Mr. HATFIELD. Mr. President, countless times over the years I have come to this floor to point out the obvious: the foundation of this Nation's security rests not in well-stocked arsenals but in the health and education and housing of its citizens. And I have come to this floor time and time again to speak of peace through strength: the peace which comes through strong schools, strong social services, and strong families—the peace which can only be achieved by addressing human needs and the root human causes of violence and despair.

This time, Mr. President, the verse is a little different but my tune is exactly the same. I rise today to introduce a joint resolution designating the second Sunday in October as National Children's Day. I do so because I believe that our children are this Nation's most valuable resource—and because I believe that we ought to set aside a day to recognize that simple fact.

The premise of this joint resolution is captured by a comment made by President Herbert Hoover at his White House Conference on the Health and Protection of the Child six decades ago:

> If we could have but one generation of properly born, trained, educated and healthy children, a thousand other problems of government would vanish.

I ask unanimous consent that a copy of the Children's Charter developed during that conference be included in the RECORD following my remarks. Those of my colleagues who are familiar with the Children's Charter know that it is a remarkable document.

Unfortunately, however, it is a document of goals which remain unmet—six long decades after they were put forward. From prenatal care to child care, from safe housing to secure streets: we know the needs, but they remain unmet.

Let me offer my colleagues a vision of our children on the eve of the 21st century. Today, 1 in 5 children lives in poverty—and 1 in 5 children lives with a single parent. By the year 2000, both numbers will be 1 in 4. And by the year 2000, 1 in every 5, 20-year-old woman will be a mother—4 in 5 will not be married, and only 6 in 10 will have a high school diploma.

These numbers are horrifying, Mr. President, but it seems all too easy to think of them as just that: numbers. What we must do is add the human dimension to this vision.

Every day—every single day—in this country, 27 children die in poverty because they were not immunized, because they were not fed, because they were not sheltered. Every day nine children are killed by a bullet—nine young lives are snatched from us by the random violence of our streets. And every day, Mr. President, six children across this Nation commit suicide.

We are not just talking about quality of life—we are talking about life itself. Individual human lives—individual children with real names and real faces who are being swallowed up by violence and despair. And the toll—the human toll—rises every day.

This joint resolution is not going to change those facts. That, Mr. President, is partially our job—and partially the job of parents, teachers, business, and community leaders across this country. But this joint resolution is going to make us stop and think—about the precious resources we have and about our stewardship responsibilities as a nation and as individuals.

I introduce this joint resolution with a heavy heart—the unmet human needs in our midst are growing every day. But I also introduce this joint resolution with great joy—as the father of four children, I know first hand the hope our children represent. In the words of Abraham Lincoln:

> A child is a person who is going to carry on what you have started. He is going to sit where you are sitting and when you are gone, attend to those things which you think are important. You may adopt all the policies you please, but how they are carried out depends on him. He will assume control of your cities, your States, your Nation. He is going to move in and take your churches, your schools, your university, your corporations. * * * The fate of humanity is in his hands.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE CHILDREN'S CHARTER—PRESIDENT HOOVER'S WHITE HOUSE CONFERENCE ON CHILD HEALTH AND PROTECTION RECOGNIZING THE RIGHTS OF THE CHILD AS THE FIRST RIGHTS OF CITIZENSHIP PLEDGES ITSELF TO THESE AIMS FOR THE CHILDREN OF AMERICA

I. For every child spiritual and moral training to help him to stand firm under the pressure of life.

II. For every child understanding and the guarding of his personality as his most precious right.

III. For every child a home and that love and security which a home provides; and for that child who must receive foster care, the nearest substitute for his own home.

IV. For every child full preparation for his birth, his mother receiving prenatal, natal, and postnatal care; and the establishment of such protective measures as will make child-bearing safer.

V. For every child health protection from birth through adolescence, including: periodical health examinations and, where needed, care of specialists and hospital treatment; regular dental examination and care of the teeth; protective and preventive measures against communicable diseases; the insuring of pure food, pure milk, and pure water.

VI. For every child from birth through adolescence, promotion of health, including health instruction and a health program, wholesome physical and mental recreation, with teachers and leaders adequately trained.

VII. For very child a dwelling place safe, sanitary, and wholesome, with reasonable provisions for privacy, free from conditions which tend to thwart his development; and a home environment harmonious and enriching.

VIII. For every child a school which is safe from hazards, sanitary, properly equipped, lighted, and ventilated. For younger children nursery schools and kindergartens to supplement home care.

IX. For every child a community which recognizes and plans for his needs, protects him against physical dangers, moral hazards, and disease; provides him with safe and wholesome places for play and recreation; and makes provision for his cultural and social needs.

X. For every child and education which, through the discovery and development of his individual abilities, prepares him for life; and through training and vocational guidance prepares him for a living which will yield him the maximum of satisfaction.

XI. For every child such teaching and training as will prepare him for successful parenthood, homemaking, and the rights of citizenship; and, for parents, supplementary training to fit them to deal wisely with the problems of parenthood.

XII. For every child education for safety and protection against accidents to which modern conditions subject him—those to which he is directly exposed and those which, through loss or maiming of his parents, affect him indirectly.

XIII. For every child who is blind, deaf, crippled, or otherwise physically handicapped, and for the child who is mentally handicapped, such measures as will early discover and diagnose his handicap, provide care and treatment, and so train him that he may become an asset to society rather than a liability. Expenses of these services should be borne publicly where they cannot be privately met.

XIV. For every child who is in conflict with society the right to be dealth with intelligently as society's charge, not society's outcast; with the home, the school, the church, the court and the institution when needed, shaped to return him whenever possible to the normal stream of life.

XV. For every child the right to grow up in a family with an adequate standard of living and the security of the stable income as the surest safeguard against social handicaps.

XVI. For every child protection against labor that stunts growth, either physical or mental, that limits education, that deprives children of the right of comradeship, of play, and of joy.

XVII. For every rural child as satisfactory schooling and health services as for the city child, and an extension to rural families of social, recreational, and cultural facilities.

XVIII. To supplement the home and the school in the training of youth, and to return to them those interests of which modern life tends to cheat children, every stimulation and encouragement should be give to the extension and development of the voluntary youth organizations.

XIX. To make everywhere available these minimum protections of the health and welfare of children, there should be a district, county, or community organization for health, education, and welfare, with full-time officials, coordinating with a state-wide program which will be responsive to a nation-wide service of general information, statistics, and scientific research. This should include:

(a) Trained, full-time public health officials, with public health nurses, sanitary inspection, and laboratory workers

(b) Available hospitals

(c) Full-time public welfare service for the relief, aid, and guidance of children in special need due to poverty, misfortune, or behavior difficulties, and for the protection of children from abuse, neglect, exploitation, or moral hazard.

For every child these rights, regardless of race, or color, or situation, wherever he may live under the protection of the American Flag.●

## ADDITIONAL COSPONSORS

S. 345

At the request of Mr. DODD, the name of the Senator from Nevada [Mr. REID] was added as a cosponsor of S. 345, a bill to grant employees family and temporary medical leave under certain circumstances, and for other purposes.

S. 416

At the request of Mr. DOMENICI, the name of the Senator from Utah [Mr. GARN] was added as a cosponsor of S. 416, a bill to provide that all Federal civilian and military retirees shall receive the full cost of living adjustment in annuities payable under Federal retirement systems for fiscal years 1990 and 1991, and for other purposes.

S. 1207

At the request of Mr. PACKWOOD, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of S. 1207, a bill to amend the Communications Act of 1934 to reform the radio broadcast license renewal process and for other purposes.

S. 1384

At the request of Mr. DASCHLE, the names of the Senator from Nebraska [Mr. KERREY] and the Senator from South Carolina [Mr. HOLLINGS] were added as cosponsors of S. 1384, a bill to amend title XVIII of the Social Security Act to provide direct reimbursement under part B of Medicare for nurse practitioner or clinical nurse specialist services that are provided in rural areas.

S. 1860

At the request of Mr. BOREN, the name of the Senator from North Carolina [Mr. SANFORD] was added as a cosponsor of S. 1860, a bill to amend title 38, United States Code, to require the Secretary of Veterans Affairs to furnish outpatient medical services for any disability of a former prisoner of war.

S. 1974

At the request of Mr. HARKIN, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 1974, a bill to require new televisions to have built in decoder circuitry.

S. 2044

At the request of Mr. BIDEN, the names of the Senator from Wisconsin [Mr. KASTEN] and the Senator from Nevada [Mr. REID] were added as cosponsors of S. 2044, a bill to require tuna products to be labeled respecting the method used to catch the tuna, and for other purposes.

S. 2056

At the request of Mr. HARKIN, the name of the Senator from South Dakota [Mr. DASCHLE] was added as a cosponsor of S. 2056, a bill to amend title XIX of the Public Health Service Act to provide grants to States and implement State health objectives plans, and for other purposes.

S. 2097

At the request of Mr. PELL, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 2097, a bill to promote and encourage alternative nondefense uses of defense facilities, to provide assistance for the retraining of unemployed defense workers whose employment is terminated, and to provide adjustment assistance to communities adversely affected by the termination or curtailment of defense contracts or the closure or realignment of military installations.

S. 2112

At the request of Mr. METZENBAUM, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of S. 2112, a bill to amend the National Labor Relations Act to prevent discrimination based on participation in labor disputes.

S. 2125

At the request of Mr. DODD, the name of the Senator from Kansas [Mrs. KASSEBAUM] was added as a cosponsor of S. 2125, a bill to condition the availability of United States assistance for El Salvador.

S. 2146

At the request of Mr. DASCHLE, the names of the Senator from North Dakota [Mr. BURDICK], the Senator from Wisconsin [Mr. KASTEN], and the Senator from Iowa [Mr. GRASSLEY] were added as cosponsors of S. 2146, a bill to clarify the authority of the Small Business Administration to make disaster assistance loans to small businesses in case of disasters determined by the Secretary of Agriculture.

S. 2240

At the request of Mr. KENNEDY, the name of the Senator from Georgia [Mr. NUNN] was added as a cosponsor of S. 2240, a bill to amend the Public Health Service Act to provide grants to improve the quality and availability of care for individuals and families with HIV disease, and for other purposes.

S. 2274

At the request of Mr. GLENN, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 2274, a bill to establish a Federal pay system with locality-based adjustments.

S. 2284

At the request of Mr. KASTEN, the name of the Senator from Kentucky [Mr. MCCONNELL] was added as a cosponsor of S. 2284, a bill to amend the Federal Food, Drug, and Cosmetic Act to define the term light or reduced fat butter, and for other purposes.

S. 2365

At the request of Mr. DECONCINI, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of S. 2365, a bill to amend the Controlled Substances Act to prohibit advertisements intended to promote or facilitate the distribution or transfer of a schedule I controlled substance.

S. 2385

At the request of Mr. DOMENICI, the names of the Senator from Alaska [Mr. STEVENS], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Pennsylvania [Mr. HEINZ], and the Senator from California [Mr. WILSON] were added as cosponsors of S. 2385, a bill to establish the National Forest Foundation.

S. 2387

At the request of Mr. DECONCINI, the name of the Senator from Alabama [Mr. SHELBY] was added as a cosponsor of S. 2387, a bill to amend the Internal Revenue Code of 1986 to exempt Federal law enforcement officers and firefighters from the penalty tax on early distributions from retirement plans.

S. 2561

At the request of Mr. GORTON, the name of the Senator from California [Mr. WILSON] was added as a cospon-

sor of S. 2561, a bill to amend the Controlled Substances Act with respect to the regulation of precursor chemicals.

S. 2595

At the request of Mr. MCCONNELL, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of S. 2595, a bill to amend the Federal Election Campaign Act of 1971 to reduce special interest influence on elections, to increase competition in politics, to reduce campaign costs, and for other purposes.

SENATE JOINT RESOLUTION 274

At the request of Mr. LAUTENBERG, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of Senate Joint Resolution 274, a joint resolution to designate the week beginning June 10, 1990 as "National Scleroderma Awareness Week."

SENATE JOINT RESOLUTION 282

At the request of Mr. WILSON, the names of the Senator from Wyoming [Mr. WALLOP] and the Senator from Kansas [Mrs. KASSEBAUM] were added as cosponsors of Senate Joint Resolution 282, a joint resolution to designate the decade beginning January 1, 1990, as the "Decade of the Child."

SENATE JOINT RESOLUTION 292

At the request of Mr. PELL, the names of the Senator from Alabama [Mr. HEFLIN] and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of Senate Joint Resolution 292, a joint resolution to designate the year 1991 as the "Year of the Lifetime Reader."

SENATE JOINT RESOLUTION 295

At the request of Mr. DANFORTH, the name of the Senator from Wyoming [Mr. SIMPSON] was added as a cosponsor of Senate Joint Resolution 295, a joint resolution proposing an amendment to the Constitution of the United States to prohibit the Supreme Court or any inferior court of the United States from ordering the laying or increasing of taxes.

SENATE JOINT RESOLUTION 301

At the request of Mr. PELL, the names of the Senator from Illinois [Mr. DIXON], the Senator from Alabama [Mr. SHELBY], the Senator from New York [Mr. MOYNIHAN], the Senator from Arizona [Mr. DECONCINI], the Senator from Arkansas [Mr. BUMPERS], the Senator from Virginia [Mr. WARNER], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Michigan [Mr. LEVIN], the Senator from Idaho [Mr. MCCLURE], and the Senator from Arkansas [Mr. PRYOR] were added as cosponsors of Senate Joint Resolution 301, a joint resolution designating October 1990 as "National Breast Cancer Awareness Month."

SENATE JOINT RESOLUTION 311

At the request of Mr. INOUYE, the names of the Senator from South Carolina [Mr. HOLLINGS] and the Senator from Nebraska [Mr. EXON] were added as cosponsors of Senate Joint Resolution 311, a joint resolution to designate the month of November 1990 as "National American Indian and Alaska Native Heritage Month."

SENATE CONCURRENT RESOLUTION 96

At the request of Mr. LAUTENBERG, his name was added as a cosponsor of Senate Concurrent Resolution 96, a concurrent resolution to urge the administration in the strongest possible terms not to propose civil air transport services for inclusion under the General Agreement on Tariffs and Trade [GAFT], or the proposed General Agreement on Trade in Services [GATS], and to actively oppose any proposal that would consider civil air transport services as a negotiation item.

At the request of Mr. FORD, the name of the Senator from South Dakota [Mr. PRESSLER] was added as a cosponsor of Senate Concurrent Resolution 96, supra.

SENATE CONCURRENT RESOLUTION 99

At the request of Mr. PRYOR, the name of the Senator from South Dakota [Mr. PRESSLER] was added as a cosponsor of Senate Concurrent Resolution 99, a concurrent resolution expressing the sense of the Congress concerning the 25th anniversary of the Older Americans Act of 1965.

SENATE CONCURRENT RESOLUTION 127

At the request of Mr. KENNEDY, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of Senate Concurrent Resolution 127, a concurrent resolution to express the sense of Congress that Greyhound Lines, Inc., and the Amalgamated Transit Union should pursue meaningful negotiations under the auspices of the Federal Mediation and Conciliation Service and the Secretary of Labor to resolve their dispute and restore vital transportation services to American communities.

## SENATE CONCURRENT RESOLUTION 130 URGING THE ADOPTION OF A VICTIMS OF CRIME BILL OF RIGHTS

Mr. DOLE submitted the following concurrent resolution; which was referred to the Committee on the Judiciary:

S. CON. RES. 130

*Resolved by the Senate (the House of Representatives concurring),* That it is the sense of Congress that the States should make every effort to adopt the goals of the following Victims of Crime Bill of Rights.

(1) A victim of crime should be treated with compassion, respect, and dignity throughout the criminal justice process.

(2) A victim of crime should be reasonably protected from the accused throughout the criminal justice process.

(3) A victim of crime should have a statutorily-designated advisory role in decisions involving prosecutorial discretion such as the decision to plea-bargain.

(4) A victim of crime deserves comprehensive reform of the exculsionary rule, the application of which often results in the release of criminals on technicalities, rather than for substantive reasons.

(5) A victim of crime has the right to a reasonable assurance that the accused will be tired in an expeditious manner.

(6) A victim of crime has the right to be present at all proceedings related to the offense, unless the victim is to testify and the court determines that the victim's testimony would be materially prejudiced by hearing other testimony at the trail.

(7) A victim of crime has the right to information about the conviction, sentencing, and imprisonment of the person who committed the crime.

(8) A victim of crime should be compensated for the damage resulting from the crime, and to the fullest extent possible, the person convicted of the crime should be required to provide at least part of the compensation.

(9) A victim of crime should have a statutorily-designated advisory role in deciding the early release status of the person convicted of the crime.

(10) A victim of crime should never be forced to endure again the emotional and physical consequences of the original crime.

Mr. DOLE. Mr. President, I join today with the distinguished Republican leader of the House of Representatives, BOB MICHEL, in introducing the victims of crime bill of rights.

WHAT ABOUT THE VICTIMS

Next week, the Senate is scheduled to consider comprehensive crime legislation. The various bills now on the table cover such diverse topics as habeas corpus reform, the exclusionary rule, the death penalty, prison construction, and the enforcement of our Nation's gun and drug laws.

No doubt about it, these are all important subjects that deserve the serious attention of Congress. And hopefully next week these subjects will indeed get our serious attention.

But when the Senate dives into some of the very technical and complex aspects of criminal justice reform, I hope that we don't lose sight of the most important reason for taking up crime legislation.

Any crime bill should assist our law enforcement agencies. It should help the cop on the beat. And it should make the criminal justice system more accessible and more reliable.

But, most importantly, any crime bill must respect, protect, and yes, enhance the often-overlooked rights of the real-life victims of crime.

THE SCOPE OF THE PROBLEM

The Justice Department recently released statistics showing that an alarming 36.1 million crimes were committed in 1989. Although the total number of crimes committed in 1989 was generally unchanged from 1988, certain types of crimes are—unfortunately—on the rise.

Completed robbery was up by 21 percent. Household larceny was up by 4

percent. And motor vehicle theft was up by 5.5 percent.

What is probably most disturbing is the fact that almost 23 million crimes were not reported to the police last year. Some attribute the underreporting to a lack of faith in the criminal justice system. And some victims of crime are just too afraid to bring their dreadful experiences to the attention to the local law enforcement authorities.

Congress must change this. It must embolden the victims of crime. And it must make the American people aware that victims of crime have rights too, and that these rights deserve the protections of our Nation's laws.

Mr. President, that's what the victims of crime bill of rights is all about.

THE SCOPE OF THE CONCURRENT RESOLUTION

The resolution that I am introducing today simply suggests to the States that they should make every effort to adopt the goals of the victims of crime bill of rights.

Mr. President, these goals are simple and straightforward. Nothing fancy.

Victims of crime should be treated with compassion, respect and dignity throughout the criminal justice process.

Victims of crime should have a statutorily designated advisory role in decisions involving prosecutorial discretion such as the decision to plea bargain.

Victims of crime have the right to a reasonable assurance that the accused will be tried in an expeditious manner.

Victims of crime have the right to information about the conviction, sentencing, and imprisonment of the person who committed the crime against them.

And victims of crime should be compensated, to the fullest extent possible, by the person who actually committed the crime against them.

These are the ideals of the victims of crime bill of rights. And these are the goals for which our Nation's criminal justice system should strive.

CONCLUSION

Mr. President, 83 percent of all Americans will be victimized by violent crime during their lifetimes, and a violent crime affects one person in this country every 20 seconds.

Obviously, crime victimization is not a special interest issue. It is an issue that—sadly—effects every citizen of this country.

America is still the land of the free. But our precious freedoms will dwindle away, if we do not take a firm stand against the plague of crime and a firm stand on behalf of those who are its unfortunate victims.

Mr. President, I ask unanimous consent that the full text of the Justice Department statistics be inserted in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TABLE 1.—NATIONAL CRIME SURVEY: VICTIMIZATION LEVELS AND RATES, PRELIMINARY 1989

| Type of crime | Number of victimizations | | | Victimization rates | | |
|---|---|---|---|---|---|---|
| | 1988 | Preliminary 1989 | Percent change | 1988 | Preliminary 1989 | Percent change |
| All crimes | 35,795,820 | 36,077,630 | +0.8 | | | |
| Personal crimes | 19,965,940 | 20,315,360 | +1.8 | 100.1 | 100.9 | +0.8 |
| Crimes of violence | 5,909,560 | 5,933,070 | +.4 | 29.6 | 29.4 | −.6 |
| Completed | 2,179,980 | 2,224,360 | +2.0 | 10.9 | 11.0 | +1.1 |
| Attempted | 3,729,580 | 3,708,270 | −.6 | 18.7 | 18.4 | −1.5 |
| Rape [1] | 127,360 | 116,560 | −8.5 | .6 | .5 | −9.4 |
| Robbery | 1,047,980 | 1,162,240 | +10.9 | 5.3 | 5.8 | +9.8 |
| Completed | 684,260 | 829,770 | [2] 21.3 | 3.4 | 4.1 | +20.1 |
| Attempted | 363,720 | 337,570 | −7.2 | 1.9 | 1.8 | −8.1 |
| Assault | 4,734,180 | 4,660,530 | −1.6 | 23.8 | 23.2 | −2.5 |
| Aggravated | 1,741,380 | 1,691,380 | −2.9 | 8.8 | 8.5 | −3.8 |
| Completed with injury | 570,580 | 559,270 | −2.0 | 2.9 | 2.8 | −2.9 |
| Attempted with weapon | 1,170,800 | 1,131,790 | −3.3 | 5.9 | 5.7 | −4.2 |
| Simple | 2,992,800 | 2,968,790 | −.8 | 15.0 | 14.7 | −1.7 |
| Completed with injury | 859,580 | 808,960 | −5.9 | 4.3 | 4.0 | −6.8 |
| Attempted without weapon | 2,133,220 | 2,161,470 | +1.3 | 10.7 | 10.7 | +.4 |
| Crimes of theft | 14,056,380 | 14,384,770 | +2.3 | 70.5 | 71.5 | +1.4 |
| Completed | 13,241,810 | 13,537,450 | +2.2 | 66.4 | 67.2 | +1.3 |
| Attempted | 814,570 | 847,050 | +4.0 | 4.1 | 4.2 | +3.0 |
| Personal larceny with contact | 489,360 | 559,820 | +14.4 | 2.5 | 2.8 | +13.3 |
| Personal larceny without contact | 13,567,000 | 13,824,960 | +1.9 | 68.1 | 68.7 | +.9 |
| Completed | 12,795,380 | 13,018,320 | +1.7 | 64.2 | 64.7 | +.8 |
| Attempted | 771,620 | 806,300 | +4.5 | 3.9 | 4.0 | +3.5 |
| Household crimes | 15,829,880 | 15,768,110 | −.4 | 169.6 | 166.0 | −2.1 |
| Completed | 13,554,670 | 13,481,600 | −.5 | 145.2 | 141.9 | −2.3 |
| Attempted | 2,275,210 | 2,285,650 | +.5 | 24.4 | 24.1 | −1.3 |
| Burglary | 5,776,770 | 5,274,690 | [2] −8.7 | 61.9 | 55.5 | [2] −10.3 |
| Completed | 4,585,330 | 4,165,270 | [2] −9.2 | 49.1 | 43.8 | [2] −10.8 |
| Attempted forcible entry | 1,191,440 | 1,108,410 | −7.0 | 12.8 | 11.7 | −8.6 |
| Household larceny | 8,419,000 | 8,779,800 | [2] +4.3 | 90.2 | 92.4 | +2.5 |
| Completed | 7,896,430 | 8,225,930 | +4.2 | 84.6 | 86.6 | +2.3 |
| Attempted | 522,570 | 553,050 | +5.8 | 5.6 | 5.8 | +4.0 |
| Motor vehicle theft | 1,634,060 | 1,723,160 | +5.5 | 17.5 | 18.1 | +3.6 |
| Completed | 1,072,870 | 1,094,880 | +2.1 | 11.5 | 11.5 | +.3 |
| Attempted | 561,190 | 628,780 | +12.0 | 6.0 | 6.6 | +10.1 |

[1] Includes completed and attempted rape.
[2] The preliminary differences is statistically significant at the 95% confidence level.

Note.—Detail may not add to total shown because of rounding. Percent change is based on unrounded numbers. Victimization rates are calculated on the basis of the number of victimizations per 1,000 persons age 12 or over (personal crimes) or per 1,000 households (household crimes). If the trends that occurred during the first part of 1989 were to be reversed during the latter half, especially during the final 3 months, then it likely that some of the changes seen in the preliminary estimates would no longer be statistically significant in the final data.

TABLE 2. NATIONAL CRIME SURVEYS: NUMBER AND PROPORTION OF CRIMES REPORTED TO POLICE, PRELIMINARY 1989

| Type of crime | Number of crimes reported to police | | | Proportion reported to police | | |
|---|---|---|---|---|---|---|
| | 1988 | Preliminary 1989 | Percent change | 1988 | Preliminary 1989 | Percent change |
| All crimes | 13,032,240 | 13,141,670 | +.8 | 36.4 | 36.4 | +.1 |
| Personal crimes | 6,689,490 | 6,735,620 | +.8 | 36.4 | 36.4 | +.1 |

TABLE 2. NATIONAL CRIME SURVEYS: NUMBER AND PROPORTION OF CRIMES REPORTED TO POLICE, PRELIMINARY 1989—Continued

| Type of crime | Number of crimes reported to police | | | Proportion reported to police | | |
|---|---|---|---|---|---|---|
| | 1988 | Preliminary 1989 | Percent change | 1988 | Preliminary 1989 | Percent change |
| Crimes of violence | 2,829,900 | 2,728,000 | −3.6 | 47.9 | 46.0 | −4.0 |
| Completed | 1,257,910 | 1,253,110 | −.4 | 57.7 | 56.3 | −2.4 |
| Attempted | 1,571,990 | 1,474,550 | −6.2 | 42.2 | 39.3 | −5.7 |
| Rape | 57,210 | 51,120 | −10.7 | 44.9 | 43.9 | −2.4 |
| Robbery | 597,870 | 663,780 | +11.0 | 57.1 | 57.1 | +.1 |
| Completed | 440,750 | 512,380 | +16.3 | 64.4 | 61.8 | −4.1 |
| Attempted | 157,120 | 150,290 | −4.3 | 43.2 | 44.5 | +3.1 |
| Assault | 2,174,780 | 2,019,660 | −7.1 | 45.9 | 43.3 | −5.7 |
| Aggravated | 945,910 | 887,060 | −6.2 | 54.3 | 52.5 | −3.4 |
| Completed with injury | 331,350 | 335,830 | +1.4 | 58.1 | 60.1 | +3.4 |
| Attempted with weapon | 614,560 | 550,350 | −10.4 | 52.5 | 48.6 | −7.4 |
| Simple | 1,228,870 | 1,132,430 | −7.8 | 41.1 | 38.1 | −7.1 |
| Completed with injury | 443,440 | 383,700 | −13.5 | 51.6 | 47.4 | −8.1 |
| Attempted without weapon | 785,430 | 749,580 | −4.6 | 36.8 | 34.7 | −5.8 |
| Crimes of theft | 3,859,590 | 4,008,670 | +3.9 | 27.5 | 27.9 | +1.5 |
| Completed | 3,667,820 | 3,793,690 | +3.4 | 27.7 | 28.0 | +1.2 |
| Attempted | 191,770 | 216,080 | −12.7 | 23.5 | 25.5 | +8.4 |
| Personal larceny with contact | 172,280 | 189,410 | +9.9 | 35.2 | 33.8 | −3.9 |
| Personal larceny without contact | 3,687,290 | 3,819,200 | +3.6 | 27.2 | 27.6 | +1.6 |
| Completed | 3,499,340 | 3,607,620 | +3.1 | 27.4 | 27.7 | +1.3 |
| Attempted | 187,950 | 213,020 | +13.3 | 24.4 | 26.4 | +8.5 |
| Household crimes | 6,342,750 | 6,405,960 | +1.0 | 40.1 | 40.6 | +1.4 |
| Completed | 5,593,890 | 5,640,450 | +.8 | 41.3 | 41.8 | +1.4 |
| Attempted | 748,860 | 765,010 | +2.2 | 32.9 | 33.5 | +1.7 |
| Burglary | 2,931,460 | 2,667,220 | [2] +9.0 | 50.8 | 50.6 | −.4 |
| Completed | 2,553,610 | 2,312,090 | [2] −9.5 | 55.7 | 55.5 | −.3 |
| Attempted forcible entry | 377,850 | 354,390 | −6.2 | 31.7 | 32.0 | +.8 |
| Household larceny | 2,215,970 | 2,463,500 | [2] +11.2 | 26.3 | 28.1 | +6.6 |
| Completed | 2,079,170 | 2,327,850 | [2] −12.0 | 26.3 | 28.3 | +7.5 |
| Attempted | 136,800 | 138,200 | +1.0 | 26.2 | 25.0 | −4.5 |
| Motor vehicle theft | 1,195,280 | 1,286,120 | −7.6 | 73.2 | 74.6 | +2.0 |
| Completed | 961,080 | 1,009,700 | +5.1 | 89.6 | 92.2 | +2.9 |
| Attempted | 234,000 | 277,570 | +18.5 | 41.7 | 44.1 | +5.8 |

[1] Includes completed and attempted rape.
[2] The preliminary difference is statistically significant at the 95 percent confidence level.
Note.—Detail may not add to total shown because of rounding. Percent change is based on unrounded numbers. Also see note on table 1.

## SENATE RESOLUTION 285—MAKING APPOINTMENTS TO CERTAIN COMMITTEES

Mr. MITCHELL submitted the following resolution; which was considered and agreed to:

S. RES. 285

*Resolved,* That the Senator from Hawaii (Mr. Akaka) is hereby appointed to serve as a member on the Committee on Energy and Natural Resources, the Committee on Governmental Affairs, and the Committee on Veterans Affairs for the 101st Congress.

## SENATE RESOLUTION 286—MAKING ADDITIONAL MAJORITY APPOINTMENTS TO CERTAIN COMMITTEES

Mr. MITCHELL submitted the following resolution; which was considered and agreed to:

S. RES. 286

*Resolved,* That the Senator from Ohio (Mr. Metzenbaum) is hereby appointed to serve as a member on the Committee on Environment and Public Works, in lieu of the Committee on Energy and Natural Resources; the Senator from Louisiana (Mr. Breaux) is hereby appointed to serve as a member of the Committee on Finance, in lieu of the Committee on Environment and Public Works; and the Senator from New Mexico (Mr. Bingaman) is hereby appointed to serve as a member on the Committee on Labor and Human Resources, in lieu of the Committee on Governmental Affairs.

SEC. 2. Strike in paragraph 4(h)(2) of Rule XXV the words "Committee on Governmental Affairs" and insert in lieu thereof "Committee on Labor and Human Resources".

SEC. 3. Strike in paragraph 4(h)(9) of Rule XXV all after "(9)" through the word "Judiciary" and insert the following: "A Senator who is appointed on May 16, 1990 to serve on the Committee on Environment and Public Works and is serving on the Committee on the Judiciary".

## AMENDMENTS SUBMITTED

## COMPREHENSIVE AIDS RESOURCES EMERGENCY ACT

### HELMS (AND OTHERS) AMENDMENT NO. 1624

Mr. HELMS (for himself, Mr. COATS, Mr. NICKLES, Mr. THURMOND, Mr. SYMMS, and Mr. LOTT) proposed an amendment to the bill (S. 2240) to amend the Public Health Service Act to provide grants to improve the quality and availability of care for individuals and families with HIV disease, and for other purposes, as follows:

At the appropriate place, insert the following new section:

SEC. . PROHIBITION ON USE OF FUNDS.

None of the funds authorized by this Act, or an amendment made by this Act, shall be allocated to any State, metropolitan area, or rural area, if such State, metropolitan area, or rural area, carries out any program for the distribution of—

(1) sterile needles for the hypodermic injection of any illegal drug; or

(2) bleach for the purpose of cleansing needles for such hypodermic injection;

unless the President certifies that such programs are effective in stopping the spread of HIV and do not encourage the use of illegal drugs.

### KENNEDY (AND HATCH) AMENDMENT NO. 1625

Mr. KENNEDY (for himself and Mr. HATCH) proposed an amendment to the bill S. 2240, supra, as follows:

At the appropriate place, insert the following:

SEC. . PROHIBITION ON USE OF FUNDS.

None of the funds made available under this Act, or an amendment made by this Act, shall be used to provide individuals with hypodermic needles or syringes so that such individuals may use illegal drugs.

### HELMS AMENDMENT NO. 1626

Mr. HELMS proposed an amendment to the bill S. 2240, supra, as follows:

At the appropriate place, insert the following new section:

Chapter 51 of title 18, United States Code, is amended by adding at the appropriate place the following:

"SEC. . PROTECTION AGAINST THE HUMAN IMMUNODEFICIENCY VIRUS.

"(a) It shall be unlawful for any individual to knowingly donate, or sell, or to knowingly attempt to donate, or sell blood, semen, tissues, organs, or other bodily fluids if such individual—

"(1) knows on the basis of clinical or laboratory evidence, that such individual is infected with the human immunodeficiency virus or;

"(2) is an individual who, on or after January 1, 1977, is or has been a user of any intravenous drug, the sale, distribution, or use of which is prohibited under Federal or State law at the time the individual injected the drug or;

"(3) is an individual who has engaged in prostitution on or after January 1, 1977, or;

"(b) Transmission of the human immunodeficiency virus does not have to occur for a person to have committed a violation of this section.

"(c) Any person who violates the provisions of subsection (a) shall be subject to a fine of not less than $10,000 nor more than $20,000 and imprisoned for not less than 1 year nor more than 10 years, or both.

"(d) For purposes of this section the term "sexual intercourse" includes the acts described in section 2256(2)(A) of this title.".

## KENNEDY (AND HATCH) AMENDMENT NO. 1627

Mr. KENNEDY (for himself and Mr. HATCH) proposed an amendment to the bill S. 2240, supra, as follows:

At the appropriate place, insert the following new subsection:

SEC. . REQUIREMENT OF STATE LAWS PROTECTING DONATIONS OF BLOOD.

The Secretary of Health and Human Services shall not make a grant to a State under this Act, or an amendment made by this Act, unless the Secretary determines that the criminal laws of the State are adequate to prosecute any individual who knowingly and intentionally donates, or knowingly and intentionally attempts to donate, blood, blood products, semen, tissues, organs, or other bodily fluids if such individual—

(1) has been diagnosed on the basis of laboratory evidence as infected with the human immunodeficiency virus; and

(2) has been informed that he or she is infected with the human immunodeficiency virus and has knowledge of the risk of transmission of such virus, through donated blood, blood products, semen, tissues, organs, or other bodily fluids.

Nothing in this Act shall preclude any State from making it a crime to donate, knowingly and intentionally, or knowingly and intentionally attempt to donate, blood, blood products, semen, tissues, organs, or other bodily fluids by (1) an individual who, on or after January 1, 1977, is or has been a user of any intravenous drug, the sale, distribution, or use of which is prohibited under Federal or State law after the time the individual injected the drug or; (2) an individual who has engaged in prostitution on or after January 1, 1977.

## HATCH (AND KENNEDY) AMENDMENT NO. 1628

Mr. HATCH (for himself and Mr. KENNEDY) proposed an amendment to the bill, S. 2240, supra, as follows:

At the appropriate place insert the following:

There is authorized an additional 150 full-time equivalent positions to the Food and Drug Administration. The positions established by this authority are to be used for the inspection of blood banks and producers of blood products.

There is also authorized an appropriation of $1,500,000 to carry out this activity in fiscal year 1991 and such sums as may be necessary through fiscal year 1995.

## NICKLES AMENDMENT NO. 1629

Mr. NICKLES proposed an amendment to the bill, S. 2240, supra, as follows:

At the appropriate place insert the following:

TITLE —MISCELLANEOUS PROVISIONS

SEC. . TECHNICAL CORRECTIONS TO THE PRISON TESTING ACT OF 1988.

Section 902 of the Prison Testing Act of 1988 (42 U.S.C. 300ee-6) is amended—

(1) in subsection (b)(2)—

(A) by striking out "may" in subparagraph (A) and inserting in lieu thereof "will"; and

(B) by striking out subparagraph (B) and inserting in lieu thereof the following new subparagraph:

(B) victims of aggravated sexual abuse, as described in subsection (c)(2), will be informed of the results of the test, if the person convicted of the aggravated sexual assault tests positive for exposure to the human immunodeficiency virus and if the victim requests to be so informed after the victim is notified of the right of the victim to be informed under this subparagraph.";

(2) in subsection (c)(2)—

(A) by striking out "99" and inserting in lieu thereof "109A"; and

(B) by striking out "rape" and inserting in lieu thereof "aggravated sexual abuse"; and

(3) in subsection (g), by striking out "1990" and inserting in lieu thereof "1995".

## COATS (AND HELMS) AMENDMENT NO. 1630

Mr. COATS (for himself and Mr. HELMS) proposed an amendment to the bill, S. 2240, supra, as follows:

On page 57, strike out lines 8 through 15.

## CHEMICAL AND BIOLOGICAL WEAPONS CONTROL ACT

## PELL (AND HELMS) AMENDMENT NO. 1631

Mr. PELL (for himself and Mr. HELMS) proposed an amendment to the bill, S. 195, entitled the "Chemical and Biological Weapons Control Act of 1989", as follows:

In lieu of the matter proposed to be inserted by the Committee amendment, insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Chemical and Biological Weapons Control Act of 1990".

SEC. 2. FINDINGS.

The Congress finds that—

(1) chemical weapons were employed in the recent Iran-Iraq war and by Iraq in attacks against its Kurdish minority;

(2) the use of chemical and biological weapons in violation of international law is abhorrent and requires immediate and effective sanctions;

(3) United Nations Security Council Resolution 620, adopted on August 26, 1988, states the intention of the Security Council to consider immediately "appropriate and effective" sanctions against any country using chemical and biological weapons in violation of international law;

(4) the Declaration of the Paris Conference on the Prohibition of Chemical Weapons demonstrates the resolve of most countries to reaffirm support for the 1925 protocol banning the use of chemical and bacteriological weapons and to press for attainment of a ban on the production and possession of chemical weapons;

(5) as many as 20 countries, including Iran, Iraq, Syria, and Libya have or are seeking the capability to produce chemical weapons;

(6) as many as 10 countries are working to produce biological weapons;

(7) by the year 2000, at least 15 developing countries will have the ability to produce ballistic missiles capable of carrying chemical or biological warheads;

(8) the further spread of chemical or biological weapons capabilities would pose a threat of incalculable proportions to friends and allies of the United States and undermine the national security of the United States;

(9) the United Nations should create an effective means of monitoring and reporting regularly on commerce in equipment, materials, and technology applicable to the attainment of a chemical or biological weapons capability; and

(10) every effort should be made to conclude an early agreement banning the production and stockpiling of chemical or biological weapons.

SEC. 3. PURPOSE.

It is the purpose of this Act—

(1) to mandate United States sanctions and to encourage international sanctions against countries that use chemical or biological weapons in violation of international law or use lethal chemical or biological weapons against their own nationals;

(2) to require presidential reports on efforts that threaten United States interests or regional stability by Iran, Iraq, Syria, Libya, and others to acquire the materials and technology to develop, produce, stockpile, and deliver chemical and biological weapons;

(3) to urge cooperation with other supplier nations to devise effective controls on the transfer of materials, equipment, and technology applicable to chemical or biological weapons production;

(4) to promote agreements banning the transfer of missiles suitable for armament with chemical or biological warheads;

(5) to encourage an early agreement banning the development, production, and stockpiling of chemical weapons; and

(6) to seek effective international means of monitoring and reporting regularly on commerce in equipment, materials, and technology applicable to the attainment of a chemical or biological weapons capability.

TITLE I—SANCTIONS AGAINST THE USE OF CHEMICAL AND BIOLOGICAL WEAPONS

SEC. 101. SANCTIONS FOR THE USE OF CHEMICAL WEAPONS.

(a) DETERMINATION BY THE PRESIDENT.—(1) Whenever information becomes available to the United States Government indicating the substantial possibility that, on or after the date of enactment of this Act, a foreign country has used chemical or biological weapons, the President shall, within 60 days of the receipt of such information by the United States Government, make a determination as to whether that foreign country, on or after such date, has used chemical or biological weapons in violation of international law or has used lethal chemical or biological weapons against its own nationals.

(2) Not later than 60 days after the chairman of the Committee on Foreign Relations of the Senate, upon consultation with the ranking minority member of such Committee, or the chairman of the Committee on Foreign Affairs of the House of Representatives, upon consultation with the ranking minority member of such Committee, re-

quests the President to make a determination as to whether or not a foreign country, on or after the date of enactment of this Act, has used chemical or biological weapons in violation of international law or has used lethal chemical or biological weapons against its own nationals, the President shall make such determination and so report in writing to the chairmen of such Committees.

(3) In making the determination under paragraph (1) or (2), the President shall consider the following:

(A) All physical and circumstantial evidence available bearing on the possible use of such weapons.

(B) All information provided by alleged victims, witnesses, and independent observers.

(C) The extent of the availability of the weapons in question to the purported user.

(D) All official and unofficial statements bearing on the possible use of such weapons.

(E) Whether, and to what extent, the country in question is willing to honor a request from the Secretary General of the United Nations to grant timely access to a United Nations fact-finding team to investigate the possibility of chemical or biological weapons use or to grant such access to other legitimate outside parties.

(b) SANCTIONS.—In the event of a Presidential determination under subsection (a) that, on or after the date of enactment of this Act, a foreign country has used chemical or biological weapons in violation of international law or has used lethal chemical or biological weapons against its own nationals, then the President shall—

(1) terminate assistance to that country under the Foreign Assistance Act of 1961, except for urgent humanitarian assistance, or for the purpose of purchasing food or other agricultural products;

(2) terminate all foreign military sales financing under the Arms Export Control Act with respect to that country;

(3) terminate United States Government sales to that country of any defense articles or defense services;

(4) prohibit the issuance of any licenses for the export to that country of any item on the United States Munitions List;

(5) prohibit, under the authorities of section 6 of the Export Administration Act of 1979, the export to that country of any goods or technology except food or other agricultural products;

(6) oppose, in accordance with section 701 of the International Financial Institutions Act, the extension of any loan or financial or technical assistance to that country by international financial institutions;

(7) prohibit the import of any good, commodity, or service from that country;

(8) deny that country any credit or credit guarantees through the Export-Import Bank of the United States;

(9) prohibit any United States bank from making any loan or providing any credit to that country, except for loans or credits for the purpose of purchasing food or other agricultural products; and

(10) terminate, consistent with international law, the landing rights in the United States of any airline owned by the government of that country at the earliest practicable date.

SEC. 102. WAIVER.

The President may waive the applicability of some or all of the sanctions listed in section 101 with respect to a specific country for a period of not to exceed nine months beginning on the date of the determination by the President of use by that country of chemical or biological weapons in violation of international law, or the use of lethal chemical or biological weapons against its own nationals, if he determines that such waiver is in the national interest of the United States and so certifies to the Speaker of the House of Representatives and the President of the Senate. Together with such certification, the President shall submit in writing a statement containing a detailed explanation of the national interest requiring a waiver, which may include a classified addendum if necessary.

SEC. 103. NOTIFICATION.

Not later than five days after he imposes any sanction described in section 101 against a country or waives under section 102 the applicability of any such sanction, the President shall so notify in writing the Speaker of the House of Representatives and the President of the Senate.

SEC. 104. CONTRACT SANCTITY.

(a) SANCTIONS NOT APPLIED TO EXISTING CONTRACTS.—(1) No sanction described in paragraphs (6) through (10) of section 101(b) shall apply to any activity pursuant to any contract or international agreement entered into before the date of the appropriate presidential determination under section 101(a) unless the President determines, on a case-by-case basis, that to so apply such sanction would prevent the performance of a contract or agreement that would have the effect of assisting a country in using chemical or biological weapons in violation of international law or in using lethal chemical or biological weapons against its own nationals.

(2)(A) The same restrictions of section 6(m) of the Export Administration Act of 1979 which are applicable to exports prohibited under section 6 of that section shall apply to exports prohibited under section 101(b)(5).

(B) For purposes of subparagraph (A) of this paragraph, any contract or agreement the performance of which (as determined by the President) would have the effect of assisting a country in using chemical or biological weapons in violation of international law or in using lethal chemical or biological weapons against its own nationals shall be treated as constituting a breach of the peace that poses a serious and direct threat to the strategic interest of the United States, within the meaning of subparagraph (A) of section 6(m) of that Act.

(b) SANCTIONS APPLIED TO EXISTING CONTRACTS.—The sanctions described in paragraphs (1), (2), (3), and (4) of section 101 shall apply to contracts and agreements, without regard to the date such contracts or agreements were entered into, except that such sanctions shall not apply to any contract or agreement entered into before the date of the appropriate presidential determination under section 101(a) if the President determines that the application of such sanction would be detrimental to the national security interests of the United States.

SEC. 105. REMOVAL OF SANCTIONS.

The President may remove the sanctions imposed pursuant to section 101 of this Act if the President determines and so certifies to the Speaker of the House of Representatives and the President of the Senate that the country under sanction—

(1) has renounced any use of chemical or biological weapons in violation of international law, or any use of lethal chemical or biological weapons against its own nationals, and has provided reliable assurances to that effect; and

(2) has made satisfactory restitution to those affected in its earlier use of chemical or biological weapons in violation of international law or in its earlier use of lethal chemical or biological weapons against its own nationals.

SEC. 106. PRESIDENTIAL REPORTS.

Not later than 90 days after the date of enactment of this Act, and every 12 months thereafter, the President shall submit to the Speaker of the House of Representatives and the President of the Senate, a report—

(1) detailing efforts by countries or subnational groups that threaten United States security interests or regional stability (including efforts by Iran, Iraq, Libya, and Syria and other developing countries or subnational groups) to acquire the materials and technology to develop, produce, stockpile, and deliver chemical and biological weapons, together with an assessment of the present and future capabilities of such countries or subnational groups to develop, produce, stockpile, and deliver chemical and biological weapons;

(2) describing the degree to which any country or foreign person has aided or abetted the government of any country or a subnational group to engage in any activity in connection with the acquisition of any such chemical or biological weapon; and

(3) listing all United States persons against whom administrative, civil, or criminal penalties have been applied for shipment of goods and technology controlled for chemical and biological weapons proliferation purposes pursuant to the Export Administration Act of 1979 or the Arms Export Control Act.

To the extent practicable, reports submitted pursuant to this section should be based on unclassified information. Portions of each such report may be classified.

SEC. 107. MULTILATERAL EFFORTS.

The President is urged—

(1) to continue close cooperation with others in the Australia Group in support of its current efforts and in devising additional means to monitor and control the supply of chemicals applicable to weapons production to Iraq, Iran, Syria, and Libya—countries that currently support or have recently supported acts of international terrorism;

(2) to work closely with other countries also capable of supplying equipment, materials, and technology with particular applicability to chemical or biological weapons production to devise the most effective controls possible on the transfer of such materials, equipment, and technology;

(3) to seek agreements with countries that produce ballistic missiles suitable for carrying chemical or biological warheads that would prevent the transfer of such missiles; and

(4) to take the initiative in pressing for early conclusion of an international agreement banning the development, production, and stockpiling of chemical weapons.

SEC. 108. UNITED NATIONS INVOLVEMENT.

The President is urged to give full support to—

(1) the United Nations Security Council, in furtherance of Security Council Resolution 620, adopted August 26, 1988, in developing sanctions comparable to those enumerated in section 101 of this Act, to be imposed in the event that any country uses chemical or biological weapons in violation of international law; and

(2) the creation of an effective multilateral means of monitoring and reporting regularly on commerce in chemical equipment, materials, and technology applicable to the attainment of a chemical or biological weapons capability.

## TITLE II—MEASURES TO PREVENT THE PROLIFERATION OF CHEMICAL AND BIOLOGICAL WEAPONS

### SEC. 201. MULTILATERAL EFFORTS.

It is the policy of the United States to seek multilaterally coordinated efforts with other countries to control the proliferation of chemical and biological weapons.

### SEC. 202. EXPORT CONTROLS.

(a) IN GENERAL.—The President shall—

(1) use the authorities of the Arms Export Control Act to control the export of those defense articles and defense services, and

(2) use the authorities of the Export Administration Act of 1979 to control the export of those goods and technologies,

that the President determines would assist a country in acquiring the capability to develop, produce, stockpile, deliver, or use chemical or biological weapons.

(b) EXPORT ADMINISTRATION ACT.—Section 6 of the Export Administration Act of 1979 (50 U.S.C. App. 2405) is amended by adding at the end thereof the following new subsection:

"(q) CHEMICAL AND BIOLOGICAL WEAPONS.—(1) The Secretary, in consultation with the Secretary of State, shall establish and maintain a list of goods and technology that would directly and substantially assist a country or group in acquiring the capability to develop, produce, stockpile, or deliver chemical or biological weapons, the licensing of which would be effective in barring acquisition or enhancement of such capability;

"(2) The Secretary shall require a validated license for any export of goods or technology listed under paragraph (1) to any country except those with whose governments the United States has entered into bilateral or multilateral arrangements for the control of such goods or technology and such other countries as the President shall designate consistent with the purposes of this Act.

"(3) Notwithstanding any other provision of this Act, a determination of the Secretary to approve or deny an export license for the export of goods or technology under this subsection may be made only after consultation with the Secretary of State. If the Secretary disagrees with the Secretary of State regarding any determination under paragraph (1) or (2), the matter shall be referred to the President for resolution.".

### SEC. 203. SANCTIONS AGAINST CERTAIN FOREIGN PERSONS.

The Arms Export Control Act is amended by inserting after section 38 the following new section:

"SEC. 38A. SANCTIONS AGAINST CERTAIN FOREIGN PERSONS.

"(a) DETERMINATION BY THE PRESIDENT.—

"(1) IMPOSITION OF SANCTIONS.—The President, subject to subsection (d), shall impose on a foreign person the sanctions under subsection (b) if the President determines that the foreign person, on or after the date of the enactment of this section, has knowingly and materially contributed to the efforts to use, develop, produce, stockpile, or otherwise acquire chemical or biological weapons by any country that the President has determined has at any time after January 1, 1980—

"(A) used chemical or biological weapons in violation of international law;

"(B) used lethal chemical or biological weapons against its own nationals;

"(C) made substantial preparations to do the activities described in clause (A) or (B); or

"(D) been designated pursuant to section 6(j) of the Export Administration Act of 1979 as a country which supports international terrorism.

"(2) CONSULTATIONS WITH AND ACTIONS BY GOVERNMENT OF JURISDICTION.—The President may delay imposition of sanctions against a foreign person for a period of up to 90 days in order to pursue consultations with the government with primary jurisdiction over that foreign person involved in the activities cited in paragraph (1). Following these consultations, the President shall impose sanctions against the foreign person unless he has determined and certified to the Congress that such government has taken specific and effective actions, including appropriate penalties, to terminate the involvement of the foreign person in such activities.

"(3) REPORT TO CONGRESS.—The President shall report to the Congress, not later than 30 days after making a determination under paragraph (1), on the status of consultations with the appropriate government under paragraph (2), and the basis for any determination under paragraph (2) that such government has taken specific corrective actions.

"(b) SANCTIONS.—The sanctions to be imposed on a foreign person under subsection (a) are the following:

"(1) PROCUREMENT SANCTION.—The United States Government shall not procure, or enter into any contract for the procurement of, any goods or services from that foreign person.

"(2) IMPORT SANCTION.—The importation into the United States of products produced by that foreign person is prohibited.

"(c) TERMINATION OF SANCTIONS.—A sanction imposed on a foreign person under this section shall apply for a period of at least 24 months and in no case shall cease to apply to that foreign person until the expiration of the 12-month period beginning on the date the President determines and certifies to the Congress that the foreign person has ceased all activities described in subsection (a)(1).

"(d) EXCEPTIONS.—The President shall not be required under this section to apply sanctions—

"(1) in the case of procurement of defense articles or defense services—

"(A) under existing contracts or subcontracts, including the exercise of options for production quantities to satisfy United States operational military requirements;

"(B) if the President determines that the person or other entity to which the sanctions would otherwise be applied is a sole source supplier of the defense articles or services, that the defense articles or services are essential, and that alternative sources are not readily or reasonably available; or

"(C) if the President determines that such articles or services are essential to the national security under defense coproduction agreements;

"(2) to products or services provided under contracts entered into before the date on which the President publishes his intention to impose sanctions;

"(3) to—

"(A) spare parts,

"(B) component parts, but not finished products, essential to United States products or production, or

"(C) routine servicing and maintenance of products, to the extent that alternative sources are not readily or reasonably available;

"(4) to information and technology not directly useful for the development, production, or stockpiling of chemical or biological weapons; or

"(5) to medical or other humanitarian items.

"(e) DEFINITION.—For the purposes of this section, the term 'foreign person' means—

"(A) an individual who is not a citizen of the United States or an alien admitted for permanent residence to the United States; or

"(B) a corporation, partnership, or other entity, including any parent or subsidiary entity thereof, which is created or organized under the laws of a foreign country or which has its principal place of business outside the United States.".

### SEC. 204. SANCTIONS AGAINST CERTAIN FOREIGN PERSONS.

The Export Administration Act of 1979 (50 U.S.C. App. 2410) is amended by inserting after section 11A the following new section:

"CHEMICAL AND BIOLOGICAL WEAPONS PROLIFERATION

"SEC. 11B. (a) DETERMINATION BY THE PRESIDENT.—

"(1) IMPOSITION OF SANCTIONS.—The President, subject to subsection (d), shall impose on a foreign person the sanctions under subsection (b) if the President determines that the foreign person, on or after the date of the enactment of this section, has knowingly and materially contributed to the efforts to use, develop, produce, stockpile, or otherwise acquire chemical or biological weapons by any country that the President has determined has at any time after January 1, 1980—

"(A) used chemical or biological weapons in violation of international law;

"(B) used lethal chemical or biological weapons against its own nationals;

"(C) made substantial preparations to do the activities described in clause (A) or (B); or

"(D) been designated pursuant to section 6(j) of this Act as a country which supports international terrorism.

"(2) CONSULTATIONS WITH AND ACTIONS BY GOVERNMENT OF JURISDICTION.—The President may delay imposition of sanctions against a foreign person for a period of up to 90 days in order to pursue consultations with the government with primary jurisdiction over that foreign person involved in the activities cited in paragraph (1). Following these consultations, the President shall impose sanctions against the foreign person unless he has determined and certified to the Congress that such government has taken specific and effective actions, including appropriate penalties, to terminate the involvement of the foreign person in such activities.

"(3) REPORT TO CONGRESS.—The President shall report to the Congress, not later than 30 days after making a determination under paragraph (1), on the status of consultations with the appropriate government under paragraph (2), and the basis for any determination under paragraph (2) that such government has taken specific corrective actions.

"(b) SANCTIONS.—The sanctions to be imposed on a foreign person under subsection (a) are the following:

"(1) PROCUREMENT SANCTION.—The United States Government shall not procure, or enter into any contract for the procurement of, any goods or services from that foreign person.

"(2) IMPORT SANCTION.—The importation into the United States of products produced by that foreign person is prohibited.

"(c) TERMINATION OF SANCTIONS.—A sanction imposed on a foreign person under this section shall apply for a period of at least 24 months and in no case shall cease to apply to that foreign person until the expiration of the 12-month period beginning on the date the President determines and certifies to the Congress that the foreign person has ceased all activities described in subsection (a)(1).

"(d) EXCEPTIONS.—The President shall not be required under this section to apply sanctions—

"(1) in the case of procurement of defense articles or defense services—

"(A) under existing contracts or subcontracts, including the exercise of options for production quantities to satisfy United States operational military requirements;

"(B) if the President determines that the person or other entity to which the sanctions would otherwise be applied is a sole source supplier of the defense articles or services, that the defense articles or services are essential, and that alternative sources are not readily or reasonably available; or

"(C) if the President determines that such articles or services are essential to the national security under defense coproduction agreements;

"(2) to products or services provided under contracts entered into before the date on which the President publishes his intention to impose sanctions;

"(3) to—

"(A) spare parts,

"(B) component parts, but not finished products, essential to United States products or production, or

"(C) routine servicing and maintenance of products, to the extent that alternative sources are not readily or reasonably available;

"(4) to information and technology not directly useful for the development, production, or stockpiling of chemical or biological weapons; or

"(5) to medical or other humanitarian items.

"(e) DEFINITION.—For the purposes of this section, the term 'foreign person' means—

"(1) the term 'foreign person' means—

"(A) an individual who is not a citizen of the United States or an alien admitted for permanent residence to the United States; or

"(B) a corporation, partnership, or other entity, including any parent or subsidiary entity thereof, which is created or organized under the laws of a foreign country or which has its principal place of business outside the United States; and

"(2) the terms 'defense article' and 'defense service' have the same meanings as are given to such terms by paragraphs (3) and (4), respectively, of section 47 of the Arms Export Control Act.".

SEC. 205. DEFINITIONS.

For the purposes of this Act—

(1) the term "foreign person" means—

(A) an individual who is not a citizen of the United States or an alien admitted for permanent residence to the United States; or

(B) a corporation, partnership, or other entity, including any parent or subsidiary entity thereof, which is created or organized under the laws of a foreign country or which has its principal place of business outside the United States; and

(2) the terms "defense article" and "defense service" have the same meanings as are given to such terms by paragraphs (3) and (4), respectively, of section 47 of the Arms Export Control Act.

## TOURISM POLICY AND EXPORT PROMOTION ACT

### ROCKEFELLER AMENDMENT NO. 1632

Mr. PELL (for Mr. ROCKEFELLER) proposed an amendment to the bill (S. 1791) to amend the International Travel Act of 1961 to assist in the growth of international travel and tourism into the United States, and for other purposes, as follows:

Strike section 5 and insert in lieu thereof the following:

TOURISM TRADE BARRIERS

SEC. 5. (a) ANALYSIS AND ESTIMATES.—For calendar year 1990 and each succeeding calendar year, the Secretary of Commerce shall—

(1) identify and analyze acts, policies, or practices of each foreign country that constitute significant barriers to, or distortions of, United States travel and tourism exports;

(2) make an estimate of the trade-distorting impact on United States commerce of any act, policy, or practice identified under paragraph (1); and

(3) make an estimate, if feasible, of the value of additional United States travel and tourism exports that would have been exported to each foreign country during such calendar year if each of such acts, policies, and practices of such country did not exist.

(b) REPORT.—On or before March 31 of 1991 and each succeeding calendar year, the Secretary of Commerce shall submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives a report on the analysis and estimates made under subsection (a) for the preceding calendar year. The report shall include any recommendation for action to eliminate any act, policy, or practice identified under subsection (a).

### STEVENS AMENDMENT NO. 1633

Mr. GARN (for Mr. STEVENS) proposed an amendment to the bill S. 1791, supra, as follows:

On page 25, line 1, insert the phrase "or lands owned by an Alaska Native Corporation" after the word "reservation".

On page 32, line 7, insert the phrase "or lands owned by Alaska Native Corporations" after the word "reservations".

On page 32, line 10, insert the phrase "or lands owned by Alaska Native Corporations" after the word "reservations".

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. PELL. Mr. President, I ask unanimous consent that the full committee of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate, 9:30 a.m., May 16, 1990, for a business meeting to conduct pending calendar business.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON HUD INVESTIGATIONS

Mr. PELL. Mr. President, I ask unanimous consent that the HUD Investigations Subcommittee of the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Wednesday, May 16, 1990, at 10:30 a.m. to conduct an oversight hearing on the rebuilding of the Department of Housing and Urban Development.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CONSUMER AND REGULATORY AFFAIRS

Mr. PELL. Mr. President, I ask unanimous consent that the Subcommittee on Consumer and Regulatory Affairs of the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Wednesday, May 16, 1990, at 9:30 a.m. to conduct an oversight hearing on mortgage discrimination.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CONSUMER

Mr. PELL. Mr. President, I ask unanimous consent that the Subcommittee on Consumer of the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on May 16, 1990, at 9:30 a.m. to hold a hearing on environmental labeling.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. PELL. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, May 16, 1990, at 2 p.m. to hold a closed hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON SMALL BUSINESS

Mr. PELL. Mr. President, I ask unanimous consent that the Small Business Committee be authorized to meet during the session of the Senate on Wednesday, May 16, 1990, at 2 p.m. The committee will hold a hearing on the Small Business Administration's Small Business Investment Companies Program.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. PELL. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Wednesday, May 16, at 9:30 a.m. for a hearing on the legislation, S. 1235, relating to minority set-asides.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON WATER RESOURCES, TRANSPORTATION, AND INFRASTRUCTURE

Mr. PELL. Mr. President, I ask unanimous consent that the Subcommittee on Water Resources, Transportation, and Infrastructure, Committee on Environment and Public Works, be authorized to meet during the session of the Senate on Wednesday, May 16, beginning at 10 a.m., to conduct a hearing on the Hell Gate Bridge.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON MERCHANT MARINE

Mr. PELL. Mr. President, I ask unanimous consent that the Subcommittee on Merchant Marine, of the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on May 16, 1990, at 2 p.m. to hold a hearing on S. 2170, a bill to change the conditions under which carriers receiving operating differential subsidy can participate in domestic trade.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON STRATEGIC FORCES

Mr. PELL. Mr. President, I ask unanimous consent that the Subcommittee on Strategic Forces and Nuclear Deterrence of the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, May 16, 1990, at 2 p.m. to receive testimony on the space launch and command, control, communications and intelligence programs in review of S. 2171, the Department of Defense Authorization Act for fiscal year 1991.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

### TRIBUTE TO HOUSTON PEARCE

● Mr. SHELBY. Mr. President, it is with a great deal of pride that I rise today to pay tribute to Houston L. Pearce, one of Alabama's outstanding broadcasters, who was recently appointed to serve on the Board of Directors for the National Association of Broadcasters [NAB]. As one of the exceptional leaders in Alabama and Mississippi broadcasting over the years, the NAB recognized that Houston Pearce because of his vision for the future of the broadcasting industry would be a tremendous asset to the national association.

Houston is an extremely modest individual who claims that he is not a pioneer in the radio industry. I think that many people would disagree with his statement. Houston is indeed a pioneer in Alabama's radio history. He has always had a unique vision about the future of the broadcasting industry and has always had the courage and determination to make his ideas reality.

Houston began his career in radio as a young man with a dream—a dream to build a reputable radio network that would provide service to parts of rural Alabama. In 1959, his dream came true, when he and two business associates built WPRN in Butler, AL, and in 1964 built WBIB in Centreville, AL. These two stations were the first to provide radio service to these two areas of Alabama.

Houston Pearce gave the individuals living in these areas a special gift. For the first time, area residents were able to hear in their homes and cars news as it happened around the country and world. In addition, area residents were able to enjoy listening to music, as well as interesting and educational programming.

Having successfully entered the broadcast industry in Alabama in 1959, Houston formed Radio South, Inc., which is currently comprised of four stations, two sister stations in Jasper (WARF-AM and WFFN-FM) and two sister stations in Tuscaloosa (WTSK-AM and WTUG-FM). He is also the owner of WJDQ-AM-FM in Meridian, MS and has an interest in WGUD-FM-AM in Pascagoula, MS. Houston Pearce had the foresight to realize how important a medium FM would be long before it became popular, and he utilized the medium to ensure that Alabamians were well-informed and entertained.

To further his dream, Houston Pearce has been an active supporter of both the Alabama and Mississippi Broadcasters Associations. He has committed himself to improving the Alabama broadcast industry. For several years, he served as a board member of the Alabama Broadcasters Association [ABA] and is presently serving as president of that organization. In addition, he has worked to improve the broadcast industry across the country. Over the years, he has been an active supporter of the National Broadcast Association and has served on the legislative liaison committee.

Although business has been an important focus for Houston, he has also dedicated himself to helping others through the years. Houston is extremely involved in civic and professional activities. He has served as chairman of the Red Cross; as president and member of the board of directors for the Jasper Area Chamber of Commerce; and a member of the board of directors for the Jefferson-Walker-Shelby United Way. Houston Pearce is known by his friends and colleagues as a caring man and a concerned citizen who is committed to improving the quality of life for all Alabamians.

Mr. President, Houston Pearce embodies the very characteristics that identify the American spirit—faith, courage, and determination. He is a great source of pride for the State of Alabama and has given Jasper the opportunity to add yet another outstanding citizen to that city's history. I know that I join Houston's wife, Voncile, and his three children, Christie, Susan, and Dean, in sharing their pride in Houston's many accomplishments. I salute Houston as a man of great personal character, and I am honored to serve as one of his Representatives in Washington.●

### RETIREMENT OF DR. JAMES L. ROBINSON

● Mr. GRASSLEY. Mr. President, upon his retirement in June of 1990, Dr. James L. Robinson will complete 35 years of dedicated service toward quality education for Iowa's students. His relentless demand of the best for and from all students and teachers has resulted in high standards of achievements for thousands of young people who have grown up to appreciate and build on a good educational foundation.

Mr. President, James Robinson has been superintendent of schools in Cedar Falls, IA, since 1971. He was also superintendent for Vinton Community Schools and Radcliffe Community Schools and was principal at Galva Community High School. Dr. Robinson began his career as a social studies teacher in Glidden High School after receiving his B.A. from the University of Northern Colorado. He was selected to receive a fellowship school administration at Iowa State University, where he earned his doctoral degree in 1966. He is widely respected as a professional educator and as a humanitarian. His accomplishments will be long appreciated and remembered.●

### FORMER MEMBER OF CONGRESS JOHN S. WOLD ENDORSES CONGRESSIONAL TERM LIMITATION

● Mr. HUMPHREY. Mr. President, I would like to share with Senators another letter I have recently received from a former Member of Congress who supports term limitation. This one is from former Member John S. Wold, who represented Wyoming from 1969 to 1971.

I ask that former Member Wold's letter appear in the RECORD immediately following my remarks.

The letter follows:

CASPER, WY,
*May 7, 1990.*

Hon. GORDON J. HUMPHREY,
*U.S. Senate, Hart Senate Office Building, Washington, DC.*

DEAR SENATOR HUMPHREY: I want to congratulate you on your Congressional Term Limitation work. Your program for adoption of S.J. Resolution 235 has my full support.

As a former representative from Wyoming, I am very much aware of the many undesirable aspects of unlimited tenure of congressional membership.

Please list me as former Member of Congress who enthusiastically endorses your program. If I can be of assistance in furthering it, please let me know.

With kindest regards,

JOHN S. WOLD.●

## OPERATION EXODUS

● Ms. MIKULSKI. Mr. President, we have all rejoiced at the Soviet policy which allows Jews to emigrate more freely than in the past. Many Jews are choosing to make aliyah, and an expected 100,000 or more will arrive in Israel this year.

While the Israelis see this influx as a blessing, there are serious burdens as well. It will cost $3 billion to absorb the new immigrants. Forty thousand new housing units will have to be constructed. Job retraining and infrastructure improvements will be costly.

As you may know, the United States Jewish community has pledged to raise $420 million over the next 3 years to finance the resettlement of Soviet Jews. This effort has been named "Operation Exodus."

On May 6, I was honored to speak at a major fundraising event for Operation Exodus at Har Sinai in Baltimore. The Jewish community there will welcome 1,000 new immigrants and will contribute to resettlement costs in Israel.

Also addressing the gathering was Leon Uris, author of "Exodus." Mr. Uris reminded us of the refuseniks, left in the Soviet Union and the difficulty which Soviet Jews face in trying to practice their religion and keep their traditions. He analyzed the state of Soviet society today. And he discussed the ever-recurrent issue of anti-Semitism.

Mr. President, I ask that Leon Uris' remarks be printed in full in the RECORD at this point.

The remarks follow:

KEYNOTE ADDRESS, LEON URIS, OPERATION EXODUS, RALLY FOR SOVIET JEWS, MAY 6, 1990, BALTIMORE

Back in 1956 when I was writing "Exodus," my editor would phone me frantically whenever trouble broke out in the Middle East and he would plead with me to hurry and complete the manuscript.

I told him, "don't worry, whenever I finish it, the Jews will still be in trouble."

"Exodus" accomplished everything that I had hoped for it. But never in my wildest fantasy, did I believe my words would reach out and find the Lost Tribe of Israel entombed in the Soviet Union.

When the Communists took power after the First World War, the Jews were stripped of Torah and synagogue, of their press and educational facilities and every vestige of Jewish life. Morever, contact with the outside world was lost. We did not know for decades if there was a Jewish identity still in existence.

We were to get a resounding affirmation on Simchat Torah, forty years ago, when Golda Meir attended Moscow's lone synagogue. Thousands of Jews, in defiance of the authorities, came forth in one of the great moments of our history.

Some time afterwards, an incredible odyssey began. Israeli diplomats in the Soviet Union began passing around copies of "Exodus." It underwent dozens of secret and illegal translations and eventually became known as "the book." My proudest achievement is that "Exodus" was among the strongest catalysts in re-uniting the Jews of the Soviet Union with their history and stirred thousands of make aliyah. These translations were done at enormous risk. Typewritten manuscripts were passed from hand to hand in clandestine drop spots and had to be read throughout a single night, then passed along the next day for another family or group. Eighteen months ago in Boston, a well-known refusenik, Leonid Volvovsky presented me with a Medal of Freedom.

He had spent three years in a Siberian labor camp for the crime of dealing in "Exodus." And I am sorry to say there were many more who suffered his fate.

I was elated when B'nai B'rith asked me to travel to the Soviet Union to speak in their new lodges, as I had been denied a visa on several previous occasions.

Once inside the Soviet borders, it became clear that I had been allowed to enter because the masters of deceit who ruled the land that felt that I could serve their new glasnost propaganda drive in the West. "See, we have an open society now. We even welcome a Zionist enemy like Leon Uris." I was artfully separated from my people by manipulation and intimidation.

Large meeting halls in the center of Moscow and Leningrad were suddenly switched by the authorities at the last moment, to little rooms in the suburbs.

In Leningrad, two meetings were set in areas where gangs of fascist punks called the pamyat hung out and the unwritten message was clear, "Go hear Uris at your own risk." Likewise, I had been briefed about a number of Jews who worked for KGB front organizations. Sure enough they tried to arrange peace and brotherhood meetings with me with the intention of photographing me shaking their hands. Fortunately, my intelligence had been good and I was able to avoid them.

Refusniks who had accompanied me and dissident journalists scheduled to interview me were suddenly whisked away to KGB headquarters.

An airline flight was changed arbitrarily forcing me to cancel a precious appearance on Latvian TV.

In Moscow, I was to speak at the Macoile House, the new Jewish cultural hall which had opened its doors to millions of words of praise in the Western press.

My party was driven so far from the center of the city, I thought surely we must be nearing the Siberian border. We arrived at a nondescript building which bore no sign of Jewish life and I was led to a meeting room that held, perhaps a hundred people. We expressed our suspicion and an anguished argument followed.

The director of the Macoile Center finally admitted we had been moved to a neighborhood "Hall of Atheism." The Macoile Center, we learned had been selectively padlocked a week after it was opened. Foreign speakers were re-routed at the last minute on some flimsy pretext. The bottom line to all this is that there is no ongoing Jewish cultural institution in Moscow.

It was a fraud established to deceive the Western world. The Jews are still under very tight control, are universally considered to be the enemy of Russia and in the new era of glasnost, the KGB has not suddenly dissolved its four million or so agents and vanished into the night.

The KGB is still the fact of Soviet life, as we are going to learn over and over again, in the coming days and months. I did realize a moment of exaltation in Moscow that made the long and grueling journey worth while. On Simchat Torah I attended the same synagogue as Golda had forty years earlier.

This particular holiday has become a special day of Jewish recognition and a sea of people, perhaps fifteen or twenty thousand, flooded the street outside and thousands more were inside.

However, my presence was the best kept secret in Moscow. When I worked my way to a seat near the bimah, television camera lights suddenly went dark and I could see visible discomfort by the rabbi at my being there. A few minutes later, some brave soul grabbed the microphone and announced I was worshipping with them. After a gasp of silence, pandemonium erupted.

I was invited to carry a Torah through the temple, but the moment had become too awesome and I declined. Seated next to me was Connie Smukler of Philadelphia, who is a saint in the Russian Jewry movement. She turned to me and said, "Leon, just because you didn't write it, doesn't mean you can't carry it."

I took the scrolls and walked into a crush of humanity. Faces and hands blurred as they reached out to touch the Torah and then, they touched me and kissed me until I was almost drowned in their tears.

Outside the synagogue, TV cameras from CNN and foreign networks had been turned back by the ever-present KGB. As we have come to learn, the Soviet Union is a house about to collapse. It is a dreary and depressed land that cannot feed, house or clothe its citizens, or give them the smallest vestiges of pleasure.

Virtually nothing of physical beauty has been built by human hands since nineteen twelve, except the vaunted Metro, which runs on time. Every forty seconds its doors open with precision and disgorge dull-eyed, silent people, devoid of laughter, or smiles, or even conversation.

The escalators carry them up to the streets of mustard colored buildings about to crumble and they wear their weariness as though it were the national emblem. The currency is valueless, the ideals are bankrupt, the black market is rampant. Food is rationed to long lines of listless people who wait for everything, particularly vodka. The highways and the mines are obsolete.

The factories are the worst polluters in the world, lest we forget Chernobyl.

Hard currency hookers jam the lobbies of all the foreign hotels.

These are citizens largely without a work ethic, subservient to authority, fear-filled, who sold themselves for the illusion of birth to death security.

Perestroika is a contradiction in terms. One cannot restructure a house with a rotten foundation, by using the same gang of architects who built it in the first place. The Russian people have no central force to gravitate to, except the Communist Party that got them into this mess in the first place. It is a land that has never had a democratic experience in its past to light the way to its future. Here are people and groups and republics pulling in every direction being sucked into a vortex of ideological chaos. Comrade Gorbachev dances on the head of a pin, every day trying to plug up leaks in a dam that is about to burst. Is it going to be possible for Russia to survive the imminent collapse of communism without convulsions of earthquake magnitude and bloodshed?

How can we in the West expect a democracy to emerge where none has ever existed and by a people with no basic understanding of how a democracy works? On whose side will the military come down? Where will the KGB come down? Where will sixty million Moslems come down?

We have seen only the tip of the iceberg insofar as the rebellious republics are concerned. Lithuania and the Baltics will be peanuts when the Ukraine gets restless and wants independence.

Is it not likely that some extreme form of government will emerge, perhaps after a coup or a civil war?

The scent of fascism and ultra nationalism is everywhere. And do not expect the old line Stalinists to slink off quietly. The pendulum can swing in an instant like a sudden summer lightning and with the military or KGB, the Stalinists can bully their way back into power with a new era of terror. I don't know, you don't know, President Bush doesn't know and Gorbachev doesn't know.

To know this. All of it spells bad news for the Jews. Glasnost, the new free speech, was not a benevolent gift from the Communist Party to the people, but an admission that they no longer have the power to govern.

Despite this, Russian says to its Jews, "If you stay here we will continue to abuse you and if you leave you are traitors, because we need your brains."

The vile, vicious, violent by-product of glasnost is plain old down home Russian anti-Semitism, bubbling up toward a national eruption.

A pogrom was rumored for yesterday, but there is nothing in Russian history to indicate it won't happen tomorrow or next week or next month. It is now legal to hate Jews publicly and the Soviet citizenry cannot and will not look into themselves and take responsibility for this monstrous system they have created. They need to assign blame and they're going to use the big lie one more time as they have done throughout their tortured history and blame the Jews.

Thus it has always been in Mother Russia, in Poland, in the Ukraine, in the Baltics, who now beg us to assist them to find their own freedom.

On the streets of Moscow and Leningrad and Kiev, the pamyat gangs scream slogans that the Jews have brought on the ruin of Russian.

Their black T-shirts and symbols smell of the Nazi thugs of Munich in 1922.

But, it is not only in the gutters that anti-Semitism is swelling. It is found in every level of the culture and society.

American diplomats and foreign journalists I have spoken to, tell me of the shock and alarm they felt at the rank Jew baiting by Russian intellectuals, scholars, writers and politicians.

Gorbachev has put on a dazzling display of talent. Any leader can look good when he is a winner, but it takes a real genius to lead a nation in defeat.

At this moment in history, he represents the only possibility to a peaceful transition. But no matter how brilliant he is, he cannot re-write nine centuries of history in which the Jew has been the scapegoat for Russian disasters.

Nor can he legislate the cancer of anti-Semitism out of the soul and mind of the Russian people. One dissident told me, "Jew hating is part of the air we breathe." For me the message is loud and clear. Our brothers and sisters in the Soviet Union do not need an emigration, they need an evacuation.

In Poland, I joined a UJA mission led by Ernie Michel, a survivor and a devoted and prominent servant of the Jewish people. I had visited many concentration camps and extermination facilities in my research, and I had never gone into a barrack with a survivor, who told us what day-to-day life was like. Every person who survived was blessed by hand of fate.

Ernie is no exception.

I have two particular friends in New York who are survivors. One of them collected the dead bodies from the barracks each morning and took them to the crematoria. The other took them out of the gas chambers with grappling hooks. The sheer physical enormity of the Birkenau operation, holding hundreds of thousands of human fodder, was dark testimony to the insane and diabolical mentality of its perpetrators.

The new Germans tell us not to fear reunification. We fear. And on this question, we are not in the minority. The world fears.

Later, in Warsaw, I was asked by Solidarity to give my assessment of the Jewish problem in Poland. After World War II, many thousands of Jews returned to Poland, only to be driven out again. The few remaining are old, the keepers of the ashes. I told the Solidarity people: "You no longer have a Jewish problem here. There are no Jews. Our continuity is finished.

But suppose you had kept the Jews?

Suppose the children and grandchildren of the million and a half Jews who fled your pogroms at the turn of the century were here now?

Suppose you had the doctors and musicians and merchants and teachers and scientists and writers an all the decency and all the devotion and beauty that the Russian and Polish Jews brought to the American Nation?

Suppose you had some of the sixty odd Nobel Prize laureates from American Jewry and Eastern European descent?

So, who lost? The Jews, or Poland?"

In Budapest, at last, I got to run a victory lap, where I celebrated the first legal publication of "Exodus" in Eastern Europe.

There is a revitalized Jewish community, a proud and newly free people, who will make a tremendous contribution to the recovery and future of Hungary, if they are only allowed to live in peace.

I made a final pilgrimage to the site where Raoul Wallenberg struggled to save Jewish lives. Lest we forget, six hundred thousand Hungarian Jews had been murdered and Hungary is a nation easily given to anti-semitism.

I thought of my visit earlier to Riga and I wondered. How could Jews re-build their community near an extermination facility operated and guarded by Latvian auxiliaries in the Nazi SS? What of those foolish Jews who returned to Poland? What is it that demands of us that we reconstruct our desecrated synagogues and revere our past in hostile lands? We erect monuments on the sites of ghettos and we give loyalty again to people who have betrayed us.

At this very moment there are rumbles of coming pogroms in Riga and Budapest.

Our strange, wonderful, terrible journey is carved in stone in the Book of Man. As a people we have enriched every land where we have set down. We all became Jews after the Holocaust and we became sons and daughters of Israel in 1948. We are the oldest players in the world in the game of survival. Rome and Egypt and ancient Greece have fallen and disappeared, but we have survived—not because of our armies, but because of our ideas.

Yes, we must support Jewish life wherever it exists, in Moscow, in Riga, In Krakow. However, it is my personal belief that there will be a decent life for Jews in Eastern Europe when you can grow onions in the palm of your hand.

I returned from my journey with three gifts. In Budapest, I received a piece of the Iron Curtain from the Government for shooting a million words over the borders. In Moscow, in a small meeting room in the middle of nowhere, I was presented with a Samidzat copy of "Exodus." An illegal translation. Its covers were worn from a thousand pairs of hands who had touched it and I thought of the other thousands who had read my words in dim light, behind drawn curtains, passing the book from mother to son, from father to daughter and I told my audience that night, I would rather have this volume than a Nobel Prize, and I meant it.

There was final momento from Poland. I was to give a presentation before the monument to the Warsaw ghetto uprising a few blocks from Mila 18. By the time I was called to the rostrum, it had turned dark. A number of people in the mission lit torches and formed a semi-circle around me so I could read my notes.

The monument wavered in eerie shadows as I read a passage where a young boy had been taken from the ghetto because he was deemed to have the best chance to survive because of his strength of character. His uncle, a commander of the Jewish forces ordered him to survive for a hundred thousand children who would be murdered in Treblinka. At that instant, I felt something hot on my hand, and saw it splatter on the page of notes written on Warsaw Holiday Inn stationery.

At first it appeared to be blood, but as it hardened, like a seal, I realized it was wax dripping from someone's torch. I looked up and saw Ernie Michel holding the torch over me. That boy I was reading about could have been Ernie, being ordered to survive. In that sacred instant, I felt the embodiment of the miraculous passage of Jewish life.

And so it is. Every generation of Jews since the fall of the second temple has been both blessed and burdened with the commission of doing what is necessary in their times for the survival of our people.

It is tragic to note that too many of our people blessed with comfort and freedom will seize upon any debatable Israeli decision and use it as an excuse not to fulfill their obligation as Jews.

The last great Jewish community under tyranny is in imminent peril. We have endured one Holocaust in our lives. We must never again bear witness to our women and children being paraded naked before the enemy. Otherwise we can no longer endure with human dignity. Many years ago, I was going through a deep personal crisis and desperately needed words of advice. I had been a marine in the Second World War and my own commander had become a role model in life. He had fought three wars and witnessed thousands of his men go down before retiring as a major general. I told him of my dilemma. He gave it to me in a few words that I have called upon for courage all my life. "Lee," he said, "be a marine," and I knew what he meant. And I say to you, "Be a Jew," and you know what I mean.●

## REFORMULATED GASOLINE: WHOSE RECIPE IS IT ANYWAY, AND WILL IT WORK?

● Mr. DASCHLE. Mr. President, I wish to address again the subject of reformulated gasoline, and, in particular, the outrageous accusations being made by the American Petroleum Institute in an attempt to deflect attention from the toxic gasoline they continue to peddle to the American public. I have several inserts that I would like to have included in the RECORD.

Most of my colleagues have seen the multimillion-dollar Government gas ad campaign that is being orchestrated by the API in the media. These advertisements make several claims, none of which are true. I would like to set the record straight.

Claim No. 1: Politicians are writing the chemical formula for gasoline, yet no testing has been done to show Government gas is less polluting, more efficient or affordable.

The truth: First, the reformulated gasoline specifications in the Senate bill are the result of many months of working with petroleum experts, auto industry representatives, and environmentalists. At the April 25 Auto/Oil Forum, Joseph M. Colucci, head of fuels and lubricants for General Motors and cochairman of the Joint Auto/Oil Testing Program, put forward the specifications for the ideal reformulated gasoline from his company's standpoint. Those specifications are almost identical to the major specifications for the reformulated gasoline in my amendment. Specifically, General Motors recommends the following specifications:

Volatility, 9 psi max.
Aromatics, vol. %, 25 max.
Benzene, vol. %, 0.8 max.
Olefins, vol. %, 5 max.
90% Dist. Temp. °F, 280-300 max.
Sulfur, ppm, 300 max.
Oxygenates, wt. %, 2.5 min.

Second, I would like to call my colleagues attention to a December 6, 1989, paper by ARCO chemical scientists, William Piel, that appeared in the Oil and Gas Journal. The article shows that $NO_x$, hydrocarbons, and carbon monoxide are dramatically reduced by adding the oxygenate MTBE to gasoline. In its ads, API claims that adding oxygen and not increasing $NO_x$ "defies science." It is a shame that API does not listen to its own scientists.

Claim No. 2: Government gas will increase smog.

The truth: As the ARCO paper shows, oxygen decreases smog, including the smog precursors of $NO_x$, hydrocarbons, and carbon monoxide. But the API will argue that their assertion is based on the amendment being met only by spash blended ethanol. This is a creative reading of the amendment and, while it may make for good headlines, it bears no relationship to the reality of what will occur when the standards are implemented.

First, anyone familiar with the debate knows that a 2.7 weight percent oxygen standard can be met by a variety of fuels. To demonstrate this point, I would like to cite an article that appeared in the Oil Daily on March 23. In reporting on the then-proposed Daschle amendment, the newspaper stated that, "The Daschle amendment does not appear to push ethanol, which would benefit grain States like South Dakota, any more than does the current Senate bill. The 2.7-percent oxygenate requirement could be met by either ethanol, made from grain, or methanol, made from natural gas." EPA predicts that the amendment will be met almost exclusively by MTBE, a methanol derivative.

Second, by using a hired gun to quickly produce the scientific results it wanted within a few weeks of the Senate vote on the Clean Air Act, API chooses to ignore various reports from EPA and other technical experts showing that the use of ethanol blends either has no effect on, or actually decreases, ozone emissions. I would like to submit for the RECORD an annotated bibliography of some of these studies, compiled by the Renewable Fuels Association. Sierra Research, API's hired gun, was recently criticized by EPA and the California Air Resources Board for its efforts to discredit methanol on the same grounds, namely that it increases ozone formation. I would like to insert an article from the trade publication New Fuels Report on the EPA and CARB critiques of the Sierra Research study. Among other things, the air quality officials criticized the study as being inaccurate and misleading, and dramatically skewed.

The fact is, and I doubt even Sierra Research would deny this, that if the same skewed tests had been run using EPA-approved emissions numbers—and I remind my colleagues that EPA and EPA numbers will be used to implement the Clean Air Act—then the results would have shown a 2-percent decrease in ozone formation.

In summary, the American Petroleum Institute is in a box. They cannot deny the increased toxicity of gasoline. They cannot deny that gasoline combustion and evaporation are now responsible for 85 percent of the benzene in the air. They cannot deny that today's high aromatic, high octane gasoline is unneeded, often damaging to your car, and always damaging to the environment and human health. Instead, they have set out to misrepresent what the Clean Air Act would do, misinterpret well documented science, and scare consumers with grossly overstated cost estimates.

Such an attempt to maintain market share and increase profits at the expense of human health and the environment is reprehensible, and should be viewed as such.

The material follows:

ENVIRONMENTAL FACTSHEET FOR ETHANOL BLENDS—WHAT EPA AND THE TECHNICAL EXPERTS HAVE TO SAY

I. ETHANOL BLENDS DO NOT WORSEN THE OZONE PROBLEM

1. "A 1988 EPA technical guidance document permits all fifty state air quality control agencies to count that percentage of the motor vehicle fleet in their State using 10-percent ethanol blends as helping to achieve the federally mandated ozone air quality standard."—EPA Guidance Document To The States On Emissions Factors For Motor Vehicles Using Ethanol Blends, EPA Report # AA-TSS-PA-87-4.

2. "A 1989 EPA technical report using the most sophisticated air quality computer model available concluded that in a simulated 1995 scenario for New York City with a 100-percent market penetration of a 10-percent ethanol blend, and a 1995 scenario for St. Louis with a 50-percent market penetration of a 10-percent ethanol blend, the measurable concentration of ozone that was attributable to using the ethanol blend was insignificant—less than one part per billion (the federal ozone standard is measured in parts per million)."—Application Of The Urban Airshed Model To The New York Metropolitan Area And The City Of St. Louis, EPA Report # 450/4-90-006e.

3. "A 1988 technical report, using the Empirical Kinetics Modeling Approach (EKMA) computer model, determined that the ozone-decreasing potential attributable to reduced CO exhaust emissions from 100-percent use of ethanol blends would result in less ozone formation in the modeled cities of Chicago, Tulsa, Nashville, and St. Louis."—Evaluation of the Impact of Ethanol/Gasoline Blends on Urban Ozone Formation, Systems Applications, Inc., February 1988.

4. "A 1990 technical report, prepared by the consulting firm with whom EPA contracted to design and develop the air quality computer model recognized as the most sophisticated computer model in existence, concluded by using this computer model that if ethanol were used (up to 10 percent)

in a one-for-one replacement of the xylene fraction in unleaded gasoline in 100 percent of the motor vehicles in the City of Los Angeles that ozone levels would be reduced by 9.2 percent."—Impacts Of Ethanol Fuel Use On Air Quality In Los Angeles, March 1990.

II. ETHANOL BLENDS REDUCE CARBON MONOXIDE EXHAUST EMISSIONS

1. "10-percent ethanol blends reduce carbon monoxide exhaust emissions from pre-1975 motor vehicles (non-catalytic converters) by 22.8 percent; reduce carbon monoxide exhaust emissions from 1976-1980 motor vehicles (open-loop catalytic converters) by 33.4 percent; and reduce carbon monoxide exhaust emissions from post-1980 motor vehicles (closed-loop catalytic converters) by 17.2 percent."—EPA Guidance Document To The States On Emissions Factors For Motor Vehicles Using Ethanol Blends, EPA Report # AA-TSS-PA-87-4.

2. In January 1988, EPA published a technical guidance document to be used by all state and local air quality control agencies in preparing their current and future emissions inventories for motor vehicles using alternative fuels. States must now include these emissions inventories in revised State Implementation Plans for compliance with the federal Clean Air Act. The emissions factors for motor vehicles using alternative fuels are to be used in conjunction with EPA's "MOBILE 4" computer model, which determines the emissions inventories for all motor vehicles in an urban area. For example, using the EPA technical document and the MOBILE 4 computer program, it can be determined that in calendar year 1990, if all cars (MOBILE 4 would assume all 1971-1990 models) were using an 11.5 RVP gasoline, and switched to a splash-blended 10-percent ethanol blend, average per vehicle carbon monoxide exhaust emissions would be reduced from 18.19 grams per mile to 13.71 grams per mile—a 25.1 percent reduction.

3. To help reduce the ozone problem in this country, EPA published on March 22, 1989, a federal rule imposing nationwide fuel volatility (RVP) controls on all motor vehicle gasoline. Among other reasons, but also in recognition of the fact that the use of ethanol blends can reduce ozone levels, EPA provided in the fuel volatility rule a one-pound RVP tolerance for ethanol blends. Ethanol blends can reduce ozone because they significantly reduce carbon monoxide emissions, a precursor of ozone formation. In making this determination, the rulemaking record reveals that EPA analyzed at least thirteen technical reports, the data from which indicated that ethanol blends reduced carbon monoxide exhaust emissions in 43 pre-1975 test vehicles between 17.8 and 50.1 percent; reduced carbon monoxide exhaust emissions in 116 1975-1980 test vehicles between 25.3 and 45.6 percent; and reduced carbon monoxide exhaust emissions in 58 post-1980 test vehicles between 13.1 and 30.2 percent.

III. ETHANOL BLENDS REDUCE HYDROCARBON EXHAUST EMISSIONS

1. "10-percent ethanol blends reduce hydrocarbon exhaust emissions from pre-1975 motor vehicles (non-catalytic converters) by 4.2 percent; reduce hydrocarbon exhaust emissions from 1976-1980 motor vehicles (open-loop catalytic converters) by 14.5 percent; and reduce hydrocarbon exhaust emissions from post-1980 motor vehicles (closed-loop catalytic converters) by 2.4 percent."—EPA Guidance Document To The States On Emissions Factors For Motor Vehicles Using Ethanol Blends, EPA Report # AA-TSS-PA-87-4.

2. In January 1988, EPA published a technical guidance document to be used by all state and local air quality control agencies in preparing their current and future emissions inventories for motor vehicles using alternative fuels. States must now include these emissions inventories in revised State Implementation Plans for compliance with the federal Clean Air Act. The emissions factors for motor vehicles using alternative fuels are to be used in conjunction with EPA's "MOBILE 4" computer model, which determines the emissions inventories for all motor vehicles in an urban area. For example, using the EPA technical document and the MOBILE 4 computer program, it can be determined that in calender year 1990, if all cars (MOBILE 4 would assume all 1971-1990 models) were using an 11.5 RVP gasoline, and switched to a splash-blended 10-percent ethanol blend, average per vehicle hydrocarbon exhaust emissions would be reduced from 1.043 grams per mile to 0.961 grams per mile—an 8.5 percent reduction.

3. To help reduce the ozone problem in this country, EPA published on March 22, 1989, a federal rule imposing nationwide fuel volatility (RVP) controls on all motor vehicle gasoline. Among other reasons, but also in recognition of the fact that the use of ethanol blends reduce hydrocarbon exhaust emissions, EPA provided in the fuel volatility rule a one-pound RVP tolerance for ethanol blends. In making this determination, the rulemaking record reveals that EPA analyzed at least thirteen technical reports, the data from which indicated that ethanol blends reduced hydrocarbon exhaust emissions in 43 pre-1975 test vehicles an average of 3.7 percent; reduced hydrocarbon exhaust emissions in 116 1975-1980 test vehicles an average of 15.6 percent; and reduced hydrocarbon exhaust emissions in 60 post-1980 test vehicles an average of 3.5 percent.

IV. ETHANOL BLENDS REDUCE NITROGEN OXIDES EXHAUST EMISSIONS

1. "A report prepared by researchers from the Tennessee Valley Authority which analyzed five technical reports reporting the exhaust emissions from motor vehicles using 10-percent ethanol blends revealed that nitrogen oxides ($NO_x$) emissions in pre-1975 test vehicles were reduced 6.0 percent."—Modeling The Effect Of Ethanol/Gasoline Blend Usage, prepared by Tennessee Valley Authority, 1986.

2. "A report prepared by engineers from General Motors Research Laboratories revealed that GM production vehicles with closed-loop catalytic converters (1975-1980 models) operating on 10-percent ethanol blends had "significantly lower" exhaust emissions of nitrogen oxides (22 percent) when compared to non-alcohol base gasoline exhaust emissions."—Exhaust Emissions From Cars Fueled With Gasoline Containing Ethanol, prepared by General Motors Research Laboratories, 1980.

3. "A report prepared by the Department of Chemical Engineering of the University of Nebraska revealed that pre-1975 test vehicles operating on 10-percent ethanol blends showed no net increase in nitrogen oxides emissions."—Tests On Unleaded Gasoline Containing Ten Percent Ethanol, prepared by the University of Nebraska, 1977.

4. "A report prepared by the U.S. Department of Energy revealed that nitrogen oxides exhaust emissions from 53 test vehicles operating on 10-percent ethanol blends were reduced an average of 5.7 percent when compared to the non-alcohol base gasoline exhaust emissions."—Laboratory and Fleet Test Evaluation of Ethanol Blends, prepared by the U.S. Department of Energy, 1980.

5. "A report prepared by the Southwest Research Institute for the U.S. Environmental Protection Agency revealed that the use of 10-percent ethanol blends in 1975-1980 test vehicles exhibited "little or no effect" on nitrogen oxides exhaust emissions."—Gasohol Effects On Light-Duty Emissions, Southwest Research Institute, 1979.

6. "A technical report, prepared by the consulting firm with whom EPA contracted to design and develop the air quality computer model recognized as the most sophisticated computer model in existence, concluded by using this computer model that if ethanol were used (up to 10 percent) in a one-for-one replacement of the xylene fraction in unleaded gasoline in 100 percent of the motor vehicles in the City of Los Angeles that nitrogen oxide levels would be reduced by 8.8 percent."—Impacts of Ethanol Fuel Use Air Quality In Los Angeles, prepared by Systems Applications, Inc., March 1990.

---

[From New Fuels Report, May 7, 1990]

EPA, CARB Blast Study Showing Methanol May Form More Ozone Than Gasoline

U.S. Environmental Protection Agency and California air quality officials are blasting as inaccurate and misleading a recent study by the Sacramento, CA-based Sierra Research, Inc. which states that there is "grave doubt" regarding the benefits of methanol fuels in automobiles because methanol may lead to more ozone formation than conventional gasoline.

These officials see Sierra Research's report as another attempt to derail moves underway in Congress and in California to set tough vehicle emissions standards that will require the use of cleaner-burning fuels, such as methanol. The officials charge that to a large extent Sierra Research represents the petroleum industry, which opposes the mandated use of methanol.

The report, Ozone Benefits of Alternative Fuels: a reevaluation based on actual emissions data and updated reactivity factors, finds that if both methanol and gasoline-fueled vehicles meet the most stringent emissions standards yet adopted, those fueled by methanol will form the same or slightly more ozone, not less. The authors conclude that this, "is in stark contrast to previous and more simplistic estimates of methanol's air quality impact. Plans based on the assumed air quality benefits of methanol need immediate reevaluation." The analysis is based on the "maximum incremental reactivity" method used by the California Air Resources Board to establish "ozone equivalent" emission standards for volatile organic compound (VOC) emissions from cars running on alternative fuels.

The Sierra Research analysis applies CARB's method to emissions data from vehicles running on gasoline, 85% methanol-15% gasoline (M85), 100% methanol (M100), compressed natural gas, and liquefied petroleum gas fuels in a flexible-fueled vehicle. Sierra Research calculated the ozone reactivity of the vehicle exhaust produced by each fuel, based on the VOC-related quantities specified by CARB. The study explains that for cars running on gasoline, LPG or CNG, the regulated quantity is the non-methane hydrocarbon emissions (NMHC), while for methanol-fueled vehicles it is the organic material hydrocarbon equivalent

(OMHCE). The exhaust reactivity values were then expressed by Sierra Research as grams of ozone formed per gram of NMHC or OMHCE emitted.

For the methanol-fueled vehicles, Sierra Research observed the same or a slight increase in reactivity compared with those fueled by gasoline. However, the study notes that other alternative fuels saw a benefit in reduced reactivity. Sierra Research finds a 10% to 18% reduction in LPG reactivity and as much as a 50% reduction in CNG.

An EPA official blasted the Sierra Research report as having "no relevancy" to how clean methanol can be compared with gasoline. The main point of inaccuracy in Sierra Research's study is the comparison of methanol and gasoline emissions based on current standards, he said. EPA established emissions standards for methanol vehicles several years ago so that the absence of standards would not impede the introduction of methanol-fueled cars. It is currently drafting regulations for CNG vehicles. Under current rule for methanol, any methanol-fueled vehicle produced has to be certified to meet emissions standards of "equal stringency" to that of a gasoline-powered car. The EPA source said the intention of this rule was to require an emission standard for methanol that would equal the standard for gasoline because it would not have been fair to require methanol to meet a tougher standard, such as those under consideration in the Clean Air Act and at CARB, because it would have placed a competitive restriction on methanol.

Comparing methanol emissions to that of gasoline based on the most stringent standards in place will not result in methanol showing a greater benefit in ozone reduction than gasoline because the emissions standards are of equal stringency, according to the source. It is misleading to say that methanol will produce the same or slightly higher ozone emissions as gasoline, based on the use of current emission standards, he said. When more stringent emission standards are imposed, methanol produces significantly less ozone-forming compounds than gasoline.

California air quality officials say Sierra Research inappropriately used the "maximum incremental reactivity" methodology. A source noted that Sierra Research used total volumes of hydrocarbons in its calculation of reactivity which included methane content. By including methane content, which is less reactive than the non-methane content of hydrocarbons, the results of the Sierra Research analysis were "dramatically skewed," the source said.●

## MADISON POLICE DEPARTMENT CELEBRATES 100 YEARS

● Mr. LAUTENBERG. Mr. President, I rise today to pay tribute to the Madison, NJ, Police Department as they join together with State and county police departments to celebrate 100 years of dedicated service to their community.

Madison's Police Department was established on January 24, 1890, with two uniformed marshals performing the police duties. Today, the police department stands strong with 25 patrol officers, 4 sergeants, 4 lieutenants, 1 captain, and 1 chief.

The duties of today's officer are far more diversified and complex than the marshals of 100 years ago. Today's unrest is not the same as that of the early 1900's when new settlers and immigrants flocked into town. In those days, fighting, and stealing of produce and poultry were common crimes. Today's police officers are asked to protect our children from drugs and battle crime related to drugs. Despite these differences, the Madison police of yesterday and today still perform the same basic functions—to protect our families and homes, answering the public's calls for help and properly enforcing the law.

Every day for the past 100 years the Madison police officers have put their lives on the line to protect their community. And their accomplishments as policemen are a testament to their commitment. They should be proud of what they and over half a million men and women who devote themselves to law enforcement have chosen to do with their lives. They are a special group of American heroes, an elite corps who deserve the thanks and support of us all.

As the town of Madison gathers to celebrate its police department's 100th anniversary and various units throughout the State join in on this momentous occasion, I extend my congratulations to all of Madisons law enforcement officials, past and present and to Chief of Police Donald Capen and Capt. John Salmon for their dedicated efforts.●

## HEALTH REFERRAL SERVICE

● Mr. LUGAR. Mr. President, I would like to take this opportunity to inform my colleagues of the Health Referral Service. This agency, in operation since 1979, serves the Indiana communities of Lafayette and West Lafayette, and Tippecanoe County.

The Health Referral Service, a division of the Visiting Nurse Home Health Service, Inc., is a not-for-profit organization. The service is funded through Federal community block grants but relies heavily on a core of over 120 volunteer physicians, dentists, nurses, and community servants. It provides health and health-related screening and referral to low-income individuals and families. The 60-percent of all clients who cannot be treated in the service's office are referred to a physician or dentist and assisted in making necessary appointments. The director of the Service also performs follow-up treatment that may be required.

The Health Referral Service is based on the belief that a healthy community is one which can take care of its own. The Service maintains that reaching the goal of a healthy community which can meet the health care needs of low-income families requires the active participation not only of volunteers but also of local leaders, churches, and philanthropic organizations. Accordingly, the Health Referral Service works with religious and philanthropic groups to help offset the costs of prescription medications and medical appliances.

I ask my colleagues to join me in saluting the Health Referral Service and its many volunteers on the occasion of their 10-year anniversary.●

## VISIT BY THE PRESIDENT OF TUNISIA

● Mr. INOUYE. Mr. President, I rise today in recognition of the visit to the United States of His Excellency Zine el Abidine Ben Ali, President of the Republic of Tunisia. It is a pleasure to welcome him to our shores and to have the opportunity to publicly express our appreciation for his leadership in the cause of peace in the Middle East.

Since assuming the Presidency of his country 2½ years ago, President Ben Ali has demonstrated his commitment to building democracy, improving the social conditions of his people and liberalizing Tunisia's economy. His efforts have been impressive, and despite several recent setbacks, should result in a renewed confidence in the stability and vitality of the country.

The elections held in April 1989 were Tunisia's most open and free since achieving independence in 1956. A wide range of opposition political parties participated with over 10,000 political prisoners released and their full civil rights restored. Since then, most political parties and associations have been legalized, including the independent Democratic Women's Association. The Department of State cited these and other significant improvements in its human rights report for 1989, and I am confident that with the continued support of the United States, President Ben Ali will remain committed to these noble reforms.

On the economic front, President Ben Ali is to be commended for taking a number of difficult steps to restore prosperity to the country. He has done this despite numerous setbacks in recent years which have included: the loss of approximately 50,000 agricultural jobs on top of already high unemployment, a drop in grain production by 85 percent, and an unanticipated Government expenditure of 10 percent for food imports, due to a drought which has plagued the country for over 2 years.

Nevertheless, President Ben Ali has not strayed from his original reform path which consists of moving from the wide-ranging Government regulation of his predecessor to a more a liberal, open economy with minimum of pricing controls. On August 12 of last year, the President announced price increases to several heavily subsidized

products in an effort to reduce the country's deficit. Remaining subsidies will now be targeted to the most socially disadvantaged segments of society.

In addition, Tunisia also is in the process of gradual currency devaluation as part of its effort to move toward a convertible currency in its next 5-year plan. These economic reforms have begun to pay off, with significantly new foreign investment in the country being reported. Exports increased by 40.2 percent from 1988 to 1989 despite a decline in petroleum production, an impressive achievement. Similarly, in the first half of last year, imports rose 44.5 percent suggesting a future expansion of the agro-industry and textile sectors.

Tunisia is still on the road to recovery after suffering significant crop losses during the 1988 locust infestation. With the close cooperation of the United States, Tunisia was able to initiate an eradication effort which limited the extend of the damage. Long-term planning and close collaboration will be needed to prevent a recurrence of this problem. Tunisia is one of the few countries which responded impressively to the infestation, and in doing so, helped to lessen the impact on its neighbors.

United States-Tunisian cooperation also extends to the military sphere where, for nearly a decade, the two nations have worked to bring stability to the region through the Joint Military Commission. I am confident the United States will continue to contribute the necessary resources to the Government of Tunisia to enable it to meet its ongoing defense requirements.

Lastly, I would like to offer my personal appreciation to President Ben Ali and the people of Tunisia for their efforts on behalf of Middle East peace. In these difficult times, peacemakers and moderate statesmen are rare and deserve our encouragement and support. President Ben Ali has demonstrated these qualities in his encouragement of the five nation Arab Maghreb Union. In the words of the President, the union marks a "turning point in the destiny of our peoples," and I agree.

Tunisia also has played an important role in some of the region's more intractable conflicts. We all recall that in 1982, the Government of Tunisia demonstrated its leadership role by accepting, at the request of the United States, elements of the Palestine Liberation Organization [PLO] evacuated from Beirut. More recently President Ben Ali has been active in trying to normalize relations between the United States and Libya and has offered to mediate the ongoing dispute between our two countries.

I believe that President Ben Ali has proven himself a valued friend and ally of the United States. It is with great pleasure that I extend my warm welcome and best wishes to him in the hope that our two countries will continue to maintain a close and supportive relationship in the future.●

## NIGHT OF 100 STARS III

● Mr. LAUTENBERG. Mr. President, I want to call my colleagues' attention to an extraordinary benefit held in New York the evening of May 5 at Radio City Music Hall. The "Night of 100 Stars III" was held to benefit the entertainment world's own charity, the Actors' Fund of America, to support its AIDS assistance programs.

Established 108 years ago, the Actors' Fund is the oldest theatrical charity in the world. The fund provides timely and confidential help through many comprehensive programs and services to the entertainment professional working in any capacity of the entertainment industry.

The Actors' Fund maintains a complex in my home State in Englewood, NJ, consisting of a retirement residence—the Actors' Fund Home, and a 50-bed extended care facility offering the finest in skilled nursing care.

In 1982, the Actors' Fund celebrated its centennial by staging the first "Night of 100 Stars" to benefit the needy of show business. A sequel, "Night of 100 Stars II" was held in 1985. The productions of these two benefits enabled the Actors' Fund of America to build their current extended care facility. This state of the art facility is now fully occupied.

The AIDS epidemic has hit the entertainment industry hard. To meet the challenge of the AIDS crisis, The Actors' Fund provides a comprehensive assistance Project for People With AIDS. The program is also designed to assist individuals diagnosed as HIV positive, with ARC, or AIDS and to assist their families as well. This program is administered by professional social workers, and provides care and support while bridging the gaps in government and community services. Currently one-fourth of the Actors' Fund's annual budget goes to provide care and housing for entertainment professional affected by AIDS.

More than $4 million was spent last year as the fund answered the growing needs of its constituency, and the proceeds from the "Night of 100 Stars III" will help meet these continuing needs.

On the "Night of 100 Stars III" the entertainment industry turned out in full force to show their support and to raise funds to combat this terrible disease that has claimed the lives of so many talented individuals.

Living legends, Helen Hayes, Katherine Hepburn and Jimmy Stewart were cochairpersons of this fundraising extravaganza. I was honored to serve with my Senate colleagues from the tristate region as an honorary cochairperson for the benefit.

May the fine work of this outstanding organization continue in the fight against AIDS.●

## ORDER FOR STAR PRINT—S. 2112

Mr. PELL. Mr. President, I ask unanimous consent that S. 2112 be star printed to reflect the changes I now send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MULTIPLE-USE SUSTAINED-YIELD WEEK

Mr. PELL. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of Senate Joint Resolution 240, designating Multiple-Use Sustained-Yield Week, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 240) designating the week of June 10, 1990, through June 16, 1990, as "Multiple-Use Sustained-Yield Week."

The PRESIDING OFFICER. Is there objection to the request of the Senator from Rhode Island?

There being no objection, the Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution (S.J. Res. 240), with its preamble, is as follows:

S.J. RES. 240

Whereas 1990 marks the 30th anniversary of enactment of the Multiple-Use Sustained-Yield Act of 1960 (16 U.S.C. 528 through 531);

Whereas national forests were established to improve and protect the forests within their boundaries;

Whereas national forests are managed to meet outdoor recreation, range, timber, watershed, wildlife, fish, wilderness, and other needs including those set forth in the Act of June 4, 1897;

Whereas the Multiple-Use Sustained-Yield Act of 1960 was enacted by Congress to enhance and supplement the purposes for which the national forests were established.

Whereas under the Multiple-Use Sustained-Yield Act of 1960, the term "multiple use" includes the management of all the various renewable surface resources of the national forests so that such resources are

utilized in the combination that will best meet the needs of the American people;

Whereas multiple use management of Government lands accommodates the needs of various land uses by reducing conflict between such uses, and by providing for harmonious and coordinated management of resources;

Whereas under the Multiple-Use Sustained-Yield Act of 1960, the term "sustained yield of several products and services" means the achievement and maintenance in perpetuity of a high-level annual or regular periodic output of the various renewable resources of the national forests without impairment of the productivity of the land;

Whereas it is the duty of the Secretary of Agriculture to protect and manage the lands of the national forests, under a multiple-use, sustained-yield basis, and such duty is essential to the continued welfare and security of this Nation; and

Whereas the Multiple-Use Sustained-Yield Act of 1960 was signed into law on June 12, 1960 by President Dwight D. Eisenhower: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the week of June 10, 1990, through June 16, 1990, is designated as "Multiple-Use Sustained-Yield Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate activities and programs.

Mr. PELL. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. GARN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## TOURISM POLICY AND EXPORT PROMOTION ACT OF 1990

Mr. PELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 526, S. 1791, the Tourism Policy and Export Promotion Act of 1990.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1791) to amend the International Travel Act of 1961 to assist in the growth of international travel and tourism into the United States, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Rhode Island?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

*That this Act may be cited as the "Tourism Policy and Export Promotion Act of 1990".*

*FINDINGS*

*SEC. 2. The Congress finds that—*

*(1) the travel and tourism industry is the second largest retail or service industry in the United States;*

*(2) travel and tourism receipts make up over 6.7 percent of the United States gross national product;*

*(3) travel and tourism expenditures last year were approximately $350 billion;*

*(4) in 1988 the travel and tourism industry generated about 6 million jobs directly and about 2.5 million indirectly;*

*(5) international visitors spent approximately $43 billion in the United States last year;*

*(6) travel and tourism services ranked as the largest United States export in 1989;*

*(7) advanced technologies, industrial targeting, the industrialization of the Third World, and the flight of some United States manufacturing capacity to overseas locations have affected the international competitiveness of the United States; and*

*(8) although the trade deficit is shrinking, imports continue at record levels, and therefore, export expansion must remain a national priority.*

*NATIONAL GOAL*

*SEC. 3. It shall be the national goal under this Act to increase and sustain United States export earnings from United States tourism and transportation services traded internationally and to maintain a travel and tourism export surplus in order to help eliminate the overall United States trade deficit.*

*STATISTICAL REPORT*

*SEC. 4. (a) SURVEY OF INTERNATIONAL AIR TRAVELERS.—The Secretary of Commerce, to the extent available resources permit, shall improve the survey of international air travelers conducted to provide the data needed to estimate the Nation's balance of payments in international travel by—*

*(1) expanding the survey to cover travel to and from the Middle East, Africa, South America, and the Caribbean and enhancing coverage for Mexico, Oceania, the Far East, and Europe; and*

*(2) improving the methodology for conducting on-board surveys by (A) enhancing communications, training, and liaison activities in cooperation with participating air carriers, (B) providing for the continuation of needed data bases, and (C) utilizing improved sampling procedures.*

*The Secretary of Commerce shall seek to increase the reporting frequency of the data provided by Statistics Canada and the Bank of Mexico on international travel trade between the United States and both Canada and Mexico. The Secretary shall improve the quarterly statistical report on United States international travel receipts and payments published in the Bureau of Economic Analysis document known as "The Survey of Current Services" and heighten its visibility.*

*(b) REPORT TO CONGRESS.—The Secretary of Commerce shall, within 18 months after the date of enactment of this Act, report to the Congress on—*

*(1) the status of the efforts required by subsection (a); and*

*(2) the desirability and feasibility of publishing international travel receipts and payments on a monthly basis.*

*TOURISM TRADE BARRIERS*

*SEC. 5. (a) NATIONAL TRADE ESTIMATES.—Section 181(a)(1)(A)(i) of the Trade Act of 1974 (19 U.S.C. 2241(a)(1)(A)(i)) is amended by inserting "travel and tourism;" immediately after "commodities;".*

*(b) REPORT ON TRADE BARRIERS.—Section 181(b)(1) of the Trade Act of 1974 (19 U.S.C. 2241(b)(1)) is amended by inserting "and Committee on Commerce, Science, and Transportation" immediately after "Finance".*

*ACTION TO FACILITATE ENTRY OF FOREIGN TOURISTS*

*SEC. 6. (a) FINDING.—The Congress finds that foreign tourists entering the United States are frequently faced with unnecessary delays at the United States border.*

*(b) ACTION BY SECRETARY.—The Secretary shall, in coordination with appropriate Federal agencies, take appropriate action to ensure that foreign tourists are not unnecessarily delayed when entering the United States.*

*TOURISM TRADE DEVELOPMENT*

*SEC. 7. (a) ANNUAL PLAN.—(1) Section 202(a)(15) of the International Trade Act of 1961 (22 U.S.C. 2123(a)(15)) is amended by striking "marketing" and inserting in lieu thereof "tourism trade development".*

*(2) Section 202 of the International Travel Act of 1961 (22 U.S.C. 2123) is amended by adding at the end the following new subsection:*

*"(e) Beginning with fiscal year 1991, each annual tourism trade development plan developed and submitted to the Congress by the Secretary under subsection (a)(15) of this section shall focus on those countries with respect to which tourism trade development has the greatest potential for increasing travel and tourism export revenues.".*

*(b) ADVISORY BOARD.—(1) Section 303(a)(3) of the International Trade Act of 1961 (22 U.S.C. 2124b(a)(3)) is amended—*

*(A) in subparagraph (A), by striking "and";*

*(B) in subparagraph (B), by striking "one" and inserting in lieu thereof "two" and by striking the period at the end and inserting in lieu thereof "; and"; and*

*(C) by adding at the end the following new subparagraph:*

*"(C) at least one shall be a representative of a city who is knowledgeable of tourism promotion.".*

*(2) The last sentence of section 303(b) of the International Travel Act of 1961 (22 U.S.C. 2124b(b)) is amended by striking "two consecutive terms of three years each" and inserting in lieu thereof "six consecutive years or nine years overall".*

*(3) The first sentence of section 303(f) of the International Travel Act of 1961 (22 U.S.C. 2124b(f)) is amended—*

*(A) by striking "and" and inserting in lieu thereof a comma; and*

*(B) by inserting immediately before the period at the end the following: ", and when the plan is submitted to the Congress, shall send to the Congress by separate communication the comments of the Board on the plan".*

*(c) CONFORMING AMENDMENTS.—(1) Section 204 of the International Travel Act of 1961 (22 U.S.C. 2123b) is amended by striking "marketing" each place it appears and inserting in lieu thereof "tourism trade development".*

*(2) Section 301(a) of the International Travel Act of 1961 (22 U.S.C. 2124(a)) is amended—*

*(A) by striking "Marketing" and inserting in lieu thereof "Trade Development"; and*

*(B) by striking "marketing" and inserting in lieu thereof "tourism trade development".*

*(3) Section 303(f) of the International Travel Act of 1961 (22 U.S.C. 2124b(f)) is amended—*

*(A) by striking "Marketing" and inserting in lieu thereof "Trade Development"; and*

*(B) by striking "marketing" and inserting in lieu thereof "tourism trade development".*

COORDINATION

SEC. 8. Section 301 of the International Travel Act of 1961 (22 U.S.C. 2124) is amended by adding at the end the following new subsection:

"(c) The Secretary shall ensure that the services of the United States and Foreign Commercial Service continue to be available to assist the United States Travel and Tourism Administration at locations identified by the Under Secretary of Commerce for Travel and Tourism, in consultation with the Director General of the United States and Foreign Commercial Service, as necessary to assist the Administration's foreign offices in stimulating and encouraging travel to the United States by foreign residents and in carrying out other powers and duties of the Secretary specified in section 202.".

RURAL TOURISM DEVELOPMENT FOUNDATION

SEC. 9. (a) FINDINGS; ESTABLISHMENT OF FOUNDATION.—(1) The Congress finds that increased efforts directed at the promotion of rural tourism will contribute to the economic development of rural America and further the conservation and promotion of natural, scenic, historic, scientific, educational, inspirational, and recreational resources for future generations of Americans and foreign visitors.

(2) In order to assist the United States Travel and Tourism Administration in the development and promotion of rural tourism, there is established a charitable and nonprofit corporation to be known as the Rural Tourism Development Foundation (hereinafter in this section referred to as the "Foundation").

(b) FUNCTIONS.—The functions of the Foundation shall be the planning, development, and implementation of projects and programs which have the potential to increase travel and tourism export revenues by attracting foreign visitors to rural America. Initially, such projects and programs shall include but not be limited to—

(1) participation in the development and distribution of educational and promotional materials pertaining to both private and public attractions located in rural areas of the United States, including Federal parks and recreational lands, which can be used by foreign visitors;

(2) development of educational resources to assist in private and public rural tourism development; and

(3) participation in Federal agency outreach efforts to make such resources available to private enterprises, State and local governments, and other persons and entities interested in rural tourism development.

(c) BOARD OF DIRECTORS.—(1)(A) The Foundation shall have a Board of Directors (hereafter in this section referred to as the "Board") that—

(i) during its first two years shall consist of nine voting members; and

(ii) thereafter shall consist of those nine members plus up to six additional voting members as determined in accordance with the bylaws of the Foundation.

(B)(i) The Under Secretary of Commerce for Travel and Tourism shall, within six months after the date of enactment of this Act, appoint the initial nine voting members of the Board and thereafter shall appoint the successors of each of three such members, as provided by such bylaws.

(ii) The voting members of the Board, other than those referred to in clause (i), shall be appointed in accordance with procedures established by such bylaws.

(C) The voting members of the Board shall be individuals who are not Federal officers or employees and who have demonstrated an interest in rural tourism development. Of such voting members, at least a majority shall have experience and expertise in tourism trade promotion, at least one shall have experience and expertise in resource conservation, at least one shall have experience and expertise in financial administration in a fiduciary capacity, at least one shall be a representative of an Indian tribe who has experience and expertise in rural tourism on an Indian reservation, at least one shall represent a regional or national organization or association with a major interest in rural tourism development or promotion, and at least one shall be a representative of a State who is responsible for tourism promotion.

(D) Voting members of the Board shall each serve a term of six years, except that—

(i) initial terms shall be staggered to assure continuity of administration;

(ii) if a person is appointed to fill a vacancy occurring prior to the expiration of the term of his or her predecessor, that person shall serve only for the remainder of the predecessor's term; and

(iii) any such appointment to fill a vacancy shall be made within 60 days after the vacancy occurs.

(2) The Under Secretary of Commerce for Travel and Tourism and representatives of Federal agencies with responsibility for Federal recreational sites in rural areas (including the National Park Service, Bureau of Land Management, Forest Service, Corps of Engineers, Bureau of Indian Affairs, Tennessee Valley Authority, and such other Federal agencies as the Board determines appropriate) shall be nonvoting ex-officio members of the Board.

(3) The Chairman and Vice Chairman of the Board shall be elected by the voting members of the Board for terms of two years.

(4) The Board shall meet at the call of the Chairman and there shall be at least two meetings each year. A majority of the voting members of the Board serving at any one time shall constitute a quorum for the transaction of business, and the Foundation shall have an official seal, which shall be judicially noticed. Voting membership on the Board shall not be deemed to be an office within the meaning of the laws of the United States.

(d) COMPENSATION AND EXPENSES.—No compensation shall be paid to the members of the Board for their services as members, but they may be reimbursed for actual and necessary traveling and subsistence expenses incurred by them in the performance of their duties as such members out of Foundation funds available to the Board for such purposes.

(e) ACCEPTANCE OF GIFTS, DEVISES, AND BEQUESTS.—(1) The Foundation is authorized to accept, receive, solicit, hold, administer, and use any gifts, devises, or bequests, either absolutely or in trust, of real or personal property or any income therefrom or other interest therein for the benefit of or in connection with rural tourism, except that the Foundation may not accept any such gift, devise, or bequests which entails any expenditure other than from the resources of the Foundation. A gift, devise, or bequest may be accepted by the Foundation even though it is encumbered, restricted, or subject to beneficial interests of private persons if any current or future interest therein is for the benefit of rural tourism.

(2) A gift, devise, or bequest accepted by the Foundation for the benefit of or in connection with rural tourism on Indian reservations, pursuant to the Act of February 14, 1931 (25 U.S.C. 451), shall be maintained in a separate accounting for the benefit of Indian tribes in the development of tourism on Indian reservations.

(f) INVESTMENTS.—Except as otherwise required by the instrument of transfer, the Foundation may sell, lease, invest, reinvest, retain, or otherwise dispose of or deal with any property or income thereof as the Board may from time to time determine. The Foundation shall not engage in any business, nor shall the Foundation make any investment that may not lawfully be made by a trust company in the District of Columbia, except that the Foundation may make any investment authorized by the instrument of transfer and may retain any property accepted by the Foundation.

(g) USE OF FEDERAL SERVICES AND FACILITIES.—The Foundation may use the services and facilities of the Federal Government and such services and facilities may be made available on request to the extent practicable without reimbursement therefor.

(h) PERPETUAL SUCCESSION; LIABILITY OF BOARD MEMBERS.—The Foundation shall have perpetual succession, with all the usual powers and obligations of a corporation acting as a trustee, including the power to sue and to be sued in its own name, but the members of the Board shall not be personally liable, except for malfeasance.

(i) CONTRACTUAL POWER.—The Foundation shall have the power to enter into contracts, to execute instruments, and generally to do any and all lawful acts necessary or appropriate to its purposes.

(j) ADMINISTRATION.—(1) In carrying out the provisions of this section, the Board may adopt bylaws, rules, and regulations necessary for the administration of its functions and may hire officers and employees and contract for any other necessary services. Such officers and employees shall be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service and may be paid without regard to the provisions of chapters 51 and 53 of such title relating to classification and General Schedule pay rates.

(2) The Secretary of Commerce may accept the voluntary and uncompensated services of the Foundation, the Board, and the officers and employees of the Foundation in the performance of the functions authorized under this section, without regard to section 1342 of title 31, United States Code, or the civil service classification laws, rules, or regulations.

(3) Neither an officer or employee hired under paragraph (1) nor an individual who provides services under paragraph (2) shall be considered a Federal employee for any purpose other than for purposes of chapter 81 of title 5, United States Code, relating to compensation for work injuries, and chapter 171 of title 28, United States Code, relating to tort claims.

(k) EXEMPTION FROM TAXES; CONTRIBUTIONS.—The Foundation and any income or property received or owned by it, and all transactions relating to such income or property, shall be exempt from all Federal, State, and local taxation with respect thereto. The Foundation may, however, in the discretion of the Board, contribute toward the costs of local government in amounts not in excess of those which it would be obligated to pay with government if it were not exempt from taxation by virtue of this subsection or by virtue of its being a charitable and nonprofit corporation and may agree so to contribute with respect to property transferred to it and the income derived there-

*from if such agreement is a condition of the transfer. Contributions, gifts, and other transfers made to or for the use of the Foundation shall be regarded as contributions, gifts, or transfers to or for the use of the United States.*

*(l) LIABILITY OF UNITED STATES.—The United States shall not be liable for any debts, defaults, acts, or omissions of the Foundation.*

*(m) ANNUAL REPORT.—The Foundation shall, as soon as practicable after the end of each fiscal year, transmit to Congress an annual report of its proceedings and activities, including a full and complete statement of its receipts, expenditures, and investments.*

*(n) DEFINITIONS.—As used in this section, the term—*

*(1) "Indian reservation" has the meaning given the term "reservation" in section 3(d) of the Indian Financing Act of 1974 (25 U.S.C. 1452(d));*

*(2) "Indian tribe" has the meaning given that term in section 4(e) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b(e));*

*(3) "local government" has the meaning given that term in section 3371(2) of title 5, United States Code; and*

*(4) "rural tourism" means travel and tourism activities occurring outside of United States Standard Metropolitan Statistical Areas, including activities on Federal recreational sites, on Indian reservations, and in the territories, possessions, and commonwealths of the United States.*

*(o) ASSISTANCE BY SECRETARY OF COMMERCE.—Section 202(a) of the International Travel Act of 1961 (22 U.S.C. 2123(a)) is amended—*

*(1) by striking "and" at the end of paragraph (14);*

*(2) by striking the period at the end of paragraph (15) and inserting in lieu thereof "; and"; and*

*(3) by adding at the end the following new paragraph:*

*"(16) may assist the Rural Tourism Development Foundation, established under the Tourism Policy and Export Promotion Act of 1990, in the development and promotion of rural tourism.".*

TOURISM DEVELOPMENT STUDY

*SEC. 10. (a) REQUIREMENT TO ASSEMBLE INFORMATION.—The Secretary of Commerce shall assemble available information on economic activity associated with scenic and recreational travel, including but not limited to case studies of existing scenic byways. The Secretary shall consult with other departments and agencies of the United States which may have relevant data.*

*(b) STUDY.—The Secretary of Commerce shall conduct a study regarding—*

*(1) economic effects associated with the public identification and promotion of scenic byways as tourist attractions;*

*(2) techniques for incorporating scenic byways into tourism development programs;*

*(3) economic effects associated with the public identification and promotion of Indian reservations as tourist attractions; and*

*(4) techniques for incorporating Indian reservations into tourism development programs.*

*(c) REPORT.—Not later than one year after the date of enactment of this Act, the Secretary of Commerce shall transmit to the Congress a report on the information assembled under subsection (a) and the results of the study conducted under subsection (b), including any recommendations based on that study.*

POLICY CLARIFICATIONS

*SEC. 11. (a) NATIONAL TOURISM POLICY.—(1) Section 101(b)(1) of the International Travel Act of 1961 (22 U.S.C. 2121(b)(1)) is amended to read as follows:*

*"(1) optimize the contributions of the tourism and recreation industries to the position of the United States with respect to international competitiveness, economic prosperity, full employment, and balance of payments;"*

*(2) Section 101(b) of the International Travel Act of 1961 (22 U.S.C. 2121(b)) is amended—*

*(A) by redesignating paragraphs (2) through (12) as paragraphs (5) through (15), respectively; and*

*(B) by inserting immediately after paragraph (1) the following new paragraphs:*

*"(2) increase United States export earnings from United States tourism and transportation services traded internationally;*

*"(3) ensure the orderly growth and development of tourism;*

*"(4) coordinate and encourage the development of the tourism industry in rural communities which (A) have been severely affected by the decline of agriculture, family farming, or the extraction or manufacturing industries, or by the closing of military bases; and (B) have the potential necessary to support and sustain an economy based on tourism;".*

*(b) DUTIES OF SECRETARY OF COMMERCE.—(1) Section 201 of the International Travel Act of 1961 (22 U.S.C. 2122) is amended—*

*(A) by redesignating paragraphs (2) through (6) as paragraphs (3) through (7), respectively;*

*(B) in paragraph (3), as so redesignated, by striking "tourist facilities," and all that follows and inserting in lieu thereof the following: "receptive, linguistic, informational, currency exchange, meal, and package tour services required by the international market;"; and*

*(C) by inserting immediately after paragraph (1) the following new paragraph:*

*"(2) provide export promotion services that will increase the number of States, local governments (as defined in section 3371(2) of title 5, United States Code), and companies in the United States that sell their tourism services in the international market, expand the number of foreign markets in which exporting States, cities, and companies are active, and inform States, cities, and companies in the United States regarding the specialized services the international market requires;".*

*(2) Section 202(a)(9) of the International Travel Act of 1961 (22 U.S.C. 2123(a)(9)) is amended by striking "United States travel and tourism interests" and inserting in lieu thereof "the United States national tourism interest".*

*(c) AUTHORIZATION REGARDING CERTAIN EXPENDITURES.—Section 202 of the International Travel Act of 1961 (22 U.S.C. 2123) is amended by section 7(a) of this Act, is further amended by adding at the end the following new subsection:*

*"(f) Funds appropriated to carry out this Act may be expended by the Secretary without regard to the provisions of sections 501 and 3702 of title 44, United States Code. Funds appropriated for the printing of travel promotional materials shall remain available for two fiscal years.".*

*(d) REPEAL.—The International Travel Act of 1961 (22 U.S.C. 2121 et seq.) is amended by repealing section 203.*

*(e) TOURISM POLICY COUNCIL.—(1) Section 302(b)(1) of the International Travel Act of 1961 (22 U.S.C. 2124a(b)(1)) is amended—*

*(A) by redesignating subparagraphs (H) and (I) as subparagraphs (L) and (M); and*

*(B) by inserting immediately after subparagraph (G) the following new subparagraphs:*

*"(H) the Secretary of Agriculture;*

*"(I) the Chairman of the Tennessee Valley Authority;*

*"(J) the Commanding General of the Corps of Engineers of the Army, within the Department of Defense;*

*"(K) the Administrator of the Small Business Administration;".*

*(2) Section 302(d) of the International Travel Act of 1961 (22 U.S.C. 2124a(d)) is amended by adding at the end the following new paragraph:*

*"(4)(A) Every year, upon designation by the Secretary of Commerce in accordance with subparagraph (B), up to three Federal departments and agencies represented on the Council shall each detail to the Council for that year one staff person and associated resources.*

*"(B) In making the designation referred to in subparagraph (A), the Secretary of Commerce shall designate a different group of agencies and departments each year and shall not redesignate any agency or department until all the other agencies and departments represented on the Council have been designated the same number of years.".*

AUTHORIZATION OF APPROPRIATIONS

*SEC. 12. (a) IN GENERAL.—Section 304 of the International Travel Act of 1961 (22 U.S.C. 2126) is amended—*

*(1) in the first sentence by inserting immediately before the period the following: ", not to exceed $15,000,000 for the fiscal year ending September 30, 1990, not to exceed $18,000,000 for the fiscal year ending September 30, 1991, and not to exceed $21,000,000 for the fiscal year ending September 30, 1992"; and*

*(2) by striking the last two sentences.*

*(b) FUNDS FOR FOUNDATION.—Of the funds authorized under section 304 of the International Travel Act of 1961 (22 U.S.C. 2126), as amended by subsection (a), there are authorized to be appropriated to the Secretary of Commerce for each of fiscal years 1990, 1991, and 1992 not to exceed $500,000 to—*

*(1) match partially or wholly the amount or value of contributions (whether in currency, services, or property) made to the Rural Tourism Development Foundation by private persons and Federal, State, and local government agencies; and*

*(2) provide administrative services for the Rural Tourism Development Foundation.*

*(c) FINANCIAL ASSISTANCE FOR STATE PROGRAMS.—There is authorized to be appropriated to the Secretary of Commerce not to exceed $10,000,000 for the period beginning October 1, 1989, and ending September 30, 1992, for the purpose of providing financial assistance for States whose tourism promotion needs have increased due to disasters. The funds authorized under this subsection shall be in addition to any funds authorized under section 304 of the International Travel Act of 1961 (22 U.S.C. 2126), as amended by subsection (a).*

The PRESIDING OFFICER. Are there amendments to the substitute?

AMENDMENT NO. 1632

(Purpose: To make a substitute amendment for section 5)

Mr. PELL. Mr. President, on behalf of the Senator from West Virginia [Mr. ROCKEFELLER] I send an amend-

ment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Rhode Island [Mr. PELL], for Mr. ROCKEFELLER, proposes an amendment numbered 1632.

Mr. PELL. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

Strike section 5 and insert in lieu thereof the following:

TOURISM TRADE BARRIERS

SEC. 5. (a) ANALYSIS AND ESTIMATES.—For calendar year 1990 and each succeeding calendar year, the Secretary of Commerce shall—

(1) identify and analyze acts, policies, or practices of each foreign country that constitute significant barriers to, or distortions of, United States travel and tourism exports;

(2) make an estimate of the trade-distorting impact on United States commerce of any act, policy, or practice identified under paragraph (1); and

(3) make an estimate, if feasible, of the value of additional United States travel and tourism exports that would have been exported to each foreign country during such calendar year if each of such acts, policies, and practices of such country did not exist.

(b) REPORT.—On or before March 31 of 1991 and each succeeding calendar year, the Secretary of Commerce shall submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives a report on the analysis and estimates made under subsection (a) for the preceding calendar year. The report shall include any recommendation for action to eliminate any act, policy, or practice identified under subsection (a).

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1632) was agreed to.

Mr. PELL. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GARN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1633

Mr. GARN. Mr. President, on behalf of Senator STEVENS, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Utah [Mr. GARN], for Mr. STEVENS, proposes an amendment numbered 1633.

Mr. GARN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 25, line 1, insert the phrase "or lands owned by an Alaska Native Corporation" after the word "reservation".

On page 32, line 7, insert the phrase "or lands owned by Alaska Native Corporations" after the word "reservations".

On page 32, line 10, insert the phrase "or lands owned by Alaska Native Corporations" after the word "reservations".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1633) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROCKEFELLER. Mr. President, today I rise to support the passage of S. 1791, the Tourism Policy and Export Promotion Act of 1990. This bill will maximize the export potential of the tourism industry.

At a time when our balance of payments is awash in red ink, the travel and tourism industry stands as a net exporter generating a surplus of over $1.3 billion in 1989. My State of West Virginia has experienced the tangible benefits of a healthy tourism industry. Tourists spend nearly $4 million a day in my State and tax revenues generated by the tourist industry amount to almost $104 million a year. Most importantly in a State where employment has been battered by imports, this export industry employs over 38,000 West Virginians.

If this industry is to continue to be an engine of economic growth and export expansion, then there must be a vigorous and coordinated Federal policy. S. 1791 sets the proper course. It provides the first 3-year reauthorization of the U.S. Travel and Tourism Agency [USTTA] in 9 years. It recognizes the importance of this industry as a net exporter. To achieve its stated goal of expanding upon our recent surplus in travel and tourism revenues, the major provisions of S. 1791 will:

Require the USTTA to concentrate its efforts on those countries that have the greatest potential for increasing travel and tourism expenditures; further, in order to target the appropriate markets for expansion, the Commerce Department will be required to improve its data collection process.

The Secretary of Commerce is directed to take appropriate action to ensure that foreign tourists are not unnecessarily delayed when entering the United States. This problem is particularly acute at points of entry along the Canadian border and at the Honolulu airport.

In addition, for those of us from rural States whose economies desperately need economic diversification, the bill establishes a Rural Tourism Foundation.

I am offering an amendment to section 5 of the bill to require the Department of Commerce to do an annual study of trade barriers to travel services and tourism. The committee bill required USTR to include this information in their National Trade Estimates. After discussions with the industry and the administration, I have come to the conclusion that it is more appropriate for USTTA to compile and report this information.

So, Mr. President, what we will pass here today is a trade bill with no quotas, requiring no convoluted negotiations and threatening no retaliation. Instead, we have an export promotion act that has bipartisan support in this body and strong support from the tourism industry. Mr. President, with the enactment of this bill, we will finally have a Federal policy which is fitting of an industry which represents growth, employment, and revenues.

Mr. BURNS. Mr. President, I rise today to applaud my colleagues for joining with Senator ROCKEFELLER and me on S. 1791, the Travel Policy and Export Promotion Act of 1990.

I am proud to have been a part of updating the tourism policy for this great country of ours. Tourism is an industry that involves so many segments of our work force and yet it is taken for granted by leaders of our country, industry itself, and the general populous.

Those of us who rely on tourism for our States' well-being and economic health need to work double time to increase the awareness and appreciation for what a large industry tourism is.

In March of this year, the Department of Commerce reported that travel and tourism commanded a trade surplus for the first time in 29 years, to the tune of $1.2 billion. It led agriculture in export earnings.

This gives us living proof that tourism is alive and well in America today. Now our job and commitment is to make sure that tourism is given every chance to maintain and even increase its performance.

It is only proper that we are passing this bill the week before National Tourism Week. I encourage all of my colleagues as well as those who make their living from tourism to get out next week and promote your industry. It all counts, and every little effort makes a difference.

Many people do not know they belong to such a fast growing and lucrative business. The guy who fries hamburges at the local fast food restaurant, the housekeeper who cleans rooms in the local motels, the guy who works road construction in Montana, or the airline pilot who flies businessmen and vacationers into West Virginia; they are all a part of this great

business of tourism and probably do not even think about it.

We have to make everyone working in these types of jobs aware of themselves and the important job they do to produce a $1.2 biliion surplus in U.S. tourism. It takes all of us.

I am glad to see the efforts that USTTA and others are making to develop tourism through small business in rural America. Their national rural tourism study has been a great step forward in bringing growth to the rural areas of this country.

There are many states like Montana, Wyoming, the Carolinas, and others that have a hard time drawing visitors away from the crowded metropolitan hot spots. Especially the foreign visitors.

It takes a concentrated effort to build awareness and educate travelers, whether they are business or pleasure travelers, to the idea of venturing into the unknown, lesser traveled areas of our country. We are pretty good folks once you get out and meet us. I know they will like us once they find us.

Today it is more important than ever that rural States like my home of Montana and others look seriously at diversifying their economic development resources. In my home State we have miles and miles of open roads and beauty and splendor that not many States have left to offer.

It is important that we do not stop with this one piece of legislation to support tourism. In future months I will be working with my colleagues to bring about changes that will help support the changes that are needed to encourage growth and prosperity in tourism. We need to build incentive for businessmen and businesswomen to open businesses and and take on leadership roles that will help build this industry's future.

We need to encourage innovative and creative thinking and action. But in order for this creativity to succeed we need to offer support and leadership in the right places. We need to be creative in our thinking here in the Congress.

I ask my colleagues here today to act with me in the future. I know we can make a difference.

Mr. STEVENS. Mr. President, today we consider the Tourism Policy and Export Promotion Act. I am delighted to be an original cosponsor of the measure.

The tourism industry is important nationwide, but it is especially important in Alaska. It is our third largest industry and has created some 20,000 jobs. Last year Alaska had more visitors than we have people with nearly 800,000 visitors touring our State. Together, they spent half a billion dollars in Alaska. That is one-quarter of our entire State budget.

This bill will go a long way in promoting tourism in this country, particularly in rural areas like Alaska. It establishes a Rural Tourism Development Foundation to develop and implement programs and projects to attract foreign visitors to remote areas.

The foundation would help promote our national parks, national forests, and national recreation areas. This function is critical in a State like Alaska where we have 70 percent of the Nation's park lands, a quarter of our national forests, and one-third of our public lands under the stewardship of the Bureau of Land Management.

This legislation also encourages development of the tourism industry in rural communities which have been severely affected by the decline of mining activities. The National Park Service has effectively shut down mining in Alaska's national parks. Many are converting their mining camps into wilderness retreats for tourism. It is my hope that those miners can take advantage of this program to help them make the transition from a mining to a tourism based economy.

Finally, the bill includes a provision that Senator HOLLINGS and I added in committee. It provides $10 million to promote tourism in States that have been struck by disasters. South Carolina is still struggling to recover from Hurricane Hugo. And Alaskans are trying to recuperate from the effects of the *Exxon Valdez* oilspill.

This money will help our States let visitors know that South Carolina and Alaska are still great vacation destinations.

I thank Senator HOLLINGS for his leadership on this issue and want to express my appreciation to Senator DANFORTH for supporting our amendment. I also want to express my gratitude to Senator ROCKEFELLER for all his hard work in drafting the bill.

Mr. HOLLINGS. Mr. President, I support the passage of S. 1791, the Tourism and Export Promotion Act of 1990, which recognizes the importance of tourism to our economy. Tourism is not just Bermuda shorts, cameras, golf clubs, and tennis. This is an industry that means millions of jobs and billions of dollars a year. Last year, tourism was responsible for creating 6.6 million jobs and bringing in $36 billion in revenue. In my State, tourism is now the second largest employer. As an export, the travel and tourism industry just recently posted a $1.3 billion surplus in our balance of payments.

Mr. President, with the exception of the aircraft industry, this is the only industry in which we are running a positive balance of trade, and yet, our Federal tourism policy has not been changed for over 10 years. Furthermore, the U.S. Travel and Tourism Administration [USTTA] has not been reauthorized in 9 years.

S. 1791, introduced by my colleague, Senator ROCKEFELLER, provides for a 3-year authorization for the USTTA of $15 million, $18 million, and $20 million. In constant dollars, this funds the agency at 1978 levels. The bill also changes the focus of our national tourism policy from marketing to its rightful place, trade promotion. I applaud my colleague's important efforts to bring tourism the attention it deserves.

In addition, Mr. President, S. 1791 recognizes the special needs that arise when a disaster strikes a major tourist area. The Alaskan oilspill, the San Francisco earthquake, and Hurricane Hugo all resulted in physical devastation to some of the most beautiful and popular tourist centers in the United States. But what can be even more devastating to the tourism industries—after the debris is cleared and the beaches are cleaned—is the false perception that the areas have been destroyed. For example, nearly 8 months after the San Francisco earthquake, tourism to the bay area has suffered a precipitous decrease in visitors to the area. Unfortunately, people do not realize that San Francisco, and the areas in my own State of South Carolina hit so hard by Hurricane Hugo, are in fact cleaned up and ready for business. Restoration of the tourism industry in my State alone will preserve the jobs of over 96,000 residents of my State employed in the industry and sustain the $4.5 billion in revenue that South Carolina receives from tourists. This economic impact is not only important to my State but to the economic well-being of the rest of the Nation.

Thus, Mr. President, S. 1791 will authorize up to $10 million for a 3-year period to States whose tourism and promotional needs have increased as a result of a disaster. This modest sum will pay a handsome dividend by restoring jobs and revenues to States which have suffered from the ravages of disasters, and preserving an important national industry.

Mr. President, S. 1791 sets a course for a vigorous and coordinated Federal tourism policy to expand upon a bright, shining light in our otherwise dismal trade picture. I ask my colleagues to join me in supporting this important measure.

Mr. DANFORTH. Mr. President, I urge my colleagues to join me in support of the Tourism Policy and Export Promotion Act of 1990, a bill to help the United States capture its share of the international tourism market.

At this time, the United States lags behind in this fast growing and lucrative economic market. While Western Europe attracts between half and two-thirds of all world tourism earnings, the United States attracts only about 10 percent, or $43 billion. In spite of our poor showing, at $43 billion, tour-

ism by foreign visitors generated our Nation's largest export revenue earnings last year, followed by agriculture, chemicals, and motor vehicles. In fact, in 1989, the U.S. tourism industry achieved its first international trade surplus of $1.2 billion.

Enactment of S. 1791 would help us hang on to that long-awaited tourism trade surplus. Specifically, S. 1791 directs the U.S. Travel and Tourism Administration to increase and sustain our export earnings by focusing our promotional activities on countries with the greatest potential for increasing our market share.

Another important provision in S. 1791 creates a Rural Tourism Development Foundation to help the USTTA spread the benefits of foreign tourism to every part of the U.S.A. In 1987, the most recent year for which statistics are available, foreign visitors spent over $107 million in Missouri. Missouri has a first-rate product to offer—our State is rich in terms of history and cultural heritage, scenic beauty and recreational opportunities, events ranging from first-rate major league baseball to world renowned symphony orchestras, experiencing life in both big cities and small towns. We are telling the world about the Show Me State through USTTA's overseas marketing campaign involving Missouri and other States in America's Heartland. With the help of the Rural Tourism Development Foundation, Missouri—and other States that offer foreign tourists a unique chance to get into the country—can do even more.

Finally, I am proud to recognize the vital role that a fine Missourian has played in bringing S. 1791 to a vote in the Senate. Peter Herschend, who serves on the Senate Commerce Committee's Travel and Tourism Industry Advisory Council, has been a key source of inspiration and energy as we have worked to get this bill written, introduced, and approved. I urge my colleagues to support S. 1791 and help us take one more step toward its enactment.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill (S. 1791), as amended, was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1791

That this Act may be cited as the "Tourism Policy and Export Promotion Act of 1990".

FINDINGS

SEC. 2. The Congress finds that—

(1) the travel and tourism industry is the second largest retail or service industry in the United States;

(2) travel and tourism receipts make up over 6.7 percent of the United States gross national product;

(3) travel and tourism expenditures last year were approximately $350 billion;

(4) in 1988 the travel and tourism industry generated about 6 million jobs directly and about 2.5 million indirectly;

(5) international visitors spent approximately $43 billion in the United States last year;

(6) travel and tourism services ranked as the largest United States export in 1989;

(7) advanced technologies, industrial targeting, the industrialization of the Third World, and the flight of some United States manufacturing capacity to overseas locations have affected the international competitiveness of the United States; and

(8) although the trade deficit is shrinking, imports continue at record levels, and therefore, export expansion must remain a national priority.

NATIONAL GOAL

SEC. 3. It shall be the national goal under this Act to increase and sustain United States export earnings from United States tourism and transportation services traded internationally and to maintain a travel and tourism export surplus in order to help eliminate the overall United States trade deficit.

STATISTICAL REPORT

SEC. 4. (a) SURVEY OF INTERNATIONAL AIR TRAVELERS.—The Secretary of Commerce, to the extent available resources permit, shall improve the survey of international air travelers conducted to provide the data needed to estimate the Nation's balance of payments in international travel by—

(1) expanding the survey to cover travel to and from the Middle East, Africa, South America, and the Caribbean and enhancing coverage for Mexico, Oceania, the Far East, and Europe; and

(2) improving the methodology for conducting on-board surveys by (A) enhancing communications, training, and liaison activities in cooperation with participating air carriers, (B) providing for the continuation of needed data bases, and (C) utilizing improved sampling procedures.

The Secretary of Commerce shall seek to increase the reporting frequency of the data provided by Statistics Canada and the Bank of Mexico on international travel trade between the United States and both Canada and Mexico. The Secretary shall improve the quarterly statistical report on United States international travel receipts and payments published in the Bureau of Economic Analysis document known as "The Survey of Current Services" and heighten its visibility.

(b) REPORT TO CONGRESS.—The Secretary of Commerce shall, within 18 months after the date of enactment of this Act, report to the Congress on—

(1) the status of the efforts required by subsection (a); and

(2) the desirability and feasibility of publishing international travel receipts and payments on a monthly basis.

TOURISM TRADE BARRIERS

SEC. 5. (a) ANALYSIS AND ESTIMATES.—For calendar year 1990 and each succeeding calendar year, the Secretary of Commerce shall—

(1) identify and analyze acts, policies, or practices of each foreign country that constitute significant barriers to, or distortions of, United States travel and tourism exports;

(2) make an estimate of the trade-distorting impact on United States commerce of any act, policy, or practice identified under paragraph (1); and

(3) make an estimate, if feasible, of the value of additional United States travel and tourism exports that would have been exported to each foreign country during such calendar year if each of such acts, policies, and practices of such country did not exist.

(b) REPORT.—On or before March 31 of 1991 and each succeeding calendar year, the Secretary of Commerce shall submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives a report on the analysis and estimates made under subsection (a) for the preceding calendar year. The report shall include any recommendation for action to eliminate any act, policy, or practice identified under subsection (a).

ACTION TO FACILITATE ENTRY OF FOREIGN TOURISTS

SEC. 6. (a) FINDING.—The Congress finds that foreign tourists entering the United States are frequently faced with unnecessary delays at the United States border.

(b) ACTION BY SECRETARY.—The Secretary shall, in coordination with appropriate Federal agencies, take appropriate action to ensure that foreign tourists are not unnecessarily delayed when entering the United States.

TOURISM TRADE DEVELOPMENT

SEC. 7. (a) ANNUAL PLAN.—(1) Section 202(a)(15) of the International Trade Act of 1961 (22 U.S.C. 2123(a)(15)) is amended by striking "marketing" and inserting in lieu thereof "tourism trade development".

(2) Section 202 of the International Travel Act of 1961 (22 U.S.C. 2123) is amended by adding at the end the following new subsection:

"(e) Beginning with fiscal year 1991, each annual tourism trade development plan developed and submitted to the Congress by the Secretary under subsection (a)(15) of this section shall focus on those countries with respect to which tourism trade development has the greatest potential for increasing travel and tourism export revenues.".

(b) ADVISORY BOARD.—(1) Section 303(a)(3) of the International Trade Act of 1961 (22 U.S.C. 2124b(a)(3)) is amended—

(A) in subparagraph (A), by striking "and";

(B) in subparagraph (B), by striking "one" and inserting in lieu thereof "two" and by striking the period at the end and inserting in lieu thereof "; and"; and

(C) by adding at the end the following new subparagraph:

"(C) at least one shall be a representative of a city who is knowledgeable of tourism promotion.".

(2) The last sentence of section 303(b) of the International Travel Act of 1961 (22 U.S.C. 2124b(b)) is amended by striking "two consecutive terms of three years each" and inserting in lieu thereof "six consecutive years or nine years overall".

(3) The first sentence of section 303(f) of the International Travel Act of 1961 (22 U.S.C. 2124b(f)) is amended—

(A) by striking "and" and inserting in lieu thereof a comma; and

(B) by inserting immediately before the period at the end the following: ", and when

the plan is submitted to the Congress, shall send to the Congress by separate communication the comments of the Board on the plan".

(c) CONFORMING AMENDMENTS.—(1) Section 204 of the International Travel Act of 1961 (22 U.S.C. 2123b) is amended by striking "marketing" each place it appears and inserting in lieu thereof "tourism trade development".

(2) Section 301(a) of the International Travel Act of 1961 (22 U.S.C. 2124(a)) is amended—

(A) by striking "Marketing" and inserting in lieu thereof "Trade Development"; and

(B) by striking "marketing" and inserting in lieu thereof "tourism trade development".

(3) Section 303(f) of the International Travel Act of 1961 (22 U.S.C. 2124b(f)) is amended—

(A) by striking "Marketing" and inserting in lieu thereof "Trade Development"; and

(B) by striking "marketing" and inserting in lieu thereof "tourism trade development".

COORDINATION

SEC. 8. Section 301 of the International Travel Act of 1961 (22 U.S.C. 2124) is amended by adding at the end the following new subsection:

"(c) The Secretary shall ensure that the services of the United States and Foreign Commercial Service continue to be available to assist the United States Travel and Tourism Administration at locations identified by the Under Secretary of Commerce for Travel and Tourism, in consultation with the Director General of the United States and Foreign Commercial Service, as necessary to assist the Administration's foreign offices in stimulating and encouraging travel to the United States by foreign residents and in carrying out other powers and duties of the Secretary specified in section 202.".

RURAL TOURISM DEVELOPMENT FOUNDATION

SEC. 9. (a) FINDINGS; ESTABLISHMENT OF FOUNDATION.—(1) The Congress finds that increased efforts directed at the promotion of rural tourism will contribute to the economic development of rural America and further the conservation and promotion of natural, scenic, historic, scientific, educational, inspirational, and recreational resources for future generations of Americans and foreign visitors.

(2) In order to assist the United States Travel and Tourism Administration in the development and promotion of rural tourism, there is established a charitable and nonprofit corporation to be known as the Rural Tourism Development Foundation (hereinafter in this section referred to as the "Foundation").

(b) FUNCTIONS.—The functions of the Foundation shall be the planning, development, and implementation of projects and programs which have the potential to increase travel and tourism export revenues by attracting foreign visitors to rural America. Initially, such projects and programs shall include but not be limited to—

(1) participation in the development and distribution of educational and promotional materials pertaining to both private and public attractions located in rural areas of the United States, including Federal parks and recreational lands, which can be used by foreign visitors;

(2) development of educational resources to assist in private and public rural tourism development; and

(3) participation in Federal agency outreach efforts to make such resources available to private enterprises, State and local governments, and other persons and entities interested in rural tourism development.

(c) BOARD OF DIRECTORS.—(1)(A) The Foundation shall have a Board of Directors (hereafter in this section referred to as the "Board") that—

(i) during its first two years shall consist of nine voting members; and

(ii) thereafter shall consist of those nine members plus up to six additional voting members as determined in accordance with the bylaws of the Foundation.

(B)(i) The Under Secretary of Commerce for Travel and Tourism shall, within six months after the date of enactment of this Act, appoint the initial nine voting members of the Board and thereafter shall appoint the successors of each of three such members, as provided by such bylaws.

(ii) The voting members of the Board, other than those referred to in clause (i), shall be appointed in accordance with procedures established by such bylaws.

(C) The voting members of the Board shall be individuals who are not Federal officers or employees and who have demonstrated an interest in rural tourism development. Of such voting members, at least a majority shall have experience and expertise in tourism trade promotion, at least one shall have experience and expertise in resource conservation, at least one shall have experience and expertise in financial administration in a fiduciary capacity, at least one shall be a representative of an Indian tribe who has experience and expertise in rural tourism on an Indian reservation or lands owned by an Alaska Native Corporation, at least one shall represent a regional or national organization or association with a major interest in rural tourism development or promotion, and at least one shall be a representative of a State who is responsible for tourism promotion.

(D) Voting members of the Board shall each serve a term of six years, except that—

(i) initial terms shall be staggered to assure continuity of administration;

(ii) if a person is appointed to fill a vacancy occurring prior to the expiration of the term of his or her predecessor, that person shall serve only for the remainder of the predecessor's term; and

(iii) any such appointment to fill a vacancy shall be made within 60 days after the vacancy occurs.

(2) The Under Secretary of Commerce for Travel and Tourism and representatives of Federal agencies with responsibility for Federal recreational sites in rural areas (including the National Park Service, Bureau of Land Management, Forest Service, Corps of Engineers, Bureau of Indian Affairs, Tennessee Valley Authority, and such other Federal agencies as the Board determines appropriate) shall be nonvoting ex-officio members of the Board.

(3) The Chairman and Vice Chairman of the Board shall be elected by the voting members of the Board for terms of two years.

(4) The Board shall meet at the call of the Chairman and there shall be at least two meetings each year. A majority of the voting members of the Board serving at any one time shall constitute a quorum for the transaction of business, and the Foundation shall have an official seal, which shall be judicially noticed. Voting membership on the Board shall not be deemed to be an office within the meaning of the laws of the United States.

(d) COMPENSATION AND EXPENSES.—No compensation shall be paid to the members of the Board for their services as members, but they may be reimbursed for actual and necessary traveling and subsistence expenses incurred by them in the performance of their duties as such members out of Foundation funds available to the Board for such purposes.

(e) ACCEPTANCE OF GIFTS, DEVISES, AND BEQUESTS.—(1) The Foundation is authorized to accept, receive, solicit, hold, administer, and use any gifts, devises, or bequests, either absolutely or in trust, of real or personal property or any income therefrom or other interest therein for the benefit of or in connection with rural tourism, except that the Foundation may not accept any such gift, devise, or bequests which entails any expenditure other than from the resources of the Foundation. A gift, devise, or bequest may be accepted by the Foundation even though it is encumbered, restricted, or subject to beneficial interests of private persons if any current or future interest therein is for the benefit of rural tourism.

(2) A gift, devise, or bequest accepted by the Foundation for the benefit of or in connection with rural tourism on Indian reservations, pursuant to the Act of February 14, 1931 (25 U.S.C. 451), shall be maintained in a separate accounting for the benefit of Indian tribes in the development of tourism on Indian reservations.

(f) INVESTMENTS.—Except as otherwise required by the instrument of transfer, the Foundation may sell, lease, invest, reinvest, retain, or otherwise dispose of or deal with any property or income thereof as the Board may from time to time determine. The Foundation shall not engage in any business, nor shall the Foundation make any investment that may not lawfully be made by a trust company in the District of Columbia, except that the Foundation may make any investment authorized by the instrument of transfer and may retain any property accepted by the Foundation.

(g) USE OF FEDERAL SERVICES AND FACILITIES.—The Foundation may use the services and facilities of the Federal Government and such services and facilities may be made available on request to the extent practicable without reimbursement therefor.

(h) PERPETUAL SUCCESSION; LIABILITY OF BOARD MEMBERS.—The Foundation shall have perpetual succession, with all the usual powers and obligations of a corporation acting as a trustee, including the power to sue and to be sued in its own name, but the members of the Board shall not be personally liable, except for malfeasance.

(i) CONTRACTUAL POWER.—The Foundation shall have the power to enter into contracts, to execute instruments, and generally to do any and all lawful acts necessary or appropriate to its purposes.

(j) ADMINISTRATION.—(1) In carrying out the provisions of this section, the Board may adopt bylaws, rules, and regulations necessary for the administration of its functions and may hire officers and employees and contract for any other necessary services. Such officers and employees shall be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service and may be paid without regard to the provisions of chapters 51 and 53 of such title relating to classification and General Schedule pay rates.

(2) The Secretary of Commerce may accept the voluntary and uncompensated services of the Foundation, the Board, and

the officers and employees of the Foundation in the performance of the functions authorized under this section, without regard to section 1342 of title 31, United States Code, or the civil service classification laws, rules, or regulations.

(3) Neither an officer or employee hired under paragraph (1) nor an individual who provides services under paragraph (2) shall be considered a Federal employee for any purpose other than for purposes of chapter 81 of title 5, United States Code, relating to compensation for work injuries, and chapter 171 of title 28, United States Code, relating to tort claims.

(k) EXEMPTION FROM TAXES; CONTRIBUTIONS.—The Foundation and any income or property received or owned by it, and all transactions relating to such income or property, shall be exempt from all Federal, State, and local taxation with respect thereto. The Foundation may, however, in the discretion of the Board, contribute toward the costs of local government in amounts not in excess of those which it would be obligated to pay with government if it were not exempt from taxation by virtue of this subsection or by virtue of its being a charitable and nonprofit corporation and may agree so to contribute with respect to property transferred to it and the income derived therefrom if such agreement is a condition of the transfer. Contributions, gifts, and other transfers made to or for the use of the Foundation shall be regarded as contributions, gifts, or transfers to or for the use of the United States.

(l) LIABILITY OF UNITED STATES.—The United States shall not be liable for any debts, defaults, acts, or omissions of the Foundation.

(m) ANNUAL REPORT.—The Foundation shall, as soon as practicable after the end of each fiscal year, transmit to Congress an annual report of its proceedings and activities, including a full and complete statement of its receipts, expenditures, and investments.

(n) DEFINITIONS.—As used in this section, the term—

(1) "Indian reservation" has the meaning given the term "reservation" in section 3(d) of the Indian Financing Act of 1974 (25 U.S.C. 1452(d));

(2) "Indian tribe" has the meaning given that term in section 4(e) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b(e));

(3) "local government" has the meaning given that term in section 3371(2) of title 5, United States Code; and

(4) "rural tourism" means travel and tourism activities occurring outside of United States Standard Metropolitan Statistical Areas, including activities on Federal recreational sites, on Indian reservations, and in the territories, possessions, and commonwealths of the United States.

(o) ASSISTANCE BY SECRETARY OF COMMERCE.—Section 202(a) of the International Travel Act of 1961 (22 U.S.C. 2123(a)) is amended—

(1) by striking "and" at the end of paragraph (14);

(2) by striking the period at the end of paragraph (15) and inserting in lieu thereof "; and"; and

(3) by adding at the end the following new paragraph:

"(16) may assist the Rural Tourism Development Foundation, established under the Tourism Policy and Export Promotion Act of 1990, in the development and promotion of rural tourism.".

TOURISM DEVELOPMENT STUDY

SEC. 10. (a) REQUIREMENT TO ASSEMBLE INFORMATION.—The Secretary of Commerce shall assemble available information on economic activity associated with scenic and recreational travel, including but not limited to case studies of existing scenic byways. The Secretary shall consult with other departments and agencies of the United States which may have relevant data.

(b) STUDY.—The Secretary of Commerce shall conduct a study regarding—

(1) economic effects associated with the public identification and promotion of scenic byways as tourist attractions;

(2) techniques for incorporating scenic byways into tourism development programs;

(3) economic effects associated with the public identification and promotion of Indian reservations or lands owned by Alaska Native Corporation, as tourist attractions; and

(4) techniques for incorporating Indian reservations or lands owned by Alaska Native Corporation, into tourism development programs.

(c) REPORT.—Not later than one year after the date of enactment of this Act, the Secretary of Commerce shall transmit to the Congress a report on the information assembled under subsection (a) and the results of the study conducted under subsection (b), including any recommendations based on that study.

POLICY CLARIFICATIONS

SEC. 11. (a) NATIONAL TOURISM POLICY.—(1) Section 101(b)(1) of the International Travel Act of 1961 (22 U.S.C. 2121(b)(1)) is amended to read as follows:

"(1) optimize the contributions of the tourism and recreation industries to the position of the United States with respect to international competitiveness, economic prosperity, full employment, and balance of payments;"

(2) Section 101(b) of the International Travel Act of 1961 (22 U.S.C. 2121(b)) is amended—

(A) by redesignating paragraphs (2) through (12) as paragraphs (5) through (15), respectively; and

(B) by inserting immediately after paragraph (1) the following new paragraphs:

"(2) increase United States export earnings from United States tourism and transportation services traded internationally;

"(3) ensure the orderly growth and development of tourism;

"(4) coordinate and encourage the development of the tourism industry in rural communities which (A) have been severely affected by the decline of agriculture, family farming, or the extraction or manufacturing industries, or by the closing of military bases; and (B) have the potential necessary to support and sustain an economy based on tourism;".

(b) DUTIES OF SECRETARY OF COMMERCE.—(1) Section 201 of the International Travel Act of 1961 (22 U.S.C. 2122) is amended—

(A) by redesignating paragraphs (2) through (6) as paragraphs (3) through (7), respectively;

(B) in paragraph (3), as so redesignated, by striking "tourist facilities," and all that follows and inserting in lieu thereof the following: "receptive, linguistic, informational, currency exchange, meal, and package tour services required by the international market;"; and

(C) by inserting immediately after paragraph (1) the following new paragraph:

"(2) provide export promotion services that will increase the number of States, local governments (as defined in section 3371(2) of title 5, United States Code), and companies in the United States that sell their tourism services in the international market, expand the number of foreign markets in which exporting States, cities, and companies are active, and inform States, cities, and companies in the United States regarding the specialized services the international market requires;".

(2) Section 202(a)(9) of the International Travel Act of 1961 (22 U.S.C. 2123(a)(9)) is amended by striking "United States travel and tourism interests" and inserting in lieu thereof "the United States national tourism interest".

(c) AUTHORIZATION REGARDING CERTAIN EXPENDITURES.—Section 202 of the International Travel Act of 1961 (22 U.S.C. 2123) is amended by section 7(a) of this Act, is further amended by adding at the end the following new subsection:

"(f) Funds appropriated to carry out this Act may be expended by the Secretary without regard to the provisions of sections 501 and 3702 of title 44, United States Code. Funds appropriated for the printing of travel promotional materials shall remain available for two fiscal years.".

(d) REPEAL.—The International Travel Act of 1961 (22 U.S.C. 2121 et seq.) is amended by repealing section 203.

(e) TOURISM POLICY COUNCIL.—(1) Section 302(b)(1) of the International Travel Act of 1961 (22 U.S.C. 2124a(b)(1)) is amended—

(A) by redesignating subparagraphs (H) and (I) as subparagraphs (L) and (M); and

(B) by inserting immediately after subparagraph (G) the following new subparagraphs:

"(H) the Secretary of Agriculture;

"(I) the Chairman of the Tennessee Valley Authority;

"(J) the Commanding General of the Corps of Engineers of the Army, within the Department of Defense;

"(K) the Administrator of the Small Business Administration;".

(2) Section 302(d) of the International Travel Act of 1961 (22 U.S.C. 2124a(d)) is amended by adding at the end the following new paragraph:

"(4)(A) Every year, upon designation by the Secretary of Commerce in accordance with subparagraph (B), up to three Federal departments and agencies represented on the Council shall each detail to the Council for that year one staff person and associated resources.

"(B) In making the designation referred to in subparagraph (A), the Secretary of Commerce shall designate a different group of agencies and departments each year and shall not redesignate any agency or department until all the other agencies and departments represented on the Council have been designated the same number of years.".

AUTHORIZATION OF APPROPRIATIONS

SEC. 12. (a) IN GENERAL.—Section 304 of the International Travel Act of 1961 (22 U.S.C. 2126) is amended—

(1) in the first sentence by inserting immediately before the period the following: ", not to exceed $15,000,000 for the fiscal year ending September 30, 1990, not to exceed $18,000,000 for the fiscal year ending September 30, 1991, and not to exceed $21,000,000 for the fiscal year ending September 30, 1992"; and

(2) by striking the last two sentences.

(b) FUNDS FOR FOUNDATION.—Of the funds authorized under section 304 of the Interna-

tional Travel Act of 1961 (22 U.S.C. 2126), as amended by subsection (a), there are authorized to be appropriated to the Secretary of Commerce for each of fiscal years 1990, 1991, and 1992 not to exceed $500,000 to—

(1) match partially or wholly the amount or value of contributions (whether in currency, services, or property) made to the Rural Tourism Development Foundation by private persons and Federal, State, and local government agencies; and

(2) provide administrative services for the Rural Tourism Development Foundation.

(c) FINANCIAL ASSISTANCE FOR STATE PROGRAMS.—There is authorized to be appropriated to the Secretary of Commerce not to exceed $10,000,000 for the period beginning October 1, 1989, and ending September 30, 1992, for the purpose of providing financial assistance for States whose tourism promotion needs have increased due to disasters. The funds authorized under this subsection shall be in addition to any funds authorized under section 304 of the International Travel Act of 1961 (22 U.S.C. 2126), as amended by subsection (a).

Mr. PELL. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. GARN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## EXECUTIVE SESSION

### EXECUTIVE CALENDAR

Mr. PELL. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations: Calendar 770. Michael P. Galvin, to be an Assistant Secretary of Commerce; Calendar 772. David W. Mullins, Jr., to be a member of the Board of Governors of the Federal Reserve System; Calendar 773. Jessica L. Parks, to be a member of the Merit Systems Protection Board, and Calendar 774. Anthony J. Hope, to be Chairman of the National Indian Gaming Commission.

I further ask unanimous consent that the nominees be confirmed, en bloc, that any statements appear in the RECORD as if read, that the motions to reconsider be laid upon the table, en bloc, that the President be immediately notified of the Senate's action, and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF COMMERCE

Michael Paul Galvin, of Illinois, to be an Assistant Secretary of Commerce.

FEDERAL RESERVE SYSTEM

David W. Mullins, Jr., of Arkansas, to be a member of the Board of Governors of the Federal Reserve System for the unexpired term of 14 years from February 1, 1982.

MERIT SYSTEMS PROTECTION BOARD

Jessica L. Parks, of Georgia, to be a member of the Merit Systems Protection Board for the remainder of the term. expiring March 1, 1995.

DEPARTMENT OF THE INTERIOR

Anthony J. Hope, of California, to be Chairman of the National Indian Gaming Commission for a term of 3 years.

## LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, The Senate will resume legislative session.

## SYMPOSIUM ON SENATE LEADERSHIP

Mr. MITCHELL. Mr. President, I wish to call to Members' attention a special day-long symposium on the history of Senate party leadership, which will take place this Thursday. This event is jointly sponsored by the Senate Bicentennial Commission and the Dirksen Congressional Center.

The conference will profile the contributions of nine distinguished 20th-century Senate floor leaders, beginning with John W. Kern, who served in the Woodrow Wilson era, and concluding with Mike Mansfield, who left the Senate in 1977.

The speakers were selected from among the Nation's leading journalists, historians, and political scientists. Each is a specialist on the operations of the U.S. Congress.

Sessions will be held between 9:15 a.m. and 4:30 p.m. in the auditorium of the Dirksen Senate Office Building. At 4:30 former Senate Majority Leader Howard Baker will present to Mike Mansfield the first annual Dirksen Center Award for Meritorious Service.

All Senators are invited to join Senator Baker and Senator Mansfield at a reception beginning at 5 p.m. in room S-146 of the Capitol Building.

## ORDERS FOR TOMORROW

MORNING BUSINESS

Mr. PELL. Mr. President, on behalf of the majority leader, I ask unanimous consent that when the Senate recesses today, it stand in recess until 9:30 a.m. Thursday, May 17, 1990; following the time for the two leaders, there be a period for morning business, not to extend beyond 10 a.m., with Senators permitted to speak therein for up to 5 minutes each and that the Senate resume consideration of S. 195, the chemical and biological weapons bill, at 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

## RECESS UNTIL 9:30 A.M. TOMORROW

Mr. PELL. Mr. President, if the acting Republican leader has no further business and if no Senator is seeking recognition, I now ask unanimous consent the Senate stand in recess under the previous order until 9:30 a.m., Thursday, May 17, 1990.

There being no objection, the Senate, at 6:48 p.m., recessed until Thursday, May 17, 1990, at 9:30 a.m.

## NOMINATIONS

Executive nominations received by the Senate May 16, 1990:

DEPARTMENT OF STATE

G. PHILIP HUGHES, OF VIRGINIA, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO BARBADOS, AND TO SERVE CONCURRENTLY AND WITHOUT ADDITIONAL COMPENSATION AS AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE COMMONWEALTH OF DOMINICA, AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO SAINT LUCIA, AND AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO SAINT VINCENT AND THE GRENADINES.

THE ABOVE NOMINATIONS WERE APPROVED SUBJECT TO THE NOMINEES' COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

# EXTENSIONS OF REMARKS

## INDUSTRIAL POLICY REVISITED

### HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. LaFALCE. Mr. Speaker, beginning in 1983 I held over 100 hearings on the issue of industrial competitiveness, which many called industrial policy. I called for creation of a committee of business, labor, and academic leaders to analyze industrial, competitiveness and recommend necessary steps, sector by sector.

One of the key economists in the Reagan White House, Dr. Paul Krugman, who served with the Office of Management and Budget, adamantly opposed my efforts to set goals for the economy.

Now, Dr. Krugman has changed his mind. In the Journal of Commerce of Tuesday, May 8, Dr. Krugman says that he now believes "that U.S. interests would be served by adoption of a limited, explicit, industrial policy for high-technology sectors."

Welcome aboard, Dr. Krugman. I would be delighted if he would try to convince the current Bush White House to adopt his new posture.

The following is Dr. Krugman's article from the Journal of Commerce:

[From the Journal of Commerce, May 8, 1990]

INDUSTRIAL POLICY'S NOT SO BAD

(By Paul Krugman)

In the early 1980's there was widespread support for a U.S. industrial policy. Economists, however—myself included—roundly denounced the industrial policy enthusiasts.

There is a respectable intellectual case for government intervention to promote some industries, especially those likely to generate important technology spillovers, but seven or eight years ago it seemed unlikely that our government would have the knowledge to pursue a useful industrial policy or the will to avoid turning it into a political pork barrel.

This article represents a partial recantation. I now believe that U.S. interests would be served by adoption of a limited, explicit industrial policy for high-technology sectors.

The reason is only to a small extent that I have changed my views about the economics of industrial policy. It is true that even while the general public's faith in free markets has been growing, economic theory has in recent years moved increasingly away from the kind of models that justify that faith.

The real reason that we need an industrial policy, however, is political. It is the only realistic answer to what otherwise will be a growing confrontation with Japan.

This is not the place to recapitulate the endless arguments over how Japan works. Let me simply assert that the widespread perception that Japan plays by different rules from the rest of us is basically right. This is not a moral judgment, a question of what's right or what's fair. It is just a statement of fact. Japan's market is not open to foreigners in the way that the U.S. or West Germany markets are open.

How much of a problem does the Japanese difference pose for the United States? To defenders of Japan, and to those who believe that a restructured U.S. economy is about to enter a golden age, there is no problem at all.

To alarmists, Japan's challenge is undermining America's economic prospects. The reality is more mundate. Japan's difference hurts the U.S. economy, but only a little. The Japan problem is real, but it is not central.

Yet the problem cannot be dismissed. Japan is a great economic power that does not play by the same rules as the other great economic powers. Economically, and above all politically, that is a fact that cannot be ignored. One way or another, the United States has got to find a way of dealing with Japan.

There are two extreme views about what to do. On one side are the old-time free traders, who want us in effect to turn the other cheek. On the other side are the bashers, who want us to confront Japan and demand massive change, or else.

For those of us in neither camp, the whole issue is agonizing. The old-time free-trade position seems naive, reflecting neither the realities of Japan nor the political possibilities for America. Yet the basher program does not seem very appealing either. Above all, it is virtually certain to fail in its premise: Japan will not change all of a sudden, and we therefore will be stuck with the "or else."

My political forecast is that the bashers will more or less have their way, and that the next decade will be one of growing economic nationalism. This nationalism will be expressed in a demand for import restrictions that will hurt our own economy at least as much as they hurt Japan's.

But this is an outcome that might be avoided if, instead of trying to bully the Japanese into acting like us, we adopt an explicit, but limited, industrial policy. That is, the U.S. government should make a frank decision to subsidize a few sectors, especially in the high-technology area, that may be described plausibly as "strategic," and in which there is a perceived threat from Japanese competition.

I am not at all sure that the actual economic benefits of such a policy will exceed its costs. However, the downside would be limited: federal expenditures of, say, $10 billion a year to support industrial research and development consortia would produce at least some benefits, so that even at worst the net cost of the program to the economy would be a few billion a year—that is, less than 0.1% of the gross national product.

At the same time, such a limited industrial policy could serve a double-edged political purpose. It could be an answer to those who fear that Japanese strategic trade policy is squeezing the United States out of all the key sectors, and it could provide an incentive for the Japanese to find ways to open up their system, if only to persuade the United States not to subsidize industries that complete with Japanese exports.

An on-budget program would be less likely to turn into a pure tool of special interests that a program of import restrictions whose costs consist of higher prices that are virtually invisible to consumers.

I am not advocating some form of "managed trade"—nor would managed trade be an acceptable second-best alternative to the proposed industrial policy. One of the main purposes of the policy proposal is precisely to provide an alternative to managed trade, with its hidden costs and near-total dominance by interest-group politics.

Viewed from the right perspective, then, a limited U.S. industrial policy could be a relatively inexpensive way to cope with the stresses produced by relative U.S. decline and the special problem of dealing with Japan.

This is a safe policy proposal to make, since it seems unlikely that such a clean solution will be adopted. Bashers prefer managed trade, perhaps because its costs are less indentifiable; politicians prefer it for the same reason; and in the 1990s anything that raises the current budget deficit is avoided whatever its future costs. But I am now convinced that industrial policy is the lesser of several evils.

## EL SALVADOR: A DEFENSE

### HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday May 16, 1990*

Mr. CRANE. Mr. Speaker, I am confused. In a few days my colleagues and I will be asked to vote on a bill which authorizes emergency assistance to emerging democracies and at the same time eliminates some of the funds to the struggling democracy in El Salvador. Is it, or is it not, our goal to promote democracy throughout the world? Or do we only support those countries which are in the first stages of reform, and desert them when they truly need us the most?

I would like to share with my colleagues who continue to question whether our money has been used to improve conditions in El Salvador the following article written by President Cristiani. The piece, which appeared in the Washington Post, highlights a number of positive changes that have taken place in El Salvador since General Romero was overthrown in 1979 and gives much of the credit for these changes to the United States. The President specifically states in the article that our aid has been particularly useful in helping out the most impoverished Salvadorans.

In his inaugural address 11 months ago, President Cristiani unveiled a five-point plan to achieve lasting peace in his country and, to date, there is every indication that he is sin-

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

cerely committed to this goal. With this in mind, it is easy to understand why President Cristiani questions, as do I, why the United States would consider withdrawing support from his government now when "there has never been so much encouraging progress on all fronts to demonstrate that U.S. aid is being well spent and U.S. policy is well conceived."

I urge my colleagues to take a moment to consider President Cristiani's remarks before the vote on H.R. 4636.

[From the Washington Post, Apr. 27, 1990]

EL SALVADOR: A DEFENSE

(By Alfredo Cristiani)

Many Americans, including some in Congress, as evidenced by a vote yesterday in a House committee, sharply question whether all the aid the United States has provided for El Salvador has accomplished anything at all. After a decade of U.S. support, they argue, nothing has changed. The guerrilla war and abuse of human rights by government forces continue, while nothing is done for the one-quarter of Salvadoran families living in extreme poverty.

In El Salvador we find it odd that this question is raised at this time, because from our perspective there has never been so much encouraging progress on all fronts to demonstrate that U.S. aid is being well spent and U.S. policy is well conceived.

For example:

El Salvador has become a functioning democracy.

We have had six elections in the past 10 years, and when I took office last year after winning 54 percent of the vote, it was the first time in our history that the reins of government had passed from one civilian to another through popular elections. Our constitutional democracy had passed a crucial test that should please all Americans.

The prospects of peaceful settlement of the war have never looked better.

In my inaugural address 10 months ago I declared that the quest for a peaceful settlement to the decade-long conflict with the Marxist terrorist Farabundo Marti Liberation Front (FMLN) was my top priority, and I outlined a five-point plan to achieve it. Talks began last year, but the FMLN broke them off in November by launching its biggest offensive of the war at the heart of our cities, thinking it could touch off a popular uprising against the elected government. But the people refused, and the FMLN was driven back.

In December the presidents of the five Central American countries meeting in San Isidro de Coronado, Costa Rica, issued a direct statement of support for my government, which it characterized as the product of "democratic, pluralistic and participative processes." The presidents asked the U.N. secretary general to urge both sides to resume the peace negotiations. Without hesitation I set aside any bitterness over the terrorist attacks and went to United Nations headquarters in New York to ask for Secretary General Javier Perez de Cuellar's intermediation. His efforts produced our first session with the FMLN in Geneva two weeks ago, in which both sides agreed to work toward a U.N.-verified truce and to continue talks scheduled to resume during the next few weeks at a time and place yet to be decided. This progress in our quest for peace should spark hope in everyone who genuinely wants a decent end to our agony.

The army is more disciplined and has proved itself willing to investigate abuses of human rights within its ranks.

Ten years ago Archbishop Oscar A. Romero was gunned down by a death squad widely suspected to have been made up of military men. No official attempt was ever made to find the killers. During the guerrilla offensive last November six Jesuit priests, their housekeeper and her daughter were barbarously murdered at the University of Central America in San Salvador. Within hours I ordered a full-scale investigation by our U.S.-funded and trained Special Investigative Unit and requested further technical assistance from the FBI, Scotland Yard and the Canadian and Spanish police. With this international help, we ran more than 300 ballistic tests on the weapons of soldiers near the university at the time. Within two months, an army colonel, three lieutenants and five enlisted men were indicted for the crime. Meanwhile, the search continues for evidence that may link others to the crime, and our offer of a $250,000 reward for information that would lead to additional arrests is still open. There has not been and will not be any cover-up to protect anyone we can get evidence against.

Our critics may say that nothing has changed in El Salvador since Archbishop Romero's assassination in 1980, but our actions should indicate that everything has changed since then. The high command has cooperated fully in the effort to root out the killers within its ranks. This has never happened before. It sends the message to the other military people that such crimes will not be tolerated. It also tells the vast majority of the military, who are good people, that the bad apples are going to get caught.

While it is true we cannot guarantee that a judge or jury will convict these men for this outrageous crime (we wouldn't be a democracy if we could), we will vigorously prosecute the case to the full extent of the law. We are limited by a legal system that has been described as flawed, but I am pushing ahead with legislation to correct these shortcomings.

Our economic and social programs are directed toward the most impoverished Salvadorans.

We are in the first and most difficult stages of a structural adjustment program to correct the economic mistakes of the past and introduce the kind of competitive free enterprise system that is the only proven way to bring about development and prosperity. But to avoid further burdening our poorest people, we have exempted them from major price increases for services resulting from the ending of government subsidies. Moreover, we have given out almost 15,000 land ownership titles to landless farmers who couldn't get their titles under the existing land reform program, which made it difficult for them to get credit to finance their crops. This should rejuvenate the land-reform system.

U.S. economic aid has played a key role in helping our poor, because they are the most directly affected when the guerrillas blow up rural buses and electric power lines. U.S. funds enable us to repair critical infrastructure quickly to minimize the effect on these people and their livelihoods.

Can we say here in 1990 that we are a perfect democracy with no human rights problems? Of course not. But we are making progress, and nothing is more important to continued advancement than a peace settlement. But let me be clear about this: it would be a serious mistake to cut or curtail aid at this crucial moment in the peace process. It would lead those who want to overthrow our democracy by violent means to believe that they can achieve in Washington what they could not achieve in El Salvador.

If these talks succeed and the FMLN guerrillas agree to join with us in our democracy, our goal is to reduce the size of our military substantially and convert U.S. military aid into education, health and other programs for the most needy, including job training for former combatants.

We know that El Savador's problems cannot be solved by violence. Rather, we are convinced that economic progress measured by social justice for all Salvadorans can only be obtained within the framework of constitutional democracy.

## A TRIBUTE TO THE PEPPERELL POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Pepperell Police Department for their dedicated and outstanding service to the people of Pepperell, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave officers of the Pepperell Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief David Young and those who serve in the Pepperell Police Department:

Thomas Lane, James Scott, Allen Davis, Benjamin McDonald, Kenneth Beers, Steven Bezanson, James Peters, Armando Herrera, Peter Gibbs, Jessica Leblanc, Brian Goldman, Alan Lessieur, and Kevin Cooney.

## A NEED FOR A CHANGE OF U.S. FOREIGN POLICIES IN THE SOUTH PACIFIC

### HON. ENI F.H. FALEOMAVAEGA

OF AMERICAN SAMOA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. FALEOMAVAEGA. Mr. Speaker, I was privileged recently to have accompanied Chairman STEPHEN SOLARZ of the House Foreign Affairs Subcommittee on Asia-Pacific, and Congressman ROBERT DORNAN of the

House Armed Services Committee, in August of last year to review U.S. policies toward the Pacific Region on Oceania.

Mr. Speaker, I am pleased to share with my colleagues a summary analysis and our findings as a result of our meeting with several of the leaders of Pacific nations.

Mr. Speaker, I submit for the RECORD an excellent summary of our findings as so eloquently stated by Chairman SOLARZ.

PROBLEMS IN PARADISE: UNITED STATES INTERESTS IN THE SOUTH PACIFIC

(Statement by Representative Stephen J. Solarz)

For four decades and more, ever since the end of World War II, American policy and American policymakers have largely ignored the South Pacific. At best our policy toward the region has been one of benign neglect. As a consequence, the tremendous store of goodwill that our wartime liberation of the region gained us in the South Pacific has gradually diminished, until today that reservoir of friendliness and sympathy toward the United States is in danger of drying up.

The peoples of the South Pacific correctly point out that U.S. aid to the 17 countries and entities of the region, exclusive of $10 million provided under the South Pacific Fisheries Treaty, totals a paltry $6.9 million. By way of comparison, Australia, according to the latest available figures, provides well over $250 million; Japan, $66 million; and New Zealand, with a population smaller than Kentucky's or Arizona's, over $40 million.

In other respects, as well, there is a growing perception in the region that the United States is not responsive to the needs or the sensibilities of the inhabitants of the South Pacific. Included among their grievances are the failure of the United States to ratify the protocols to the Treaty of Rarotonga establishing a South Pacific Nuclear Free Zone; perceived U.S. support for France's program of nuclear testing in the region; the absence of permanent U.S. diplomatic missions in many of the countries of the region; and a belief that Washington is not sufficiently responsible to the region's environmental concerns.

Some will ask why we should care about the South Pacific. Why, in an era of budgetry constraints, should the United States adopt a more visible and active role in the region? The answer, simply stated, is that it is in our interests to do so. Indeed the United States has a wide range of political, security, economic, and humanitarian interests in the region that would be well served by a new policy that gives higher priority to the South Pacific.

Politically, we have an interest in sustaining sister democracies around the world.

Strategically, we have an interest in keeping open the air and sea lanes connecting Australia, New Zealand, and the United States, and in maintaining our long-standing policy of strategic denial vis-a-vis the Soviet Union.

Economically, we have an interest in the rich marine and mineral resources of the region.

And from a humanitarian point of view, we have an interest in helping the people of the South Pacific, many of whom subsist on a per capita income considerably below $1,000 a year, overcome the often harsh conditions under which they live.

Convinced of the importance of the region for the United States, and believing that the time was ripe for a new look at American interests and policies in the South Pacific, two of my colleagues and I made a trip to the region last August. Joining me were Congressman Robert K. Dornan (R-Calif.) of the House Armed Services Committee and Congressman Eni Faleomavaega (D-American Samoa) of the House Foreign Affairs Committee. Over the course of twelve days we visited seven countries: Kiribati, Fiji, Western Samoa, New Caledonia, Vanuatu, Papua New Guinea, and the Solomon Islands.

Today we are releasing a formal report on our trip, entitled "Problems in Paradise: United States Interests in the South Pacific." I believe I am correct in saying that this document is the most comprehensive study of U.S. interests in the South Pacific and U.S. relations with the countries of the South Pacific ever produced by the Congress. Certainly it is the most up-to-date.

As part of our report, we have offered a number of recommendations of both a regional and a country-specific nature. Among those recommendations are the following:

The U.S. should continue its leadership role on the driftnet fishing issue.

The Administration should submit the Protocols of the Treaty of Rarotonga to the Senate for ratification.

The U.S. should beef up its diplomatic presence in the region.

The U.S. should establish additional bilateral aid missions in the region.

The U.S. should initiate a South Pacific scholarship program.

Acting in cooperation with our friends in the region, the U.S. should plan special ceremonies commemorating the 50th anniversaries of the major World War II battles of the South Pacific.

The Administration should submit the South Pacific Regional Environmental Program Convention and the associated Protocols to the Senate for ratification.

The U.S. should expand high level contacts between American and South Pacific leaders.

The U.S. should increase the level of U.S. representation at meetings of the regional organizations.

The U.S. should take steps to see that Voice of America broadcasts are available to a larger regional audience.

The Peace Corps should expand its presence in the region.

The Administration should prepare a strategy for the promotion of trade, investment, and tourism in the South Pacific.

The U.S. should reorganize its current diplomatic posts in the region.

It is our firm conviction that the time has come for the United States to rediscover the South Pacific. It is high time for a new, comprehensive American strategy toward the region. The starting point for such a strategy would be a greater sensitivity to South Pacific views on a variety of issues, most particularly the Treaty of Rarotonga. Another component in the strategy would be a systematic effort to project a higher U.S. profile in the region, not so much through increased aid resources as through a greater diplomatic presence, higher-level official contacts, enhanced people-to-people programs, and more active U.S. participation in South Pacific regional organizations.

We feel confident that my drawing up such a strategy for the South Pacific, based upon the recommendations contained in this report, the United States could get considerable mileage from a relatively modest investment of resources and attention. In this fashion, not only would American interests be furthered, but those of our friends in the South Pacific as well.

## WELCOMING HIS EXCELLENCY ZINE EL ABIDINE BEN ALI, PRESIDENT OF THE REPUBLIC OF TUNISIA

### HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. CONTE. Mr. Speaker, it is my pleasure to welcome to the United States, His Excellency Zine el Abidine Ben Ali, President of the Republic of Tunisia. President Ben Ali is an important friend of the United States and an outspoken proponent of free and democratic government in a region of the world which often sees too few democratic leaders.

Since assuming the Presidency in November 1987, in accordance with the Tunisian Constitution, President Ben Ali has instituted a number of reforms designed to restore freedoms which had eroded over the last several years. Among the political reforms implemented are the opening of the democratic process to other political parties, greater freedom of the press, the release of thousands of political prisoners, and limiting the presidential terms in office to two. All of these initiatives have combined to ensure that Tunisia maintains a government that is responsive to its citizens.

Tunisia, however, faces many challenges. The rise of Islamic fundamentalism, which espouses anti-democratic reforms, could endanger the political progress thus far achieved.

In order to address the need for economic reform, President Ben Ali has instituted a major structural adjustment plan supported by the World Bank, the IMF, and the United States. Commendably, President Ben Ali has not restored to heavy-handed measures to meet these political and economic challenges. Instead he has chosen to expand democratic and economic freedoms for the people of Tunisia so that they can collectively benefit from these measures.

For many years I have followed the progress, and at times the problems, of the Tunisian people. They have placed great emphasis on education rather than costly military buildups.

Mr. Speaker, and my colleagues, I hope that you will join me in extending a warm welcome to His Excellency Zine el Abidine Ben Ali, President of Tunisia, a friend of the United States, and an example of democratic leadership for the world.

## TRIBUTE TO THE ASIAN-PACIFIC STATE EMPLOYEES ASSOCIATION

### HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. MATSUI. Mr. Speaker, I rise today to bring to my colleagues' attention the work of a

distinguished public service organization, the Asian-Pacific State Employee Association.

Over the years, the association had dedicated itself to improve the quality of life for all members of the Sacramento community. Through their commitment, the association has assisted many young students in furthering their education by offering scholarships to distinguished college-bound students.

The Asian-Pacific State Employee Association is most deserving of our thanks and our praise for their efforts and compassion. There are few cases more worthwhile than encouraging our young people in their efforts to enhance their education and contribute in a meaningful way to society. Given the unprecedented challenges arising from the vast and significant changes which are taking place in our society, the importance of an advanced education is greater now than ever before.

I wish to commend the association on this act of public service, and extend my personal congratulations to each of these students for their academic excellence. Being honored with scholarships by the Asian-Pacific State Employee Association Scholarship Committee are Ms. Thu Tran of Encina High School, Ms. Julia Fong of C.K. McClachy High School, and Ms. Jennifer Ouchida of rio Americano High School. Mr. Scott Ichikawa of C.K. McClatchy High School is the recipient of the KCRA TV Channel 3 scholarship and Mr. Somwang Hingkham of Cordova Senior High School is the recipient of the Aerojet scholarship.

Mr. Speaker, I know my colleagues join me in wishing these students continued success in their academic endeavors.

## HONORING CAPTAIN RICHARD A. STRATTON

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. MACHTLEY. Mr. Speaker, I rise today to honor Capt. Richard A. Stratton, of Newport RI, who is being honored by Rhode Island Military Order of the Purple Heart for his years of dedicated and distinguished service in the U.S. Navy.

Captain Stratton began his military career in 1948 in the Massachusetts National Guard. He then enlisted in the Navy and was commissioned in 1955 through the Naval Aviation Cadet Program. He has served as executive assistant to the deputy director Joint Strategic Target Planning Staff, Strategic Air Command Headquarters, a commanding officer for two Navy recruiting districts, and as deputy for operations at the U.S. Naval Academy. From 1967 to 1973, he was a prisoner of war in Vietnam. In 1975, he was promoted to the rank of Captain. He has been the director at the Naval Academy Prep School in Newport. He retired from active service in 1986.

Captain Stratton has received several medals and commendations during his career. Among these are the Purple Heart, the Navy Commendation Medal, the Air Medal, the Meritorious Service Medal, the Legion of Merit, the Bronze Star, and the Silver Star. In addition, he was appointed an honorary Chief Petty Officer and is a member of the U.S. Coast Guard CPO Association, the Fleet Reserve Association, and the Navy Enlisted Reserve Association.

For his years of dedicated and loyal service to our Nation both in times of war and of peace, it is with great pleasure that I salute Captain Stratton. I wish him all the best and continued success in the future.

## A TRIBUTE TO THE BOXBOROUGH POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Boxborough Police Department for their dedicated and outstanding service to the people of Boxborough, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Boxborough Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order, that our neighborhoods are not held hostage to the threats of criminals, and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief William Morrison and those who serve in the Boxborough Police Department:

Ralph E. Kelley, Stephen P. Trefry, Michael J. Edmonds, Michael R. Grill, Scott J. Camilleri, John W. Deasy, William N. Rowe, Stephanie M. Baker, Erik Ramsland, Harold W. Curtis, Richard N. Priest, Paul A. Wilson, Robert Nugent, and Raymond Eyles.

## TRIBUTE TO ESTHER AND BEN GEIZHALS

### HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. MRAZEK. Mr. Speaker, on the evening of May 20, 1990, the American Friends of Bnai Zion Haifa Medical Center in New York City will honor two dear friends of mine, Esther and Ben Geizhals. The Geizhals will be feted at a black-tie dinner in Queens for their dedication, devotion, and commitment to the medical center and their years of service to Bnai Zion.

The Geizhals' story, Mr. Speaker, is a compelling one. Ben, a native of Cracow, Poland, survived the horrors of four concentration camps during World War II, and Esther is a survivor of Auschwitz. They moved to the United States after the war and live in New Hyde Park, Queens. The couple has three children, one of whom resides in Israel.

For nearly 20 years, Mr. Speaker, my predecessor in Congress and I have been the beneficiaries of Ben's wise counsel on matters concerning Israel and the Middle East. After serving as a congressional aide to our former colleague Lester Wolff for 12 years, he has continued to impart his special view of world events to me, and I am grateful for this guidance.

Ben also has thrown himself into community service with a rare vigor. Among the positions he has held or continues to hold are president of Young Israel of New Hyde Park; president of the Cracow Society; board member of Queens College Speech and Hearing Center, the American Federation of Polish Jews, the American Federation of Concentration Camp Survivors, and the Salute to Israel Parade, and executive board member of Bnai Zion and of Friends of IDF.

Through all of his good works, Mr. Speaker, Ben has recognized the strength and companionship of his wife Esther as a driving force. Indeed, they are a team, and it is only fitting that they will be honored as such on May 20. I'm sure my colleagues in the House join with me in sending best wishes to my good friends Esther and Ben Geizhals at this proud moment in their lives. I look forward to their continuing friendship in the years ahead.

## AFL-CIO'S LANE KIRKLAND RECEIVES INTERNATIONAL HUMAN RIGHTS AWARD

### HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. FASCELL. Mr. Speaker, last evening I had the honor of presenting to Lane Kirkland, president of the AFL-CIO, a 1990 International Human Rights Award in behalf of the International Human Rights Law Group. It was an honor for me to present such a significant award to one of the most distinguished citizens of this country and of the entire world.

The International Human Rights Law Group is a nonprofit public interest law center which serves as a catalyst to mobilize the skills of the legal community to promote and protect human rights. The Law Group has worked in more than 40 countries to investigate human rights abuses, to monitor elections, and to support the independence of judiciaries. The Law Group's wise counsel, as a nonpartisan, nonideological advocate, has contributed greatly to the work of the Congress through its testimony before the Committee on Foreign Affairs and especially our Subcommittee on Human Rights and International Organizations. Under the able leadership of it's executive director, Amy Young, and the direction of a distinguished board of directors chaired by Robert Herzstein the International Human Rights Law Group has made a very real differ-

ence in the lives of thousands and thousands of men and women around the globe.

Last night, along with other distinguished honorees Yelena Bonner and Alexander Dubchek, the Law Group paid tribute to a man who reflects, if not personifies, the American labor movement which has contributed so very much to making this country the envy of the globe. In honoring Lane Kirkland the Law Group also honored the men and women of the AFL–CIO whose support, whose dues, and whose hard work on the job and in union activities have enabled Lane Kirkland's unique talents to touch the lives of millions in distant lands.

It is easy, inside the beltway, to see organized labor only as an interest group—though larger and more powerful than most, perhaps all. But those of us in elective politics who have the opportunity to meet with workers one on one see organized labor for what it really is: part of mankind's ancient struggle to bring dignity to the life of each and every individual. It is a noble task which lies at the very heart of what members of the Law Group and we in Congress mean when we speak of human rights. And all too often the struggle for workers rights today—even in the United States—is about fundamental rights, issues of individual dignity and worth, and not simply questions of pay.

It is a mighty statement to the selflessness of the American worker that when a group of workers has succeeded in ending abuses they have not stopped, satisfied with their own achievements. American workers, through their unions, have reached out to others to help them in their struggle. Last night's award to Lane Kirkland was made possible because America's workers have had the vision to recognize that the fabric of human rights cannot stop at national boundaries, that one person's rights are not fully secured while those of his neighbors are at risk.

It is in the spirit of concern for fellow workers around the globe that the American labor movement and especially the AFL–CIO has involved itself in the struggle for workers rights, for human rights, in Poland, Chile, Guatemala, El Salvador, Korea, the Soviet Union, and dozens of other nations.

When Lech Walesa and the then small Solidarity movement were unlikely winners against the monolith of Communist dictatorship, Lane Kirkland was there with financial, organizational, and especially fraternal moral support. It was his vision that provided critical support to workers in Poland and it is their example that proved so powerful throughout Eastern Europe. Lane Kirkland and the men and women of the AFL–CIO through their actions and example helped to turn the web of possibility inherent in the Helsinki process into concrete achievements.

Over the years Lane Kirkland and the AFL–CIO have been in the forefront of struggle for rights in the Soviet Union, from workers rights to championing the right of Soviet Jews and others to freely emigrate.

When the dark night of the Pinochet government fell over Chilean democracy, the AFL–CIO was there with critical support for Chilean free labor unions. When the opportunity for a new day drew nearer, Lane Kirkland was in the forefront of those helping Chilean Democrats to regain their democracy.

The list of nations where Lane Kirkland has made a very real difference is a long one. Wherever progress on human rights can be made, you will see labor leaders in the front ranks. And wherever labor leaders are struggling for human rights, there you will find Lane Kirkland and the members of the AFL–CIO.

As a former board member of the National Endowment for Democracy I have had the opportunity to work closely with Lane Kirkland and to see firsthand the unique contribution he as an individual makes to the tasks to which he sets in hand. He is truly a champion of human rights. His vision, courage, and tenacity have been rewarded in large measure by the events of this last remarkable year. Yet he would be the first to say that in many ways our job has only begun.

Last night's award ceremony was a joyful occasion but our enthusiasm was tempered by the realization that, even as we celebrated, all too many of our fellow human beings do not have the fundamental rights, the basic dignity, to which their humanity entitles them. But last night's awards ceremony was their celebration too, for the energy and dynamism and dedication we recognized through the awards lives in the hearts and minds of untold millions. And one day, thanks to people like Lane Kirkland, they, too, will have their day in the sunshine.

## HONORING THE 35TH ANNIVERSARY OF THE BRONX MUNICIPAL HOSPITAL CENTER

### HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ENGEL. Mr. Speaker, today I would like to recognize the quality patient care that is being provided at the Bronx Municipal Hospital Center, which is celebrating its 35th anniversary of service to the people of the Bronx.

Since 1955, the success of BMHC has truly been a community effort. Hospital workers, medical staff, elected officials, labor unions and community organizations have all contributed their special skills and commitment to excellence.

BMHC is a 776-bed teaching hospital affiliated with the Albert Einstein College of Medicine, and it is the largest municipal hosptial in the Bronx. Its residency training programs involve 40 medical specialties and subspecialties.

A long list of important and innovative medical work has been performed at the center. Its burn service, first established in 1961, is the only service of its kind in the borough. The hyperbaric center is a leader in the treatment of victims of smoke inhalation and carbon monoxide poisoning. Since 1986, BMHC has run a pediatric AIDS day care center that provides both educational and clinical support for children with AIDS.

Over the past few years, BMHC has expanded its home health care services and taken an active role in the recruitment and retention of nurses. All of these programs are just a fraction of the quality health care provided by the dedicated professionals at BMHC.

I congratulate all the staff and supporters of BMHC on this festive occasion, and thank you on behalf of my Bronx constituents. I pledge my support for your important programs and wish you continued success in the years ahead.

## DOROTHY ALLENSWORTH: MAKING DREAMS COME TRUE

### HON. NITA M. LOWEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mrs. LOWEY of New York. Mr. Speaker, I rise today to pay tribute to an outstanding American who has dedicated her life to helping those who are working to make a better life for themselves through education.

Dorothy Allensworth is the executive director of College Careers, an organization which helps severely disadvantaged young people lift themselves out of poverty by offering them the opportunity to secure a college education.

College Careers' sponsorship goes far beyond simply helping a person enter college. It provides assistance in resolving personal problems, guidance in selection of a college, help with admissions and financial aid, and help with tuition, room, and board. Dorothy's leadership in this organization has been instrumental in its outstanding success record. Starting with 22 students in 1967, College Careers has grown to sponsor approximately 150 students from 60 to 70 different colleges and technical schools each year.

On Saturday, May 19, 1990, Dorothy will receive the prestigious "Ethics in Action" award by the Ethical Culture Society of Westchester. This award is presented each year to no more than two individuals in recognition of their outstanding community service. The recipients of this award have demonstrated through their work unusual dedication and commitment toward improving the human condition.

I have had the privilege of knowing Dorothy for several years, and I know that her leadership and commitment in helping fulfill the dreams of young people to attend college grows from her personal belief that individuals can make a difference, that they can improve the lives of those they are willing to reach out and help. Her work has helped hundreds and hundreds of young people and thereby make this a better world.

## A TRIBUTE TO THE LITTLETON POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Littleton Police Department for their dedicated and outstanding service to the people of Littleton, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Littleton Police Department—the public servants on the frontline who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Thomas Odea and those who serve in the Littleton Police Department:

Joseph Lombardo, Robert Romilly, Steven Ziegler, John Hagan, Paul Hollingsworth, Greg Irvine, John Kelly, Mathew King, Paul Baratta, and Thomas Delegge.

## THE NATIONAL PEACE OFFICERS MEMORIAL DAY CEREMONY

### HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. GILMAN. Mr. Speaker, I would like to take this opportunity to draw the attention of my colleagues to a touching police memorial service I attended on Tuesday, May 15, 1990, commemorating the 163 men and women who made the supreme sacrifice in the line of duty last year.

I would also like to share with my colleagues the moving remarks given at the memorial by Vice President QUAYLE.

The National Peace Officers Memorial Service takes place on May 15 of each year during National Police Week. Each year, survivors, police officers, officials, and friends gather in order that we may commemorate the courageous service of those we have lost, and to express our gratitude for those who place their lives on the line every day.

Mr. Speaker, I insert at this point in the CONGRESSIONAL RECORD the full text of Vice President QUAYLE's remarks at the memorial ceremony:

REMARKS BY VICE PRESIDENT DAN QUAYLE

Thank you, Dewey, for those inspiring and though provoking words. You are all lucky to have found a great and tough leader in Dewey Stokes.

We are gathered here today in the name of the American people. We have come to commemorate 163 men and women who have made the highest sacrifice that any human being can make. These men and women, whose names will be read shortly, gave their lives so that we, their fellow citizens, could live freely and in peace. We are moved by what they have done for us, by the love we feel for them, and in the cases of the family members present by the memories of those who were most treasured by them in life.

And so it is that we have set aside this day every year to come together as a nation to honor those who have fallen in the line of duty. We come here seeking each other's company, to contemplate the terrible loss we have suffered, to express our frustration over the senseless violent acts of criminals, and to ask why God in His infinite widom has taken from us those who were so good and who we most loved.

There are no easy answers to questions such as these. But perhaps we should begin by keeping in mind the example set by the men and women who founded this country. They handed this special land on to us as a sanctuary of freedom, a "Shining City on a hill." But they did so only at a great cost in lives lost, both in wars overseas and in the struggle against crime at home.

We face the same reality that our forefathers confronted—that freedom is dearly bought and dearly maintained. And, that the price is paid in a never ending war against crime, as well as in ceaseless vigilance against threats from our enemies overseas.

The war against crime and drugs, which so taxes our patience and ability to persevere as a nation, is every bit as much a struggle for national survival as any other that this country has faced. The enemy within—the violent criminal and the drug dealer—threatens not only our freedom and way of life, but the very idea of civilization itself.

We who have not made the ultimate sacrifice must resolve to be as brave, as dutiful, and as generous as those whom we now honor. Let us live up to that obligation by leaving this Ceremony today pledged to do three things: First, to honor those who have died; second, to carry on their life's work; and third, to learn from their example.

We should begin by honoring those who have died this past year with the recognition that they are in fact American heroes. The fallen peace officers of 1989, and of every other year, gave their lives for their country as valiantly and as courageously as any of America's war heroes have done.

Today, we formally recognize and express our gratitude for that sacrifice. The National Law Enforcement Memorial, which will be completed soon, and which will be the site of this Ceremony in future years, will further express our admiration as a nation for the bravery, character, and love shown in the line of duty by these men and women.

Second, we should leave this Ceremony today pledged to carry on the life's work of those who have died. There is one piece of unfinished business in particular that, above all others, we should pledge to complete.

One year ago today, President Bush spoke at this Ceremony. He urged us to keep faith with the sacrifice of those peace officers who've died in the line of duty by waging a renewed and total war on crime. He called for "a national strategy, a partnership with America's cities and States, to take back the streets." And, he proposed a broad legislative initiative to fight violent crime which he sent to the Congress.

This Comprehensive Violent Crime Control Act would fight crime: by greatly broadening the availability of the death penalty, by reducing the power of judges to exclude evidence of crimes, by reforming overly complicated habeas corpus procedures, and by keeping firearms out of the hands of criminals.

For one whole year, the Congress of the United States has sat on the President's anti-crime package. And it has done nothing at all during that time. It has not even scheduled a floor vote in either House.

Ladies and gentlemen, Congress needs to quit footdragging on the President's violent crime control package and pass it NOW! We owe it to the men and women whose deaths we now commemorate to do everything we can to stop violent crime.

Third, let's leave this Ceremony today having learned from the example of those who have died. Let's depart here determined to remember that there are heroes and villains in this world just as surely as there is good and evil. And, let's remember that just as we should emulate the heroes who we commemorate today, we should have no compunctions about punishing the villains.

Unfortunately, it sometimes seems that as a society we have forgotten some simple, basic truths one of which is that there are evil people in the world who are intent on doing wicked things.

We sometimes hear it said that society is more to blame for crimes than are criminals. Or that crime is caused by parents who are too distant or who pamper their children too much. Or that crime is caused by America's poverty, or that it's actually America's prosperity that is to blame. TV violence, boredom, passionate impulses—everything and everyone is blamed. Everyone—except the criminal.

However, those who have been out on the streets know better. They know, as President Bush has said many times, that the criminal chooses his way of life, his companions, and the kinds of crimes he commits. They know that it is the criminal who chooses to reject society and its values. And, they know the criminal is not the victim, he is the victimizer. Any law-abiding society has a duty to punish wrongdoers. And punishment is not an unseemly indulgence in revenge but a civilized response to wrongdoing.

At the same time, let us not forget that there are many good people in the world as well as the evildoers. And, let's be proud that among those good people, there are the heroes who we honor with this Ceremony today.

We should be proud that our history shows some 30,000 heroes have given their lives in the war against crime. That staggering number does not even include those law enforcement officers who were wounded or disabled.

It does include many men like Charlie Hill, a good family man, who was active in his church and neighborhood and was loved by all who knew him. On March 23 of last year, Charlie Hill went to serve an eviction notice and ended up losing his life. He was killed in a shootout with a thug, who was holding a hostage in a crack house. Another officer, Andrew Chelchowski, was seriously wounded in the exchange. Charlie Hill's mother, his wife Virginia, and his sons Robert and Charles, Jr., are here with us today.

Another of the heroes we honor with this Ceremony is State Trooper Jerry Hines. On February 20th of last year, at 11:55 p.m., he pulled a car over on the Interstate because he suspected the driver was drunk. The driver, who had committed several other murders only hours before, shot Jerry Hines respeatedly with a hand gun and left him to die. Jerry Hines' wife, Carol, his daughter, Jennifer, and his sister, Maria, are also with us today.

Sadly, there are so many other families, like Charlie Hill's and Jerry Hines', repre-

sented and honored here today. Next year, they may be joined by the families of the two latest heroes, Greg Hauser and Ray Kilroy of Chicago, who lost their lives just this past Sunday night when they responded to a plea for help from a grandmother who was being harassed by her own grandson.

Let us resolve, as a society, to do more for the families of these fallen law enforcement heroes—and for all the other victims of crime. As far as I am concerned, we have spent far too much time worrying about the rights of criminals and not nearly enough time worrying about the rights of victims.

We need to restore some balance to the scales of justice by putting victims' rights first—where they belong. Let us leave this place inspired by the example of sacrifice and love set by those whom we honor, like Charlie Hill and Jerry Hines. Let us commit ourselves to carry on their life's work by passing tough anticrime laws and by winning the war on crime. And, let us determine never to forget that there are heroes and villians in the world, and that we are privileged to walk in the footsteps of some of the finest and bravest men and women this country has ever produced. These men and women honored us by the manner in which they lived and by the manner in which they died.

Receive them, O Lord, into your heavenly kingdom, and hold them in Your arms while they await us, and the day when we shall all be together again.

Thank you all, and God bless you.

## THE REPUBLIC OF CHINA INAUGURATES PRESIDENT LEE

### HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. CRANE. Mr. Speaker, it gives me great pleasure and honor to wish my friends in the Republic of China on Taiwan good luck as they inaugurate their eighth President, Mr. Lee Teng-hui, on May 20, 1990.

In the last 10 years the Republic of China has been standing tall: First as a developing democracy, and second as a major economic power in the world. Its living standards are among the highest in the world, and its economic growth, averaging more than 8 percent a year since 1981, has been the envy of the world as well. At present it has a foreign reserve of more than $75 billion and the ROC Government has established a $1.2 billion international economic cooperation and development fund, the purpose of which is to strengthen overseas economic cooperation or joint planning of economic development in the form of direct and indirect loans, technical assistance, or guaranteed investments.

Despite our lack of a formal relationship with the Republic of China, the United States has a strong "unofficial" relationship with the ROC. In recent years we have had a number of trade consultations with the ROC Government regarding their continuing trade surplus with us. Recent trade figures show, however, that there has been a decline in their trade surplus, and it is conceivable that a trade balance between our countries can be achieved at some future date.

Mr. Speaker, the Republic of China is a responsible international country and our fifth largest trading partner. As its economy continues to expand, it is the duty of all Western nations, and especially of the United States to help it return to all proper international organizations. ROC's application to join GATT has been temporarily blocked, but no effort should be spared in helping the Republic of China attain its goal of being a major international player.

As we congratuate the people on Taiwan and President Lee Teng-hui, the first elected Taiwanese president, on President Lee's May 20th inauguration, I wish to say that my colleagues and I have always enjoyed working with ROC's representatives in Washington. They are a dedicated crew and they have helped us understand their country throughout the years.

## THE SOCIAL SECURITY TEST REPEAL RALLY

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. MACHTLEY. Mr. Speaker, I rise today to commend the work of many of my colleagues in arranging the Social Security earnings test repeal rally, showing support for the Older Americans Freedom To Work Act. I was honored to be able to speak in favor of repealing this earnings test.

This obvious disincentive to work has been a thorn in the side of senior citizens. Those reaching retirement age should not be forced to stop working. Removing this barrier can foster more independent, confident seniors. Older Americans can and should participate as productive members of society.

This legislation would benefit those seniors who need it most. Two-thirds of the benefit from repeal would go to those with income of less than $40,000. Working without added penalties such as the earnings test gives seniors independence from Federal programs. Nobody should be dependent upon the Federal Government in their everyday lives.

The repeal of the earnings test also makes economic sense. Keeping in mind the social costs of retirement, encouraging productivity increases overall benefits. Instead of contributing to the Nation's output of goods and services, a retiree receives a pension and health care benefits paid for by working taxpayers—thus affecting the economy.

Removing the earnings test barrier makes sense for individuals and the economy. It seems that we have an opportunity to help a large group of people without burdensome complications. I believe it is about time we took this step.

## "RAPPIN" FOR THE ENVIRONMENT

### HON. GEORGE J. HOCHBRUECKNER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. HOCHBRUECKNER. Mr. Speaker, I would like to take this opportunity to share with my colleagues the concerns expressed by one young person in my district for a clean, safe environment.

Wanting to help other students realize the importance of environmental issues, Raheam Brown, a constituent of mine from the Westhampton Beach Junior High School, in Westhampton Beach, NY, composed a rap song about recycling. I am proud to include his message in today's CONGRESSIONAL RECORD.

Untitled

White paper thrown into cans,
A wine glass for the woman and man.
It's all about recycling and how we can help,
Hey, look this ain't no history class so don't yelp.
Listen to a little story 'bout a kid named Jay,
Yo, here's the story.
One day I saw him walkin' down the street,
Bobbin' his head to a strange beat.
Eatin' his hotdog and sippin' his drink,
Everyone thought that he was a big fink.
Throwin' paper is what the boy was doin'
Walkin' down the street while he was chewin'.
Didn't realize what was goin' on,
As you can hear he was wrong.
He didn't recycle that was his mistake,
A mistake that you really shouldn't make.
So Recycle! Recycle! Recycle! Recycle!
When we recycle paper we save trees,
And make goods that get shipped overseas.
And not only that we make the air better too,
All by the help of what we can do.
So don't be frontin' or even casin',
Jus' help out with the U.S. Nation.
And Recycle! Recycle! Recycle! Recycle!
Peace!

## A TRIBUTE TO THE DRACUT POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Dracut Police Department for their dedicated and outstanding service to the people of Dracut, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave officers of the Dracut Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a Nation ruled

by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Louis Panas and those who serve in the Dracut Police Department:

Robert Paquin, Lawrence Veino, Kevin Rowe, Thomas McNiff, Raymond Jones, Paul Charbonneau, David Courtenay, Joseph Shurtleff, Thomas Barker, Anthony Archinski, Charles Cregg, William Dubois.

Pasquala DeCunto, Brendon Loughran, Robert Hoag, Leonard Flanagan, Barry Cregg, Peter Apostolas, Kevin Richardson, Richard Bergeron, Gerald Surprenant, Gerard Dauphinais, James Wagner, Harry Curtis.

Rogert Brissette, Stephen Araskiewicz, Phillip Berard, Ralph Garland, Stephen Chaput, Donna Guziejka, Leonard Wagner, Thomas Cappelluzzo, Peter Kelleher, David O'Brien.

## EXIMBANK OPENS NEW LINE OF CREDIT FOR POLAND

### HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. FAUNTROY. Mr. Speaker, in an effort to support Poland's transformation to a free market economy, President Bush has announced that Eximbank will begin to offer Poland medium-term credit for financing projects and supporting United States exports. Previously, legal restraints prohibited Eximbank from doing business in Poland on a medium-term basis and limited financing to a short-term basis of 1 year or less. The Export-Import Bank Act, requiring Eximbank to have "reasonable assurance of repayment," prevented Poland from buying United States exports. However, in light of Poland's progress in complying with the austerity program required by the IMF, Eximbank's Board of Directors explored various possibilities in which the United States could provide Poland with the means to purchase American capital equipment and services. I commend the Board's decision and hope that American manufacturers will take advantage of Poland's open market. I encourage my colleagues to review the following article explaining this recent development in United States lending policy toward Poland and communicate the news to their constituents.

[From the Wall Street Journal, May 14, 1990]

EX-IM BANK TO EXPAND LOANS TO POLES; BUSH SETS OTHER EAST BLOC INITIATIVES

(By Gerald F. Seib)

COLUMBIA, SC.—President Bush, as part of an effort to show broader American support for nascent democracies in Eastern Europe, said the U.S. Export-Import Bank is opening a new line of credit for Poland.

Mr. Bush said the bank, an independent government agency that finances exports of American goods, will begin offering medium-term loans and loan guarantees and medium-term credit insurance for projects in Poland. Previously, the Ex-Im Bank was providing only short-term credit insurance, the White House said.

Short-term financing generally is extended for only one year, while medium-term financing can be repaid over roughly five to seven years, White House officials said. They added that any new financing for projects in Poland would have to come out of existing Ex-Im Bank funds, meaning that the administration won't seek additional funds for the president's initiative.

Mr. Bush announced the step at a commencement address here at the University of South Carolina. He said the move was part of an American effort to "export our experience" to help Eastern Europe nations that are shucking their Communist systems.

All told, the modest package of initiatives announced by the president amount to a relatively low-cost attempt to counter assertions that he hasn't been aggressive enough in helping Eastern Europe pull away from Soviet Control.

In addition to the new Ex-Im Bank financing, Mr. Bush said that the U.S. will be sending delegations to observe coming elections in Romania and Bulgaria and will participate in a meeting of the Conference on Security and Cooperation in Europe in a few weeks to draw up guidelines on free elections and political pluralism.

Mr. Bush also announced the formation of a Citizens Democracy Corps, which will consist of private-sector volunteers who will help East Europeans develop democracies and market-oriented economies. Officials said the administration will seek $300,000 in government, funding to get the Democracy Corps started.

The White House didn't say how much new Ex-Im Bank financing will be available for Poland. The bank's exposure in Poland now is $52 million, mostly in financing arranged before 1982.

Offering new financing is a way for the U.S. to reward and support Poland's painful decision to put its sagging socialist economy through "shock therapy" of rapid change toward a free-market system. U.S. officials want to encourage other East European nations—as well as the Soviet Union—to launch similar programs of radical economic change.

The new Ex-Im financing will be earmarked primarily for projects involving Poland's small but growing private sector or involving state enterprises that have put forth plans to go private. Mr. Bush said the financing "will provide Poland a new line of medium-term export credits and loan guarantees for purchasing machinery, technology and services from American suppliers."

## TRIBUTE TO THE SACRAMENTO CHAPTER OF THE JAPANESE-AMERICAN CITIZENS LEAGUE

### HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. MATSUI. Mr. Speaker, I am honored to rise today to bring to my colleague's attention the work of a distinguished public service organization, the Sacramento Chapter of the Japanese-American Citizens League.

Over the years, the league has dedicated itself to improve the quality of life for all members of the Sacramento community. Through their commitment, the league has assisted many young students in furthering their education by offering scholarships to distinguished college-bound students.

The Japanese-American Citizens League is most deserving of our thanks and our praise for their efforts and compassion. There are few causes more worthwhile than encouraging our young people in their efforts to enhance their education and contribute in a meaningful way to society. Given the unprecedented challenges arising from the vast and significant changes which are taking place in our society, the importance of an advanced education is greater now than ever before.

I wish to commend the league on this act of public service, and extend my personal congratulations to each of these students for their academic excellence. Being honored with scholarships are: Ms. Shannon Suo of Casa Roble High School, Ms. Debra Childers of El Camino High School, Ms. Jennifer Ouchida of Rio Americano High School, Mr. Scott Ichikawa of C.K. McClatchy High School, Ms. Carolyn Aoki of Rio Americano High School, Ms. Jennifer Shoda of El Campo High School, Mr. Allen Kobayashi of J.F. Kennedy High School, Rie Taniguchi of Grant Union High School, Mr. Kevin Yasumura of J.F. Kennedy High School, Mr. Jason Uyeyama of Sacramento Adventists Academy, Mr. Kevin Toyama of C.K. McClatchy High School, Ms. Jill Yamada of J.F. Kennedy High School, Ms. Diane Matsuo of J.F. Kennedy High School, Mr. Todd Otani of J.F. Kennedy High School, Ms. Ann Yoshikawa of C.K. McClatchy High School, Ms. Jennifer Kojima of C.K. McClatchy High School, Ms. Nicole Taniguchi of Del Campo High School, Mr. Koichi Mizushima of C.K. McClatchy High School, Ms. Irene Ohara of J.F. Kennedy High School, Ms. Melanie Childers of El Camino High School, Mr. James Young of Luther Burbank High School, Ms. Janette Hashimoto of Sacramento City College, Mr. Rickey Tadokoro of Sacramento City College, and Ms. Ronda Hirata of Sacramento City College.

Mr. Speaker, I know my colleagues join me in wishing these students continued success in their academic endeavors.

## TRIBUTE TO MSGR. ROBERT J. KIRWIN

### HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. MRAZEK. Mr. Speaker, I rise today in recognition of Msgr. Robert J. Kirwin of St. Aidan's Roman Catholic Church of Williston Park, NY. Monsignor Kirwin will be retiring after 45 years of distinguished service to the diocese of Rockville Centre.

Monsignor Kirwin was born on December 27, 1919 in Brooklyn. He graduated from St. Anthony of Padua School, Bishop Loughlin

High school, and St. Francis College, and Immaculate Conception Seminary. He was ordained on April 3, 1945. Monsignor Kirwin has served as associate pastor at St. Philomena in East Hampton, chaplain of St. John the Baptist High School, founding pastor of St. Thomas More in Hauppauge, and associate pastor and pastor of St. Aidan's. He also served as a member of the Senate of Priests, Priests' Personnel Policy Board, Diocesan Task Force on Priorities, Deacon Advisory Board, board of governors of Smith Haven Ministries, and the Priest' Advisory Board.

Mr. Speaker, Monsignor Kirwin has touched the lives of thousands of people through his service to the church. He has demonstrated his deep commitment to the tenets of his faith and profound compassion for his fellow man. His concern for all peoples has earned him the respect of Long Islanders of all faiths and backgrounds.

On June 19, the St. Aidan's community and friends throughout the New York area will join to honor and pay thanks to Monsignor Kirwin for his service. I am proud to join in this richly deserved tribute and wish Monsignor Kirwin well in all his future endeavors.

## A TRIBUTE TO THE CHELMSFORD POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Chelmsford Police Department for their dedicated and outstanding service to the people of Chelmsford, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave officers of the Chelmsford Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Raymond P. McKeon and those who serve in the Chelmsford Police Department:

James C. Greska, Pennryn D. Fitts, Philip N. Molleur, Armand J. Caron, John J. Mack, Leslie Adams, William McAllister, Raymond McCusker, John Walsh, Steven Burns, Francis Roark, Lance Cunningham.

Robert Burns, James F. Midgley, Edgar L. Auger, William E. Strobel, Jr., Roland E. Linstad, Patrick W. Daley, Thomas A. Niemaszyk, Francis P. Kelly, Bruce A. Darwin, Edward A. Rooney, Richard A. Adams, Eugene W. Walsh.

Michael E. Rooney, Robert J. Trudel, John E. Redican, Russell H. Linstad, William F. Walsh, Timothy F. O'Connor, John J. Donovan, William J. Floyd, Kenneth P. Duane, Ernest R. Woessner, Jr., Joseph R. Gamache, James Finnegan, Jared Finnegan, Chandler Robinson.

John McGeown, Michael Stott, Peter McGeown, James Murphy, Brian Mullen, Paul Cooper, Paul Richardson, Francis Teehan, Alan Cote, Scott Ubele, Martin Krikorian, Debra Metcalf, Gail Mullen, Mark St. Hilaire, Robert Villare.

## TRIBUTE TO ANNE P. LEYS, RN

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. MACHTLEY. Mr. Speaker, I rise today to congratulate a member of my community who is being recognized for her outstanding service to her fellow citizens.

Anne P. Leys, RN, of Middletown, RI, is receiving the Mary A. Dwyer Award from the Visiting Nurse Service of Newport County. The award is named in memory of Mary A. Dwyer, the agency's executive director from 1954 to 1979. The award is presented to an individual who has displayed a history of outstanding service to the agency.

Mrs. Leys' career with the agency has truly been outstanding. In 1950, Anne helped create the agency as one of the original four charter members of the Visiting Nurse Service. Today, 40 years after its inception, Anne still attends every board meeting and actively participates in all of the daily operations of the agency. During her time with the agency, its services have constantly expanded to include not only the city of Newport but also all of Newport County.

In addition to Mrs. Leys' dedication to the Visiting Nurse Service, she has also contributed countless hours to other civic groups. She served on the Red Cross Board for several years and trained nurses during the war effort. She was the school nurse at St. George's School in Newport for 23 years. She has served on the Girl Scout Council, the Rhode Island State Nurses Board, and the board of education where she was the first woman to be appointed there. A gifted artist and floral arranger, Anne has taught flower arranging throughout Rhode Island. Besides her current role with the Visiting Nurse Service, she is presently the president of the Newport Hospital Nurses Alumni.

It is with great pleasure that I recognize Anne Leys for her tremendous career as a member of the Visiting Nurse Service. Her devotion to her community serves as a model for us all. I wish her the best and continued success in the future.

## SALUTING FATHER DAN O'HARE

### HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. GILMAN. Mr. Speaker, please allow me to take this opportunity to call to the attention of all of our colleagues one of my outstanding constituents, Father Daniel M. O'Hare, who, on this weekend, will be celebrating the 25th anniversary of his ordination to the priesthood.

St. Francis of Assisi once wrote:

Where there is charity and wisdom, there is neither fear nor ignorance. Where there is patience and humility, there is neither anger nor vexation. Where there is poverty and joy, there is neither greed nor avarice. Where there is peace and meditation, there is neither anxiety nor doubt.

When he wrote those words, St. Francis of Assisi may well have been predicting the career of Father Dan O'Hare. His entire life has been devoted to charity and wisdom, to patience and humility, and to poverty and joy.

Father Dan, as he is affectionately known throughout our mid-Hudson region of New York, is especially noted for founding AMEN—Americans Mobilized to End Narcotics Abuse. This organization, which Father Dan founded back in the apathetic 1970's when few in our society recognized the dangers inherent in narcotics and substance abuse, has been the model for similar organizations througout the United States. It was Father Dan's philosophy that our young people should be presented with the alternatives to drug and alcohol use before peer pressures made them victims of these dead-end avenues. Next year, we will be celebrating the 20th anniversary of the founding of AMEN, but it would be impossible to count or catalogue the countless lives that were saved by Father Dan through this outstanding organization.

Father Dan's perseverance and expertise have been manifested in many other ways. He has hosted a weekly radio program on station WKIP which has educated many people regarding the danger signs of substance abuse. He has served with distinction as vice president of the Orange County Council on Alcoholism. His parishoners at Most Sacred Heart Church in Port Jervis, as well as his former parishoners at St. Patrick's Church in Newburgh, can attest to his dedication to his flock.

In January 1988, Father Dan O'Hare was appointed to the White House Conference for a Drug Free America [WHCDFA]. In this capacity, Father Dan was able to share his experiences and observations with caring people from throughout all 50 States. His willingness to share and help others has been a major factor in formulating our Nation's war on drugs.

In many ways, Father Dan has been an inspiration to all of us because of his candor in recounting his own personal struggle with alcohol. The fact that this giant of a man is willing to use his own problems as an example to others of how such problems can be overcome is perhaps the greatest tribute to his contributions.

Mr. Speaker, on Sunday, May 20, Father Dan O'Hare is offering a special mass of thanksgiving to commemorate and consecrate the 25th anniversary of his ordination to the priesthood. I will be on hand, as will many of the grateful people whose lives he has touched during his quarter century of giving to others.

Accordingly, I invite my colleagues to join with me in congratulating Father Dan for his dedication in making our world a better place in which to live.

## SMITHTOWN HIGH SCHOOL EAST VICTORS IN CONSTITUTIONAL COMPETITION

### HON. GEORGE J. HOCHBRUECKNER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. HOCHBRUECKNER. Mr. Speaker, I would like to personally commend the 20 students of Smithtown High School East, in Saint James, NY, who were the winners in the New York State National Bicentennial Competition on the Constitution and Bill of Rights, and who captured fourth place in the national competition held in Washington, DC, on May 5 through 7.

The competitive program is designed to provide students with a fundamental understanding of the Constitution and the Bill of Rights, and with the principles and values they embody, and an understanding of the rights and responsibilities of citizens in our constitutional democracy. Over 800,000 secondary students studied for months to prepare for their role as experts testifying on selected constitutional issues.

These 20 high school seniors' dedication and enthusiasm thrust them to the top of a competitive national group. Their scholarly achievements provide a shining example to the St. James community, to New York State, and to our entire country. Their performance indicates the high caliber of our Long Island educational programs.

Mr. Speaker, I would also like to recognize the efforts of their instructor, Mr. Alan McKeeman, whose personal leadership and guidance in the students' preparation played a large role in their success. Congratulations, Smithtown High School East, and best wishes in your future endeavors. The people of the First Congressional District on eastern Long Island are very proud of you.

## HONORING THE COMMUNITY CENTER OF ISRAEL

### HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ENGEL. Mr. Speaker, this Sunday in my district, a leading religious institution, the Community Center of Israel, is installing its new officers for the coming year. I wish to recognize the outstanding community service performed by the outgoing officers and wish the new officers, led by President Arnold Hyman, continued success.

Arnold Hyman is a lifelong resident of the Bronx who has been active in the community for many years. He has championed many Jewish causes, from working to revitalize the Jewish community in the Bronx to aiding newly arrived Jewish immigrants from Eastern Europe.

I also congratulate the Community Center of Israel for being active and involved in the Bronx community. The CCI has promoted positive community values and worked to improve the lives of its members and its neighbors in the Bronx. I look forward to working closely with the Community Center of Israel and its officers in the months and years ahead.

## A TRIBUTE TO THE TOWNSEND POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Townsend Police Department for their dedicated and outstanding service to the people of Townsend, MA in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Townsend Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, Are you prepared to offer your life in service to your community?

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief William May and those who serve in the Townsend Police Department.

Richard Vance, Barry Brown, Erving Marshall, David Profit, John Johnson, John Carter, Paul Morrison, James Marchand, Cheryl Mattson, Thaddeus Rochette.

## JC NALLE ELEMENTARY SCHOOL CELEBRATES THE 10TH ANNUAL AFRICA DAY

### HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. FAUNTROY. Mr. Speaker, I rise today to bring to the attention of my colleagues to JC Nalle Elementary School, located in the District of Columbia, as they celebrate their 10th Annual Africa Day.

Now in its 10th year, Africa Day has served to build bridges of friendship, self esteem and cultural understanding among the students, teachers, parents and administrators at Nalle Elementary. The students of Nalle Elementary are in essence goodwill ambassadors who love and respect their history and have the desire to promote youth exchange between the United States and Africa, and envision a world made stronger through cooperation, dialog, and mutual exchange.

As a product of the District of Columbia public school system, I am very proud of the talented professionals who are committed to providing a quality education for our young people.

## TRIBUTE TO TRAVELERS AID SOCIETY OF RHODE ISLAND

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize the Travelers Aid Society of Rhode Island, an organization that has helped thousands of people of Rhode Island for the past 16 years.

Travelers Aid Society is a multiservice agency that provides a wide variety of programs to persons in crisis. Travelers Aid volunteers provide these service through four major units. The first of these is the social service unit, comprised of social workers in housing, substance abuse, and mental illness. They provide 24-hour service to anyone who needs assistance with food, shelter, clothing, medical care, family resettlement, and alcohol, and substance abuse treatments. Traveler's Aid Society also provides educational and employment and opportunities.

Also available at the Providence office is a community room. This is open 24 hours a day, serving not only as a respite from the weather, but also as a place to have a snack and find out about the services available with Traveler's Aid Society.

The Travelers Aid runaway youth project [RYP] has been established to help give guidance and support to those who need it. It aids not only runaways, but also homeless, young people, and throwaways. Outreach workers canvas the streets from 1 p.m. to 10 p.m. everyday, telling youngsters about the services that they provide.

Nonemergency medical care is also available for people of all ages through the medical van project. This medical office on wheels makes rounds 5 nights a week in the greater Providence area. Anybody who needs minor medical help is treated. The van offers a wide variety of tests, as well as treatments of cuts, bruises, and upper respiratory ailments. If treatment cannot be provided in the van, referrals are made to a variety of facilities. All of the workers are volunteers. Travelers Aid Society also provides literacy classes, as well as higher education counseling and support for young people.

On behalf of all Rhode Islanders, I would like to thank Travelers Aid Society for all of their efforts. I wish them continued growth and success in the future.

## GREGORIO PEREZ RICARDO FREEDOM TRIANGLE

### HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. FASCELL. Mr. Speaker, I rise today to inform the Members of this body about a moving and important event soon to transpire in the international waters off Cuba. On May 20, 1990, the anniversary of Cuban independence, a triangular stretch of ocean, demarked by only points of latitude and longitude, is being named the "Gregorio Perez Ricardo Freedom Triangle."

To understand the deep significance of this event, one must know who Gregorio Perez Ricardo was and what he represents. Gregorio was a citizen of Castro's Cuba. Like many before him, and the many who will certainly follow him, life there had become so repelling, and freedom here so attractive, that Gregorio and two companions went down to the sea to board a raft for the perilous voyage to the United States.

Hunger, thirst, and the unrelenting Sun took their terrible toll. One of the three was lost at sea. The brave and determined Gregorio manfully endured, finally arriving on our shores. But his taste of freedom was destined to be brief and had been purchased at the highest price. Gregorio, age 15, was buried in Miami on March 1, 1990.

Gregorio's odyssey, alone, would warrant this memorial event, but he is just one of unknown hundreds who have died in the attempt to flee tyranny and repression. The Gregorio Perez Ricardo Freedom Triangle made not of marble, but of wind and waves, is a fitting memorial to those who perished, often alone and anonymously, in this particular stretch of water, in their failed but valiant bids for freedom.

The memorial event is also a timely and necessary reminder that an island prison need not have the barbed wire and machineguns that were the mark of shame in Eastern Europe. Castro has the Sun, the sea, and the sharks to do the dirty work of keeping the Cuban people imprisoned.

I applaud the diligent efforts of Mr. Humberto Cancio who organized this moving memorial. I also salute the many organizers of, and participants in the Cuban Brotherhood Flotilla which will sail the waters of the Gregorio Perez Ricardo Freedom Triangle and those foreign vessels which have pledged to symbolically sail with the flotilla to commemorate all those who have died in the name of freedom.

As we look back in remembrance of Cuban Independence Day and in commemoration of Gregorio Perez Ricardo and his compatriots, we must, at the same time, renew our determination to see a future Cuba in which children are not forced to choose between a lifetime of repression and the peril of the sea.

## MRS. LEE PARSONS DAVIS: A LIFETIME OF SERVICE

### HON. NITA M. LOWEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mrs. LOWEY of New York. Mr. Speaker, I rise today to pay tribute to an outstanding American who has dedicated her life to helping those in need.

On Thursday, May 17, 1990, the Salvation Army of New Rochelle, NY, will honor Mrs. Lee Parsons Davis for her 40 years of service. Since 1943, she has been active in the Salvation Army. She will be the member with the longest service record in the history of that organization which has served so many over the years. She has been instrumental in countless Salvation Army achievements including the acquisition of their present property.

In addition to her work with the Salvation Army, she has been actively involved with many other worthwhile community organizations including the Presbyterian Church of New Rochelle and the Garden Club of New Rochelle.

Mrs. Davis came to New Rochelle with her husband, the late Supreme Court Justice Lee Parsons Davis, in 1943. Since then, she has been unswerving in her commitment and dedication to helping those in need. Her work serves as a shining example to us all, and the honor she is receiving is richly deserved.

## A TRIBUTE TO THE TYNGSBORO POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Officer's Week to pay tribute to the Tyngsboro Police Department for their dedicated and outstanding service to the people of Tyngsboro, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Tyngsboro Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, Are you prepared to offer your life in service to your community?

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Charles C. Chronopoulos and those who serve in the Tyngsboro Police Department:

Howard F. Given, William McAnistan, Charles C. Chronopoulos, Jr., Paul Larkham, Brian Alley, Roger Boulette, Richard Burrows, Christopher Chronopoulos, Joanne Coulter, John Georges, Daniel Larocque, Michael Leclair, John Manning, Joseph Pivirotto.

Thomas Walsh, Thomas Casper, Eileen Castonguay, Robert Gray, Raymond Grenier, M. Michael Johnson, Gregory Kasabian, Betty Maille, Steven Manning, John Martin, Robert Prescott, Ronald Provost, Joseph Reidy, Joseph Taff.

## THE CRISIS IN KASHMIR PROVINCE

### HON. ENI F.H. FALEOMAVAEGA

OF AMERICAN SAMOA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. FALEOMAVAEGA. Mr. Speaker, I want to share with my colleagues the grave and most serious situation now developing in India, relative to the killings and denial of human rights by the Indian Government against the provinces of Kashmir and Punjab in India.

Mr. Speaker, I want to submit for the record several relevant newspaper accounts of the problems of Kashmir.

Mr. Speaker, I call upon Secretary Baker and the Bush administration to take action and find out what is happening in Kashmir and Punjab.

[From the Washington Times, May 11, 1990]

UNEASY EYES ON KASHMIR IMPASSE

(By Cord Meyer)

Having been the cause of war between India and Pakistan at least twice before, the tense situation in Kashmir is moving toward the top of the Bush administration's foreign policy agenda.

As the Indian Government deploys some 20,000 army and paramilitary forces to restore order in the Indian-ruled northern state of Jammu and Kashmir, the largely Moslem Kashmir population looks increasingly to Pakistan for moral and material support.

In their diplomatic efforts behind the scenes to defuse a conflict that could involve one-fifth of the world's population, senior Bush officials feel they have one significant advantage in that neither side believes it has anything to gain from a war.

Pakistan diplomats declare, "War would be an unmitigated disaster," and Indian officials in Washington soberly admit, "War would set us back a decade." With this recognition by democratically elected and responsible governments that war is no solution, Bush officials hope at best not to solve the complex issue of Kashmir's future but to stabilize a deteriorating situation.

Unfortunately, neither the Pakistani government of Prime Minister Benazir Bhutto nor the Indian government of Prime Minister V.P. Singh enjoy secure majorities in their respective parliaments, and both leaders are under heavy pressure from more extreme nationalists to escalate the conflict. U.S. diplomats have quietly pointed out how dangerous this pressure is.

The historic roots of the dispute go back to the division of the princely state between

India and Pakistan at the time of the British departure. The Pakistanis believe that the Moslem majority in Kashmir should have had the right by plebiscite to join Pakistan, while the Indians claim that Kashmir historically has been part of India and voted to accept its current constitution.

Objective observers believe that the Indian government bears a full share of the blame for the polarization of the situation inside Kashmir. The 70 percent Moslem majority was antagonized by what it considered to be a rigged election of 1987, and in 1989 there was growing resentment against an Indian administration that provided few resources for the growth and development of the country.

Among the unemployed Kashmiri youth, the flames of Moslem fundamentalism spread quickly from Pakistan, Iran and Afghanistan, while the events in Eastern Europe and the toppling of the Berlin Wall encouraged the belief that massive demonstrations could change the course of history.

Responding with round-the-clock curfews and harsh repression, the Indian authorities have tried to disband the huge demonstrations. In the process, they imposed martial law under Gov. Jagmohan, who has asked rhetorically how many people Abraham Lincoln killed in the U.S. Civil War.

In Pakistan, Mrs. Bhutto claims that she is only providing moral and political support to the Kashmiri resistance, but organizations like the Jammu and Kashmir Liberation Front have their supply lines into Pakistan. The Indian government has demanded an end to this covert support as a condition for further talks.

Bush officials feel under heavy pressure to move quickly to get negotiations going between the Pakistani and Indian governments. They fear with good reason the rapid radicalization of the Kashmiri resistance into fundamentalist and terrorist organizations. There already are more than 20 of these extremist groups, and they specialize in the kidnapping and assassination of Indian officials.

With very little time remaining before the Kashmiri population has been radicalized beyond the point of no return, the U.S. State Department is pressing both New Delhi and Islamabad for early and constructive talks. The Indians are being urged to grant much wider autonomy to locally elected officials and to increase substantially Indian economic assistance.

Mrs. Bhutto is being asked to move decisively against the flow of arms that is reaching the extremist groups in Kashmir. Progress on both sides can lead to peaceful dialogue and an end to the escalation of threat and counterthreat.

Perhaps this is the most that can be achieved at this time, but Bush officials would like to see a reduction of tension lead to the withdrawal of troops from the advanced positions both sides occupy on the border, to reduce the chance of war beginning by accident.

Finally, the fact that both Pakistan and India have the capacity to produce nuclear weapons within a few months adds an extra element of urgency to this peacekeeping effort.

SOUTH ASIAN SOLUTION IS REAL AUTONOMY

*To the Editor:*

"At the Brink in Kashmir" (editorial, April 22) was insightful. It gave a clear historical perspective and a sense of urgency in avoiding a conflict. However, it sidestepped the fundamental issue in the Kashmir problem, and that is the free will of the Kashmiri people, continual disregard of which by India has led to the present internal violence. India holds onto Kashmir at all costs.

A quick review of Indian history will help in understanding the situation. The British rule in India was a result of territorial acquisitions, spanning over a century, of independent states. Many such states were conquered in bloody wars. For example, the Punjab was annexed after two Anglo-Sikh wars. In 1947 the British left behind an Indian subcontinent comprised of different states with distinct cultures, languages and customs. The rulers changed from alien "white" to native "brown" sahibs. In the more than 40 years since then, there has been an increasing sense of frustration among the individual states that crave greater autonomy.

In this context, the Punjab and Kashmir have been in the forefront in expressing their demands for change. Their desire for self-rule is strong and has been further fanned by the events in Eastern Europe.

What the joint effort by the United States and the Soviet Union should aim for is not just the avoidance of a conflict between India and Pakistan, but the creation of a genuine autonomy for the individual states in both these countries. Otherwise, the threat of violence within and without their borders will remain. Unfortunately, Representative Stephen Solarz, whom you call one of Washington's wiser voices on Asia, has all but failed to recognize this.—PRITPAL S. KOCHHAR

New York, April 26, 1990

---

WEAK PAKISTANI CLAIMS

*To the Editor:*

"India and Pakistan Make the Most of Hard Feelings" (The Week in Review, April 22) is somewhat misleading. First, contrary to the assertion that Pakistan occupies a stronger legal position, its historical claims to Kashmir are weak. When British paramountcy lapsed in 1947, the nominally independent princely states were given the option to join either India or Pakistan. Maharajah Hari Singh, the monarch of Kashmir, had sought to maintain his independence despite pressure from both sides. However, the Pakistani leadership, unwilling to await his final decision, fomented a tribal revolt and provided military support to the insurgents.

Second, Indian and Chinese forces did not clash in Kashmir in 1962. When the Chinese attacked India, the fighting was confined to a region known as the Aksai Chin in the west (near Tibet) and the then-Northeast Frontier Agency, or the present-day Arunachal Pradesh in the east.

One must take issue, too, with the article's subtle distortions. Your chronology states that in 1971 "India again fights Pakistan." This formulation implies that India initiated the conflict and glosses over the real precipitating element—the genocidal policies of the West Pakistani regime.

Finally, it is patronizing to label India as "Hindu-dominated." India has shown a commitment to secularism, however flawed. Would one speak of the United States as "Christian-dominated"?—SUMIT GANGULY

New York, April 25, 1990

*(The writer is associate professor of political science, Hunter College.)*

[From the New York Times, Jan. 22, 1990]

25 REPORTED DEAD AS INDIAN ARMY OPENS FIRE ON KASHMIR PROTESTERS

(By Barbara Crosette)

NEW DELHI, Jan. 21—The Indian Army opened fire today on demonstrators defying a curfew in the Kashmiri city of Srinagar, and at least 25 people were killed and 60 wounded, Government-controlled television reported.

If the death toll is confirmed, the violence would be the worst reported in Jammu and Kashmir the only state with a Muslim majority in predominantly Hindu India, in the nearly two years since a resurgence of secessionist sentiment began. Since 1947, Muslim militants have been demanding independence or union with Islamic Pakistan.

The Foreign Minister of Pakistan, Sahabzada Yaqub Khan, arrived in New Delhi today for talks. But the continuing trouble in Kashmir, the first serious challenge to the new Government of Prime Minsiter V.P. Singh, has dampened hopes for a fresh start in Indian-Pakistani relations.

LOCUS OF THREE WARS

New Delhi says that the Pakistani Government supports the Muslim separatists, a charge that Islamabad denies. India and Pakistan have fought two of their three wars over Kashmir since the two countries gained independence from Britain in 1947.

The army's introduction into the conflict, with orders to shoot on sight marked the first widespread use of troops to be reported in Srinagar. It suggested that the troops of the Central Police Reserve Force, a national organization used in troubled areas, has been unable to contain rapidly growing separatist sentiment in the Kashmir Valley.

Srinagar, the state's summer capital and one of India's prime tourist areas, has been under a curfew since last month. But crowds have been surging into the streets to defy federal and state police forces charged with enforcing it, residents of the city say.

Indian television reported that troops were responding to "pillaging" by mobs in parts of the city. The demonstrations are leading up to a public display of anti-Indian feeling planned for the country's most important national holiday, Republic Day on Friday.

The unrest in India's Kashmir Valley was fed by dissatisfaction with the state government under Chief Minister Farooq Abdullah, who resigned on Thursday night.

Dr. Abdullah stepped down after the Government of Prime Minister Singh announced the reappointment of a former governor, Jagmohan, for Jammu and Kashmir state. Mr. Jagmohan, who served as the state's governor from 1984 until last year, arrived in Srinagar today to take up his post.

The national Government led by Mr. Singh, which took office last month, has taken control of Kashmir under a constitutional arrangement known as governor's rule.

The new Governments in New Delhi and Jammu and Kashmir face a critical situation that by most accounts was allowed to deteriorate and drift in the last years of Rajiv Gandhi's Administration. Mr. Gandhi's Congress Party had clung to power in the state through an alliance with Dr. Abdullah's National Conference, a Kashmiri party.

The coalition, formed by the Congress Party and Dr. Abdullah in a 1987 election that was locally regarded as having been

rigged, soon lost the confidence of many Kashmiris. In the absence of other strong local parties, disaffected residents of the valley began to sympathize with, if not actually support, the armed resistance groups.

The extent of the valley's alienation was demonstrated in December, when after five detained militants were freed in return for the release of the kidnapped daughter of India's Home Minister, crowds came out to celebrate the freeing of the separatists. The demonstrations persisted, prompting the authorities to re-imposed the curfew.

Kashmir is now being described by officials here as "worse than Punjab," another state torn by a militant separatist movement.

Adding to the problems facing Prime Minister Singh, leaders of Buddhist militants in Ladakh, a mountainous region that is also part of Jammu and Kashmir state, have indicated that they might renew their campaign for a new political order, which had been dormant since last fall.

Parts of Kasmir are claimed by both India and Pakistan. Both countries keep large forces on either side of a United Nations line of control that serves as a border, and they have occasionally exchanged fire.

Some of the Kashmiri guerrilla groups are openly pro-Pakistani and militantly Islamic. Pakistan denies any official role in the state's problems, but leaders of Pakistani Kashmir acknowledge their willingness to assist rebels on the Indian side of the United Nations boundary.

The United Nations says that India has refused for 40 years to allow a plebiscite on the future of the disputed territory.

Western diplomats here say that while Pakistanis in Government or the opposition may use the Kashmiri issue for domestic political gains, playing on a deep distrust of India, there is no evidence that Islamabad is to blame for fomenting the trouble, which has indigenous roots.

[From the Washington Post, Apr. 19, 1990]

U.S. VOICES CONCERN OVER KASHMIR—STATE DEPARTMENT CAUTIONS INDIA AND PAKISTAN

(By Al Kamen)

The Bush administration last night called on India and Pakistan to "take immediate steps to reduce the level of tension" between them over Kashmir, saying "there is a growing risk of miscalculation which could lead events to spin dangerously out of control."

The unusual public warning came from Undersecretary of State Robert M. Kimmitt, the No. 3 official in the department, in a statement volunteered to the Asia Society's Washington Center.

It was the most explicit public expression of U.S. concern since the long-simmering dispute over the northern Indian state began to heat up several months ago.

The Indian government has accused Pakistan of arming and training militant Moslem separatists in Kashmir. Pakistan denies the charge and urges that Kashmir be allowed to decide its future in a plebiscite.

Indian Prime Minister V.P. Singh last week said Indians should prepare themselves psychologically for war with Pakistan, and his home minister, Mufti Mohammed Sayed, was quoted as saying war with Pakistan "would be fully justified" to defeat Pakistani-backed separatists.

In recent days the United States has consulted with Indian and Pakistani diplomats in Washington and sent messages to New Delhi and Islamabad through U.S. ambassadors.

Secretary of State James A. Baker III discussed the situation with Soviet Foreign Minister Eduard Shevardnadze in Washington earlier this month. The superpowers, who previously backed opposing sides, are exchanging information and have agreed to seek to head off armed conflict, U.S. officials said.

"We believe that neither the Indian nor Pakistani governments seek a confrontation on this divisive issue," but the dangers of miscalculation are growing, Kimmitt said. He called on the two sides to "take immediate steps to reduce the level of tension by lowering rhetoric and avoiding provocative troop deployments, and instead to devote their energies to addressing this issue through dialogue and negotiations."

Indian and Pakistan have gone to war three times along the Kashmir border: in 1949, 1965 and 1971. Kimmitt said the dispute will be difficult to resolve, but that a reason for optimism "is the desire among many members of the international community to work to lessen tension.

Kimmitt said "the Indians themselves will admit that most of the problems in Kashmir are internal." He called on the governments of both countries to "make the political decision to lower the rhetoric . . . we want to make sure that each side keeps open lines of communication not just between political but also between military establishments," he said, so that any military "deployments, particularly as we move to the season where the snows are melting and so forth, are not seen by the other side as intentionally or unintentionally provocative."

[From the New York Times, Apr. 23, 1990]

KASHMIRIS FLEE TO THE PAKISTAN SIDE WITH TALES OF INDIAN ARMY BRUTALITY

(By Barbara Crosette)

Islamabad, Pakistan, April 22—Thousands of Kashmiris have fled the Indian-controlled Kashmir Valley and crossed into Pakistan in recent weeks, bringing stories of atrocities by Indian troops and paramilitary forces, the leader of Pakistani-controlled Kashmir says.

The official, Abdul Qayyum Khan, president of the part of Kashmir under Pakistan, said in an interview here on Wednesday that about 4,000 Kashmiris, mostly young men, were staying in Muzzafarabad, the capital of the territory. An unknown number of others are scattered across Pakistan with relatives or sympathizers, he said.

A large contingent of exiled Kashmiris from the state controlled by India, including whole families, is beginning to grow around the Pakistani city of Rawalpindi, the country's military headquarters. Among them are young men seeking firearms and training, which Pakistani opposition politicians are increasingly willing to provide.

Prime Minister Benazir Bhutto, whose Pakistan People's Party hopes to gain control of Kashmir through an allied local party in May elections, has been vocal in her support of Kashmiris from Kashmir state, describing them as "freedom fighters" akin to Palestinians, and pledging $5 million to their cause.

ASSERTIONS AGAINST INDIAN TROOPS

A recent opinion survey by Gallup Pakistan indicated that 78 percent of people polled thought that Islamabad should give Kashmir state military supplies. The poll, taken in February, when New Delhi began to increase pressure on the separatists in the valley, also found that support for talks with India to resolve the dispute had dropped to half of what it was a few years ago.

The exiles from the Kashmir Valley say Indian forces are destroying property, terrorizing families and abusing women, Mr. Qayyum Khan said.

"Repression unknown in our history is being carried on by Indians," he said. "They are trying to encircle the valley."

Mr. Qayyum Khan said morale on the Pakistani side is "getting worse every day" as worries about relatives in the valley and fears of an Indian military strike on this side are growing. Some Indian politicians, blaming Islamabad for the Kashmiris' uprising—an assertion most diplomats question—have threatened to "teach Pakistan a lesson."

SEPARATIST MOVEMENT GROWS

"The least they can do in a war is attack Azad Kashmir," Mr. Qayyum Khan said, using the Pakistani name for his territory, which means "free Kashmir." "Even if they wanted to give up the valley, they would give us a final blow, a parting kick."

He said New Delhi was deliberately portraying the Kashmiri separatist movement, which has been growing rapidly for more than a year, as an Islamic fundamentalist crusade in order to discredit it among Western human-rights groups.

Foreign reporters are not permitted to visit Kashmir state to verify or dispute Kashmiri accusations against India. Access to the Pakistani side is unlimited, except along the cease-fire line, where there has been shooting.

Pakistani troops continue to prevent groups of Kashmiris from crossing into India, fearful of provoking Indian forces entrenched in bunkers along the hilly border. Some Pakistanis have already been killed there. People from Kashmir state who come here arrive mostly in small groups through traditional routes that evade border patrols.

NO JAMMU AND KASHMIR VOTE

Mr. Qayyum Khan, who was among those Kashmiris who fought against Indian forces in 1947 in an unsuccessful effort to wrest the valley from New Delhi's control, said many more people from Kashmir state may now cross into Pakistan after New Delhi's banning last week of most Kashmiri organizations it accuses of advocating separatism.

A cease-fire line through mountainous terrain separates the two Kashmirs after three Indian Pakistan wars in the disputed territory New Delhi has refused to allow a plebiscite called 10 years ago by the United Nations that would allow residents of India's Jammu and Kashmir state to choose the country to which they want to belong.

Jammu and Kashmir is India's only Muslim majority state. Pakistan, an Islamic nation created from the partition of British India in 1947, has always held that the Kashmir Valley should have been ceded to Pakistan. The two countries fought over the territory in 1947, 1965 and in 1971, as a second front of a war that was centered in what is now Bangladesh.

## INTRODUCTION OF THE POLICE PROTECTION ACT OF 1990

**HON. EDWARD F. FEIGHAN**

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. FEIGHAN. Mr. Speaker, "our society is increasingly violent. * * * The drug war is escalating. * * * Firearms are ever more powerful. * * * Criminals are better armed and more violent than ever before * * *." We hear these phrases often, but do we truly take time to think about those men and women who are out on the streets each day fighting crime and facing guns held by deranged criminals? Do we really think about the danger these public servants face each and every day?

One of the most effective developments in the last two decades has been the invention of fibers that are bullet-resistant. Literally thousands of lives have been saved by personal protective body armor, or bullet-proof vests. While these vests do not turn their wearer into Superman, able to deflect any and every bullet, they do provide significant protection against gunshots.

Since bullet-resistant vests were first developed in the early 1970's, the National Institute of Justice has provided assistance to the law enforcement community by developing voluntary standards for the vests. These standards have been developed in consultation with the law enforcement standards lab at the National Institute of Standards and Technology. In addition, law enforcement officers from across the country have been consulted for their unique expertise.

Unfortunately, a controversy has developed recently over the current standard, and an industry group has developed a separate standard. Police departments are now confused about which type of vest to buy: one that complies with the NIJ standard, or one that complies with the industry standard. But a more dangerous consequence is that officers are confused and confidence in the vests is waning. We cannot allow this to happen. Congress has a responsibility to ensure that bullet-resistant vests are manufactured so as to provide a high level of protection for law enforcement officers. We must end this confusion, establish a clear Federal standard, and then set about encouraging officers to wear vests whenever they are on duty.

I am convinced that the National Institute of Justice, working with the law enforcement standards lab, is the best agency to accomplish this task. NIJ has been developing voluntary standards for over 10 years. NIJ staff has the expertise, has set up the procedures, and has personnel on staff already devoted to personal protective armor standard-setting.

Today I am introducing the Police Protection Act of 1990, legislation to establish mandatory standards for bullet-resistant vests. My bill will formalize the current standard-setting procedure. It requires that NIJ consult with all other Federal agencies that might have an interest, either because of their law enforcement functions or because they purchase bullet-resistant vests for their employees. In addition, the legislation requires consultation with the true experts: our Nation's law enforcement officers. These are the people we are trying to protect, I think they ought to have some say in that protection.

The bill provides that the current National Institute of Justice standard, NIJ 0101.03, be established as the interim standard until an official standard is promulgated through the rulemaking process. I add this as the interim standard because I am convinced that it is the best standard currently available.

Mr. Speaker, I am pleased to note that my bill has the support of the Fraternal Order of Police, the International Brotherhood of Police Officers, and the National Association of Police Organizations. I would like to express my appreciation to these groups for their assistance and support in the development of this legislation. I would also like to express my appreciation to these groups for their assistance and support in the development of this legislation. I would also like to thank the distinguished chairman of the Rules Committee, Mr. MOAKLEY, for cosponsoring this measure. I look forward to working with my colleagues in both Houses and on both sides of the aisle to ensure that mandatory standards are developed for bullet resistant vests. This is a small part of the war on crime, but it is a most important step—a life-saving step.

This week, as we commemorate National Peace Officers Week, and pay tribute to the thousands of law enforcement officers who have been shot and killed in the line of duty, I urge my colleagues to take time to consider what the increasing violence of our society means to our Nation's law enforcement officers and support this effort to ensure that bullet resistant vests meet minimum Federal standards.

I ask that the full text of the legislation be included in the RECORD immediately following my remarks. Thank you, Mr. Speaker.

H.R. 4830

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Police Protection Act of 1990".

SEC. 2. FINDINGS.

The Congress finds that—

(1) violence in this country continues to escalate,

(2) law enforcement officers put their lives on the line every day to protect the public from violent crime,

(3) law enforcement officers should have effective body armor which protects them from firearm violence,

(4) the complexities of body armor and the diverse nature and abilities of law enforcement officials to purchase and test it result in unnecessary risk, and

(5) Congress has a responsibility to ensure that our Nation's law enforcement officers have available to them the best protection that current technology allows.

SEC. 3. NATIONAL INSTITUTE OF JUSTICE ISSUANCE OF STANDARDS.

Part B of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3721 et seq.) is amended by adding at the end the following:

"BODY ARMOR SAFETY STANDARDS

"SEC. 204. (a) STANDARDS AND TEST PROTOCOLS.—

"(1) IN GENERAL.—The National Institute of Justice shall by regulation establish performance standards and test protocols—

"(A) for the capability of body armor to withstand bullets fired from firearms and for other matters relating to the effectiveness of body armor to protect law enforcement officers, and

"(B) for labels to be affixed by body armor manufacturers to armor which is manufactured in compliance with the standards described in paragraph (1).

"(2) TYPES OF STANDARDS.—A performance standard established under paragraph (1)(A) shall consist of the following types of requirements—

"(A) standards expressed in terms of performance requirements, and

"(B) requirements that vests be labeled with the noted level of ballistic protection and other appropriate warnings and instructions, including the manufacturing date.

"(b) REVIEW.—The Director shall review the study of standards and test protocols by the Government Accounting Office under subsection (j) in determining appropriate standards and test protocols.

"(c) REGULATIONS AND PROCEDURES.—The Director is authorized to establish such regulations and procedures as may be necessary to carry out this section, including procedures for certification and, when necessary, decertification of body armor models.

"(d) SAFETY OF OFFICERS STANDARD.—In developing standards for body armor under subsection (a), the Director shall rely upon the needs of the criminal justice agencies and the safety and welfare of both male and female officers wearing body armor.

"(e) CONSULTATIONS.—In developing standards and test protocols under subsection (a) for body armor, the National Institute of Justice shall consult with—

"(1) the Law Enforcement Standards Laboratory of the National Institute of Standards and Technology of the Department of Commerce,

"(2) the Department of Defense,

"(3) the Federal Bureau of Investigation,

"(4) the Bureau of Alcohol, Tobacco, and Firearms,

"(5) the Secret Service and the United States Marshal's Service,

"(6) any other Federal agency which purchases body armor for its employees,

"(7) representatives from labor organizations representing law enforcement personnel, law enforcement management organizations, and law enforcement fraternal and professional associations,

"(8) State and local law enforcement officers from police departments in the United States, and

"(9) representatives of the major manufacturers of body armor.

"(f) INTERIM STANDARD.—Beginning on the date of the enactment of this Act and ending on the date standards take effect under subsection (a), the National Institute of Justice standard number 010.03 entitled 'Ballistic Resistance of Police Body Armor' shall apply to the manufacture, sale, or distribution in commerce of body armor.

"(g) TESTING.—The manufacturers of body armor subject to the performance standards established under subsection (a) shall submit to the National Institute of Justice on a periodic basis (established by the National Institute of Justice) representative samples of amor to be tested for compliance with such standards. The National Institute of Justice may take such other action as may be appropriate to determine if such armor is in compliance with such standards.

"(h) SANCTION.—

"(1) IN GENERAL.—No person may manufacture for sale, offer for sale, or distribute in commerce any body armor which is not in compliance with the interim standards in effect under subsection (f) or the standards established under subsection (a).

"(2) CIVIL PENALTIES.—Any person who knowingly violates paragraph (1) shall be subject to civil penalty not to exceed $2,000 for each such violation.

"(3) CRIMINAL PENALTIES.—

"(A) PENALTY.—Any person who knowingly and willfully violates paragraph (1) after receiving notice of noncompliance from the National Institute of Justice shall be fined not more than $45,000 or be imprisoned not more than one year, or both.

"(B) OFFICER OR DIRECTOR OF A CORPORATION.—Any individual director, officer, or agent of a corporation who knowingly and willfully authorizes orders, or performs any of the facts or practices constituting in whole or in part a violation of paragraph (a) and who has knowledge of a notice of noncompliance received by the corporation from the National Institute of Justice shall be subject to penalty under this subsection without regard to any penalties to which that corporation may be subject under this subsection.

"(j) REPORT.—

"(1) STUDY.—The General Accounting Office shall compile, review, and compare any standards and test protocols for body armor issued by the National Institute of Justice, manufacturers, and any other standards and test protocols issued by law enforcement and military entities.

"(2) SUBMISSION OF STUDY.—Not later than 6 months after the date of enactment of this section, the General Accounting Office shall complete the study required in subsection (a) and submit the study to the National Institute of Justice and the Judiciary Committees of Congress.

"(k) DEFINITION OF BODY ARMOR.—For purposes of this section, the term 'body armor' means any product sold or offered for sale as personal protective body armor whether the product is to be worn alone or is sold as a complement to other products or garments.".

## A SALUTE TO HARRY A. GREENBERG

### HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Ms. ROS-LEHTINEN. Mr. Speaker, it is with great pride that I rise today to share with my colleagues the life of an exceptional member of the Miami community. A resident of beautiful Bal Harbour, FL, Harry A. Greenberg is a true example of what our senior citizen community can give to all of us. I am proud to represent him and the thousands of senior citizens who live in the Miami area. Their contributions to our community are innumerable; their wisdom makes us a richer, better place to live.

A native of Newark, NJ, and later a resident of Orange, Mr. Greenberg worked for the Universal Match Co. for 43 years in New York City. When he retired, at the mandatory retirement age of 70, he turned his energies to art and what has developed into a most successful hobby. That hobby has helped many charitable organizations, since Mr. Greenberg turns over his beautiful oil paintings, watercolors and their proceeds to many diverse charities.

During his career at the Universal Match Co., his artistic talents led him to design matchbook covers used by the company's main institutional clients: large hotels and chain stores. Through his endeavors in creating striking-looking and innovative covers, matchbook collecting became a fad which intrigued people of all ages during the thirties, the forties, and even today. A status symbol to show off where the collector has been? Perhaps. Maybe others collect them merely for their visual appeal.

But Mr. Greenberg was painting more than matchbook covers. He participated in numerous shows and initiated art festivals in his hometowns. Some of the beneficiaries of his art include the Daughters of Israel, Bayle Seton League of Seton Hall University, the Rutgers Hillel Campus, and the Veteran's Hospital. In our community, his paintings hang at Mercy Hospital and the Douglas Gardens Home for the Aged.

Among his nonartistic accomplishments are: 42 years on the New Jersey State Athletic Commission and 45 with the State Boxing Commission. He was also chairman of the Milk Fund Boxing and Wrestling Shows during the depression, and organizer of various fund raisers for the poor.

After spending his winters in the Miami area for many years, Mr. Greenberg joined forces with Shirley Berger, art club president at Harbour House, to promote classes, trips, and other events of interest for art lovers. Mr. Greenberg says that the response to the art club has been very encouraging. So encouraging that he and Ms. Berger had to decide whether to keep the membership at the 450-member limit or expand. He goes on to say that he hopes the art club will provide something different for those residents interested in art, something to break the monotony.

Mr. Speaker, at age 88 Harry Greenberg is leading a full life. He is an inspiration not only to all our senior citizens, but especially for our young people to learn how important volunteer work and cooperation with our community is. Life could never be monotonous for Harry Greenberg, or any who followed his example, with his lust for living, his enthusiasm for art and for all of his fine deeds to help his fellow man. I salute him and thank him for truly making a difference.

## NATIONAL BREAST CANCER AWARENESS

### HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mrs. MORELLA. Mr. Speaker, I will be introducing, with Congresswoman COLLINS, a bill commemorating October as National Breast Cancer Awareness Month. I feel this is especially appropriate in light of the fact that 1 in every 10 women will develop breast cancer in her lifetime. According to the American Cancer Society, 150,900 women will be diagnosed with breast cancer in 1990. In 1989, more than 40,000 women died of breast cancer, and in 1990, that number is expected to be 44,000. These are alarming statistics—but there is some good news. Although breast cancer is the most prevalent type of cancer in women, survival rate approaches 100 percent when the cancer is detected early.

Mammography, a low-dose x ray of the breast, in conjunction with physical examination by the health professional and self-examination by the woman, are the best tools we have for detecting this disease when it will do the least harm. Unfortunately most women do not take advantage of these procedures, either out of fear of the disease, ignorance of the exams, or concerns about the cost of the procedures.

That is why recognition of Breast Cancer Awareness Month is an important step toward prevention of the frightening number of deaths attributed to this disease each year. This resolution will give congressional support for programs undertaken by many health and women's organizations to make women aware of the risk factors and preventive measures they can take to protect themselves from breast cancer.

It is imperative that breast self-examination and mammography become common practices. Women should understand the necessity of early detection and the steps to take if they have any suspicions. When breast cancer is diagnosed at an early stage, proper therapy can be implemented, and the survival rate for the patients is much higher. The diagnosis techniques are very effective, yet too few use them. The passage of this resolution will increase awareness of the diagnosis techniques, and will express our concern and hope for imminent progress in the fight against breast cancer.

Each of us knows someone who has been struck with this terrible disease. A friend and constituent of mine, Rose Kushner, tragically passed away last January, after a long battle with breast cancer. Rose worked endlessly for advancement in the fight against breast cancer. Appointed by President Carter to the National Cancer Advisory Committee in 1980, she continued until her death to contribute to the fight against breast cancer, as well as make strides for the rights of breast cancer patients.

Awareness is the key to fighting this epidemic. It is only through education that women will learn the importance of detection techniques, diagnosis, and therapy. As Members of Congress, it is our responsibility to make this education available to all. I urge my colleagues to support this important resolution.

## A TRIBUTE TO THE CARLISLE POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Carlisle Police Department for

their dedicated and outstanding service to the people of Carlisle, MA in the protection of life, liberty and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Carlisle Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, Are you prepared to offer your life in service to your community?

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief David Galvin and those who serve in the Carlisle Police Department:

Earnest Steward, John Sullivan, Nancy Iosue, Graig Grogan, Richard Tornquist, Bruce MacNeil, Thomas Whelan, Neal Archambault, William Tee, Stephen Otto, W. Royce Taylor, Mark Schofield, Leo Crowe, Kevin Walsh, Steven Curley.

## TRUCK SAFETY AWARD

### HON. WAYNE OWENS

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. OWENS of Utah. Mr. Speaker, I would like to call to the attention of my colleagues an award recently given to a truckload motor carrier in my district, C.R. England & Sons, Inc. C.R. England and Sons of Salt Lake City, UT is the recipient of the Grand Prize Trophy in the 1989 Annual Fleet Safety Contest. The trophy was awarded at a meeting of the Interstate Truckload Carriers Conference.

The conference represents the truckload, irregular route, common and contract motor carriers of the United States and is affiliated with the American Trucking Association. Daniel England, chief executive officer of C.R. England accepted the trophy at the annual meeting of the conference in Las Vegas, NV.

The fleet safety contest is a competition between the 550 carrier members of the conference. The trophy is given on the basis of which company has the best safety record and safety program in the preceding year.

The drivers for C.R. England & Sons log 50 million miles annually, and to be judged from among their peers in the important field of highway safety is a great tribute to the management and drivers of that company.

For years, C.R. England & Sons has played an active role in the Salt Lake City community and throughout the State of Utah. The company promotes civic pride and highway safety. The award given to the company and its drivers is well deserved.

## NATIONAL POLICE WEEK

### HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. SCHUETTE. Mr. Speaker, I rise today to commemorate National Police Week and the many brave police throughout Michigan and America.

Twenty-seven years ago, President John F. Kennedy declared the week of May 14 as Law Week and proclaimed May 15 as a day of mourning for police officers who have given the ultimate sacrifice, their lives, in the line of duty to their communities and country. Shortly after the President honored the officers, he and J.D. Tippet of the Dallas Police Department were assassinated by Lee Harvey Oswald.

The National Law Enforcement Officers Association has combined the efforts of 15 law enforcement groups to build the National Law Enforcement Memorial in remembrance of officers like J.D. Tippet. Fourteen of the brave officers honored by the memorial served in Michigan. I humbly applaud their sacrifice and their dedication to the ideals of bravery, honor, and duty.

I would especially like to salute the families and memory of Vikki Hubbard, a Detroit police officer who was killed on March 12, 1989, and Sherdard Brison, also on the Detroit force, who was killed on March 5, 1990. Their courage, bravery, and dedication is an inspiration to us all.

After receiving unanimous congressional authorization, the National Law Enforcement Officers Association began building a memorial in the Washington, DC, Judiciary Square to honor the officers. More than 500,000 Americans have donated money to NLEO's memorial fund. It will be completed in 1991, during National Police Week. Mr. Speaker, please join me in saluting the National Law Enforcement Officers Association and the many officers who have died in the line of fire.

## HEARTBREAK RADIO IN SANTA FE

### HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. RICHARDSON. Mr. Speaker, yesterday I shared with you the news that a dear friend of mine, Bob Barth, died last week at the age of 43. The city of Santa Fe and the State of New Mexico have had a difficult time mourning his death. We're reminded of him every morning as we turn on the radio. His absence from the airwaves is difficult to comprehend. We really do miss him.

Of all the words that have been spoken about Bob's death and of all the stories that have been written, there is one eulogy that really stands out. I direct your attention to a column authored by Bob's close friend, Larry Calloway.

HEARTBREAK RADIO IN SANTA FE

(By Larry Calloway)

What do you say to a friend in pain? I mean physical pain—upper arms, chest, heart. Bob Barth sat humped over in the gown they gave him. Hand on the forehead as if in prayer. Wired to a TV monitor at the nurse's station. Clean, thin hair. Rounded shoulders. My friend and colleague looked like he was imitating a baby picture of himself, in Santa Fe's St. Vincent Hospital.

What do you say? You try a little humor. I asked if there was anything I could do—like take those bothersome calls from those sexy women who adored him on talk radio. No laugh there. His mind was on his children and his ex-wife.

The flowers! I offered to help clean the room. He'd been here only eight hours and there were about a dozen deliveries of flowers. By the window was a single rose. "It's from the hospital board," he said, nothing he'd hammered them about something earlier in the week and now they had him.

Hey, I said, it's a black rose! He knew the reference—the black rose sent to the legislator after he voted against some cops.

This made him laugh, but then he said, "For the first time, I have no interest in the Legislature." And I knew Bob, who had covered every legislative session for about 20 years, doing double time free when the news demanded it . . . the reliable, constant man on the scene with the mike, was sick.

"Somewhere," I finally said, "I read that pain always asks a question." "Right now I don't want to know the answer," he said.

And he told about the walk alone from the parking lot to those slithering emergency-room doors at dawn. He walked the long walk, thinking, "If I can make it to the doors, they'll see me."

They did. But, Hey, this was Bob Barth. Somebody started joking. Somebody started the usual repartee. Then somebody saw he was having a heart attack or something.

They pulled him through and now, 2:30 p.m. Thursday, wired for TV, sitting like a baby, he had a message. Something had happened. He had seen something: a thin, thin, almost invisible line.

He began, "I've thought more about death than most people, . . ."

I knew he was right, but not so much because he was a diabetic but because he had an abiding religious faith. He entered a Roman Catholic seminary in the "60s but got to listening to a smuggled transistor radio, to all that "60s music. And that was it. He came home to Santa Fe and eventually got into radio as a disc jockey. For 23 years, in a time of market-hopping corporate radio stars, he served the people.

And he was a saint. He could report on both sides of the line that divides most communities in New Mexico. I never knew him to give up being fair to anybody, even the meanest politician. His morning guests were legislators, members of Congress, state executives, the archbishop . . . but no voice was too small, not the *viejita* announcing a church meeting, not the angry but frightened kid opposing WIPP. And nobody was ever turned down for a birthday spin of "*Las Mananitas*" on the air.

He loved the community, the whole community, the people. They ought to commission a statue of him with his old tape recorder hanging in his left hand and the mike offered to the world in his right. . . .

"I've thought more about death than most people," he was saying in the hospital

on Thursday afternoon. "Today, for the first time, I knew I could die. And if I get through this I have a message: The line between knowing you could die and dying is . . . that thin."

There was no light between his thumb and finger as he gestured. He smiled. I will remember the scene as if it were in a shaft of light. What could I say? I hugged him like a baby and let him be.

I did not know I would have to pass his message on.

What do you say to a friend in pain? You don't. You listen. Because the question asked by pain is not for the body, but the soul. And the question is for you.

Bob died without seeing another sunrise—and he'd seen most of them. His station, KMIK, was heartbreak radio all Friday morning. It was a radio wake the likes of which I've never heard and never will again.

He was 43.

## THE HEALTH INSURANCE COUNSELING AND ASSISTANCE ACT OF 1990

### HON. JIM MOODY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. MOODY. Mr. Speaker, I am pleased to introduce today the Health Insurance Counseling and Assistance Act of 1990. Representatives DAVID PRICE and MARILYN LLOYD have joined me as original cosponsors.

This legislation, a companion bill to S. 2189 introduced last February by Senator PRYOR, will help Medicare beneficiaries make informed decisions about the purchase of Medicare supplemental—Medigap—insurance. I am pleased to join Senator PRYOR, the distinguished chairman of the Senate Aging Committee, in advocating this innovative approach to preventing abuses in the sale of Medigap insurance.

This bill directs the Secretary of Health and Human Services to establish a program of grants to States for counseling and assistance to Medicare beneficiaries who need information about health insurance coverage. The bill also creates a national resource center to act as a clearinghouse for health insurance counseling information. The bill authorizes appropriations of $14 million a year for fiscal years 1991-95 from the Hospital Insurance Trust Fund for the grants program, and $1 million a year for the resource center.

Medigap is a $12 billion per year market. Roughly 25 million Americans—nearly 80 percent of Medicare beneficiaries—opt to purchase Medigap policies. Medigap isn't cheap, with an average annual premium of about $700. Some high end policies cost much more. I believe that most Medigap insurers and their agents are honest and scrupulous in their efforts to sell an insurance product to the consuming public. Unfortunately, this business also has its crooks and con artists. That they are preying on our senior citizens, many of whom live on fixed incomes, is particularly galling.

The Ways and Means Health Subcommittee, on which I serve, recently held a hearing on Medigap premium increases and consumer abuses in the sale of Medigap insurance. Our hearing particularly underscored the difficulty in enforcing the Baucus standards—the Federal law which sets basic minimum standards for Medigap insurance.

With the exception of the Baucus standards, regulation of the sale of Medigap insurance is left to the States. My own State of Wisconsin has a State-law requirement which standardizes the coverage which must be offered by Medigap insurers to Medigap purchasers. Even with standardization in place I keep hearing about abuses which occur: senior citizens spending literally thousands of dollars purchasing duplicative and unneeded Medigap insurance from unscrupulous insurance agents who are spurred on by excessively high first-year commissions.

Fortunately for seniors, Wisconsin has a first-rate Medigap and insurance benefits counseling program. Wisconsin's program, established as a six county pilot project in 1978, was implemented statewide in the early 1980's, uses some 60 paid professional specialists, and provides counseling for Medicare, Medigap, Medicaid, other insurance or public assistance, as well as community education, individual counseling, legal assistance, assistance with filling out forms, and filing claims.

Wisconsin's program is administered by the State Department of Health and Human Services Bureau on Aging. The State is subdivided into six Area Agencies on Aging which have administrative responsibilities for all 72 counties. Service is also supplemented by the Center for Public Representation, which provides legal assistance to referred clients, and back-up and training for benefits specialists in two of the regions, which cover 29 counties.

In addition to the counseling and legal assistance, the Board on Aging and Long Term Care operates a toll-free hotline service for telephone inquiries. The hotline provides a crucial source of information and basic counseling for shut-ins, and can refer more complicated problems to benefits specialists for further consulation and assistance.

The Wisconsin program works. In 1989, the program provided real help to nearly 40,000 persons. Wisconsin's program is funded at $1.5 million per year. Funding sources are both State and Federal, with Federal funds coming from Title II-B of the Older Americans Act.

I cite these specifics to illustrate how much assistance can be provided for a very small amount of funding. The legislation I am introducing today would provide other States—which do not have the same infrastructure for assisting seniors—with an incentive to establish such programs. States like Wisconsin which already have counseling programs in place could qualify for grant assistance to expand the scope of their activities.

Counseling programs are extremely cost-effective. Families United for Seniors Action reports that the California program saves seniors twice as much as the program costs. Families USA estimates that the California program saves 5,000 seniors $916 each every year.

With last year's repeal of the Medicare Catastrophic Coverage Act, seniors are again facing real pressure to purchase or upgrade their Medigap insurance. I have no doubt that repeal of the MCCA will encourage unscrupulous operators to prey on Medicare beneficiaries' fears and encourage them to purchase low-value high-cost insurance. There's more reason than ever to encourage the establishment of State-counseling programs, which are strongly endorsed by Consumers Union, seniors groups, the Health Insurance Association of America, and the Blue Cross/Blue Shield Association.

Mr. Speaker, let me make it absolutely clear that I do not consider counseling as the only solution we need to abuses in the Medigap industry, and I do not offer this legislation as a cure-all for the outrageous tactics and rip-off policies which some disreputable Medigap insurance salespersons use.

The Ways and Means Health Subcommittee will consider a comprehensive response to abuses in the Medigap industry, an action I welcome. The subcommittee will consider options including mandatory standardization of benefits, Federal review of State enforcement, strengthening the Baucus loss ratio standards for individual and group policies, and requiring refunds of premiums for policies not in compliance with the Baucus standards. However, Medigap counseling is clearly a much-needed component of such a comprehensive legislative proposal, and I am pleased to offer this legislation to address that need.

## TRIBUTE TO MRS. ANN BENNETT

### HON. GEORGE (BUDDY) DARDEN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. DARDEN. Mr. Speaker, I want to bring to the attention of my colleagues the following article by Meg McGriff from the Summerville News. Mrs. Ann Bennett, of Chattonooga County, has worked with Summerville attorney Bobby Lee Cook for more than 40 years. Mr. Cook is one of the most respected attorneys in our region, and as this article points out, Mrs. Bennett has played an important role in his office for four decades. Mrs. Bennett's commitment to her job and her service to the community are well known in Summerville, and I am pleased to bring this to the attention of the House of Representatives:

SECRETARY'S SECRETARY WORKS OVER 40 YEARS FOR LAWYER'S LAWYER

(By Meg McGriff)

For over 40 years, Ann Bennett has devoted her professional life to being a good secretary. As secretary to Bobby Lee Cook, often called a "lawyer's lawyer," Ann Bennett is as close to a "secretary's secretary" as one can get.

SECRETARIES

As Americans celebrate National Secretaries Week, professionals like Mrs. Bennett are being saluted for their contributions to businesses and professions everywhere.

"I couldn't have done it all these years if it weren't for the man himself," said Mrs. Bennett, referring to her employer. "I've never had any desire to do anything else or go anywhere but here."

Their professional association began years ago, Sept. 17, 1949. At the time Mrs. Bennett, a recent graduate of Summerville

High School, had taken a job at the glove mill operated by Riegel Mills. She knew how to type, and her high school principal suggested she talk to a young lawyer he knew that was getting ready to open a practice in downtown Summerville.

LAW OFFICE

That man was Bobby Lee Cook, and Ann took off downtown to contact him about the position of secretary for his new law office.

"He was busy painting the floor in the office which was above McGinnis Drug Store," she said. "I went to work the next day, and the rest is history."

Her greatest education has come from working on the job. She did pick up short hand skills with the help of Burt Self. But she still says her best teacher was her boss.

NO ROUTINE

"I do only what I am asked to do. Mr. Cook makes his own appointments. That's the way he's always done it. There is just no routine. No day is the same as the day before," said Mrs. Bennett.

She insists that she is there to take care of any task that comes her way. And she's careful not to hand out any advice on behalf of the famous lawyer who employs her.

"Clients will ask lots of questions, but I know better than to give them advice. I don't have a law degree and am not qualified to do that," she said.

GREATEST REWARD

Her greatest reward for her many years of devoted service is the respect and admiration she has received not only from Cook, but from each member of his family.

"I've been here through all of the years when the children were born, and I feel an attachment to them, just like family," she said.

She also is pleased by the many interesting people she has been able to know through her employment.

"The biggest problem I have is that I tend to parrot his thinking," said Mrs. Bennett. "If he feels strongly about an issue, more than likely I share that view."

DUTIES CHANGE

Mrs. Bennett has raised four children of her own. In recent years she has been nursing a critically-ill husband. And so many of her duties have been passed on to others. At one time she did the bookkeeping for the firm. But others have come in to help relieve her of many day-to-day tasks so that she can take care of her husband.

"Law is Mr. Cook's hobby as well as his career," she says fondly.

Through her loyalty as his secretary, they have seen his practice grow to the high esteemed position it is today.

LOYALTY PRAISED

Speaking on behalf of the family, Kris Connelly, who practices law alongside her father, said, "We rely on Ann tremendously. It takes a lot of experience to know how to do what she can do."

## A TRIBUTE TO THE LOWELL POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Lowell Police Department for their dedicated and outstanding service to the people of Lowell, MA in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Lowell Police Department—the public servants on the frontline who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, Are you prepared to offer your life in service to your community?

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Superintendent John Sheehan and those who serve in the Lowell Police Department:

George Gentle, John Cullan, James Gookin, Robert Kierce, John Maher, Martin Roth, George Ryan, Thomas Conlon, Edward Davis, John Flaherty, Vincent Murphy, John Newell.

Chauncey Normandin, Ronald Potvin, Arthur Ryan, Sr., William Shea, Garrett Sheehan, John Sullivan, Borden Zwicker, Sr., David Abbott, Patrick Burns, Brendan Durkin, William Busby, Dennis Cormier.

Arthur Diette, James Doyle, Charles Duarte, Kenneth Lavallee, Robert Liston, Angus MacDonald, Michael O'Keefe, Raymond Richardson, Arthur Ryan, Jr., George Shanahan, Susan Siopes, Steven Smith, Kevin Staveley, Brendan Tobin.

Francis Waterman, Jonathan Webb, Richard Beauchesne, Victor Bisson, Martin Boisvert, Vincent Bomal, Arthur Bourgeois, John Boutselis, Arthur Boyle, Daniel Brady, Donald Brill, Warren Brodeur, Mark Buckley, John Bugler.

Richard Bugler, Brian Callahan, John Callahan, Richard Callahan, William Callahan, James Campbell, Diane Capone, Robert Caron, Michael Chandonnet, Barry Chevalier, John Clarke, Felix Concepcion, Phillip Conroy.

Paul Corcoran, Raymond Costello, Roy Cox, Timothy Crowley, Jeffrey Davidson, Robert Davidson, John Davis, Robert DeMoura, John Dempsey, Rodney Desrosiers, John Dolan, Paul Donaghue, Wilfred Dow.

Edward Dowling, Daniel Duffy, Francis Dumont, Roger Dumont, Michael Farnum, Hilda Fernandez, David Ferry, James Fitzpatrick, Thomas Fleming, Gerald Flynn, John Flynn, David Freeman, Deborah Friedl, Peter Gickas.

Julio Gonzalez, Borden Zwicker, Sophia Gramas, Georgia Themeles, Lisa Coupe, Mary Moynihan, Thomas Bellefeuille, James Hurley, Gerald Kilbride, Paul Murray, Thomas Bellefeuille, Jr., Robert Fian, Barbara McCarthy, William O'Malley.

Denise Pelletier, Elizabeth Pyrcz, Patricia Rondeau, Patricia Stuart, Joann Seamans, Timothy Roy, Walter Welcome, Mark Servin, Margaret Boumel, Melissa Fraser, Denise Mowatt, Avis Murray, Alice Boyle.

Patsy Choate, Doris Christakos, Candice Connor, Mary Cook, Carlean Coulouras, Jean Dempsey, Catherine Descoteaux, June Dion, Leah Favreau, Maureen Ferreira, Maureen Gay, Suzanne Gendreau, Deborah Geoffroy.

Diane Grady, Donna Holder, Angel Otero, Evelyn Pacheo, Adrien Paquette, Paul Paradise, Maurice Pelletier, David Pender, Edward Pitta, Mark Poirier, Miguel Pol, Leonard Pollard, Christopher Purcell, John Prycz.

David Quigley, Miguel Quinones, Robert Reyes, Gary Richardson, Raymond K. Richardson, Jose Rivera, Robert Roper, Francis Rouine, Arthur Russell, William Ryan, Charles Sadlier, Philip Salome, Arthur Santos.

George Santos, Dennis Sargentelli, Paula Scalzilli, David Seamans, David Shaughnessy, Thomas Sheehan, Richard Soucy, Alexander Souleotis, Gerald Sullivan, Scott Swindells, William Tanguay, Francis Taylor, William Taylor, James Trudel.

Raymond Vachon, Gerald Wayne, Anthony Witman, John Wojcik, Francis Wojtowicz, Andrew Wolfgang, Paul Goyette, John Guilfoyle, Francis Harvey, Randall Humphrey, Lewis Humphrey, Lewis Hunter, Daniel Hyde, Dennis Janowicz.

Brian Jason, Francis Keefe, William Keefe, Francis Kennedy, Michael Kueazler, Heather Koller, Paul LaCedra, Paul Laferriere, Thomas Lafferty, Daniel LaMarche, Thomas LaPointe, John Leary, Richard Leavitt, M. Ann Lessieur.

Normand Levasseur, Edward Lyman, Sergio Maldonado, Richard Marchand, Leo Marquis, Gerald McCabe, Robert McCarthy, Joseph McGarry, Larry McGlasson, William McKenney, Bryan McMahon, John McWilliams, Thomas Meehan, Leo Mendes, Jr.

Albert Mercier, Michael Miles, Kenneth Moore, Dennis Moriarty, Stephen Morrill, Gerald Mousseau, Edward Murphy, John Myers, Dennis Newell, Arthur Noel, Stephen O'Neill, Howard Osborne, Shirley Kelley, Patricia Kunguius.

Joan Lane, Patricia Mapakoi, Kathleen McMullen, Judith Murphy, Patricia Netto, Theresa Noel, Patricia Noyes, Susan Piekos, Linda Reid, Rita Sakalinski, Barbara Sawyer, Shirley Schaeffer.

Theresa Trudel, Laura VanDinter, Marian VanDinter, Rosanne Vieira, Patricia Wedge, Maryanne Young.

## IN RECOGNITION OF THE WINNERS OF THE CREVE COEUR AREA CHAMBER OF COMMERCE ANNUAL ESSAY CONTEST

### HON. JACK BUECHNER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. BUECHNER. Mr. Speaker, I rise today in recognition of three outstanding young people from my district: Ted William Beasley, Amy Wilhelm, and Alice Lin. These young people deserve our congratulations as the winners of the 1990 Creve Coeur Area Chamber of Commerce and the Lions Club essay contest.

Ted, Amy, and Alice will each receive a scholarship from the Creve Coeur Area Chamber of Commerce and the Lions Club based on their exceptional understanding of women

and business as illustrated by their prize-winning essays in the chamber of commerce and the Lions Club annual essay contest. This contest has traditionally attempted to challenge students to formulate a response to a specific question in their answer, combining pragmatic considerations with social responsibility.

This year's question, "are career women changing the nature of the business world?", would challenge even the most seasoned of social architects, but leave these young people undaunted. Their answers are notable for their bold and intelligent analysis, and reflect tremendous insight into the issues which confront our society today. In their discussion of these issues, they have shown an awareness often lacking in more experienced policymakers.

The first place answer came from Ted William Beasley of Parkway North High School. His essay, which provided conclusive evidence that women are affecting the business world in numerous areas, should be must reading for American policymakers.

For his award winning answer, Ted will receive a $2,000 scholarship from the chamber of commerce and the Lions Club. The 2d and 3d place awards of $1,500 and $1,000, go to Amy Wilhelm of Pattonville High School and Alice Lin of Parkway Central High School, respectively. However, in my book they are all first place winners.

Our Nation is fortunate to have fine young people such as these and organizations such as the Creve Coeur area Chamber of Commerce and the Lions Club which encourage these activities. The chamber and the Lions Club are to be commended for taking an active interest in the education and development of our young people, and for backing this commitment with the investment in time and money it requires. This is the sort of private sector initiative we should, indeed must, encourage.

Our young people are the window to the future of our Nation. Through their eyes we can see tomorrow, with their thoughts we will dream new dreams. The winners, indeed, all of the participants in the essay contest, renew our optimism in the future of this Nation. For this we thank them.

Mr. Speaker, I ask each of my colleagues to join me in congratulating these young Americans and wishing them success in their future endeavors.

## COMMENDATION OF JOHN J. DOUGHERTY

### HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. FOGLIETTA. Mr. Speaker, I rise today to pay special tribute to an outstanding labor leader from my district. John J. Dougherty has successfully served the cement masons local union for over 30 years.

Upon entering the union in 1959, John gained great admiration and respect from his fellow workers. In July of 1973, John's coworkers chose him as a representative for the Cement Masons Local 592. Mr. Dougherty retained this position until he was chosen president and business manager in 1987.

Furthermore, Mr. Dougherty holds several other positions which benefit from his involvement. They include: president of the Penn State Conference of Plasterers and Cement Masons, vice president of the Pennsylvania Building Trades Council, the Philadelphia AFL–CIO Council and the Philadelphia Building Trades Council; senior trustee of Cement Masons Health and Welfare Pension Plan and chairman of the Cement Masons Apprentice Committee.

The breadth of John's contributions can be matched only by the recognition he has received for his charitable endeavors. John is a fine role model for the people of Philadelphia, the City of Brotherly Love. As an active member of the Variety Club, an organization which organizes many programs for the children of the city, John has contributed his time and energy to many charitable causes. For instance, John and his fellow union members installed a block long sidewalk and access ramps at the Association for Retarded Citizens. In addition, John worked to complete cement work for the Archibishop Ryan's High School swimming pool.

Mr. Speaker, on May 19, 1990, Mr. Dougherty will be honored, at a charitable banquet, by the Philadelphia Chapter of Unico National for this outstanding humanitarian work. I wish to extend both my sincere congratulations and whole-hearted thanks for John J. Dougherty's service to the people of Philadelphia.

## CONGRESSMAN DALE E. KILDEE HONORS JAMES M. McCOLGAN

### HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. KILDEE. Mr. Speaker, I ask my colleagues to join me in paying tribute to a person who has done so much to improve the quality of life for the residents of my hometown of Flint, MI, Mr. James M. McColgan.

Mr. Speaker, too often we think of public servants as those individuals who work for public agencies or those who are elected to public office. But there are those individuals, who simply believe that it is their civic duty to make their communities a better place to live. Mr. Jim M. McColgan is one of those special individuals.

In 1970, James McColgan became the sole owner of the M&B Distributing Co., and he started a successful family-operated food distribution business. Over the years, Mr. McColgan and his family have been very successful business people in the Flint area, and they have opened additional stores in several other States. However, they have always found time to help those who are the most vulnerable in our society.

For several years now, the McColgan family has worked with the Genesee County Community Action Agency's Neighborhood Service Center [GCCAA] to serve over 10,000 hungry men, women, and children in our community each year. Like other social service agencies, GCCAA has been hurt by a scarcity of resources needed to meet the increasing demands of the community. While many people talk about private industry helping the public sector, James McColgan has set a standard that should be emulated around the country. When GCCAA needed freezers to store perishable Federal commodities, and did not have the money to pay for it, Mr. McColgan provided free storage at his business so these commodities could be distributed to impoverished families. And when GCCAA began receiving Federal dollars to pay for the storage of the commodities, Mr. McColgan would promptly return the money to GCCAA so they could serve more needy families. Mr. McColgan has returned over $18,000 that has been used to feed hungry children, to allow families to stay in their homes, to provide clothing to families, and to enable senior citizens to pay for their medical prescriptions. During this time, he has not kept one penny for his own expenses.

In 1988, Mr. McColgan made an offer to buy the Hamady Food Stores, a chain of grocery stores that have been an important part of our community for over 70 years. When the former owner of the Hamady Food Stores filed for bankruptcy, Mr. McColgan worked tirelessly with local labor and community officials to put together a package that allowed him to take over the ailing food stores. Since acquiring the Hamady Food Stores, Jim and his wife Jane, who is secretary of M&B Distributing and vice president of Hamady Food stores, Jim McColgan, Jr., president of M&B Distributing and vice president of Hamady Food Stores, Robert M. McColgan, vice president of M&B Distributing and treasurer of Hamady Food Stores, and Aaron McColgan, Produce Supervisor of Hamady Food Stores, have all worked together to make this family-business an enormous success. Their efforts have not only saved hundreds of jobs in our community, but they have maintained many precious neighborhood food stores, and they have preserved an integral part of our community's history. They are truly a remarkable family, and their efforts have led to Jim McColgan being named the Businessman of the Year by the Sales and Marketing Executives of Flint.

Moreover, since Mr. McColgan bought the Hamady Food Stores, he has continued to help GCCAA assist indigent people in Genesee County. Every week, the staff of the Neighborhood Service Center pick up food, including dairy products, from all of the 21 Hamady Stores in the Flint area to be distributed to needy families. It is estimated that over $250,000 worth of food reaches these people annually through these donations. He also convinced several food brokers to donate excess food to GCCAA rather than trying to resell it.

Mr. McColgan and his family are also very active in a number of other community organizations. Jim has been a strong supporter of the Whaley's Children Home, and he recently served as the honorary chairman of the Easter Seals Telethon. In addition, the Hamady Food Stores are one of the major sponsors of the Airshow for Special Olympics and the McColgans have generously contrib-

uted to many community groups, such as the Flint Institute of Music.

Mr. Speaker, we in the Genesee County area are truly fortunate to have a person like Jim McColgan, and indeed, a family like the McColgans, living in our community. On Monday, May 21, 1990, the Genesee County Community Action Agency will honor Mr. McColgan for the opening of the Hamady/M&B Reclamation Food Distribution Center. This building will be used to distribute both privately donated, and publicly received commodities for needy families in the Flint area. In true style, Mr. McColgan provided and assisted in building a drive-in cooler and freezer to store these commodities. This building is a tribute to an individual who has dedicated himself to ensuring that all residents in our community will receive proper nutrition. It is for these reasons that I am proud to honor Jim M. McColgan and thank him for all he has done for making Flint, MI, a better place to live.

## RETIREMENT OF DR. ELLIS E. McCUNE, PRESIDENT OF CALIFORNIA STATE UNIVERSITY, HAYWARD

### HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. STARK. Mr. Speaker, I rise today to pay tribute to Dr. Ellis E. McCune, the president of California State University, Hayward. Dr. McCune is retiring after 23 years of dedicated service at Cal State Hayward [CSUH] in California's Ninth Congressional District.

President McCune received his B.A. and Ph.D. degrees in political science at the University of California, Los Angeles. He then held teaching and administrative positions at Occidental College in Southern California and at California State University, Northridge. He was also the dean of academic planning for the California State colleges from 1963 to 1967.

I would like to take this opportunity to list some of Dr. McCune's many accomplishments while at CSUH.

He significantly increased ethnic diversity of faculty, staff, and students. In 1988, 38 percent of the students were minorities; aided CSUH in becoming the first CSU campus to establish an affirmative action plan; guided the campus through a decline in student enrollments and avoided layoffs in 1975, then was able to increase enrollment from 6,000 to today's level of 13,000; established the Contra Costa Center, a CSUH satellite campus where construction on permanent buildings will begin in 1990; formed the strategic planning council in 1989 to develop future directions for the university; established the alumni association with 6,000 members; more than doubled the number of campus buildings from 5 to 14; increased emphasis on development, enrollment, and public relations. Appointed the development director who is planning the University's first major fundraising effort with the support of local corporations and community groups; and increased student financial aid, including scholarships, to $8 million.

He has also been active in many community organizations and has served as director of the Hayward Chamber of Commerce; board of directors, Oakland Museum Association; chairman, United Bay Area Crusade; and, member of the Hayward Rotary.

President McCune has also served in many capacities for a variety accreditation committee for the American Association of State Colleges and Universities; member, board of directors, Council on Postsecondary Accreditation; board of directors, American Council on Education; president, Western Association of Schools and Colleges; vice chairman, Association of American Colleges.

Mr. Speaker, I cannot agree more with what one of his peers, Chancellor for the California State University, said about President McCune:

Ellis McCune is a leading statesman in higher education. His wisdom, leadership, intellect and graceful wit have been invaluable to me personally and to the California State University. President McCune's contributions to higher education are magnificent. During his 30-year career in the California State University he has proven to be an extraordinary visionary. His involvement in educational and community activities have shown the highest degree of dedication to humanity. We can't begin to express our gratitude for his exemplary service to the California State University.

## PUERTO RICO GOVERNOR RESPONDS TO PRESIDENT BUSH ON STATUS PLEBISCITE

### HON. JAIME B. FUSTER

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. FUSTER. Mr. Speaker, on many occasions of late my colleagues have heard me speak of the pending legislation in both the House and Senate that would authorize a congressionally sanctioned political status plebiscite in Puerto Rico between statehood, independence, and an enhancement of the existing commonwealth status.

President Bush favors statehood while I, as my colleagues know, favor the enhanced commonwealth option as being in the best interests of both Puerto Rico and the United States. I have great respect for the institution of statehood, Mr. Speaker, but statehood just does not correspond to the existing economic and cultural-linguistic realities of Puerto Rico.

President Bush, in his advocacy of statehood, recently sent to Puerto Rico two high-ranking White House officials, Deputy Chief of Staff Andrew Card and Chase Untermeyer. Some of the things they said there were widely reported in the Puerto Rican press, prompting our Governor, Rafael Hernández Colón, to write a letter today to President Bush.

Because I know my colleagues would be interested in such a response by Gov. Hernández Colón. I am inserting it below in the RECORD.

MAY 16, 1990.

Hon. GEORGE BUSH,
*President of the United States, The White House, Washington, DC.*

DEAR MR. PRESIDENT: In my inaugural speech of January 2, 1989, I took the initiative of proposing to the United States a referendum so that the people of Puerto Rico would have an opportunity to exercise the fundamental right of self-determination as to the political status to govern the Island's future.

It was and is my deep conviction that this is an appropriate moment in history to resolve the so-called status question, so that this Island and its people can move forward, building on the constructive achievements of the Commonwealth which have made possible substantial mutual economic and strategic benefits for the U.S. and Puerto Rico, while at the same time preserving a treasured cultural heritage.

My initiative was implemented—following consultations with the representatives of the other parties in Puerto Rico, Members of the Congress, and your Administration—with the understanding that the status options to be developed must be of equal dignity, fair and balanced, and that the exercise of self-determination by the people of Puerto Rico, to be valid, must be conducted in an atmosphere free from outside interference and distortion.

It is in this spirit that we have conscientiously participated, for over a year, in the congressional process and are still firmly pledged to the realization of my original goal for our people. During this time, I have repeatedly ignored what I believe to have been serious breaches of these mutual understandings, but in good conscience I can no longer do so. It is with considerable regret that I now feel compelled to express my deepest disappointment in the treatment of the plebiscite process by your Administration.

In your 1989 State of the Union message, you immediately linked endorsement of a status plebiscite for Puerto Rico with a strong expression of your support for statehood rather than the other options of enhanced commonwealth or independence. Since that time the Administration has made every conceivable effort to:

Maximize the alleged attractiveness of statehood;

Minimize of ignore its serious fiscal and cultural problems;

Oppose all measures providing greater autonomy under commonwealth; and

Endorse discriminatory treatment in programs for the needy under commonwealth.

In your May 9 letter to U.S. Representative Robert Lagomarsino, you asked: "How can we applaud the exciting and momentous movements toward freedom in Eastern Europe, Latin America and elsewhere while refusing to grant to our own citizens the right of self-determination?". This is a most noble sentiment, which I wholeheartedly endorse. Mr. President, it is therefore ironic that your own Administration, by dictating to the people of Puerto Rico the course the U.S. Government wants them to choose, is in effect dealing with Puerto Rico in a manner tragically resonant of the approach now being taken by President Gorbachev toward the Baltic Republics. Indeed, as Moscow agents occupy various government buildings in Vilnius, Lithuania to press their version of their future relationship, White House representatives this week are appearing in the political halls of San Juan, Puerto Rico to promote statehood.

Mr. President, the people of Puerto Rico must be permitted to make their choice free from the awesome pressure that can be brought to bear by the Office of the President of the United States and his Administration. For this reason, I respectfully urge you to direct the Administration to henceforth adopt a position of strict neutrality on the choices to be presented in the status plebiscite. History is full of examples of the use of plebiscites and referenda to give apparent legitimacy to gross violations of democratic and legal principles.

Mr. President, we must ensure that the proposed plebiscite for Puerto Rico does in fact prove to be an inspiring example, to Eastern Europe and to the world of the way a true democracy provides for genuine self-determination.

I remain fully committed in my desire to work with all concerned toward the fulfillment of the historic opportunity. I am hopeful that we can yet ensure a dignified and fair process that affords the people of Puerto Rico and unfettered right of choice to determine their own destiny.

Cordially yours,

REFAEL HERNANDEZ-COLON.

## A SALUTE TO BRIG. GEN. CELES KING III

### HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. DYMALLY. Mr. Speaker, I rise today to salute Celes King III, brigadier general, the highest ranking African-American officer in the California State Military Reserve.

I am pleased to be listed among the thousands of people who know Brig. Gen. Celes King III as a caring person, a man of integrity and a man with a great wealth of knowledge and dedication to the good and welfare of not only the people of south central Los Angeles, but to people throughout Los Angeles County, the State of California, and the Nation.

Dr. King has unselfishly given many years of his time, talents and efforts to advancing the cause of civil rights and to creating a more livable world for all of us. I would like to take this opportunity to salute Brig. Gen. Celes King III and express my appreciation for his untiring efforts for what is right, and for his numerous achievements which include:

Professional Bail Agents of the U.S., national president;

Independent Bail Agents of California, former president;

Los Angeles City Human Relations Commission, former president;

Los Angeles Brotherhood Crusade, co-founder;

Los Angeles Rumor Control, co-founder;

Los Angeles NAACP, former president;

CORE California State chairman;

Southern California National Business League, former chairman;

Tuskegee Airmen, former Air Force pilot officer;

California Military Reserve, brigadier general;

California State University, former assistant professor;

California State Senate commissioner;

California State Martin Luther King Holiday Commission;

Pacific Coast University, LLB;

Masters degree, urban planning, Pepperdine University;

Masters degree, business, Pepperdine University;

Former chair of the board;

University of Santa Barbara (CA);

University of Santa Barbara (CA) Ph.D.; and

Recipient of numerous other awards and honors.

Professor King has successfully operated his family's bail agency since graduating from law school almost 40 years ago. His success as a bail agent has been reflected by numerous honors and awards presented to him by his peers in the bail industry. Through the many years in which he has admirably served his profession, he has been called upon to represent his industry before Congress, the California Legislature, and local government.

It is not unusual in the course of a busy day, which starts early in the morning, for Dr. King to call and be called by the helpless, the needy, State and local government officials and leaders, and national leaders—including the President of the United States.

General King fills an active schedule of political and community activities in every spare moment between his day long dedication to his family, his friends, his associates and his business.

Dr. King serves on dozens of boards and commissions which serve people from all walks of life. He has been honored for his dedicated service by the University of California by having his life story and the activities of his family placed with the exclusive oral history collection at UCLA and Berkley libraries.

Brig. Gen. Celes King III is an active Republican who has forged close working relationships with Democrats and Independents, and has dedicated his life to serving the people.

Brig. Gen. Celes King III began his military career in World War II where he was among a handful of outstanding young black men who broke the Air Force color line by becoming an officer in the famous Tuskegee Airmen. He was later elevated to the position of brigadier general in the California Military Reserve by former Gov. Jerry Brown, making him the highest ranking black person in the California military.

Mr. Speaker, I am pleased to salute Celes King III for all of his outstanding contributions in making the world of those around him a better place to live. I commend him for the many awards and honors bestowed upon him. Finally, I salute Brig. Gen. Celes King III for serving as a brilliant and positive role model for the young people in his community.

## A TRIBUTE TO THE ACTON POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Acton Police Department for their dedicated and outstanding service to the people of Acton, MA in the protection of life, liberty and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Acton Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, Are you prepared to offer your life in service to your community?

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Phillip L. Connors and those who serve in the Acton Police Department:

Donald Happakoski, Bradley Madge, John Wyman, Paul Cormier, William O'Connell, David Bonner, Mark Coulter, Judith Hadley, Dana Beauvais, Harver LaPrade, John Bousack, William Murray, Arthur Boisseau.

## CONGRESSIONAL CALL TO CONSCIENCE VIGIL FOR SOVIET JEWS

### HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. McGRATH. Mr. Speaker, I want to take this opportunity to draw attention to the problems Soviet Jews are experiencing, even in this era of glasnost.

In its May 7 issue, Newsweek ran a cover story which revealed the degree of anti-Semitism that still takes place in the Soviet Union and Eastern Europe. While the article was indeed disturbing, I was encouraged to see that Newsweek exposed the pain that still inflicts millions of Jews. It is truly disturbing that many in this country believe that Soviet and Eastern European Jews have been freed.

The era of glasnost has produced an array of new freedoms for the people of the Soviet Union. Unfortunately, a wave of anti-Semitism has emerged as a result of the personal independence. In January of this year, a Moscow writers' meeting was disrupted by a group shouting anti-Semitic rhetoric through a bullhorn, while police stood idly by. In addition, Pamyat—a nationalist anti-Semitic organization—is more virulent than ever, holding public meetings and publishing anti-Semitic materials. With the Berlin Wall crumbled and much of Eastern Europe now open to democracy, we cannot overlook this gross human rights violation. Through pressure from the United States, we must demand that President Gorbachev end these vicious acts of harassment and violence.

In a related matter, the Soviet Government recently rejected a plea from Secretary of

State James Baker to permit direct flights to Israel for Soviet Jews. Of course, without such flights, thousands of Soviet Jews are trapped in the Soviet Union. While Gorbachev has finally permitted Soviet Jews to emigrate, he has repeatedly balked on opening air routes to Israel. In essence, Gorbachev has not liberated Soviet Jews. The Soviet action that denies direct flights to Israel raises very serious questions about the intentions of the Soviet leaders. Is Moscow sincere in freeing Soviet Jews?

I have joined several House Members in a letter to Soviet Ambassador Yuriy Dubinin, calling on the Soviets to reconsider this gross inequity. Under the terms of the Jackson-Vanik amendment, most favored nation [MFN] benefits for Soviet trade is conditioned on Jewish emigration. Until direct flights from the Soviet Union to Israel are established. I believe MFN status for the Soviet Union should continue to be denied.

In closing, I want to urge my colleagues to read between the lines when the Soviets tell us of the wide ranging benefits of glasnost and their "liberation" of Soviet Jews. Soviet and Eastern European Jews are still receiving no more than lipservice from a government that has promised to free them. The United States must serve as the global standard bearer of human rights and promote the basic freedoms that are entitled to the Jews of Eastern Europe and the Soviet Union.

## LEGISLATION TO AMEND TAX CODE TO ASSIST PERSONNEL AFFECTED BY BASE CLOSURE OR REDUCTION

### HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. MADIGAN. Mr. Speaker, I rise today to introduce legislation that amends the Federal Tax Code so that the Homeowners Assistance Program [HAP] benefit for military and civilian personnel affected by a base closure or reduction is not taxed as income.

The HAP was created to help military and civilian homeowners who are forced to sell their homes due to a base closure or reduction. These homeowners receive a payment based on the value of their home prior to the announcement of a base closure or reduction. For example, a family that sells its $100,000 home for $70,000 receive 85 percent of that $30,000 difference, or $25,000

These people are forced to sell their homes because of a Federal decision. They should not be punished for buying a home near their base. But then this benefit is taxed as income, they are being punished.

Taxing the benefit is counterproductive to the intention of the program. The Federal Government is giving with one hand and taking away with another. The idea of the program is to help military and civilian personnel and their families, not to hurt them. It's difficult enough to uproot an entire family and move to a new town, make new friends, and put the kids in new schools. It is especially hard when that decision is not voluntary.

Amending the Tax Code in this way will benefit military and civilian men and women who are forced to sell their homes because of Government actions. I urge my colleagues to join me in supporting this important measure.

## LONG-TERM CARE

### HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, May 16, 1990 into the CONGRESSIONAL RECORD:

LONG-TERM CARE

Few problems come to my attention from constituents more often than the care of frail or ill older persons. I do not find anyone who is satisfied with the current system of long-term care. As more Americans live longer they suffer not only illnesses which require hospital care, but also conditions that require long-term care at home or in a nursing home. In 1987, roughly 6.5 million older Americans needed long-term care. By 2040 the number is expected to increase to 19 million.

The costs of long-term care can be staggering. Nursing homes cost roughly $30,000 annually, and professional care of older persons in their homes can cost up to $200 a day. Americans spent at least $56 billion on long-term care in 1987. Many families pay for long-term care out of their own pocket, straining their incomes and using up life savings. Roughly half of all extended health care spending is from private sources. Insurance companies offer only a limited number of extended health care policies, and federal programs do not begin to meet the total need.

CURRENT COVERAGE

The predominant provider of long-term care is the family. Older persons with whom I speak express strong preference for remaining at home as long as possible. Fortunately, families spend an enormous amount of time and energy taking care of older persons, and roughly 70% of disabled older persons receive care exclusively from nonpaid sources, generally family and friends. Yet this is becoming increasingly difficult as more women work outside the home.

Roughly 120 insurance companies now offer some type of long-term care insurance, providing about 1.5 million policies. Most health insurance policies, however, offer little relief to persons needing long-term care, and only about 1% of all extended health care expenditures are paid for by private insurance. Long-term care insurance has several limitations: Benefits are often inadequate to meet costs and do not usually keep pace with inflation; policies may not cover an illness a person already has; and many policies are unaffordable to all but the wealthiest families, costing up to several hundred dollars each month.

Given the drain of long-term care on family resources, it is not surprising that many older persons ultimately depend on public programs for their care. Medicaid, the Federal-State program for the poor, offers some relief, but the program provides benefits only to those who meet stringent financial standards. During the 1980s the Congress expanded several programs to provide limited community and home based care, such as hospice care and in-home services. These limited steps do not provide a comprehensive solution to the problem of long-term care.

FUTURE OPTIONS

The Congress is reviewing a number of proposals to provide extended health care benefits. The debate centers on whether a potential solution should be private or public, or some combination of the two.

One proposal centered largely in the private sector would offer federal tax incentives for purchasing long-term care insurance or for establishing individual medical accounts modeled on individual retirement accounts (IRAs). If younger persons, with lower levels of risk of needing care, buy long-term care insurance, the cost of the policies should go down. It is not clear, however, whether the government could provide large enough tax incentives to get enough people to buy the policies. The cost to the Treasury of this approach could be high.

A number of public solutions also have been offered. One approach would provide long-term care to all chronically disabled persons regardless of their ability to pay. Beneficiaries would not be responsible for any cost. The drawback of this proposal is its price tag, probably over $55 billion a year.

Another proposal would combine private insurance and Medicare coverage. Medicare, the federal health benefits program for older persons and the disabled, would be expanded to cover nursing home and home care after a predetermined amount, or deductible, is paid by the beneficiary. Medicaid would help pay the deductible for lower-income persons, and others could buy private insurance to meet this cost. This proposal defines and limits in advance the costs for insurance companies. Since they would only have to cover the deductible, policies could be more affordable. The cost to the Treasury could be up to $50 billion annually.

OUTLOOK

Several factors limit consideration of these and other long-term care proposals. First, the government continues to run enormous budget deficits, and finding additional federal resources to fund long-term care will be difficult. Other worthy priorities are competing for limited federal resources at a time when 32% of federal outlays already directly benefits older Americans. In addition, the recent repeal of the Catastrophic Protection Act, which expanded Medicare hospital and drug benefits, increased the doubts of many in the Congress about finding a publicly acceptable way to finance long-term care. Finally, both the Congress and the President are in doubt as to the next step in health care, and have failed to provide leadership on this issue.

I would favor a long-term care proposal that combines private and public options and allows older people to remain at home as long as possible. The responsibility for care should not fall solely on individuals or families, nor should the government provide comprehensive care for all older people. Private long-term care insurance and individual medical accounts could be encouraged, and everything should be done to improve the ability of people to pay for their own care. But it is unlikely that private financing alone can do the job, and some public sector participation will be necessary. This could include expanding government assistance to unpaid care givers along with greater coverage of home care services and easing Medic-

aid eligibility requirements. The Congress should continue to explore providing long-term care under a general social insurance program like Medicare. In the end, private and public sector approaches must fit together to provide affordable, quality long-term care.

## H.M.S. "ROSE" REPLICA

### HON. CHRISTOPHER SHAYS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. SHAYS. Mr. Speaker, yesterday, Senator JOSEPH I. LIEBERMAN and I introduced legislation which will allow a replica of the 1757 English frigate, H.M.S. *Rose,* to engage in trade along the coast of the United States.

Built in Nova Scotia in 1970, and berthed in Bridgeport, CT, the *Rose* replica is owned by the nonprofit organization, the H.M.S. *Rose* Foundation, which is headquartered at Captain's Cove Seaport in Bridgeport, CT.

The *Rose* is currently in the process of receiving its certification as a sailing school vessel. Once she receives her certification, the H.M.S. *Rose* Foundation will begin a variety of educational programs, in which trainees will learn about American maritime history, natural science and ecology and the importance of teamwork as they take part in the sailing of the vessel.

Built in 1757 in Yorkshire, England, the original H.M.S. *Rose* took part in the Seven Years War. In 1761, this 24-gun frigate sailed to the West Indies and took part in the capture of Havana and Martinique.

In 1768 she arrive in Boston under the command of Captain Sir Benjamin Caldwell. While on patrol off Boston in April of 1769, her first officer, Lt. Panton, was killed while trying to impress, or draft, sailors from a brig called the *Pitt Packett.* A young lawyer, John Adams was appointed Public Defender of the four accused seamen of the *Pitt Packett* who were charged with piracy on the high seas. They were found not guilty by reason of self defense and thus H.M.S. *Rose* unwittingly helped to launch John Adams' career.

Late in 1774, she was sent to Newport, RI. Newport had become one of the richest cities in America by perfecting the art of smuggling, to the point where it had become the city's principal industry. Rhode Islanders had already been sent to put an end to the smuggling.

Being considerably larger than the vessels sent previously, H.M.S. *Rose* was able to reduce smuggling to zero and the resulting unemployment caused Newport to lose four-fifths of its population by mid-1775. In response, the Rhode Island General Assembly sent a bill to the Continental Congress to establish a national Navy to deal with the ship. The bill, introduced by Rhode Islander Steven Hopkins, passed on October 13, 1775, thus making H.M.S. *Rose* directly responsible for founding the American Navy.

In 1776 she sailed to New York as part of an attacking fleet of 300 vessels. She played a major part in the campaign making forays up the Hudson and East Rivers and patrolling the western end of Long Island Sound.

Her career ended at the mouth of the harbor in Savannah, GA, where she was ordered to be sunk to block the harbor from an invasion of a French fleet.

I would like to recognize the work of Kaye Williams, owner of the Captain's Cove Seaport in Bridgeport, CT. In 1984, Kaye towed a greatly deteriorated vessel into historic Black Rock Harbor. For the next 2 years he labored over the reconstruction and replacement of virtually every plank of the vessel. Thanks to his perseverance, the *Rose* replica has the distinction of being the largest wooden operational sailing vessel in the world.

I would also like to recognize the work of Richard Bailey, captain of the *Rose,* who has worked tirelessly to bring the vessel into compliance with stringent Coast Guard safety standards. He has also worked closely with my staff in bringing about this legislation.

The *Rose* has brought romance and excitement to Bridgeport since her arrival in 1984. Hundreds of students and residents of Bridgeport, as well as people from around the world, have toured the ship at dockside.

When she embarks on her voyage this summer to various ports-of-call around the country, she will be an ambassador of good will for Bridgeport and for all of Connecticut.

The text of the bill follows:

H.R. —

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That notwithstanding section 27 of Merchant Marine Act, 1920 (46 U.S.C. App. 883) and sections 12106, 12107, and 12108 of title 46, United States Code, the Secretary of the department in which the Coast Guard is operating may issue a certificate of documentation for employment in the coastwise trade of the United States, Great Lakes trade, and fisheries for the vessel Rose (United States official number 928811).

## SALUTE TO CONCERNED PARENTS FOR HEAD START, PATERSON, NJ, ON ITS 25TH ANNIVERSARY

### HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ROE. Mr. Speaker, I rise today to salute a truly outstanding organization in my Eighth District of New Jersey whose efforts on behalf of the children of the community have made the city of Paterson, the State of New Jersey and our Nation a far better place to live.

I am speaking of the Concerned Parents For Head Start, a vitally active organization which was begun in 1965 as a means of enabling parents to assure that their children were reaping the fullest benefits of the highly successful Head Start Program. The 25th anniversary of this landmark organization, and of the Head Start Program's beginnings in Paterson will be celebrated with a dinner dance on Thursday, May 24, 1990, at the Brownstone House in Paterson, NJ.

Mr. Speaker, I know this event will be a great source of pride to the many people that have made Concerned Parents For Head Start such a success, and I would like to take this opportunity to salute the leadership of executive director Cecile Dickey, policy council president Diane Addison and board of directors president Helen Van Riper. I would also like to pay tribute to the distinguished keynote speaker at this important event, Dr. Dorothy Height, national president of the National Council of Negro Women.

Mr. Speaker, as a means of sharing with you and our colleagues the rich background of this outstanding organization, I would like to insert for the RECORD the official history of the Concerned Parents for Head Start:

In the summer of 1965, Head Start in Paterson begun as a demonstration project under the sponsorship of the designated community action agency "Paterson Task Force for Community Action" utilizing federal funds. Much of the planning was done hurriedly, primarily by Volunteers, with little knowledge of purpose other than to prepare young children for entrance into public schools as part of President Lyndon Johnson's "War on Poverty". This demonstration soon developed into a full time program.

The children were mainly chosen from the easily identified depressed, overcrowded "inner cities". It soon became apparent that strong leadership was needed to ensure the accommodation of the large numbers of children that were physically, socially, and emotionally deprived; and that an eight week pe-school education was insufficient to meet the needs of the children and families.

Recognizing that if Head Start children are to reach their fullest potential there must be an opportunity for Head Start parents to influence the character of programs affecting the development of their children. The organizational structure provided this opportunity by effective parent participation in the planning and implementation of programs through participation on the Policy Council. The Council consisted of concerned community people, professional representatives and parents of the Head Start children.

The purpose of Head Start became clear; to increase opportunities for pre-school children of the poor, ages 3-5 by providing an environment in which each child has the opportunity to develop his/her full potential as a unique individual with a specific learning style. The parents and community realizing this program's merits, soon had a full day, full year program. The program in 1965 consisted of five classrooms in various rented facilities, 180 children were receiving services provided by a staff of 35. In 1970, Concerned Parents for Head Start incorporated as a not for profit tax exempt corporation. Understanding the importance of parents in the decision making process; the newly formed Board of Directors of Concerned Parents for Head Start through petition, asked the Board of Directors of Paterson Task Force to provide them with delegate agency status, giving the parents a greater opportunity to make decisions about the nature and operation of the program.

In 1973 Concerned Parents for Head Start became a delegate agency of the Paterson Task Force for Community Action. The new Governing Board immediately went about the new tasks which had now become their responsibility. Viewing and approving budgets, accounting for monies spent, making by-law changes, hiring of administrative personnel, approving personnel practices and procedures were among the decisions they were called upon to make. It was clear from

the beginning that parent involvement would become a proven technique for improving the quality of educational experience and the personal lives of the Head Start families.

In 1976 the Head Start program severed its relationship with Paterson Task Force, the Community Action Agency was experiencing financial difficulties that hampered its ability to serve the needs of the Head Start Program. During this time frame the Executive Director of Head Start moved to centralize operations; she took on the task of finding suitable quarters to house the entire Head Start Program. In 1977 Concerned Parents for Head Start became a single purpose agency for the Head Start Program in Paterson after being in competition with the Catholic Diocese of Paterson who was desirous of becoming the sponsor for the program.

In 1978 the Head Start Program moved into its present building after financing was obtained through a local banking institution, Today through several expansion initiatives the corporation is providing services to 402 children in 22 classrooms in 5 sites with a staff of 78.

Mr. Speaker, I appreciate the opportunity to present this brief profile of a truly outstanding and vital organization that has improved the quality of life of the children of Paterson, NJ, for a quarter of a century, and in so doing has made its community, State, and our Nation a better place to live, the Concerned Parents for Head Start of Paterson, NJ.

## A TRIBUTE TO THE ASHBY POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Ashby Police Department for their dedicated and outstanding service to the people of Ashby, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Ashby Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, Are you prepared to offer your life in service to your community?

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Oliver M. Mutch and those who serve in the Ashby Police Department:

Anthony Enus, Kevin Dillon, John Goubeaud, Ann Fitzgerald, Peter Violette, Leroy Schofield, and Mike Saball.

## TRANSPORTATION EMPLOYEE ALCOHOL AND DRUG TESTING ACT OF 1990

### HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. COUGHLIN. Mr. Speaker, I am delighted to be joined today by my colleague and good friend, Mr. HUGHES, to introduce critically important legislation requiring mandatory drug and alcohol testing of transportation professionals.

The Transportation Employee Alcohol and Drug Testing Act of 1990 will require testing for drug and alcohol use by the operators of aircraft, railroads, commercial motor vehicles, and mass transportation vehicles. It protects the rights of those tested by incorporating guidelines established by the Department of Health and Human Services [HHS] on laboratory accuracy, as well as protections for individual privacy.

In 1988, the Department of Transportation [DOT] issued rules—most of which became effective last December—to require drug testing of nearly 4 million transportation workers. While this is certainly a step in the right direction, our legislation will provide the DOT with the statutory authority necessary to prevent court challenges. It will also require the DOT to supplement their program with requirements for alcohol testing.

The evidence of drug and alcohol use in the transportation industry is overwhelming. In January 1987, a crash between a Conrail freight train and an Amtrak passenger train at Chase, MD, resulted in 16 fatalities and 170 injuries.

The Conrail train's engineer and brakeman subsequently testified that they had been smoking marijuana in the cab prior to the fatal accident. Since this tragedy, there has been an average of 1 railroad accident every 10 days involving drugs or alcohol.

In March, a Southeast Pennsylvania Transportation Authority [SEPTA] train crashed killing 3 people and injuring 94. Transit authorities subsequently announced that one of the motormen on the subway train tested positive for cocaine use.

A Northwest Airlines crew was recently arrested for operating a jetliner with 91 passengers on board while under the influence of alcohol. All three pilots were found to have blood alcohol levels above Federal Aviation Administration [FAA] limits. Fortunately, the aircraft landed without incident.

In February, the National Transportation Safety Board [NTSB] announced the results of a 1-year study of fatal truck crashes in eight States. The NTSB found that 33 percent of the truck drivers who were killed in these crashes were drug- or alcohol-impaired.

These threats to public safety are why the Supreme Court has found testing programs to be within the limits of the Constitution—both Federal Railroad Administration post-accident testing of railway workers and U.S. Customs Service drug testing requirements for employees seeking promotions. Moreover, the Court has let stand several appeals court rulings allowing random tests for those in safety-related positions.

The fact is that large numbers of transportation employees work in an environment with little, if any, direct supervision. A strong deterent, such as the threat of being detected and sanctioned for drug and alcohol use is, therefore, a necessity.

We rely upon the vigilance of trained employees to remain alert to occurrences that might endanger our safety. Those who drink alcohol or use illegal drugs simply have no business holding a sensitive travel or public-safety job through which they assume responsibility for innocent lives.

Mr. Chairman, the presence of alcohol and illegal drug use in the transportation industry poses far too serious a threat to ignore. Drug and alcohol testing is the only method we have to reasonably ensure that transportation professionals will not use drugs or alcohol.

The fact is that random testing works. Since the Department of Defense instituted random testing, drug use has dropped from 27.6 percent in 1980 to 4.8 percent in 1988. The Coast Guard started random testing in 1983 and has seen a drop in drug use from 10.3 percent to 2.8 percent in 1988.

Further, the public supports testing. A recent Gallup poll found that 80 percent of all Americans surveyed favored testing of those in public safety positions. Moreover, our bill will require rehabilitation programs that give employees the opportunity to come forward and get help before they are identified through testing as a drug or alcohol abuser.

While our legislation is substantially the same as S. 561, introduced by my colleagues, Senators HOLLINGS and DANFORTH, it goes beyond this Senate bill by including urban mass transit systems. The Hollings-Danforth legislation has passed the Senate nine times since it was first introduced in 1987.

Mr. Chairman, the need for this legislation is obvious and the time for action is now. Enactment of this legislation will strengthen efforts already underway in the transportation industry. The potential for disaster created by those who abuse alcohol and illegal drugs while employed in safety sensitive transportation positions mandates that we do everything we can to eliminate the cause of the threat. I urge my colleagues to consider the importance of this issue and join us in this bipartisan effort.

## WEST VIRGINIA'S MOM OF THE YEAR

### HON. ROBERT E. WISE, JR.

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. WISE. Mr. Speaker, I rise today to pay tribute to the winner of West Virginia's MOM of the Year Award. Mary Niebauer Hacala of Charleston, WV, is indeed a remarkable woman. Mary Hacala was born on a farm in Pennsylvania, but has spent the last 55 years of her rich life in West Virginia. There she bore and raised her five sons and took care of her totally disabled husband, while teaching school to supplement the small disability checks. After a long illness, her husband died

in 1957. Despite this tragic loss she raised her five sons sending them all to complete university degrees. These men are all now successful; one a lawyer, one the president of a company, the third an engineer, the fourth a Jesuit priest serving the poor in the Appalachian region, and the fifth the owner of his own business.

Mary Hacala, who turned 80 today, has officially retired from teaching, but she continues to tutor any child in need of basic skills. Despite her aging years she continues to serve her community and family. Her sons words in his letter to the International MOM Foundation best describe her, "She is a classic symbol of the ideal, hard working, long suffering, ever loving and generous Mountaineer West Virginia Mother."

Congratulations and happy birthday Mary Hacala.

## UNITED BLACK FUND CONTINUES TO MEET THE UNMET NEEDS

### HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. DELLUMS. Mr. Speaker, it is with great pleasure that I bring to the attention of my colleagues the continuing contributions of the United Black Fund.

As the final decade of the 1990's unfolds before us, I wish to extend my continued support of the United Black Fund, Inc., on the occasion of its 18th Annual Victory Luncheon, which celebrates the successful United Black Fund/United Way Partnership Campaign of 1989.

The unprecedented growth of the United Black Fund, Inc., from 3 agencies in 1970 to its present 60-member agencies warrants great praise. The leadership of the UBF in the Nation's Capital and its development of the International United Black Fund gives us hope for the future.

With the resurgence of racism and the brutal attacks on our citizens and the constant battle we face against drugs and the violence it causes in our communities, the strong influence of the United Black Fund, Inc., is necessary to combat these and other evils.

I believe that education is the key we must use to reshape our world for a better future for our children and grandchildren. The District of Columbia as the Nation's capital must be the example for the rest of the country; it is the starting point for our positive actions to mold and reshape the minds of the leaders in the 21st century.

The presence of the 60 United Black Fund agencies throughout the Metropolitan Washington, DC area are indeed a reassurance to the community that the United Black Fund, Inc., will continue to meet the unmet needs.

## A SALUTE TO THE AMERICAN FLAG

### HON. ELTON GALLEGLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday May 16, 1990*

Mr. GALLEGLY. Mr. Speaker, I rise today to honor one of my constituents, Ruby Mae Ramsey of Thousand Oaks, CA. Like millions of Americans, she was outraged by the actions of that tiny minority who feel called upon to desecrate our American flag, and by the judges who allow such actions to continue.

She has written a poem that I would like to share with my colleagues, and with all Americans. I would like to thank her for sending it to me. It reads as follows:

Not too many years ago,
When I was a child in school,
Our flag was raised with honor,
And a most important rule:
Never should it touch the ground,
But handled with utmost care.
One could sense the reverence,
As we all assembled there.

Now it seems that it's all right,
To burn what men have died for.
Has "The Star Spangled Banner,"
Lost everything it stand for?
Americans were silent,
No fuss, no criticism,
When rendered the highest court,
Its terrible decision.

I call it desecration!
They can call it what they will.
Has "Old Glory" lost its honor?
Does it stir within you still?
The emblem of our country,
Considered just an old rag!
A nation without honor!
A country without a flag!

Mr. Speaker, Ruby Mae Ramsey speaks eloquently for me, and I'm sure for many of our colleagues. The time is long overdue that Old Glory is once again preserved and protected.

## WE REMEMBER BUBBY

### HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. PAYNE of New Jersey. Mr. Speaker, Cecil Earl Davis, known to friends and loved ones as "Bubby," passed away on Monday, April 30, 1990, at the VA Medical Center in East Orange, NJ. I grew up with Bubby and his wife, Barbara, in a section of Newark, NJ, called North Newark.

I remember him as a person with a strong sense of right and wrong. His family would say he believed he was usually right and every one else was wrong. He loved to "do battle"—whether as a young Golden Gloves champion, or with friends or radio and TV talk show hosts about some burning issue of the day.

At his memorial service on May 4, his cousin remembered him as one who would do what was right. She recounted how in 1947, a restaurant in a nearby New Jersey community was believed to be discriminating against blacks. His cousin, a student at the local college, asked him to accompany her to the restaurant to be served. He did and they were.

His wife was caucasian. And they married at a time—1948—when interracial marriages were almost unheard of. He was not oblivious to racial bias but he did not let people's prejudices affect his family. He commanded respect and it enabled him, his wife, and three daughters to go anywhere and to do anything.

Bubby was guided by the principle of doing what is right and tried fiercely to live his life that way.

Cecil E. Davis lived his life with dignity. He was a talented man who, because of the color of his skin, realized on the smallest of his great dreams. Yet, he never let go of those dreams.

The following obituary was prepared by the family for his memorial service:

Cecil Earl Davis was born in Newark, New Jersey on April 2, 1927 to the late Celestine and Arthur Davis. He succumbed to a lengthy illness on Monday, April 30, 1990 at the Veterans Medical Center in East Orange, New Jersey.

Cecil attended the Newark Public Schools and while still a very young man became interested in the art of boxing. He scored several one round knockouts and became a Golden Gloves Champion. He was encouraged to become a professional fighter because of his success in the ring and he later spent many hours following the careers of Joe Louis, his idol, and other famous fighters.

At the age of seventeen, Cecil joined the United States Navy where he served for eleven years. After a brief spell as a civilian entrepreneur he returned to military service by joining the United States Air Force. It was here that he gained expertise in aircraft engine maintenance. He retired as a Sergeant after a total of twenty-one years in the military. After retirement, he was, for a time, co-owner of the Davis and Copeland General Tire Company of Newark, New Jersey.

Cecil had many interests. He loved to dance and to socialize, especially with friends in the Old North Newark Club. He would pick out favorite tunes on the piano or put together his own love song. His mind was always active, inventing or creating something of his very own. He concerned himself with world issues and the plight of the oppressed. He was an articulate spokesman for his strong beliefs. He loved to dine in fine restaurants and to share the good life with those he loved.

He leaves to mourn his loss and to cherish his memory, a devoted wife, Barbara; three daughters, Ivy Lynn Davis, Marianne Davis Lowe, April Donna Lewis; two granddaughters, Kyndra and Kelli Lewis; one grandson, Amir Lowe and many other relatives and friends.

## A TRIBUTE TO THE ASHBURNHAM POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Ashburnham Police Department

for the dedicated and outstanding service to the people of Ashburnham, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These "others" are the brave officers of the Ashburnham Police Department—the public servants on the front line who enforce the laws we create. These men and women ensure that we remain a Nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Ronald Laplante and those who serve in the Ashburnham Police Department:

Robert Brennan, Ronald Savoy, Kevin Ahearn, Jeffery Shampine, John Doucette, Robert Harrington, Ralph Harrington, Peter Violette, Roberto Trujillo, and Travis Rixford.

## LET'S BALANCE THE BUDGET

### HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ANDERSON. Mr. Speaker, in 1986, at the 27th Soviet Party Congress, then General Secretary Gorbachev told his fellow Communist Party members: "Comrades, we have failed." Today, I have the same message for my fellow American legislators of both parties: Congress, we have failed. We have failed in our duty to balance the Federal budget.

Make no mistake about it, the current budget deficit is the greatest problem America faces today. Many call it a challenge. I do not consider keeping our country's financial house in order a challenge, it is a responsibility. We in Congress are responsible for two things, passing laws and passing out Federal funds. Judging by the amount of "Dear Colleagues" piling up on my desk, we are adept at the former, but judging by the deficit we are racking up for the 10th year in a row, we are inept at the latter. I find it hard to believe that as the elected leaders of this country we are unable to do two things at once, especially when given an entire year to do so.

The Federal deficit is the worst enemy of American business today. Compared to the distortion of the financial services market we are causing by massive government borrowing, the structural impediments to American exports in Japan we are always ranting about from this podium are peanuts. Foreign competition is a pushover compared to the unassailable competition for capital posed by the Treasury Department. Higher interest rates hurt the ability of U.S. corporations to obtain the financing they need to invest in research and development, which in turn increases the competitive advantage of foreign corporations. Higher interest rates also keep the dollar at an artificially high level on foreign exchange markets, making it more difficult for American exporters to sell their products overseas and lowering the price of imported goods. Together, these two results of higher interest rates raise the trade deficit and the amount of dollars we send to foreign countries. The very countries which benefit the most from this deficit enhanced imbalance of trade, including Japan, Korea, and West Germany, are only too happy to lend us our own money back to finance our irresponsible deficit. The price of the loan? You guessed it: More hard earned American dollars, in the form of interest on U.S. Treasury bonds. This adds even further to the exodus of dollars from our economy. Some of these dollars are then used by the Japanese and others to buy up American corporations, which increases their foreign competitive advantage, their share of our markets, and the trade deficit. This contributes to foreign financing of the budget deficit, which leads to higher interest rates, and starts the whole cycle going again, causing more and more money to be lost from our economy.

The end results of all this are higher taxes and prices and less jobs for working Americans, who in the end are the ones who wind up paying for our irresponsibility. Isn't it amazing how so often when there is an expensive debacle in this country, no matter who gets blamed in the press or thrown in jail by the courts, whether it's the *Exxon Valdez* oilspill or the savings and loan bailout, the people who end up being punished the most are the innocent American taxpayers. These are the people who have to foot the bill to pay for the solutions to these catastrophies. These are also the people who elected us to office to protect them from just such exigencies as these. The Pledge of Allegiance ends with: "and justice for all." I do not feel Congress is being just with the American taxpayer.

Allowing our economy to be managed like this is an outrage, and it is own our fault. We are draining our country of its lifeblood, the capital needed to start up new businesses, to give substance to entrepreneurial ideas, to give our young people jobs and the opportunity to pursue the American dream. Higher costs of capital in the form of higher interest rates mean higher costs for everything, from healthcare to housing. In my southern California district the average cost of a home is well beyond the reach of the typical working family. I am proud to say that I am currently supporting legislation to extend aid to first time home buyers through the Mortgage Revenue Bond Program, to help them finance the most important basic investment they will ever make. Unfortunately, I cannot give them help in the form they need it most—in the form of lower housing costs and lower interest rates, until we can lower the deficit. Working Americans are the people whom we hurt the most with our fiscal irresponsibility.

The next time someone loses a job to foreign competition in this country, we should not blame the Japanese, we should blame ourselves. We are all Members of Congress, the branch of government tasked by the Constitution with the responsibility of managing the country's finances. It is high time that we here in Congress lived up to our collective responsibility as the elected representatives of the United States of America, the greatest Nation ever to exist on the face of the Earth. Don't expect the President to provide the necessary leadership without any initiative from Congress. We cannot continue to do nothing and pray for the best. The Lord helps those who help themselves. America deserves better than it's getting, from the President and from us. Just because the President may not be doing his job does not mean that we have an excuse not to do ours. Balancing the budget may be tough, but it is our job. Let's do our job. Let's do the right thing by the people who trusted us enough to elect us to Congress. Let's balance the budget.

## THE 60TH ANNIVERSARY FOR HACKENSACK YWCA

### HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. TORRICELLI. Mr. Speaker, it is with great respect and admiration that I address my colleagues in the House today, for I rise to extend my heartiest congratulations and warmest best wishes to the YWCA of Hackensack on the occasion of its 60th anniversary.

The YMCA offers a wide variety of services and programs for the entire community. In September 1966, the first Small Fry Club (nursery school) began in the YWCA gym, for the pre-schoolers whose mothers were in the building, taking classes or swimming. In 1969, the Small Fry Club moved to the First Presbyterian Church in Hackensack, and mothers were no longer required to be at the YWCA during the sessions. Today the YWCA has 16 Small Fry classes including Parent/Tot and Just Me Programs in 6 sites in Bergen County, serving over 250 children per year.

In 1970 the Room Registry Service and Second Start Jail Program were begun. The Room Registry Service matches single working women with homeowners who have rooms to rent in their homes. During 1989, the YWCA served 207 clients, both roomers and homeowners, and 51 cooperative living arrangements were made. SSJP began by teaching grooming and Yoga to women in the jail annex teaching office skills and GED preparation to male and female inmates.

The YWCA instituted Post-Mastectomy Program in October 1976 which was comprised of exercise, swim, and discussion, in cooperation with the National Council of Jewish Women, greater Teaneck section. This continuing program has helped many women recover physically and emotionally from the effects of breast surgery.

A country-wide rape intervention program (S.E.R.V.E.) was sponsored by the YWCA in December 1979 which includes a 24 hour hotline, training for professionals, brochures describing programs and services, and booklets on Risk Reduction, Recovery, and Campus Date and Acquaintance Rape.

For all the 60 years of its existence, the YWCA has offered leisure-time and educational activities for adults. YWCA members have

always been active in the community, serving on boards and planning groups which advocate for the needs of women and families. I am certain that this outstanding organization will continue to work to provide quality services to those in need.

Mr. Speaker I am proud to join in paying tribute to this exceptional group and extend my best wishes to them on their 60th anniversary.

## THE FRANK R. HOWARD MEMORIAL HOSPITAL AUXILIARY MEMBERS SILVER ANNIVERSARY

### HON. DOUGLAS H. BOSCO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. BOSCO. Mr. Speaker, I would like to take this opportunity to congratulate and commend the hardworking auxiliary members of the Frank R. Howard Memorial Hospital on the occasion of their silver anniversary.

The auxiliary members have been serving the patients and staff of this hospital since 1965. This long-term commitment to the town of Willits and surrounding areas demonstrates the dedication of the auxiliary members to their community in the spirit of voluntarism.

Each day volunteers set out to make contributions and to make a difference in the lives of others. Hospital volunteers are not only some of the most important, but some of the finest I have seen. Whether they hold a hand, visit newborns and lonely patients, deliver flowers and gifts, raise money to improve areas of the hospital, or work in the gift shop, these volunteers strive to improve the stay of each and every patient in the hospital. When that patient is a loved one or friend, one appreciates the dedication of the volunteers that much more.

Willits is truly fortunate to have the benefit of the devoted Howard Memorial auxiliary members. I am sure that the entire community joins me in congratulating and commending these fine people.

## ZAIRE: IN THE FOOTSTEPS OF EASTERN EUROPE?

### HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. DREIER of California. Mr. Speaker, last month President Mobutu Sese Seko of Zaire announced a series of sweeping reforms designed to improve the political climate in his country.

In an address to his people, Mobutu dissolved Zaire's only political party, the MPR, and lifted a 20-year ban on opposition parties, effectively ending his government's monopoly of power. In addition, Mobutu called for the drafting of a new constitution, one which would create a balanced system of judicial, legislative, and executive branches.

A new Prime Minister, Lunda Balalu, has been named and put in charge of heading a transitional government and appointing new ministers. National elections are tentatively scheduled for April 1991.

Zaire has made progress in other areas as well. Last year, the United Nations Human Rights Commission cited Zaire as one of the countries which had substantially improved its human rights situation. At the same time, the World Bank cited Zaire as 1 of the 10 most improved economies in the world. Certainly, the people of Zaire have much to look forward to in future years.

While I recognize that much has yet to be accomplished, we must at least acknowledge that Zaire has committed itself to making progress on human rights, civil rights, and economic rights. I hope that together we can work with Zaire to help them in their transition to democracy.

## ADRIEN BLOCK INTERMEDIATE SCHOOL

### HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. SCHEUER. Mr. Speaker, I rise today in recognition of the 20th anniversary of the Adrien Block Intermediate School in Flushing, Queens—one of the finest junior high schools in the city of New York.

In its 20-year history, the Adrien Block Intermediate School has consistently ranked among New York City's top public schools in terms of student reading and mathematics achievement. That its students excel in these and other academic areas is a testament to its dedicated, professional teachers and support personnel, as well as to the youngsters themselves, and to their parents who have obviously instilled in them the vital importance of education.

But high academic standards and test scores only tell part of the story. The Adrien Block Intermediate School's approximately 1,100 students come from a wide array of ethnic backgrounds. This diversity enhances and enriches the educational process, as youngsters exposed to a variety of cultures at an early age develop a heightened understanding and appreciation for the cultural moasic that has made America the world leader it is today. In this increasingly interdependent world of ours, the importance of fostering racial harmony and global understanding through interaction among peoples of various ethnic and socioeconomic backgrounds cannot be emphasized enough.

I salute the Adrien Block Intermediate School community for its ongoing commitment to fostering school and home environments in which our young prople are encouraged to learn, to interact with one another, and to strive to attain their highest goals.

## A TRIBUTE TO THE DUNSTABLE POLICE DEPARTMENT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ATKINS. Mr. Speaker, I rise today on the occasion of National Police Week to pay tribute to the Dunstable Police Department for their dedicated and outstanding service to the people of Dunstable, MA, in the protection of life, liberty, and property.

Each day the newspapers are full of stories of violence and lawbreaking which others have to resolve. These others are the brave officers of the Dunstable Police Department—the public servants on the front line who enforce the laws that we create. These men and women ensure that we remain a Nation ruled by law and order; that our neighborhoods are not held hostage to the threats of criminals; and that justice is served.

Our country is a better place for the professionalism of these police officers who have offered their lives to serve the common belief that justice is an inherent right. How many of us can answer so courageously the question, "Are you prepared to offer your life in service to your community?"

Too often, we wait until it is too late, until some brave officer is struck down, to say thanks for a job well done. Let us take this time to recognize the contributions of Chief Kenneth W. Tkachuk and those who serve in the Dunstable Police Department:

James Downes III, James Dow, George Aggott, Frank Quattrochi, David Galvin, Ryan Lamarre, Michael Palumbo, Gerald Simmons.

## RESTORE FAIR TREATMENT FOR TROPICAL FRUIT GROWERS

### HON. PATRICIA F. SAIKI

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mrs. SAIKI. Mr. Speaker, I am introducing legislation today to restore the annual accrual method of accounting for those taxpayers—specifically pineapple and banana growers—who, along with sugarcane growers, had properly used this accounting method for up to 30 years before its use was restricted 2 years ago by an amendment in the Technical and Miscellaneous Revenue Act of 1988. The legislation will reinstate this sensible method of accounting which was developed in the early fifties to address particular problems encountered by taxpayers who grow certain tropical crops with long preproductive periods.

Two of the larger industries in the State of Hawaii are the pineapple and the sugarcane industries.

The production of pineapples and sugarcane in Hawaii is significantly different from the production of what most people consider to be traditional farming crops. First, tropical crops are subject to volatile price fluctuations, the uncertainties of the weather and storms in

the tropics, and tropical pests and diseases. Second, the growth cycle of certain tropical crops is significantly longer than that of the grain and vegetable crops which most often come to mind when we speak of farming activities. For example, the normal cycle for pineapple production is 4 years. A first crop is harvested 18 to 20 months after planting. A second crop is harvested 12 to 14 months later. Sometimes a third crop is harvested another 12 to 14 months later, but, in most instances, the fields lie fallow for the duration of the cycle.

The Internal Revenue Code generally requires farming companies to compute their income on an accrual basis. Specifically, revenues and expenses are recognized on an accrual basis, and the costs incurred in growing crops must be capitalized. However, capitalizing these growing costs causes two significant accounting problems for our pineapple and sugarcane farmers whose preproduction cycle is so drawn out. First, putting preproductive period expenses on the balance sheet means that a taxpayer would have an asset on its books that might never be realized due to tropical storms, pests, and diseases. Recording an asset on the balance sheet that might never be realized is not only contrary to standard accounting practices, but it is also misleading to lenders and to shareholders. Second, capitalization of preproductive period expenses distorts a grower's income statement since it does not result in a proper matching of revenue and expense.

In the early fifties, it was determined that growers of these particular tropical crops needed a change in accounting methods in order to compute a more realistic balance sheet and to avoid a distortion of income. Upon the advice of a national accounting firm, and with the consent of the Internal Revenue Service, these taxpayers changed to the annual accrual accounting method for financial and tax purposes. Under the annual accrual method, the preproductive period costs of growing crops are charged to current period expense rather than capitalized. This removed the questionable asset of preproductive period expenses from the balance sheet and allowed for annual matching of costs and revenues at comparable price levels.

The annual accrual method was used successfully by Hawaiian pineapple and sugarcane growers for more than 30 years. Although the commercial banana industry does not operate in our State, I understand that major growers of bananas have also used this method for the same reasons since the 1950's. Not only was the annual accrual method used with Internal Revenue Service approval, but the method was codified in section 447(g) of the Internal Revenue Code by Congress in 1976.

When the uniform capitalization rules of code section 263A were enacted in the Tax Reform Act of 1986, the history of the legislation clearly stated that taxpayers properly using the annual accrual method would be allowed to continue to use that method. It therefore came as a surprise to our pineapple growers—and to banana growers—when the Joint Committee on Taxation's Blue Book explanation of the 1986 Tax Reform Act stated that Congress intended that only sugarcane growers be allowed to continue using that method. A technical amendment to that effect was subsequently enacted in the Technical and Miscellaneous Revenue Act of 1988.

I understand that there has been some speculation that the 1988 amendment was enacted to prevent a potential slippery slope problem. With the enactment of uniform capitalization rules and the repeal of certain other specialized accounting rules, it was feared that some new taxpayers would attempt to apply the annual accrual method to crops other than those to which the method had been applied for many years. Unfortunately, in an attempt to prohibit such an expansion of the method, the 1988 technical amendment listed sugarcane as the only tropical crop to which the annual accrual method could be applied. It appears in retrospect, however, that the feared abuse would not have been possible under the original language of the 1986 Act, so the technical amendment was not necessary. Nonetheless, the 1988 amendment continues to discriminate against the pineapple and banana growers who had properly used the method prior to 1986.

During my business career, I became familiar with the annual accrual method. I know that forcing pineapple growers off their sensible and historical method of accounting would be economically devastating for Hawaiian pineapple producers which are already competing with low-cost producers in other countries. It would cause severe repercussions in the Hawaiian economy, without any apparent justification. It is our responsibility in Congress to repeal legislation when it has fulfilled its purpose or when it has proven unworkable or unmerited. In this particular case, an error was made, and we need to correct the situation by restoring the annual accrual method of accounting for pineapple and banana growers.

## A TRIBUTE TO WILLIAM R. FREDENBERG, A NATIVE AMERICAN VETERAN OF THREE WARS

### HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. ROTH. Mr. Speaker, I would like to take this opportunity today to honor a true American hero, Mr. William R. Fredenberg, on the occasion of "William R. Fredenberg Week" in Menominee, WI.

Bill Fredenberg's story is the kind that you might find in a book about young men who go abroad to serve their country, make their country and community proud, and return to a hero's welcome. His actions remind me of a remark Harry Truman once made while commending the soldiers who fought in World War II. President Truman said, "We do not go to war for gain or for territory; we go to war for principles, and we produce men like these."

Bill Fredenberg's service to his country and its principles during one war is extraordinary. But what is truly exceptional about Bill Fredenberg is that he served his country in remarkable fashion not once, but three times.

In 1944, 11 days after D-Day, the Allied Forces were established on the European Continent. The fighting was fierce and resistance was greater than anticipated.

Providing air cover for our troops fighting the ground war was Major Fredenberg of the U.S. Air Force. Piloting a P–47 Thunderbolt, he completed 36 daring missions, strafing enemy targets, destroying enemy supply depots, and disrupting Nazi reinforcements. During his 37th mission, he was shot down by heavy enemy ground fire while attacking an enemy-held rail yard in France.

After surviving a fiery crash, he was taken prisoner by the German Army. At this point, the war for most Allied pilots ended in a POW camp. But not so for Bill Fredenberg. He escaped from a POW train in Tours, France, leading 13 of his fellow prisoners to freedom.

Unable to achieve a quick repatriation, he joined the Free French underground operating in Nazi-occupied France. He was liberated by the advancing Allied Forces in September 1944, after nearly 4 months behind enemy lines.

Major Fredenberg won the Distinguished Flying Cross for his bravery on the strafing mission and earned the admiration of all who were with the Allied cause as he helped the resistance in France.

He was discharged in 1945 following the end of the war and he returned as a hero to his home in Wisconsin.

But soon, the United States found itself engaged in the Korean war and Major Fredenberg once again joined the fight. In 1951 he was recommissioned and stationed with the 40th Fighter Squadron in Japan.

Here, he traded in the old P–47 Thunderbolt for the new jets that now roamed the skies. He chased Migs down Mig Alley and gave ground support to desperate troops fighting against overwhelming odds.

At the conclusion of the Korean campaign, he continued to serve his country as an air training command pilot from 1953 to 1960.

Then another conflict, this one in Vietnam, demanded his service and, with the rank of captain, Bill Fredenberg again answered the call.

While flying an AC–47 gunship, Captain Fredenberg earned his second Distinguished Flying Cross at a battle near Pleiku.

Again, in the role of flying support for vastly outnumbered ground forces, Captain Fredenberg attacked a large enemy force that had surrounded the allied forces. With complete disregard for the low-ceiling, poor visibility and heavy surface-to-air, Captain Fredenberg circled the battle zone for 1½ hours of continuous combat until the enemy had been turned back.

If there is any doubt about the heroism of this brave American, let me erase it by recounting the ways his country thanked him for his service. Captain Fredenberg is the recipient of the following awards:

Two Distinguished Flying Crosses with oak clusters; the Air Medal with 1st through 14th oak clusters; European Air Medal with three battle stars; Korean Service Medal; United Nations Service Medal; POW medal; American Defense Medal; Japan Occupation Medal; Vietnam Service Medal; Air Force Outstanding

Unit Award; Air Force Longevity Service Award; and Armed Forces Reserve Medal.

On the field of battle, Bill Fredenberg's uncommon valor was an uncommon virtue.

In a Normandy chapel, near the place where Bill earned his first Distinguished Flying Cross, an inscription reads, "These endured all and gave all that justice among nations might prevail and that mankind might enjoy freedom and inherit peace."

Bill Fredenberg endured three wars so that freedom and peace might prevail.

## WILLIAM E. MARTIN, REV. LAWRENCE J. MILLER, REV. THOMAS F. OLSEN, AND JOSEPH A. WARD INDUCTED INTO HUDSON COUNTY CYO HALL OF FAME

### HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, May 16, 1990*

Mr. GUARINI. Mr. Speaker, an outstanding organization serving the needs of the youth in my district recently celebrated its 50th anniversary. Ceremonies commemorating the last 50 years of achievement were conducted by Archbishop Theodore McCarrick of the Archidiocese of Newark.

Friday, May 18, 1990 marks the date when the Hudson County Catholic Youth Organization [CYO] hosts its annual awards night dinner, announced Thomas Hart, chairman of the dinner committee. This dinner celebrates the hundreds of volunteers who generously give of their time and talent so that CYO programs may continue to serve the young people of Hudson County.

Since 1940–41, the CYO has provided countless programs designed to develop children spiritually, intellectually, socially, culturally, and physically. The success of the CYO is evident every day in people who have grown from CYO roots to take their place in the world. CYO children have grown to become doctors, lawyers, teachers, government leaders, and in every case productive members of society.

In addition to honoring its myriad of volunteers at the awards night dinner, the CYO also inducts members into its hall of fame. This year, the CYO will so honor four men who have a combined total of more than 120 years service to our community: William E. Martin, Reverend Lawrence J. Miller, Reverend Thomas F. Olsen, and Joseph A. Ward.

WILLIAM E. MARTIN

Born and raised in Jersey City, Bill was educated at St. John's Grammar School and St. Aloysius High School. He continued his education at Kansas State University and at the Fordham School of Social Work. He has served as a faculty member at St. Al's High School, St. James High School in Newark, and at Washington & Lee University. Bill served as the director of social services and morale for the more than 30,000 troops at Camp Crowder, MO, immediately prior to his assumption of the director's duties at the CYO.

Under the direction of Bill Martin, the CYO flourished and developed many new and long-lasting programs. He created the foundation for a day camp program that now serves in excess of 1,000 youngsters at three different locales. As a result of this program, many of today's adults, young and old, recount the events of many of their happiest and most memorable summers at this camp. As athletic director, Bill instituted and supervised more than 224 basketball leagues and countless more baseball, track and field, and swimming programs. He was appointed National Biddy Basketball Deputy Commissioner and was a significant force in establishing the national program.

Bill served as the head of the Hudson County United Way, developing this fledgling office from its infancy into one of the most successful and catalytic agencies in United Way annals. Not only has he served 19 United Way presidents during his more than 30 year tenure, but he has also served as a visible role model for the community, which has benefitted greatly from his leadership, vision and guidance. He has been a representative for the United Way throughout the world spanning from the United Kingdom to Beijing, The People's Republic of China—where he served as a United Way Ambassador. Truly, Bill Martin is a shining example of brotherhood and all that is great about the American spirit and people.

REV. LAWRENCE J. MILLER

Born in the Bronx, New York, "Larry" Miller spent a number of years as research chemist after leaving Fordham University prior to being ordained a Catholic priest on May 31, 1969.

Assigned to Our Lady of Mercy Parish in Jersey City in June 1969, he moved immediately to establish a number of youth sports leagues in his area. This included Jersey City's first hockey league. His efforts and development of the Pee Wee Basketball programs have taught children not only basketball and competitiveness, but team spirit as well. Duke University's outstanding point guard Bobby Hurley is only one of the many young people who has benefited from these programs. In addition to basketball, numerous other programs were instituted. This list includes track and field, girls' softball, flag football, and cheerleading programs initiated under the auspices of Larry Miller's supervision.

Under Father Miller's direction, the Hudson County CYO was resurrected from the slough of the urban dilemma which marked the decade of the 1970's into an effective organization serving the needs and development of our youth in the 1980's and beyond.

In 1987, much to the sorrow of Hudson County residents, Father Miller was transferred to the Immaculate Heart of Mary parish in Scotch Plains. But it was with great joy that Hudson County welcomed him back upon his recent appointment as pastor to the St. Mary Star of the Sea Church in Bayonne.

REV. THOMAS F. OLSEN

There are thousands of people who are better human beings and share pleasant memories for having experienced Father Olsen's leadership and example. Father Olsen has been a two-time, two-term director of the Hudson County CYO.

Ordained in 1953, Father Olsen was assigned to Our Lady of Mount Virgin in Garfield where he served as CYO and Holy Name Society moderator. In addition, he served the Altar Boys, the Travel Club, and the Children of Mary and Drama Club.

In 1968, Father Olsen was transferred to Assumption/All Saints Parish in Jersey City. He brought with him a fresh, new vitality and energy to the parish and was named CYO director in 1970. In 1976, he was named pastor of the parish and served as such until he was named the pastor of St. Paul of the Cross Parish. Once again, Father Olsen provided outstanding leadership and guidance to his parishoners. In 1988, he was appointed to his second term as CYO director.

When the archdiocese of Newark purchased the former Boystown complex in Kearny, they began a process of renovation designed to transform these premises into the Archdiocesan Youth Center. I am confident that Reverend Olsen, the center's director, will continue to build on his career of achievement with honor and distinction.

JOSEPH A. WARD

Joe has already been a creative individual and an innovator. His CYO and youth activity began while serving at St. Henry's Parish in Bayonne as its athletic director. This led to his ascension to the directorship of the CYO. While at St. Henry's, Joe led his teams to city and county championships, as well as an archdiocesan title. In addition to these accomplishments, Joe is also remembered for the following achievements. He was a catalyst for the Bayonne CYO "Big Five"—a noted semi-professional team which competed throughout the metropolitan area. He was also a charter member of the Hudson County Semi-Pro League. It was in 1957 that he served as director of the CYO and it was there that he introduced the Little Guys Program—which went immediately to Highwood, Illinois enroute to winning the National Tournment.

In 1958, Joe began the first area tackle-football league. It included players from five parishes. Local individuals serving beneath Joe, such as Tony Nocera, Mike Filosa, Ike Venutolo, and the late Jack McCoy all benefitted greatly by witnessing and experiencing, firsthand, the great breadth of Joe's talent and example.

Additionally, Joe worked closely with the National Cheerleading Association and was instrumental in establishing a host of local clinics. In 1960, Joe coordinated the largest fundraising event in Hudson County: The National High School All-America Game, played at Roosevelt Stadium. John Thompson, Paul Silas, Connie Hawkins, and Danny Waddleton were among the number of players who helped raise more than $35,000 for charitable functions at this event.

Joe Ward represents the quite determination, industriousness, and perseverance which, when combined, are the bedrock of excellence and achievement.

We are all proud of him.

In the 50 years of its existence—one-half century of work, achievement, and success—the Hudson County CYO has served millions of people throughout the county. It has been a sponsor of numerous athletic programs, in-

cluding basketball teams and leagues for a number of years. Hence, it is with great pleasure that at this, the 50th Annual Awards Night Dinner, we will open the doors to the newly created Hudson County CYO Basketball Hall of Fame.

The first inductees will be: George Blaney, James Boylan, Edward Lawson, Vincent Ernst, Charles "Mandy" Johnson, Robert Hurley, Sr., Robert Hurley, Jr., David Rivers, Michael O'Koren, and James Spanarkel.

The aforementioned people represent the very best virtues and qualities that the CYO and, indeed, America strives for. All are exemplary for the effort and energy expended in the service of their fellow man, but their greatest accomplishments are in the lives they lead—lives of contribution to society augmented by the pursuit of moral, intellectual, and physical excellence.

I am certain that my colleagues here in the House of Representatives wish to join me in a salute to the CYO and the recipients of these distinguished awards.

## SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, May 17, 1990, may be found in the Daily Digest of today's RECORD.

## MEETINGS SCHEDULED

### MAY 18

8:30 a.m.
Agriculture, Nutrition, and Forestry
Business meeting, to continue consideration of proposed legislation to strengthen and improve U.S. agricultural programs.
SR-332

9:30 a.m.
Environment and Public Works
Superfund, Ocean and Water Protection Subcommittee
Business meeting, to mark up S. 203, to authorize research into ground water contamination and to authorize the EPA Administrator to assist State and local governments in ground water protection strategies; to be followed by a hearing on S. 1697, to require local educational agencies to conduct testing for radon contamination in schools.
SD-406

Finance
Medicare and Long-Term Care Subcommittee
To hold hearings on recommendations for the Medicare Volume Performance Standards (MVPS) for fiscal year 1991, which is the rate of growth in spending for physician services reimbursed by the Medicare program.
SD-215

Veterans' Affairs
To hold hearings on titles I and III of S. 2100, Veterans Compensation Cost-of-Living Adjustment Act, S. 1887, to allow for Kentucky Vietnam veterans to receive a one-time bonus from the Commonwealth, S. 2454, Veterans Programs Improvement Act, S. 2482, to clarify the eligibility of certain minors for burial in national cemeteries, S. 2102, to modify certain congressional reporting requirements of the Secretary of Veterans Affairs, S. 2556, Radiation Exposed Veterans Compensation Amendments, S. 2499, to limit the amount of funds held by fiduciaries of incompetent veterans subject to inheritance by nondependent heirs, S. 2485, to authorize the Secretary of Veterans Affairs to provide financial assistance for the operation and maintenance of State veterans cemeteries, and proposed legislation to expand radiation presumptions for veterans.
SR-418

Special on Aging
To hold hearings to examine service delivery problems at the Social Security Administration.
SD-628

10:00 a.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Office of Surface Mining, Department of the Interior.
S-128, Capitol

Banking, Housing, and Urban Affairs
To hold hearings on proposed money laundering legislation, including S. 2327 and H.R. 3848, to authorize Federal depository institution regulatory agencies to revoke charters, terminate deposit insurance, and remove or suspend officers and directors of depository institutions involved in money laundering.
SD-538

Labor and Human Resources
To resume hearings on S. 2114, to promote excellence in American mathematics, science, and engineering education.
SD-430

### MAY 21

1:00 p.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Department of the Interior and related agencies.
S-128, Capitol

Select on Indian Affairs
To hold hearings on the nomination of Carl J. Kunasek, of Arizona, to be Commissioner on the Navajo and Hopi Relocation.
SR-485

2:00 p.m.
Armed Services
Defense Industry and Technology Subcommittee
To hold hearings on S. 2171, authorizing funds for fiscal year 1991 military functions of the Department of Defense and to prescribe military personnel levels for fiscal year 1991, focusing on Department of Defense laboratory management.
SR-222

### MAY 22

MAY 23

10:00 a.m.
Foreign Relations
To hold hearings to review U.S. policy toward Iraq, focusing on human rights, weapons proliferation and international law.
SD-419

# HOUSE OF REPRESENTATIVES—Thursday, May 17, 1990

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Gracious God, help us to take heart and gain purpose from the moral standards of our history. From the commandments of Moses to the traditions of our own families we have received direction to how life should be lived and the values that we ought hold dear. Give us, O God, a greater appreciation and allegiance for the ideas and values that have shaped our consciences, so that we may live in our time with harmony and peace. In Your name we pray. Amen.

## THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. HASTERT. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. HASTERT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 285, nays 103, not voting 44, as follows:

[Roll No. 112]

□ 1023

So the Journal was approved.

The result of the vote was announced as above recorded.

## PLEDGE OF ALLEGIANCE

The SPEAKER. The gentleman from Tennessee [Mr. GORDON] will please come forward and lead the House in the Pledge of Allegiance.

Mr. GORDON led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

## MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 87. Concurrent resolution concerning Iranian persecution of the Baha'is.

The message also announced that the Senate had passed a joint resolution of the following title, in which

the concurrence of the Hosue is requested.

S.J. Res. 264. Joint resolution to commemorate the 50th anniversary of the National Sheriffs' Association.

## ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. By previous announcement, the Chair will not receive 1-minute requests.

## PROVIDING FOR CONSIDERATION OF H.R. 2273, AMERICANS WITH DISABILITIES ACT OF 1990

Mr. GORDON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 394 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 394

*Resolved*, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2273) to establish a clear and comprehensive prohibition of discrimination on the basis of disability, and the first reading of the bill shall be dispensed with. All points of order against consideration of the bill are hereby waived. After general debate, which shall be confined to the bill and the amendments made in order by this resolution and which shall not exceed two hours, with thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, with thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Energy and Commerce, with thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation, and with thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be considered for amendment under the five-minute rule. In lieu of the amendments now printed in the bill, it shall be in order to consider an amendment in the nature of a substitute consisting of the text printed in part one of the report of the Committee on Rules accompanying this resolution as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be considered as having been read, and all points of order against the amendments printed in the report are hereby waived. No amendment to said substitute shall be in order except those printed in part two of the report of the Committee on Rules accompanying this resolution. Said amendment shall be considered in the order and manner specified in the report, shall be considered as having been read, shall be debatable for the period specified in the report, equally divided and controlled by the proponent and a Member opposed thereto. Said amendments shall not be subject to amendment except as specified in the report. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order as original text by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with instructions, if offered by Representative Michel of Illinois or his designee, or without instructions. After passage of H.R. 2273, it shall be in order to take from the Speaker's table the bill S. 933 and to consider said bill in the House, and it shall then be in order to move to strike out all after the enacting clause of the Senate bill and to insert in lieu thereof the provisions contained in H.R. 2273 as passed by the House, and all points of order against said motion are hereby waived.

The SPEAKER pro tempore (Mr. THOMAS A. LUKEN). The gentleman from Tennessee [Mr. GORDON] is recognized for 1 hour.

Mr. GORDON. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentlewoman from Illinois [Mrs. MARTIN], and pending that I yield myself such time as I may consume.

Mr. Speaker, House Resolution 394 is a modified open rule providing for consideration of the bill, H.R. 2273, the Americans With Disability Act.

The rule provides for 2 hours of general debate with one-half hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor; one-half hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce; one-half hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works and Transportation; and the final one-half hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary.

Mr. Speaker, all points of order against consideration of the bill are waived. The rule makes in order the amendment in the nature of a substitute now printed in part 1 of the report accompanying this resolution as original text for the purpose of amendment, to be considered as having been read.

All points of order against the substitute are waived.

Mr. Speaker, the rule further provides that no amendment to the bill is in order except the amendments printed in part 2 of the report accompanying this resolution in the order and the manner specified.

Debate time is allocated to each amendment and that time is to be equally divided and controlled by the proponent of the amendment and a Member opposed thereto.

The amendments are not subject to amendment except as specified in the report and all points of order against the amendments in the report are waived.

Mr. Speaker, the following amendments are made in order by the rule:

Mr. CAMPBELL or Mr. LAFALCE for 20 minutes.

Mr. MCCOLLUM for 20 minutes;

Mr. OLIN for 30 minutes;

Mr. HANSEN for 20 minutes;

Mr. CHAPMAN for 30 minutes;

Mr. LIPINSKI for 40 minutes;

Mr. SHUSTER for 40 minutes; and

Mr. SENSENBRENNER for 1 hour.

Finally, Mr. Speaker, the rule provides one motion to recommit with or without instructions, if offered by Representative MICHEL of Illinois, or his designee.

After passage of H.R. 2273, the rule makes it in order to take S. 933 from the Speaker's table and to consider the bill in the House.

The rule then provides for a motion to strike out all after the enacting clause of S. 933 and insert the text of H.R. 2273, as passed the House. All points of order against the motion are waived.

Mr. Speaker, the Americans With Disability Act is a reasonable and responsible bill which will ensure that Americans with disabilities have equal access to jobs, public accommodations, public services, transportation, and telecommunications.

Furthermore, the bill balances the concerns and costs of business and the rights of the disabled.

This critical legislation has enjoyed bipartisan support through every phase of the legislative process.

This bill has 249 cosponsors and passed the Senate with strong bipartisan support by a vote 76 to 8.

Moreover, this bill has passed in the four committees with jurisdiction by a combined vote of 155 to 11.

The rule we have drafted for this bill is very fair providing 2 full hours of debate, equally divided between the committees with jurisdiction.

The rule also provides for four Republican Members to offer amendments and four Democratic Members to offer amendments.

Finally, Mr. Speaker, this bill has been endorsed by the Bush administration and Members of both the Democratic and Republican leadership in the House.

I urge the membership to join me in adopting House Resolution 394 so that we may proceed with consideratoin of this truly historic legislation.

□ 1030

Mrs. MARTIN of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 394 is a modified closed rule providing for

the consideration of H.R. 2273, the Americans with Disabilities Act of 1989. The rule waives all points of order against the bill and against its consideration. As far as I know, the only violation involved is of the 3-day layover rule for reports. Three of the four reports were filed just 2 days ago.

The rule provides for 2 hours of general debate divided equally among the four committees of jurisdiction and their chairmen and ranking minority members. Following general debate, the rule makes in order as original text for amendment purposes the consideration of an amendment in the nature of a substitute printed in part one of the Rules Committee report on this rule, and all points of order are waived against the substitute. Mr. Speaker, the substitute is a bipartisan compromise between the four versions, and is a slight modification of H.R. 4807 introduced by Mr. HOYER.

One of the modifications made by the new substitute is in section 509 relating to congressional inclusion. It applies all the provisions of the disabilities bill to the House and the Senate, and establishes internal rulemaking and enforcement procedures. I will comment further on these congressional inclusion provisions later in my remarks.

Mr. Speaker, the rule makes in order only those amendments printed in the report of the Rules Committee on this resolution, if offered in the order and manner specified. They are not subject to amendment and are debatable according to the debate time prescribed in the report.

Make no mistake about it, Mr. Speaker, this is a very restrictive rule with a capital R. While the authority may euphemistically refer to this as a "modified open" rule, it is in truth a modified closed rule. Only 8 amendments may be offered under the rule even though some 45 amendments were submitted to the Rules Committee by last Monday's 6 p.m. deadline, and we heard from 23 witnesses on Tuesday.

Mr. Speaker, after sitting through all that testimony, I concluded that most of the amendments were sincerely motivated, well-intentioned, and raised important issues that are worthy of debate and a vote by this House. I didn't personally agree with all of the amendments presented; but I don't think that should entitle me to deprive the rest of the House of deciding those issues for itself.

I am always struck by the paradox that this House finds it necessary on important civil rights bills such as this to deny the duly elected Members of this body their basic rights to fully and freely debate, amend and vote on all the important issues raised by such bills. Look at it this way: 427 House Members, each representing over a half a million people, may not offer amendments under this rule.

Mr. Speaker, we are not a newly emerging democracy that cannot be trusted to get our feet wet in a free-wheeling deliberative process. We've been here for 200 years, and used to be far more democratic. Just 12 years ago only 15 percent of our rules were restrictive; today they comprise 45 percent.

Mr. Speaker, what we are talking about here is the simple principle of majority rule. This House is capable of managing this bill and the amendment process in a rational and responsible manner without these artificial constraints being imposed on the process.

Mr. Speaker, yesterday in the Rules Committee I offered an open rule during our committee markup on this rule. Not surprisingly, that motion was defeated on a straight party line vote. Now I have been the first to admit there are times when restrictive rules are appropriate, such as when we have a bipartisan leadership agreement on the rule, or when we are under severe time constraints or emergency situations.

Neither condition applies today. We certainly have not been doing a lot of heavy lifting around here lately. Any delays in getting this bill to the floor have been occasioned by disarray on the other side of the aisle, not on this side. Yesterday, for instance, the House concluded its legislative business around 2 p.m. I just don't buy the argument that somehow we have been pressed for time around this House.

Mr. Speaker, to conclude my summary of this rule, it does permit a motion to recommit with instructions if offered by the Republican leader or his designee. And it does provide for taking the Senate-passed companion bill, S. 933 from the Speaker's table, striking the Senate language, and inserting instead the House-passed language. All points of order are waived against that motion.

Mr. Speaker, despite the procedural constraints of this rule, I think we should at least take heart that the bill it makes in order is the product of a rather remarkable bipartisan achievement by the four committees of jurisdiction. This is evident in the overwhelming, bipartisan majority by which it was reported from each. I want to commend all those on boths sides of the aisle who worked so long and hard to bring us this monumental and landmark legislation to protect Americans with disabilities against discrimination.

Mr. Speaker, this legislation is important because it builds on the prohibitions against such discrimination which we enacted for recipients of Federal funds in the 1973 Rehabilitation Act. This bill extends those protections throughout the private sector in employment, public services and transportation, public accommodations and telecommunications. And the bill and various amendments made in order by this rule take into account the special problems and expenses that will have to be borne by the various entities to which it applies. We should be especially mindful of the practical and economic problems posed to small business as we proceed with this bill.

And yes, Mr. Speaker, the provisions of the bill even cover the Congress where for too long we have exempted ourselves from laws we impose on others. Thomas Jefferson, in his Manual of Parliamentary Practice spoke to this issue when he wrote, and I quote:

> The framers of our Constitution, in their care to provide that the laws shall bind equally on all, and especially that those who make them shall not exempt themselves, from their operation have narrowly limited the privileges of Members of Congress.

Section 509 of this bill makes all of its provisions applicable to Congress, but subject to our own internal rules and enforcement.

Mr. Speaker, I am sure Mr. Jefferson and the framers would be just as opposed to using our rules as a shield against compliance with the laws we pass as they were against granting us broad constitutional privileges. We already have rules against discriminating on the basis of handicap in our Code of Official Conduct and the Fair Employment Practices Resolution. This bill further enforces the use of our new Fair Employment Office with respect to the employment provisions of the disability act, and specifies other means for establishing remedies and procedures for the other aspects of the bill.

I hope we can demonstrate that we are sincere about making those mechanisms work effectively for the benefit of all. If, on the other hand, we use our rules only to circumvent those laws, then we should move to some more formal, external enforcement means such as I have suggested in H.R. 3276, the Congressional and Judicial Equal Employment Opportunity Act of 1989.

In conclusion, Mr. Speaker, I am pleased that we are moving forward with the Americans with Disabilities Act of 1989, even though I am less than delighted with this restrictive rule. I, therefore, urge a "No" vote on the rule so that we might have an open amendment process on this historic piece of legislation.

OPEN VERSUS RESTRICTIVE RULES, 95TH–101ST CONGRESSES

| Congress (years) | Total rules granted [1] | Open rules [2] | | Restrictive rules [3] | |
|---|---|---|---|---|---|
| | | Number | Percent | Number | Percent |
| 95th (1977–78) | 211 | 179 | 85 | 32 | 15 |
| 96th (1979–80) | 214 | 161 | 75 | 53 | 25 |
| 97th (1981–82) | 120 | 90 | 75 | 30 | 25 |
| 98th (1983–84) | 155 | 105 | 68 | 50 | 32 |
| 99th (1985–86) | 115 | 65 | 57 | 50 | 43 |
| 100th (1987–88) | 123 | 66 | 54 | 57 | 46 |
| 101st (1989–90) | 62 | 34 | 55 | 28 | 45 |

[1] Total rules counted are all order of business resolutions reported from the Rules Committee which provide for the *initial* consideration of legislation, except rules on appropriations bills which only waive points of order. Original jurisdiction measures reported as privileged are also not counted.

[2] Open rules are those which permit any member to offer any germane amendment to a measure so long as it is otherwise in compliance with the rules of the House.

[3] Restrictive rules are those which limit the number of amendments which can be offered, and include so-called modified open and modified closed rules, as well as completely closed rules, and rules providing for consideration in the House as opposed to the Committee of the Whole.

Note.—The above data differs slightly from that published in previous Congresses because it is based on a rule-by-rule examination and not just on summary tables from committee surveys for the 95th–99th Congresses as was previously done. Moreover, appropriations rules (which only provide for waivers) and original jurisdiction measures are no longer counted.—Prepared by the Minority Counsel, Subcommittee on the Legislative Process, Committee on Rules.

Code: A completely open amendment process is provided by an open rule (O). Restrictive rules are those which provide for less than a completely open amendment process and include: closed rules (C), modified closed rules (MC), and modified open rules (MO).

□ 1040

Mr. GORDON. Mr. Speaker, I yield myself such time as I may consume.

This is an unusual bill, as the gentlewoman from Illinois [Mrs. MARTIN] has pointed out. It is unusual in, I think, two regards. It is certainly unusual in the substantive sense. This is landmark legislation. It is unusual in the procedural sense, unusual in that we have such a bipartisan agreement on any legislation. Not only is this legislation supported by the President, but also by the leadership of both parties. It has 249 cosponsors, passed overwhelmingly in the Senate. So it is unusual in its bipartisan nature.

It is also unusual in the enormous amount of time and effort that has gone into crafting this legislation. Let me point out just a few things. There have been 11 hearings held in the House on this bill, 7 subcommittees and full committee markups, 6 subcommittees had jurisdiction and considered the bill, 4 full committees had jurisdiction and considered the bill. The Committee on the Judiciary marked the bill up for 2 full days, and the Committee on Public Works and Transportation marked it up for another full day. The Committee on Education and Labor passed this legislation last year by 35 to 0. The Committee on Energy and Commerce passed it by 40 to 3. The Committee on Public Works and Transportation passed this bill by 45 to 5. The Committee on the Judiciary passed the bill by a vote of 32 to 3.

So with all the votes in the subcommittees and committees, this bill has passed by a total of 152 votes, which is an enormous amount of, I believe, consensus on any kind of bill.

To talk about having an open rule on the floor now, after all this kind of earlier scrutiny of the bill, would make a mockery of the whole committee system. That is why through a bipartisan effort there was an effort made to find four amendments offered by Republican, four amendments offered by Democrats, trying to find a wide breadth of amendments, amendments that would not duplicate each other, and also give this body a chance to talk about the serious matters that still face the committee. So I think this is a very good rule. It is a bill that has been given a great amount of scrutiny. I look forward to moving and getting this bill passed into law.

Mrs. MARTIN of Illinois. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, totalitarians operate in interesting ways. They try to do good things for their society, but the tend to use a process that is both brutal and undemocratic.

Now in this case, what we have before Members today, is a totalitarian rule, because what it is attempting to do is bring to the floor a bill which is a good idea. It is good in intent. However, it is using a process which is both undemocratic and, I think truly sad.

Why can we not vote on a number of amendments? There are amendments that should be brought to this floor today that this House should have a chance to act on. Some 35 people went to the Committee on Rules to ask for amendments. We got about seven made in order. Let me talk to Members about one of those amendments.

One of those amendments was from our colleague, the gentleman from New Hampshire [Mr. DOUGLAS]. Mr. DOUGLAS wanted to make certain that the psychological disorder section of the bill did not include the necessity to hire psychopaths in police departments. What he was doing was suggesting that maybe we ought to allow police departments to prescreen people, so they did not give guns and badges to psychopaths, and send them out on the streets. It seems to me that makes eminent good sense. I do not think the American people want Members passing legislation that puts psychopathic killers on the police force, and yet the gentleman from New Hampshire [Mr. DOUGLAS] was denied the opportunity to offer his amendment.

Why can we not have the Douglas amendment out here, vote on it, and decide whether or not this House wants to have that kind of provision added to this bill? My guess is, and once described to the people, this House will decide to do that.

We ought to allow the debate. Under this rule we cannot have a debate. The gentleman from New Hampshire [Mr. DOUGLAS] will not be able to offer the amendment. We will be put in a position on final passage of voting for a bill that could potentially ask police departments to take in psychopathic killers on the street with guns and a badge. We ought to have open debate on this. I hope we have an open rule, and defeat this in order to allow the gentleman from New Hampshire [Mr. DOUGLAS] and others to bring this debate to the floor.

Mr. GORDON. Mr. Speaker, I yield 4 minutes to the gentleman from California [Mr. ANDERSON].

Mr. ANDERSON. Mr. Speaker, I rise in strong support of House Resolution 394, the rule for the consideration of H.R. 2273, the Americans with Disabilities Act. With four committees of jurisdiction involved, the various provisions of the bill have received extensive and lengthy consideration. A tremendous amount of effort has also gone into the coordination of these differing legislative provisions, as reported by the committees. I believe that this rule reflects these best efforts at compromise and fairness and I urge its adoption.

The Americans with Disabilities Act, or ADA, is a far-reaching and important piece of legislation which will permit individuals with disabilities to more fully participate in the mainstream of our society. H.R. 2273 is a good bill in the best tradition of America.

The Committee on Public Works and Transportation reported H.R. 2273 with amendments, almost all of which have been substantially incorporated into the new version of the ADA, H.R. 4807, which this rule makes in order for our consideration today.

The specific provisions of the bill which lie within our committee's jurisdiction are primarily embodied by titles II and III, dealing with publicly and privately provided transportation services. With regard to publicly provided transportation services, the bill requires the purchase of accessible transit vehicles for use on fixed route systems. The bill also requires the provision of paratransit services for those individuals whose disabilities preclude their use of the fixed route system.

With regard to privately provided transportation services, which do not receive the high levels of Federal subsidies that publicly provided services enjoy the requirements of the bill vary according to the size and type of vehicle, as well as according to the type of system on which the vehicle will operate.

Nonetheless, in all cases, this bill provides strong guarantees that individuals with disabilities will be treated with respect and dignity while using transportation services. These provisions must remain strong since a lack of adequate transportation is often cited as one of the greatest barriers to the full and equal enjoyment of life by individuals with disabilities.

Among many others, the rule makes in order two amendments directly related to the transportation provisions of the bill. The first, which failed passage in our committee, would allow the Secretary of Transportation to waive certain of the wheelchair accessibility requirements of the ADA. The second, dealing with commuter rail vehicles, prevailed in committee but was dropped from the combined bill because of a jurisdictional ruling affecing our committee and the Committee on Energy and Commerce. This amendment also waives certain wheelchair accessibility requirements of the bill under certain conditions.

Although I opposed both of these amendments in our committee, I cite them now as examples of the fairness of this rule, which will make in order a vote on each of them. I intend to oppose each of these amendments a second time when they are brought to the floor; nonetheless, I believe that, by allowing these amendments, the rule balances the need to move forward with the ADA with the right of members to be heard on their amendments.

I strongly urge the adoption of the rule.

□ 1050

Mrs. MARTIN of Illinois. Mr. Speaker, I yield 2 minutes to the gentleman from Texas [Mr. DELAY], who has the rather unique, though unfortunate, characteristic of having offered in good faith 11 amendments in the Rules Committee but not having received the courtesy of having even 1 made in order.

Mr. DELAY. Mr. Speaker, I thank the gentlewoman for that comment, because that is so true.

This bill has a laudable goal, but it lacks fairness. We are pitting one group of Americans against another group of Americans when we could bring them both together and create a situation that would make it accommodating for both. But with this bill, without the ability to amend the rule, we are not able to bring fairness into this bill and try to make everyone happy.

To give a couple examples of amendments that were denied, on the question of lack of fairness, a business owner or employer just wants to know how to comply with the bill. Yet in the definition section we do not know who the disabled are, because in the definition section they talk about anyone that has a relationship or an association with one who is disabled. That is all of us. Anyone is disabled. When someone comes in for a job, the business owner does not know whether that person is disabled or not. In that section that is so vague and ambiguous, a business owner does not know what an "undue hardship" is or "reasonable accessibility" is or what "essential functions" are. He wants to know.

Just give us an answer. Put it in the bill. We had amendments to do that, but the proponents of the bill in their testimony testified that we will, let the courts decide.

We are abrogating our responsibility in this body by not legislating and allowing amendments to come to this floor. We do not even allow tax credits. We do not allow an amendment for a tax credit. We are mandating an incredible cost. The proponents say it does not cost much. If it does not cost much, why not give a tax credit?

Senator KENNEDY in the other body said in the Fair Housing Amendments of 1988 that new construction of apartments will only cost $27 a unit. Yet we have found in just 1 short year that the average cost of making those units accessible is $4,000. Yet we will not allow a tax credit.

And this is the ultimate in fairness: We exempt private clubs from this bill. So a country club does not have to comply with the mandates in this bill. Yet we will not exempt the churches of this Nation from this bill. On the one hand, we exempt private country clubs, and then we will not accept an amendment to exempt churches.

Mr. Speaker, I ask the Members to vote against the rule so we can bring back a rule that allows us to bring fairness to this bill.

Mr. GORDON. Mr. Speaker, for purposes of debate only, I yield 5 minutes to the gentleman from Florida [Mr. BENNETT].

Mr. BENNETT. Mr. Speaker, I rise in support of the Americans With Disabilities Act. It is a compassionate and useful tool to bring into the mainstream of life many who otherwise must suffer on the edges or in the shadows of real life. I congratulate all who have helped to shape its terms and to bring it to the floor for enactment.

More than two decades ago, a new Federal building was built in my hometown of Jacksonville, FL. Though it was built on the flat shore of the St. Johns River, the building was designed so that its front door entrance could only be reached by the public climbing 15 steps in the open. I looked up at the 15 steps, looked down at the two canes I have been walking with since contracting polio as a guerrilla fighter in World War II and became distressed by the inaccessibility of the building. From that experience I introduced and helped pass the law which required that, when Federal tax moneys are involved in the construction or alteration of a building, it must be made accessible to people with disabilities. The measure before us now expands that philosophy much further; and we all welcome the benign provisions which it includes.

For instance, this bill extends to disabled Americans the same protections afforded other minorities in the civil rights bill. It protects the disabled from discrimination by any who maintain public accommodations such as hotels and transportation.

Helping the disabled cope with obstacles is not a simple matter. For what may assist some people down a slope in a wheelchair may be an obstacle to someone like myself where steps of reasonable dimensions are a breeze

compared with the constant unlocking of my knees and falling, which slopes induce. And escalators, such a blessing to some disabled, can be a source of terror to others. Falling down an escalator is not something I would recommend to the faint of heart. My good friend, Florida's fine State legislator, George Crady, has recently published a poem on this unique problem. It reads:

THE PERFECT LAW

We knocked the street curbs down, you know,
And passed the perfect law.
The Legislator's dream, come true,
A law without a flaw

For who could now complain against,
The smoothing of a curb.
It passed with only best intents,
No feelings to perturb.

The handicapped in wheelchairs and,
Those crippled with disease.
Could cross from street to sidewalk with
A fundamental ease.

But one Group now has come to mind,
With thoughts that now disturb.
Disabled? Yes. We call them Blind,
Who cannot find the curb.

Some of you may know that I have voted 16,892 times since I have been in Congress and I believe that is an all-time record in Congress, although not as important a record as that of Representative NATCHER who, in his decades of service here, has never missed a vote or a quorum call. My record came about because when I came here fresh from World War II, I walked very hesitantly with two canes, and almost immediately fell and badly broke a leg and missed a bunch of votes. My resolve to put that failure behind me led to my corrective efforts to miss no more votes.

Being disabled has some good things to it. Every day is an adventure. In fact every hour brings a challenge and, meeting the challenge, a victory. That's one thing about being disabled, but how some people respond to help the disabled is downright inspiring. I remember once when I sought new tips for my canes in a cold, windy and wet winter night here in Washington. I found myself caught helpless in the midst of a busy city street. A small, beautifully spirited, elderly black woman came to me, a complete stranger. She grabbed my arm and escorted me across the wet street while waving down the traffic with her umbrella. Once curbside, she slipped away in the dark, but not before I gave her a grateful hug. So experiencing disabilities can bring out the sweetness of human nature in uncommon ways.

Perhaps it is my experience in the great Depression which makes me look at employment as being one of the really great blessings of life. It is also one of the great needs of the disabled. This bill before us will help in that. But more is needed. We need a program to help those who are so unfortunate or so disabled that they really cannot compete for jobs in the ordinary marketplace. I have introduced such a bill, H.R. 2789, to make grants available to States to provide employment opportunities for impaired or deprived individuals. I hope Congress can address this need early in the next Congress, if not before.

As I conclude my remarks, I want to thank you all, on behalf of all disabled people, for your passing this legislation. It is a kindly and thoughtful thing to do. Thank you. Thank you.

Mrs. MARTIN of Illinois. Mr. Speaker, I yield 2 minutes to the gentleman from Florida [Mr. MCCOLLUM].

Mr. MCCOLLUM. Mr. Speaker, I very, very much support legislation for civil rights for those who are disabled and handicapped, but this rule is an abomination.

First of all, this is a very complex bill. It is a bill that has been through four of our major committees of the House, and yet we are only allowing 2 hours of total debate, one-half hour in general debate to each of those committees. That is not nearly enough time for a full discussion of this legislation in the kind of detail we ought to have on this House floor.

In the second place, we have many amendments that were denied by the Rules Committee, amendments that are very valid in the sense that the Members should have been allowed to consider them. And there is no reason, in my judgment, for that, considering the fact that we have not been out here on Fridays or Mondays or hardly any time this year, or even regular days doing business. So there is no reason not to set aside the time necessary for a day or two to consider this bill.

Having a rule that is this narrow is ridiculous, and there is no reason not to provide for these amendments. I have one amendment that has been allowed, and I do not have a complaint about that. Another amendment I would have offered, had I been allowed it—and I think I should have been—is equally important. There is no reason why it should not have been allowed.

□ 1100

There are three different ways under this legislation that somebody can seek relief, a person who is mentally or physically disabled, somebody who is considered to be that, and anybody associated with somebody who is.

I think that is pretty vague and I wanted to offer an amendment to try to define what "association" meant. Very simple. I was not allowed to do it.

I know the gentleman from North Carolina [Mr. LANCASTER] wanted to offer one that would require the disabled to participate in deciding what the public accommodation really was before it got already done by the employer and the expense accomplished. It is something that should have been debated. Maybe it would not have gotten an agreement.

Again, there is no sense in having such a time restraint as there is on this bill, considering the few hours we have worked this year and the few days that we have.

A rule like this is entirely wrong and it ought to be voted down. I urge my colleagues to vote no on the rule, whatever you think about this legislation, and let us have the kind of time we need for this subject, which is probably as important as any that will come before the House this Congress.

Mr. GORDON. Mr. Speaker, I reserve the balance of my time, pending completion of the recess.

Mrs. MARTIN of Illinois. Mr. Speaker, I reserve the balance of my time, pending our return from the recess.

## RECESS

The SPEAKER pro tempore (Mr. MONTGOMERY). Pursuant to the order of the House of Thursday, May 10, 1990, the House will stand in recess subject to the call of the Chair to receive the former Members of Congress.

Accordingly (at 11 o'clock and 1 minute a.m.), the House stood in recess subject to the call of the Chair.

## RECEPTION OF FORMER MEMBERS OF CONGRESS

The Speaker of the House presided.

The SPEAKER. On behalf of the Chair and this Chamber, I consider it a high honor and distinct personal pleasure to have the opportunity of welcoming so many of our former Members and colleagues as may be present here on this occasion.

I think we should all especially greet the distinguished former Speaker of the House, Thomas P. O'Neill, Jr., and the distinguished former Speaker of the House, Jim Wright; but to them and to all our former colleagues, we welcome you and we would like at this time to extend our greetings to you.

The Chair recognizes the Republican leader of the House, the gentleman from Illinois [Mr. MICHEL].

Mr. MICHEL. Thank you, Mr. Speaker.

Mr. Speaker, Mr. Leader and our former colleagues, welcome back to your old home, those of you who obviously who served over in the other body, yes, we are happy to have you back again, too, in our own body here.

It is always a pleasure for me to see my former colleagues, but I think there is another dimension, too, particularly today since we are honoring, or you are honoring my former colleague from Illinois, Mr. Derwinski, who I see attired in his usual array.

Then one maybe brief observation, and that is the Speaker and I during the course of the last several months have been extraordinarily privileged to meet with candidates for the legislature from bodies in the countries of Eastern Europe. Your organization has done a marvelous job in scheduling trips, information-wise, educational-wise, not only for the benefit of your Members, but I think for the good relationship of our country aboard.

The Speaker and I have been privileged to welcome candidates from, oh, Poland, Czechoslovakia, East Germany. As a matter of fact, 2 days ago I had a contingent from Bulgaria who want to represent the minority party, or the opposition party in Bulgaria, in their upcoming elections.

It is very interesting to visit with these individuals, all yearning to learn more about how does our system work. And, of course, for this particular Member, what is the function of the minority? Are they anybody? Of course, it is pretty difficult. I can tell them about it in spades, being in my 34th consecutive year as a Member of the minority party, but it has been kind of a stimulating experience to be a part of what indirectly is happening over there in Eastern Europe.

So again, I applaud you all for coming back and renewing old acquaintances. I hope we can continue to do it.

Those of us who cannot be that far off from joining your ranks always hope that we can build a very cordial relationship for the advent of that particular time, whenever it comes.

Thanks for coming back.

The SPEAKER. The Chair recognizes the distinguished majority leader, the gentleman from Missouri [Mr. GEPHARDT].

Mr. GEPHARDT. Mr. Speaker, Members, and former Members, it is a great honor for me to stand before you today and to welcome you back to the Chamber.

I want to echo and second all of the words of our minority leader, Mr. MICHEL, in welcoming you back and thanking you for all your efforts with us and with other citizens with regard to Eastern Europe and other efforts that have been made through the years.

We enter this week, actually it started last week, but we entered into a very, very important deliberation and enterprise on the reduction of the Federal deficit. As we begin that, we miss you very much. I know that all of you would love to be here for that deliberation. We may need your votes later in the week or later in the month as we begin to vote on hoped-for solutions to the deficit. Some of you may be alarmed at the volume of the numbers. I forget what the deficit was a few years ago, but indeed it has increased; but all of you have been helpful in many ways.

As I look around the room I see people who have been involved in many of our efforts on specific subjects. We have had commissions on the deficit. Some of you have been involved in that and have been extremely helpful.

A former Member, Mr. Bolling, is sitting over here. He has come back in the last few days and given us some help that we needed on that and other subjects. So for that we are deeply grateful.

For many of you, you may have left us physically, but some of you are helping us day by day and we are deeply appreciative of it. These problems are bigger than all of us put together.

I am constantly impressed, as I am sure you were when you were here, that we serve on a committee of 535 that is trying together to lead the Nation, along with the President and the other members of the executive branch. It is a daunting task. It is a task that most countries have never taken.

Winston Churchill said it right when he said, "Democracy is the worst form of government on the face of the earth, except for all the others."

Our forefathers and mothers were jealous of power. We did not want it put in any one place, and we succeeded beyond our wildest dreams in making sure it was dispersed. That gives us a special responsibility, and as we meet that responsibility we cannot do it just alone. We need your help, your continued good wishes and your continued work.

□ 1110

So in these difficult days ahead, we are going to be calling on many of you to help us find our way through probably the toughest challenges that our country has ever faced.

Thank you, and God bless all of you.

The SPEAKER. At this time the Chair would like to invite the incoming chairman of the Former Members Association and the distinguished former Republican leader of the House, John Rhodes of Arizona, to assume the chair.

Mr. RHODES (presiding). Mr. Speaker, my former colleagues, sitting Members of the House, it is a great honor for me to be in this position. As Tip O'Neill used to say, I had my eye on this chair for some time, and then he would add, and that is all you are going to get on this chair as long as I have anything to say about it.

But the experience which we have all had in this Chamber and across the building is an experience that none of us will ever forget, and it is indeed a wonderful thing that we can come back and reminisce and maybe lie to each other a little bit, and live the good days which we spent in this milieu.

The Chair directs the Clerk to call the roll of Members of Congress.

The Clerk called the roll of former Members of Congress, and the following Members answered to their names:

ROLLCALL OF FORMER MEMBERS OF CONGRESS ATTENDING ANNUAL SPRING MEETING, MAY 17, 1990

T. Dale Alford of Arkansas;
William H. Ayres of Ohio;
Robert E. Badham of California;
John A. Blatnik of Minnesota;
Richard Bolling of Missouri;
David R. Bowen of Mississippi;
Donald G. Brotzman of Colorado;
Clarence J. Brown of Ohio;
Garry E. Brown of Michigan;
John H. Buchanan, Jr. of Alabama;
Elford A. Cederberg of Michigan;
Charles E. Chamberlain of Michigan;
Jeffrey Cohelan of California;
Albert M. Cole of Kansas;
David L. Cornwell of Indiana;
James K. Coyne of Pennsylvania;
Paul W. Cronin of Massachusetts;
Edward J. Derwinski of Illinois;
Michael A. Feighan of Ohio;
John R. Foley of Maryland;
Nick Galifianakis of North Carolina;
Robert N. Giaimo of Connecticut;
William J. Green of Louisiana;
Gilbert Gude of Maryland;
James M. Hanley of New York;
Robert P. Hanrahan of Illinois;
Wm. D. Hathaway of Maine;
Jeffrey P. Hillelson of Missouri;
A. Oakley Hunter of California;
Jed Johnson, Jr. of Oklahoma;
Walter H. Judd of Minnesota;
Hastings Keith of Massachusetts;
David S. King of Utah;
Horace R. Kornegay of North Carolina;
Kenneth B. Kramer of Colorado;
Peter N. Kyros of Maine;
Paul N. McCloskey, Jr. of California;
John Y. McCollister of Nebraska;
Clark MacGregor of Minnesota;
Andrew Maguire of New Jersey;
John O. Marsh, Jr. of Virginia;
George Meader of Michigan;
Lloyd Meeds of Washington;
D. Bailey Merrill of Indiana;
Abner J. Mikva of Illinois;
John S. Monagan of Connecticut;
Frank E. Moss of Utah;
Thomas P. O'Neill, Jr. of Massachusetts;
Howard W. Pollock of Alaska;
Richardson Preyer of North Carolina;
Robert D. Price of Texas;
James M. Quigley of Pennsylvania;
Thomas Railsback of Illinois;
John J. Rhodes of Arizona;
John H. Rousselot of California;
Harold M. Ryan of Michigan;
Ronald A. Sarasin of Connecticut;
Harold S. Sawyer of Michigan;
Fred D. Schwengel of Iowa;
Garner E. Shriver of Kansas;

Carlton R. Sickles of Maryland;
Alfred D. Sieminski of New Jersey;
Henry P. Smith III of New York;
Robert T. Stafford of Vermont;
James W. Symington of Missouri;
John H. Terry of New York;
Andrew Jackson Transue of Michigan;
Charles A. Vanik of Ohio;
Charles W. Whalen, Jr. of Ohio;
Larry Winn, Jr. of Kansas;
Lester L. Wolff of New York;
James C. Wright, Jr. of Texas; and
Leo C. Zeferetti of New York.

Mr. RHODES (presiding). The Chair announces that 71 former Members of Congress have responded to their names.

The Chair now recognizes the distinguished president of the Association of Former Members of Congress, Judge Abner J. Mikva, for whatever purpose he chooses to address us and to yield to those who asked to be yielded to.

Mr. MIKVA. Mr. Speaker, the generation of men and women sitting in the Chamber this morning either have done something very right or something very wrong. I say that because we clearly have been destined to live in parlous times. Most of us have participated in or at least witnessed a war that changed the shape of the world in every which way. We are now seeing a spate of revolutions in Eastern Europe, some velvet, some bloody, some still in process, which are still again changing the geopolitical shape of the turf. The map of Eastern Europe may well resemble the shape it was in just before World War I, if all the ethnicians have their way. It may have political subdivisions that even the late Philip Burton could not have conjured. Whatever the final outcome, the ferment is real, very exciting, and very fraught with hope and danger.

Last year I commented on the difference between the way Congress is perceived at home and the way it is perceived abroad. That fact has been driven home this past year as the Eastern European politicians have descended on Washington for help in establishing a free market in politics. While they are interested in all our institutions, they are most interested in the Congress. How do we develop such an institution, they ask, an institution that can tell a President to go jump in the lake, an institution that can provide a talking forum for all the different points of view present in our huge and diverse country. Our visitors envy the staff, the equipment, the access that Members of Congress have to agencies and Cabinet officials and the executive branch generally. It is not easy to replicate the 200-plus glorious years that the Congress has functioned as an institution of the people. Even more difficult than explaining to our European visitors how the Congress works is trying to explain to our own citizens that it does work.

Toward that end, the Association last year continued and expanded its Campus Fellows Program. Since its inception, 224 visits have been made by 68 former Members of Congress to 158 campuses in 49 States. The programs have been warmly received and have given a substantial number of our college students an opportunity to hear about the real Congress and talk with one of the people who has been there.

We are now in the process of beginning to enlarge the concept. This past year, we have started a pilot project to send former Members to high schools on a program similar to the Campus Fellows. I am delighted to report that in the first week of May, our colleague John Anderson of Illinois had an immensely successful visit to a high school in Ohio. The school principal reported that the day after John left, all of the social studies teachers came into his office and were so excited about John's visit that they wanted to make certain visits by other former Members of Congress would be scheduled. John's reaction to the visit was equally positive; he said it "was wonderful and that high school students were not only ready for visits from former Members of Congress, but presented a challenge and an opportunity that should not be missed."

We're aware that many young Americans don't vote and all too few of them become personally active in the political process. Now we have an opportunity to change things. We know the political process—we have lived it. We now can go and meet with young Americans and personally demonstrate that for our democratic system, which is unique in this world, to succeed, requires that they participate. So, we hope to expand the program in this coming year and you can expect to hear more about it.

□ 1120

Mr. Speaker, I ask at this time permission to insert in the RECORD the list of fellows and institutions who have participated in the Campus Fellows Program.

Mr. RHODES (presiding). Without objection, so ordered.

The list referred to follows:

COLLEGES, UNIVERSITIES AND HIGH SCHOOL VISITED UNDER THE CAMPUS FELLOWS PROGRAM

COLLEGE/UNIVERSITY/HIGH SCHOOL, LOCATION, AND FELLOW

Alaska Pacific University, Alaska, William S. Mailliard (California).
Albion College, Michigan, David S. King (Utah).
Albion College, Michigan, Ted Kupferman (New York).
Albion College, Michigan, Martha Keys (Kansas).
Alfred University, New York, Frank E. Moss (Utah).
American College in Paris, France, David S. King (Utah).
American College in Paris, France, Byron L. Johnson (Colorado).
Arizona State University, Arizona, Gale W. McGee (Wyoming).
Arizona State University, Arizona,[1] Jacques Soustelle (France).
Assumption College, Massachusetts, Gale W. McGee (Wyoming).
Auburn University, Alabama, William L. Hungate (Missouri).
Auburn University,[1] Alabama, Alan Lee Williams (United Kingdom).
Avila College,[1] Kansas, Karin Hafstad (Norway).
Bainbridge Jr. College, Georgia, Gilbert Gude (Maryland).
Baylor University, Texas, James Roosevelt, (California).
Baylor University,[1] Texas, Peter von der Heydt (Germany).
Bowling Green State U., Ohio, Robert P. Hanrahan (Illinois).
Bradley University, Illinois, Charles W. Whalen, Jr. (Ohio).
Brandeis University, Massachusetts, Abner J. Mikva (Illinois).
Brandeis University, Massachusetts, L. Richardson Preyer (North Carolina).
Brenau College, Georgia, Ralph W. Yarborouth (Texas).
Brigham Young University,[1] Utah, Jaques Soustelle (France).
California Poly. State, San Luis Obispo, California, John B. Anderson (Illinois).
California Poly. State, San Luis Obispo, California, Frank E. Evans (Colorado).
California Poly. State, San Luis Obbispo, California, Robert N. Giaimo (Connecticut).
California Poly. State, San Luis Obispo, California, John R. Schmidhauser (Iowa).
California Poly. State, San Luis Obispo, California, Ralph W. Yarborough (Texas).
California Poly. State, Pomona, California, Robert R. Barry (New York).
Cameron University, Oklahoma, William D. Hathaway (Maine).
Cameron University, Oklahoma, William L. Hungate (Missouri).
Cameron University, Oklahoma, Dick Clark (Iowa).
Carleton College, Minnesota, William S. Mailliard (California).
Carroll College, Montana, Ralph W. Yarborough (Texas).
Chaminade College, Hawaii, Catherine May Bedell (Washington).
Chatham College, Pennsylvania, Catherine May Bedell (Washington).
Chatham College, Pennsylvania, Martha Keys (Kansas).
Charleston College,[1] South Carolina, John M. Reid (Canada).
Clarke College, Georgia, William L. Hungate (Missouri).
Clarke College, Georgia, William S. Mailliard (California).
Colgate University, New York, William S. Mailliard (California).
College of Sequoias, California, Gale W. McGee (Wyoming).
Colorado State University,[1] Colorado, Alastair Gillespie (Canada).
Columbia College, South Carolina, Catherine May Bedell (Washington).
Columbia College, South Carolina, Martha Keys (Kansas).
Columbia College, South Carolina, James M. Quigley (Pennsylvania).
Columbia College,[1] South Carolina, John M. Reid (Canada).
Columbia College, South Carolina, Henry S. Reuss (Wisconsin).
Columbia College, South Carolina, Nick Galifianakis (North Carolina).
Concordia College, Michigan, Walter H. Moeller (Ohio).

Connecticut College, Connecticut, Ralph W. Yarborough (Texas).
Converse College, South Carolina, Jed Johnson, Jr. (Oklahoma).
Dartmouth College, New Hampshire, John O. Marsh, Jr. (Virginia).
Dartmouth College, New Hampshire, William S. Mailliard (California).
Davis & Elkins College, West Virginia, Frank E. Moss (Utah).
Davis & Elkins College, West Virginia, J. Glenn Beall, Jr. (Maryland).
Denison University, Ohio, Frank E. Moss (Utah).
DePauw University, Indiana, Hugh Scott (Pennsylvania).
Dillard University,[1] Louisiana, Georg Kahn-Ackermann (Germany).
Doshisha University, Japan, Catherine May Bedell (Washington).
Duke University,[1] North Carolina, Georg Kahn-Ackermann (Germany).
Eckerd College, Florida, William L. Hungate (Missouri).
Elmira College, New York, Charles W. Whalen, Jr. (Ohio).
Friends University, Kansas, Henry P. Smith, III (New York).
Furman University, South Carolina, Jed Johnson, Jr. (Oklahoma).
Furman University, South Carolina, Charles W. Whalen, Jr. (Ohio).
Georgetown University, Washington, DC, Celio Borgja (Brazil).
Grinnell College, Iowa, Neil Staebler (Michigan).
Guilfford College, North Carolina, Gale W. McGee (Wyoming).
Gustavus Adolphus College, Minnesota, Charles W. Whalen, Jr. (Ohio).
Hamilton College, New York, William S. Mailliard (California).
Hartwick College, New York, Ralph W. Yarborough (Texas).
Hiram College, Ohio, Howard H. Callaway (Georgia).
Hiram College, Ohio, Roman L. Hruska (Nebraska).
Hope College, Michigan, Walter H. Judd (Minnesota).
Hope College, Michigan, Gale W. McGee (Wyoming).
Hope College, Michigan, Catherine May Bedell (Washington).
Idaho State University, Idaho, John R. Schmidhauser (Iowa).
Indiana State University, Indiana, Gordon L. Allot (Colorado).
Indiana Univ. Northwest, Indiana, Neil Staebler (Michigan).
Indiana Univ. Northwest, Indiana, William L. Hungate (Missouri).
Indiana Univ. Northwest, Indiana, Tom Railsback (Illinois).
Jackson State University, Mississippi, Allard K. Lowenstein (New York).
Johns Hopkins University, Maryland, Hugh Scott (Pennsylvania).
Johns Hopkins University, Washington, DC, Cello Borja (Brazil).
Kansai University, Japan, Frank E. Moss (Utah).
Kansas-Newman College, Kansas, Henry P. Smith, III (New York).
Kansas State University, Kansas, Paul N. McCloskey, Jr. (California).
Keio University, Japan, Frank E. Moss (Utah).
King College, Tennessee, Charles W. Whalen, Jr. (Ohio).
King's College, Pennsylvania, Philip Hayes (Indiana).
Kirkland College, New York, William S. Mailliard (California).
Kwansei Gakuin University, Japan, Frank E. Moss (Utah).
LaGrange College, Georgia, Ralph W. Yarborough (Texas).
Lake Forest College, Illinois, Ralph W. Yarborough (Texas).
Lindenwood College, Missouri, Gaylord Nelson (Wisconsin).
Longwood College, Virginia, Paul W. Cronin (Massachusetts).
Luther College, Iowa, Gilbert Gude (Maryland).
McNeese University, Louisiana, William S. Mailliard (California).
Marshall University, West Virginia, John J. Gilligan (Ohio).
Mary Hardin Baylor College, Texas, Brooks Hays (Arkansas).
Matanuska-Susitna Community College, Alaska, William L. Hungate (Missouri).
Mesa Community College, Arizona, Gale W. McGee (Wyoming).
Miami University-Middletown, Ohio, James Roosevelt (California).
Miami University-Middletown, Ohio, James W. Symington (Missouri).
Mid-America Nazarene Coll., Kansas, John B. Anderson (Illinois).
Mid-America Nazarene Coll., Kansas, John Dellenback (Oregon).
Millsaps College, Mississippi, Allard K. Lowenstein (New York).
Montclair State College, New Jersey, Walter H. Judd (Minnesota).
Montclair State College, New Jersey, Ralph W. Yarborough (Texas).
Morehead State University, Kentucky, Dan Kuykendall (Tennessee)
Morehead College, Georgia, William S. Mailliard (California).
Morehead College, Georgia, William L. Hungate (Missouri).
Morris Brown College, Georgia, William S. Mailliard (California).
Morris Brown College, Georgia, William L. Hungate (Missouri).
Mount Vernon College, Washington, DC, Martha Keys (Kansas).
Murray State University, Kentucky, Brooks Hays (Arkansas).
Nanzan University, Japan, Catherine May Bedell (Washington).
New York University, New York, George McGovern (South Dakota).
Northern Illinois University, Illinois, William L. Hungate (Missouri).
Northern Kentucky University, Kentucky, Martha Keys (Kansas).
North Park College,[1] Illinois, Karin Hafstad (Norway).
Northwestern University,[1] Illinois, Karin Hafstad (Norway).
Oklahoma State University, Oklahoma, Ralph W. Yarborough (Texas).
Oregon State University, Oregon, Martha Keys (Kansas).

Whitman College, Washington, Frank E. Moss (Utah).
William & Mary College, Virginia, Hugh Scott (Pennsylvania).
Wofford College, South Carolina, Jed Johnson, Jr. (Oklahoma).
225 visits—68 Fellows.

[1] International project funded by the Ford and Rockefeller Foundations for visit of Parliamentarians from the United Kingdom, Germany, France, Canada, Brazil and Norway.

Mr. MIKVA. Mr. Speaker, our Congressional Fellows Program, in which we bring staff members of the Japanese Diet to Washington for 60-day fellowships, continued successfully this year. Mr. Kazuhiko Matsui from the House of Councillors and Ms. Suzuyo Kojima from the House of Representatives visited Washington from September 18 to November 16, 1989, and had excellent experiences in offices of several Senators and Representatives and meetings with staff of congressional support service offices. After the two fellows returned to Japan, we received letters from the Secretary Generals of the House of Councillors and the House of Representatives praising the program and strongly requesting that it be continued. This project has been funded by the Japan-United States Friendship Commission.

In the spring of 1989, the United States Ambassador to Hungary, Mark Palmer, suggested that the Association become involved in Hungary to assist the emerging democratic movement. In November 1989, the Association sponsored the visit of a delegation of representatives of Hungarian democratic opposition groups to observe the Virginia gubernatorial and the New York City mayoral elections. The delegation's visit was arranged at the suggestion of Dr. Bela Kiraly, the general who led the Hungarian Revolution in 1956, and was funded jointly by the Soros Foundation and the United States Information Agency. A Capitol Hill program was arranged to inform the delegation about the legislative process and included indepth meetings with several Members of Congress.

At the invitation of the United States Embassy in Budapest, a delegation of former Members of Congress went to Hungary in March as observers of the first democratic parliamentary elections in more than 40 years. We are in the process of developing a program to bring parliamentarians from Hungary, Czechoslovakia, and Poland to the United States as part of a Democracy Institute to help the emerging democratic parliaments of Eastern Europe.

In 1984, the Association began a project to host distinguished international visitors at the Capitol under a grant from the Ford Foundation. This pilot project has proved to be extremely valuable and to date the Association has arranged more than 200 events at the Capitol for distinguished visitors from 79 separate countries.

Mr. Speaker, all these programs cost money and at this point I want to insert in the RECORD the list of our donors who make our programs possible.

Mr. RHODES. Without objection, it is so ordered.

The list referred to follows:

SPONSORS OF THE U.S. ASSOCIATION OF FORMER MEMBERS OF CONGRESS, MAY 17, 1990

PATRONS [1]

1. Ford Foundation.
2. German Marshall Fund of the United States.
3. Japan-U.S. Friendship Commission.
4. U.S. Information Agency.

BENEFACTORS [2]

5. National Endowment for the Humanities.
6. Rockefeller Foundation.
7. United Parcel Service Foundation.

DONORS [3]

8. Anonymous Individual.
9. Charles Stewart Mott Foundation.
10. John Crain Kunkel Foundation.
11. Lilly Endowment, Inc.

FRIENDS [4]

12. Anonymous Foundation.
13. Anonymous Individual.
14. Claude Worthington Benedum Foundation.
15. Howard H. Callaway Foundation.
16. Carnegie Corporation of New York.
17. Carnegie Corporation of New York—Aging Project.

[5] Supporters have contributed between $5,000 and $10,000.
[6] Sponsors have contributed between $1,000 and $5,000.

Mr. MIKVA. Mr. Speaker, this not only marks the 20th anniversary of the U.S. Association of Former Members of Congress but also the 10th anniversary of the founding of the association's program of exchanges between the United States Congress and the German Bundestag to promote German-American friendship and cooperation. A strong cooperative relationship has been developed between our association and the Association of Former Members of the Bundestag, and we are delighted that two members of our counterpart organization in Germany are here to join us in these celebrations. We are also delighted to welcome representatives from the Association of Former Members of Parliament of Australia and the Association of Former Members of the Parliament of Canada.

I would like at this time to acknowledge the presence of: Hon. David Daubney, former member of the Canadian Parliament; Hon. Rembert von Delden, former member of the German Bundestag; Hon. Uwe Looft, former member of the German Bundestag; Honorable and Mrs. David Vigor, former member of the Australian Parliament. (Applause.)

The sad part of this occasion is our duty to recollect the names of our deceased colleagues who have passed away since our report last spring.

LIST OF DECEASED MEMBERS

Hugh Q. Alexander of North Carolina;
Joseph S. Clark of Pennsylvania;
James M. Collins of Texas;
